The International Coal and Coke Co., Ltd., with collieries at Coleman, Alberta, is preparing to transfer its charter from the state of Washington to the Dominion of Canada in order to avoid double taxation. In addition to the Canadian taxes the company has for some time past been paying taxes in the United States amounting to between $1,200 and $1,500 per month.

The Hon. F. B. Carvell, speaking before the Trades and Labor Council in Kingston on February 15th, expressed the opinion that the government should discontinue the fixation of wheat prices, and that wheat should be thrown in the open market. Farmers, he said, had made tremendous profits during the war and should be satisfied with a price of $1.25 or $1.50 instead of the present fixed price of $2.25.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Acadia Sugar Refining Co.—The report of the directors of the company shows that net trading profit for the year was $489,818, from which $167,951 was deducted interest on [illegible], and $7,300 for directors' remuneration, leaving a net profit for the year of $314,567. The balance at debit of profit and loss last year was $536,151, which is now reduced to $221,584. Under the heading, loans, is an item of $1,193,043 against bonds of the company, and $1,172,621 from bank (current). The property and assets, which stand at $5,193,463, include stock of sugar on hand $668,172 and sundries $257,0[illegible]4. Trade debts due the company are $162,496.

Hillcrest Collieries, Ltd.—Net profits amounting to $110,095, an increase of $29,714, or 37 per cent., is shown in the annual statement of the company. After fixed charges the net was equal to 10.96 per cent. on the common stock outstanding, and 6.02 per cent. after payments on preferred dividends; $15,000 was placed to contingent reserve, leaving a surplus of $25,238, against $10,562 the previous year, the total surplus at present being $206,496, equal to $20.65 for each common share. The principal changes in the balance sheet are bank loans of $56,007, against none the previous year, a decrease of $12,000 to $12,995 in accounts payable. Cash, which was given as $71,539 the previous year, is placed at $98 the past year. Total assets at $2,646,009, compare with $2,534,543 the previous year.

Kaministiquia Power Co.—The company reported revenue from power for the month of January of $35,639, and with miscellaneous earnings, the total was $37,074, an increase of $2,613 over January a year ago. Operating expenses amounted to $5,131, and maintenance to $1,547, which, with fixed charges of $8,010, left a surplus of $22,334. For the three months and with January the gross revenue from power was $111,818 and net after operating expenses and maintenance $96,918, as against $93,492. After fixed charges amounting to $24,031, the surplus for the quarter was $72,886, as against $69,460. If the quarter's earnings are maintained the year's surplus of $291,540 would be equal to 13.2 per cent. on the common stock. The balance sheet shows property at $4,611,304, as against fixed liabilities of $1,940,000. Working capital is about $89,000.

Howard-Smith Paper Mills, Ltd.—Net profits of the company for the year ending with December, 1918, were $252,604, which, added to sundry revenue of $824, and revenue from investments of $3,812, made a total revenue of $257,241, against $204,263 in 1917 and $159,436 in 1916. After deducting $17,730 for bond interest, $71,243 for depreciation, $17,716 for taxes, and $4,760 for sinking fund, the balance of $145,792 left for dividends was equal to 13.7 against 11.7 per cent. the previous year. The balance left for profit and loss account was $92,292, against $81,623 in 1917, bringing the total to credit of that account to $205,765. The assets of the company amount to $2,631,666, including cash, investments and accounts receivable of $242,983, while plant and equipment are placed at $1,783,954. On the liability side of the account are bank loan and accounts and bills payable amounting to $408,525. In 1918 the sales of the company amounted to $1,377,144, against $1,122,215, an increase of $254,928.

McKinley-Darragh-Savage Co.—The report of the company for the year 1918 shows a surplus of $281,196.86, as compared with a surplus of $242,514.35 at the end of 1917. Current assets at the end of 1918 amount to $454,615.28, as compared with $398,660.29 at the end of 1917, while capital assets are shown as $2,227,606.78, as against $2,210,809.37 at the end of the previous year. The company has $234,772.45 in cash, as compared with $191,143.28 at the end of 1917.

The net value of the ore produced was $815,902.66, and the cost of production, including depreciation, was $473,735.37, leaving a gross profit of $342,167.29, and after deducting administration expenses, taxes, etc., the net profit on operations was $295,662.38, as compared with $255,149.68 in 1917. Interest and exchange received in 1918 brought the total net profits to $308,718.63, as compared with $259,794.87 in 1917. Quarterly dividends at the rate of 12 per cent. per annum were authorized, making a total of $269,723.04.

Montreal Cottons, Ltd.—Gross profits of the company show a substantial increase over those for the previous year, the increase being particularly gratifying, as, according to the president's statement, during the first four months the works of the company were practically idle, owing to the destruction of the power plant by fire in December, 1917, greatly reducing the production at the time of great demand.

Manufacturing profits amounted to $703,095, against $492,720 in 1917, and with the addition of rents and farm lands, etc., amounted to $720,649, against $496,607 in 1917. Fixed charges decreased slightly to $39,428, leaving a balance of $681,221, against $454,175 in 1917, and $446,782 in 1916. Last year the company did not include war tax in its profit and loss statement, against $35,000 included the previous year. Instead they were lumped in the figures for general repairs and other operating expenses in the "manufacturing account." The balance available for dividends amounted to $681,221, or equal to 23.1 per cent. on the common stock, against $419,175 in 1917, or equal to 15.4 per cent. After dividends of $330,000, the surplus amounted to $351,221, against $89,175 last year. Cloth sales for the year were $5,917,519 and cloth and in process amounted to $707,380, which, added to cloth and in process on December 31, 1917, made a total of $5,779,341. Against this purchases of raw cotton, wages, etc., amounted to $3,898,860; repairs, fuel, taxes, insurance, etc., to $975,070. This, added to $122,500 for depreciation, left gross profits at $703,095.

Canada Steamship Lines, Ltd.—At the annual meeting of the company, Mr. J. W. Norcross, the recently elected president, pointed out that there were several features in it which reflected the improved financial position of the company, and must of necessity give a measure of confidence during the readjustment period. He said in part:—

"Perhaps of special interest is the fact that the working capital has been increased to approximately $2,800,000. This has been effected by an increase in the current and working assets to $5,438,926, against $4,056,000, while the current liabilities have been reduced to approximately $3,600,000, against $3,800,000 a year ago. The company goes into the new year with a total surplus slightly in excess of $5,000,000, an increase of over $2,500,000, as compared with the previous year. Regarding the general operations of the company it may be pointed out that the company's poorest business during the season of 1918 was practically at a standstill. This was due to the peculiar conditions arising out of the war, and on this account the company did not break even on this branch of its service. On the other hand, owing to increased efficiency in operations, the earnings of our large inland freight lake fleet were considerably increased. In addition, our ocean fleet did not suffer as much as might have been expected from a reduction of rates, as the company had been able to make charters for its vessels covering long periods. Our operating costs, however, increased materially."

Mr. Norcross added that the ocean line service had been maintained, and the company's activities extended, while plans were under way for further extension of Atlantic ocean service. Physical assets have been maintained at a high standard. Respecting the future, conditions since the cessation of hostilities are so unsettled that it is difficult to predict, but the company is in an excellent position to handle all the business offering, and there is reason to look for an important general tourist traffic hereafter.

THE KEYSTONE OF THE ARCH

Nothing known in building is stronger than the arch The symbol of the Mutual Principle in Life Insurance. The centre of the arch is the keystone—and "The Keystone of a Life Insurance Organization," says W. O. Chapman, "is management." The three leading constituents in good management are INTEGRITY, ECONOMY and EFFICIENCY It is well known that the secret of the extraordinary success of the Mutual Life of Canada has been the rigid adherence of managers and directors through fifty years of history to these essential things. It is due to these that in spite of more than four years of devastating war, followed by a blighting pestilence, with the immense losses entailed, yet the strength of the Mutual Life of Canada is unshaken. The keystone ensures the solidity of the organization, and there is no other better qualified to defy the tooth of time than—

The Mutual Life Assurance Co. of Canada
Waterloo Ontario

USE FORESIGHT

The time to prepare for a rainy day is when the weather is fine.

That is a truism. Yet many a person that would never for a moment dispute so obvious a piece of common-sense forgets that the time to prepare for a financial "rainy day" is NOW, and that the way to do so is by means of Life Insurance To the great majority Insurance offers the only way within their reach of taking care of the future—not only the future of dependent ones but their own as well

The Great West Policies provide such Insurance on exceedingly attractive terms. Premium rates are low and profit returns are remarkable. Personal rates and full explanations will be gladly given on request. State age

FEBRUARY FIRE LOSSES

Decrease in Total for the Month—More Fatalities

The Monetary Times' estimate of Canada's fire losses during February, 1919, is $1,091,834, compared with $3,915,290 in January, 1919, and $2,243,762 for February, 1918. This reduction will be welcome to all fire insurance companies, for which the month has been a comparatively satisfactory one. The following is the estimate of the February losses:—

Fires exceeding $10,000	$ 695,000
Small fires reported	180,595
Estimate of unreported fires	216,239
Total	$1,091,834

The Monetary Times' record of the past three years and this year to date shows the following monthly losses:—

Month.	1916.	1917.	1918.	1919.
January	$ 1,649,217	$ 1,918,660	$ 2,688,556	$ 3,915,290
February	3,275,600	2,009,953	2,243,762	1,091,834
March	1,406,501	2,050,650	1,682,286	....
April	1,460,437	1,317,714	3,240,187	.
May	1,850,205	1,163,110	3,570,014	. . . .
June	494,557	1,184,627	3,080,982	.
July	3,039,634	1,101,734	3,369,684	.
August	1,057,109	1,230,183	3,110,445	. .
September	981,703	1,301,700	917,286	.
October	1,077,815	704,605	5,119,145	.
November	923,235	959,049	1,059,580	.
December	3,271,496	5,144,100	1,733,917	. . . .
Totals	$20,487,509	$20,086,085	$31,815,844	$ 5,007,124

The following is a list of fires in February at which the loss was $10,000 and over:—

Toronto, Ont., February 1, waste mills of J. M. Lawlor, $10,000.

Ville St. Piere, Que., February 1, factory of the Lumber and Construction Company, $40,000.

Halifax, N.S., February 4, dry goods store of Y. Kennedy, $50,000.

Montreal, Que., February 2, premises of the Yale Bedding Company, $40,000.

Halifax, N.S., February 4, three dwelling houses, $15,000

Beaverton, Ont., February 10, varnishing plant of the Beaver Company, Limited, $10,000.

North Bay, Ont., February 19, building of Rutherglen Milling and Mining Company, $15,000.

St. John, N.B., February 12, the court house, $10,000.

Quebec, Que., February 24, Mechanics' Supply Company's stores, $150,000.

Sherbrooke, Que., February 25, J. M. Nault's dry goods store, $30,000.

Sillery, Que., February 18, dwelling of A. Laurent, $39,[illegible]00.

St. John, N.B., February 21, warehouse of the Nashwaak Pulp and Paper Company, $30,000.

Sydney, N.S., February 21, the McKenna Garage, $40,000

Thorold, Ont., February 23, plant of the Thorold Basket Company, $20,000.

Winnipeg, Man., February 26, the Broadway Drill Hall, $15,000

Beaverdale, Que., February 10, premises of the Beaver Company, Limited, $15,000.

Shawinigan Falls, Que., February 26, business block, $150,000.

Mitchellton, Sask., February 28, post office and general store, $16,000.

Among the structures damaged or destroyed last month were:—Stores, 4; fish houses, 2; waste mill, 1; factory, 1; residences, 17; school, 1; plants, 6; business buildings, 4; tenements, 2, barns, 4; courthouse, 1; laundry, 1; market place, 1: warehouse, 1; garage, 1; drill hall, 1; business block, 1; post office, 1: residential section, 1.

Among the causes reported last month were:—Explosion of coal tar, 1; overheated chimney, 1; overheated furnace, 1; defective furnace, 1; overheating oil, 1; explosion of boiler, 1; explosion of lamp, 1; hot ashes, 1; overheated stove pipes, 1; overheated heater, 1.

The following is a list of fires at which fatalities occurred last month:—

Rosalind, Alta., February 1	Trapped in burning house.	1
Welland, Ont., February 6	Trapped in burning house.	1
Sudbury, Ont., February 9	Trapped in burning house.	4
Halifax, N.S., February 10	Suffocated in burning house.	3
Fredericton, N.B., February 13	Clothing caught fire	1
Windsor, Ont., February 15	Trapped in burning house.	1
Winnipeg, Man., February 17	No particulars given	1
Cobalt, Ont., February 18	Scalded from burning water	1
Gilbert Plains, Man., February 7	Burning gasoline	1
Montreal, Que., February 21	Trapped in burning hotel.	8
Toronto, Ont., February 22	Clothing caught fire	1
Portage la Prairie, Man., February 25	Burning gasoline	1
Total		26

The following table, compiled by *The Monetary Times*, shows deaths caused by fire during the past seven years and this year to date:—

Month.	1912.	1913.	1914.	1915.	1916.	1917.	1918.	1919.
January	27	14	26	3	10	21	28	13
February	11	21	18	11	23	19	87	26

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Alberton, P.E.I.—March 2—Business section of town was destroyed. Both sides of Main St. were ruined. Estimated loss, $100,000.

Anyox, B.C.—March 2—Plant of the Granby Consolidated Ore Co. was damaged. Estimated loss to ore bins, tracks and smelters of $50,000.

Ingersoll, Ont.—February 28—Barn on the farm of F. Minshall was destroyed after being struck by lightning. The loss is covered by insurance.

Mitchellton, Sask.—February 28—The post-office, a general store and premises occupied by the Security Lumber Co. were damaged. Estimated loss, $16,000.

Ottawa, Ont.—February 28—Three houses on Creighton Street were damaged. House of A. Brisvois, 33 Creighton Street, was badly burned. Estimated loss, $2,000.

Toronto, Ont.—February 28—The Wigwam restaurant, on the west bank of the Humber River, was destroyed. The loss is covered by insurance.

March 4—Building at 387 Brock Avenue was damaged. Estimated loss, $700.

Shawinigan Falls, Que.—February 26—Business block was damaged. Ten stores were burned. Estimated loss, $100,000.

Vancouver, B.C.—February 22—Brick block at 126 Pender Street East was damaged. Estimated loss, $8,000.

Woodburn, Ont.—February 28—House of H. Young, a farmer, was destroyed. Caused by defective chimney.

Grounds For Bank Amalgamations

Economies Gained by Union—No Signs of a Money Trust in Canada—Amalgamation Movement in Great Britain—May be Further Amalgamation in Canada—Progress in Banking in Recent Years

BY A. B. BARKER

THERE has been little real opposition to the recently announced amalgamation of the Bank of Ottawa with the Bank of Nova Scotia, except in the Ottawa district, and that mostly on sentimental grounds over the disappearance of the name of an institution which has been so intimately connected with the industrial life of that section for over two generations. The long and honorable record of the Bank of Ottawa justly entitles it to the position it holds in the district from which it takes its name, and it is easy to understand local resentment at the change, even though there be material advantages in the scheme to both shareholders and clients. What other criticism there has been appears to be based on hostility to amalgamations in general, rather than to any specific reason. It has been suggested that a larger organization might be inclined to discriminate against farmers and the business men in the smaller communities, in favor of the larger borrowers in the cities in the matter of accommodation, but so far this tendency has not developed as a result of any previous bank amalgamation in Canada, and as a matter of fact bank credit is generally more readily obtained in the country than in the cities, and on terms equally favorable. One reason is that the banker in a smaller community is on terms of greater intimacy with his customers than is possible in the cities, and this personal relation governs their business dealings very largely. Farmers' business east and west is sought after by all banks not from any altruistic motives, but because it is looked on as good business, this class of loan showing a very small percentage of losses, taking the country as a whole. Banking facilities have certainly not been diminished and Canada shows a greater proportion of banking offices to population than any other country except Scotland. It is certainly greater than the proportion for Great Britain.

During the war the opening of new branches was necessarily checked by the shortage of men, but with the close of hostilities, a considerable number of new offices both in Ontario and the west have been announced.

The proposed merger appears to have all the essentials of a most satisfactory combination. Neither bank is a competitor of the other to more than a very limited extent, and each will be benefited therefore by an expansion of business opportunities at the minimum of expense. The Nova Scotia obtains the valuable connection of the Ottawa Valley and the lumber sections of Ontario, and the Bank of Ottawa a wide field from Halifax, the West Indies and Newfoundland on the east to Victoria on the west, together with the American connections in New York, Boston and Chicago. without the amalgamation these connections could not be secured by either bank except by the opening of branches, a process requiring time, patience and money, as branches cannot be depended on to show profits on their operations for the first few years except under extremely favorable circumstances. By the merger this economic loss will be eliminated entirely, the clientele of each bank will benefit from the increased facilities which the wider connections will afford, and the shareholders will profit from the greater earning capacity of the combination.

Report of British Committee

Last year, owing to several large amalgamations between British banks, considerable adverse criticism developed and a treasury committee was appointed to investigate. This report brought out the fact, that, in the history of British banking there had been some 300 amalgamations of which more than half had taken place within the last 50 years, and that since 1891 the number of British private banks had fallen from 38 to 7, and joint stock banks from 104 to 34. This number has been further reduced since. There had also been a change in the type of amalgamations which no longer consisted in the absorption of local banks by larger and more widely spread joint stock banks, but in the union of two joint stock banks both already possessing large funds, and branches spread over a wide area.

The movement in Canada has been along similar lines but not so pronounced and while in Britain one result, largely responsible for the opposition, has been to reduce the amount of banking capital; this has not been the case in Canada. In this country banking capital has increased.

The formation of a money trust was also investigated, but the committee could discover no signs of it, though the opinion was expressed that circumstances might produce something approaching it later.

In this connection it is interesting to know that the method of guarding against such an event, recommended by the committee, is identical with that provided by the Canadian Bank Act, which prohibits any amalgamation between banks, until permission is first obtained from the minister of finance.

The principle laid down by the committee, as that upon which the government should base their decision in the case of a proposed amalgamation, was that a scheme for amalgamating or absorbing a small local bank, or any scheme to secure important new facilities for the public, or a really considerable and material extension of area, or sphere of activity, for the larger of the two banks should normally be considered favorably, but that if an amalgamation scheme involved an appreciable lap of area without securing such advantages, or would result in undue prominence on the part of the larger bank, it should be refused. The opinion was also expressed that consideration should be given to the undesirability of permitting an unusual aggregation of deposits without fully adequate capital and reserves.

Expansion of Business

Banking resources and deposits have grown steadily with the development of the country from year to year as the following table for the last 10 years shows:—

	Deposits.	Total assets.
1908	. $ 722,769,156	$1,001,352,290
1909	869,235,850	1,157,783,629
1910	926,390,794	1,229,790,859
1911	1,039,781,027	1,390,069,518
1912	1,139,081,347	1,526,081,158
1913	1,141,280,610	1,551,263,432
1914	1,153,193,664	1,555,556,815
1915	1,326,447,700	1,737,992,244
1916	1,509,085,295	1,948,044,256
1917	1,822,979,062	2,323,163,783
1918	2,146,036,972	2,689,835,181

The phenomenal figures from 1914 are due to some extent to the general advance in prices on account of war conditions, but the underlying growth in the business of this country was chiefly responsible. Had it not been for the war these conditions would in all probability have caused an increase in bank capital issues but the war put a stop, for the time, to any movement of this kind. Since the close of hostilities, however, several new issues have been announced.

In Canada as elsewhere the problems of reconstruction will necessitate more thoroughly organized and larger units than ever before, and these in turn will require the assistance of financial institutions organized along similar lines. In this movement towards greater concentration, finance does not lead—it follows. Finance can live only by service to industry, and when industry is being handled by large organizations, finance must organize in the same way. The work must be done by bigger and fewer hands, but they must not be so few as to eliminate competition. In this important matter we are not yet in sight of danger, and competition between the big units is likely to be as fierce in Canada as it is in other places.

The following table of comparisons showing the standing of the banks in England, Scotland and Canada last year and ten years ago will be of interest in connection with the foregoing:—

	1908.	Per cent. to liabilities.	1918.	Per cent. to liabilities.
England—				
Banks	50	....	34	...
Branches	4,903	....	6,004	....
Capital and reserve	£ 82,248,000	10.2	£ 84,475,000	5.5
Deposits	674,660,000	83.5	1,365,297,000	89.2
Total liabilities	806,727,000	....	1,528,631,000	....
Cash, including money on call and on time.	194,134,000	24.1	427,855,000	28
Loans	427,739,000	53	685,677,000	44
Investments ..	136,765,000	17	339,631,000	22
Scotland—				
Banks	10	...	8	...
Branches	1,178	..	1,242	....
Capital and reserve	£ 17,280,000	....	£ 16,064,000	....
Notes ..	7,162,000	5.02	19,023,000	7.9
Deposits	105,787,000	76.5	196,538,000	81.7
Total liabilities	137,562,000	....	240,550,000	....
Cash, including money on call and on time.	25,695,000	18.7	47,788,000	19.8
Loans	69,478,000	50.3	112,159,000	46.5
Investments ..	33,456,000	24.2	71,584,000	29.6

The proportion of banking offices to population in United Kingdom is about one to each 5,000.

	1908.	Per cent. to liabilities.	1918.	Per cent. to liabilities.
Canada—				
Capital and rest	$170,885,203	22.7	$ 225,608,222	10.1
Circulation ..	73,058,234	9.7	224,501,117	10.1
Deposits—				
Dominion government ..	4,343,942	....	254,927,913	...
Provincial government ...	11,622,015	....	14,756,299	....
In Canada ..	639,899,365	....	1,669,507,617	....
Outside Canada	66,903,834	....	206,845,143	....
Total deposits.	$722,769,156	96.3	$2,146,036,972	96.5
Total liabilities exclusive of capital and reserve ...	$750,031,465	....	$2,222,643,410	....
Discounts and loans	$546,079,993	....	$1,238,441,292	....
Loans on bonds and stocks .	140,964,171	....	239,368,745	....
	$687,044,164	91.6	$1,477,810,037	66.5
Investments—				
Government and municipal debentures ...	$ 30,104,314	....	$ 460,453,357	....
Bonds and stocks	44,213,479	....	53,137,962	...
Total investments	$ 74,317,793	9.9	$ 513,591,319	23.10
Depreciation gold reserve .	....	....	130,900,000	....
Total assets ..	1,001,352,290	133.5	2,689,835,181	125.
Banks	33	....	19	....
Branches			approx. 3,200	

Proportion of banking offices to population in Canada is one to each 2,500.

OCCIDENTAL FIRE INSURANCE COMPANY

The balance sheet of the Occidental Fire Insurance Co., of Winnipeg, as at December 31st, 1918, shows total assets of over $600,000, compared with $513,095 at the end of 1917. Compared with the company's balance sheet as at the end of 1913, a reduction in total assets is shown. At that time, however, the uncalled capital stock to the amount of $330,927 was included on both sides of the balance sheet. When this is deducted an increase in total assets of approximately $240,000 is shown. The statement is given in full elsewhere in this issue.

Last year premiums, less rebates and cancellations, amounted to $349,146 as compared with $298,850 in 1917. The company's loss ratio to net premiums was 38.1 per cent.; this, however, included $5,000 written off office supplies, which, when deducted, would reduce the expense ratio to 35.7 per cent., which is one-fifth of one per cent. higher than in 1917.

Holdings of Victory Bonds were $250,000, and the other investments are in good condition. No dividend has been declared, as it is considered preferable to build up a strong reserve. The profits for the year amounted to $46,127, which has been transferred from the revenue account to surplus, making a total of $189,477.

The board of directors of the company consists of Mr. Randall Davidson, president; C. A. Richardson, vice-president and secretary; S. E. Richards, R. Campbell and W. A. T. Sweatman.

The civic tax rate for Ottawa for 1919 as prepared for the city council by the Board of Control shows an increase of 2.8 mills on the dollar, independent of the water rates and school tax rates. The water rates are to be reduced 5 per cent.

Manitoba Tax Commission Evidence

Many Advocates of Provincial Income Tax, as Being Preferable to Civil Income Tax—Need For Some Understanding as to Division of Revenues is Apparent.

THE Manitoba Taxation Commission, which has been sitting for several days to consider problems of provincial and municipal taxation has received evidence regarding income taxes, property taxes and other sources of revenue. Any provincial legislation of this kind will probably be postponed until this commission has completed its work, which will last for some time yet.

J. W. Harris, former assessment commissioner for Winnipeg, in giving evidence before the commission, held that a provincial income tax would be the only proper method of solving the present taxation situation. The city was under a necessity of getting more revenue and present sources of revenue already bore more than enough. The income tax was the only method that he could see for gaining more revenue, but he would rather see this tax provincial. Mr. Harris stated that he was not in accord with the suggestion that the assessment plan, as operated by Ontario should be adopted.

Evidence from United States

Mr. J. B. Leenhouts, tax expert from Wisconsin, gave an exhaustive description of the laws governing this very important subject in his state, as well as other portions of America, and dealt with the methods adopted in connection with the enforcement of the systems, and the beneficial results accruing therefrom. He is very enthusiastic as to the practicability and efficiency of the income-tax scheme, though he admitted, when questioned by the chairman, that he knew of no instance in the United States where such a law had been put into operation affecting any city or a single unit of a state, the scheme being always state-wide.

Business Tax Has Failed

J. B. Hugg, K.C., addressed the commission on behalf of the Canadian Manufacturers' Association. He pointed out that he had represented the manufacturers of Winnipeg before the last commission which sat in 1908, and which was composed of Judge Phippen, A. L. Johnson and W. J. Christie. This commission recommended provisions now contained in the Winnipeg charter under which the business tax is at present levied in Winnipeg and stated that since that time he had watched the taxation situation in Winnipeg. The business tax is a failure, because, firstly, it did not raise sufficient revenue, only producing between $300,000 and $400,000 annually, which was less than 10 per cent. of the total taxes collected by the city. It also failed because some classes subject to the tax were unduly burdened by it, as for example retail merchants, while others, like departmental stores, mail order houses and wholesalers, professional and financial men and brokers of all kinds escaped very lightly, while other classes of citizens, who should be taxed, escaped altogether. The business tax as at present levied should be abolished.

Provincial Income Tax Preferable

When additional revenues are needed to supplement the tax on land the only fair and equitable method to secure them is by an income tax which should apply throughout the whole province and which should not be confined to the city of Winnipeg. A city income tax would, he said, be unfair for many reasons:—

1. A city income tax would give the city taxes which properly should go to other municipalities in the province. Thus residents of St. James, St. Boniface and other urban districts who earn their incomes in Winnipeg would pay a tax to Winnipeg which either wholly or partly should go to the municipalities in which they reside.

2. Wholesale houses, mail order houses, elevator firms, manufacturers and many others whose business establishments are located in Winnipeg, really derive their income from operations conducted throughout the province and a portion of their income tax should go to the support of other portions of the province and not be appropriated by the city of Winnipeg.

3. A city income tax would unfairly discriminate between industries located in Winnipeg and those located in St. Boniface, Selkirk, Portage la Prairie and other urban centres. Why should a flour mill located in Winnipeg pay a heavy income tax while a mill in St. Boniface paid none? A local tax in Winnipeg would tend to lead new industries to locate in municipalities where no tax was payable.

4. Local administration of an income tax is undesirable for many reasons. An income tax requires administration by a provincial board in order that unform assessments on all income may be made under uniform rules throughout the province.

Winnipeg Tax Situation

In 1918 the city of Winnipeg collected in taxes $7,165,394, all of which, excepting the business tax of $343,156, was levied directly on lands and buildings. These figures only needed to be stated in order to make it clear that the person and corporations who would pay taxes under an income tax do not contribute their just share to the cost of government in Winnipeg. If a provincial income tax were levied a large portion of the tax now levied on land would be lifted from the land, particularly the Patriotic Fund and the municipal commissioner's levy, possibly also a considerable portion of the School Board's levy, which amounted to $1,444,000 in 1918. These amounts could be provided for by the appropriation of part of a provincial income tax. The additional revenues resulting from the income tax could also be used to meet the impending increased expenditure due to the necessity for increased salaries to civic employees which must be made in order to maintain a fair relation between their salaries and those of other persons in the community and the expenditures which must be made to furnish necessary public services which have not been given during the war.

Still Use Land Tax

It must be borne in mind that the land should bear its fair proportion of taxes because most of the municipal services are in the nature of a benefit directly affecting the occupant or owner of the land who pays the land tax, and if a land tax is unduly light the owner tends to capitalize value of the land by reason of the services rendered by the municipality and is able to draw a permanent income from this capitalized value or to realize a speculative profit by selling the land. Any change in taxation looking towards the reduction of the land tax should have regard to its effect on land values in the community and no change should be tolerated which will enable speculators to retard the industrial development of the community by holding lands for speculative profits. Great care must also be taken lest by prematurely tapping additional sources of revenue, a new boom in real estate values will be caused which will further retard the industrial development of the city and equal care should be taken that the city, having found new and easy revenues, will not once more start on a career of expenditure such as marked the pre-war era and which is responsible for many of the present difficulties.

Experts in taxation should be summoned to study local conditions at first hand and when local requirements and local conditions are fully understood, to draft tax proposals designed to secure the necessary funds fairly and equitably from all classes involved. When proposals have been put in concrete form they could then be submitted to the various classes of persons involved for discussion, but in the meantime most of the discussion has proceeded without definite knowledge of facts and conditions.

Division of Taxation Needed

R. F. McWilliams stated that the principle of the income tax is thoroughly sound and is rapidly being adopted by all advanced countries, and will probably, in time, become the only form of taxation. "It is consistent with the principle of the ability to pay," he said, "now being recognized as the sound basis of taxation, rather than the principle of service rendered, except in particular cases. The principle, however, must be applied with regard to present conditions and its full existence must be based on conditions which permit of no other form of acquiring wealth than through personal services or interest derived from personal saving. As long as it is possible to acquire wealth by speculation the income so derived should be taxed directly or indirectly and more heavily than a true income.

"The question of an income tax for the city of Winnipeg, or for the province can not be considered apart from the general burden of all taxation paid by the people, whether municipal, provincial or Dominion. At the present time new taxation must be imposed by the Dominion in order to pay the cost of the war, and the amount of taxes necessary for these purposes is so great as to over-balance all other questions of taxation. The war debt of Canada now stands at $1,400,000,000, on which interest charges will be $75,000,000, and to this must be added the pension payments amounting to at least $25,000,000. Speaking in the House of Commons last week, Mr. Carvell placed the additional amount of revenue required at $150,000,000 a year. Manitoba's share of any Dominion tax amounts to about 8 per cent., so that it will be necessary to impose new war taxes on the people of Manitoba, in some form, to the amount of $8,000,000 a year.

Comparison of Sources

"It is obvious that so large a tax can only be raised upon some very broad basis, and there are only three forms of taxation wide enough to be considered in meeting such an additional tax—viz., increased tariff, a land tax, and an income tax. Paying the war tax by increased tariff taxation would be opposed by the people of this province, regardless of politics, and would bear most unfairly on the consuming population and upon those engaged in the production of natural resources and particularly upon all the west, in other words, upon the very elements that have least accumulated wealth. Further, it is very doubtful whether an increased tariff would produce any additional revenue and by reason of the increase in price of all goods whether imported or manufactured in Canada the result would be the most burdensome form of taxation. All sound economic theory favors direct taxation to the exclusion of indirect taxation as rapidly as public opinion can be educated to it. Similarly the land tax would bear with undue hardship on the newer portions of the country and those least able to bear the tax. The land tax could only be levied upon the basis of the market price of land, and it is recognized in all countries that lands in newer parts are, like everything else, subject to inflation. The price of a home in Winnipeg far exceeds the price of similar accommodation in almost any place in eastern Canada. Further, the land tax properly belongs to those services directly connected with the land and should be reserved for local purposes and bears no relation to the benefits received from the conduct of the war. On the other hand, an income tax will distribute the burden of the war over the entire country in proportion to the ability of the people to pay and would be the most just form of paying for the war, as charging every one in proportion to the product of his energies in a country preserved by the war. Further, it will impose the tax on western farmers, and others whose incomes fluctuate at the time when they are able to make payment, and be light in bad seasons. My contention, therefore, is that the war charges should be paid for by income tax covering the whole of the war charges and applied exclusively to that purpose.

Recommendations

"As a practical proposition for immediate action," said Mr. McWilliams, "I recommend the imposition of an increment tax to begin at not less than 10 per cent. I would have the assessment in the city accepted as a true criterion of present prices and have the tax paid on all property as the price advances beyond the present assessment rating. The rate of the increment tax should be raised to 15 per cent., and then 20 per cent., and then 25 per cent., and as much higher as is necessary to prevent any large inflation of the values. The object should be, primarily, prevention, and secondly, income, and the tax should be made stiff enough to effect the result desired. In view, however, of the fact that this kind of taxation was not in the contemplation of any investor, at the time lands were purchased, the tax should not be made so heavy as to decrease the price of land, except as to such properties as have been unduly inflated. A uniform tax would squeeze out such weak properties and put the land back in the hands of the city at a cost equal to the taxes, and this appears to be the only means of solving the present housing difficulty.

Higher Provincial Subsidies

"The only suggestion I wish to make in this connection is that careful consideration should be given to the amount of the provincial subsidies. These subsidies were established at Confederation, not as a bounty to the provinces, but as a means of readjusting the balance of revenues and expenditures which resulted from the distribution of the functions of the respective governments. The total of the subsidies was intended to be a proportion of the Dominion revenue, but with the vastly increased revenue of the Dominion, there has not been a corresponding increase in the provincial subsidies. With a careful management of the natural resources and with increases in the rates of succession duty as fast as the several provinces can be persuaded to accept a fairly uniform rate, a proper subsidy should meet all provincial requirements. The provincial addition to the municipal taxes is bad in principle and should be avoided if other means of raising the revenue can be found."

LIVERPOOL, LONDON AND GLOBE INSURANCE CO.

The seventy-first annual statement of the Liverpool, London and Globe Insurance Co., Ltd., which was issued last week, shows total assets of $17,084,397, with unearned premiums and other liabilities of $12,203,190, leaving a surplus of $4,881,207.

PACIFIC GREAT EASTERN FINANCES

A bill has been introduced into the British Columbia legislature to guarantee a loan secured from the Bank of Commerce on the security of Pacific Great Eastern Railway debenture stock. There are two debenture stock issues of the railway outstanding, the one being first mortgage 4½ per cent. stock and the other second mortgage 4½ per cent. stock.

Part of each issue, to an amount totalling £1,217,522, was pledged by the railway company with the Union Bank of Canada as collateral security for the repayment of a loan of $4,800,000 at 6 per cent. The Union Bank wished to have this loan repaid, and arrangements were made by the railway with the Bank of Commerce to have the money advanced by the latter. This latter loan becomes due on June 30th, 1919, with interest at the rate of 5½ per cent. At the time of making the arrangements with the Bank of Commerce the provincial government agreed, subject to the approval of the legislature, to guarantee the repayment of the loan. Authority is also given in the bill now introduced to permit of the loan being renewed from time to time with the same provincial guarantee.

THE OWNER AND THE HOUSING PROBLEM

GIVING evidence before the Manitoba Tax Commission, Mr. G. B. Hugg, K.C., dealt with the position of the owner, something which has not been considered in the extensive discussion which has been given to the housing problem. From the point of view of the tenant, he said, rents are too high and too big an item in the cost of living. On the other hand they did not pay a sufficient return to the owner of property, with the result that building operations have been suspended. There is not a sufficient margin between the rental income and the expenditure on taxes, etc., to yield the owner as large an income as can be obtained from other investments. Evidently investments in housing property will not be maintained if an adequate return to the investor is not assured. The income may, through extraordinary conditions, be reduced for a number of years, but new construction will then cease and sooner or later the shutting off of supply will raise rents to such a level as will again attract investments into new building.

That this has actually been the case with the owner is evidenced by the fact that the Building Owners Association of Winnipeg, the city which Mr. Hugg had more especially in mind, decided at a recent meeting to increase rents. The resolution is as follows:—

"Whereas, The cost of building and maintaining buildings both in material, labor and fuel has increased permanently and substantially in the past several years;

"And whereas, the tax system of Winnipeg imposes about 90 per cent. of all taxes levied in the city on land and buildings, which include patriotic tax, provincial government levies, and the Greater Winnipeg water district levies;

"And whereas, large increases in taxes are assured for this year amounting to an increase on the water district alone from 3.68 mills to 5.81 mills;

"And whereas, the patriotic levy amounting to one and one-half mills was assessed and paid only by real property during the war, and the new provincial government levy imposed during war times, which has been adjusted by the government for the present year on a basis of half a mill for patriotic purposes and two mills for provincial government levy—notwithstanding the impression that when the war was over these direct new charges against land would be discontinued;

"Now, therefore, in order to meet these new charges and to put improved property on a sound basis, it is the opinion of this board that rents should be increased at the expiration of the present leases to keep pace with the increased cost of maintenance and operation, and these new tax levies, and that a campaign of education by rental agents and owners of property would show to the renting population of Winnipeg how fair and just such an increase would be."

WAGES, RATES AND PRICES

WHAT some workers in the industries of the nation appear to fail to understand is that excessive wages and a reduction in the output of any one group of industrial workers adversely affects all. A case in point is the probable failure of an American steel concern to secure a contract for the furnishing of $10,000,000 worth of steel rails to China. The prices quoted by the company in question were lower than those of their English competitors, but the difference was more than offset by the more favorable rates from Liverpool to Hong Kong as against the rate between San Francisco and Chinese ports. The British shippers of manufactured goods enjoy a decided advantage, the rate per ton on steel rails being twelve dollars less than the corresponding American charges. The manufacturers of the United States have brought strong pressure to bear upon the Shipping Board, demanding that the British rates which were reduced 70 per cent. on January 27th of this year, be met by corresponding reductions on this side of the water. The United States Shipping Board state in reply, that the American ships cost to construct three times the normal price and that the British rates cannot be met unless interest on the investment and seamen's wages are sacrificed. Already there is a reduction in some lines in the steel output of American mills amounting to 20 per cent., and if contracts are lost because of high ocean freight rates the steel workers and the companies alike must pay the penalty.

Much the same may be said of railroad rates both in Canada and the United States. Under the application of the MacAdoo award the freight rates on Canadian roads were raised to such high levels as to impose a serious handicap on industry and agriculture. It is estimated that the increases to railway workers for the year 1919 alone will cost the people more than $800,000,000; and this sum can be secured only from increased taxation or excessively high rates. In the meantime the American government has guaranteed a fixed price on wheat of $2.26 at Chicago; and, on present crop estimates, one billion dollars will have to be collected from the whole people to make good the difference between the fixed price and the estimated market price. The farmers comprise about one-third the population of the United States and the railway workers some six per cent. The agricultural community exhibits little concern, at present, over high freight rates, rejoicing in its own prosperity. But high prices for farm products will not last, while the prospects are that high wages for railway employes will continue to be paid for years to come—especially under any system of government control or management whereby political pressure can be brought to bear. Estimating the agricultural population of the Republic as stated above, it must carry one-third of the increased wages bill of $800,000,000 per year. In four years three billion dollars of excess profits in wheat will be wiped out, and their costs of production and of marketing fundamentally altered to their disadvantage. It is thus readily seen that in the United States it cannot be long before manual laborers and artisans, on the one hand, and farmers on the other, come into irreconcilable conflict.

Much has been heard in Canada and the United States, in recent months, concerning the urgent need of maintaining foodstuffs, both breadstuffs and animal products, at high price levels. The result of minimum fixed prices, such as obtain for hogs and wheat just now in the Republic, is merely to keep the cost of living at artificially high figures. This brings pressure to bear upon factory workers, miners and the rest who, in turn, demand impossible wages—impossible, that is, if industries are to be kept operating at full speed. For it is evident that wages and food prices on war levels, together with high freight rates, lay a burden upon manufactures, trade and commerce that is beyond their power to support. Canada's future depends in no small degree in keeping exports of primary and secondary products at high figures. It is safe to say that the producers on this side of the water will not get a very large share of the business of reconstruction in Europe unless they can quote prices to meet those of all competitors—especially British competitors. In any event, France, Belgium, Poland and the other nations that have suffered from war will undertake only strictly necessary work at present price levels. The cost of production for Canadian manufacturers and other producers must come down if unemployment on a large scale is to be prevented.

FINANCING CANADIAN INDUSTRY AND AGRICULTURE

THE war has developed many surprising situations but none more so than in the field of finance. There the Dominion has shown power and resource with which few would have credited it before the outbreak of hostilities. New methods and new financial instruments have been devised and applied. In large measure the Canadian people themselves raised the funds essential for the carrying on of industry and the purchase of the country's exportable surplus of foodstuffs. And now, just recently, the government has arranged to finance Roumania to the extent of $25,000,000 for the buying of supplies in Canada. National finance has, in great measure, usurped the place and the functions of private international finance. Both the United Kingdom and the United States have come to the support of their European Allies with immense sums, designed not only to win the war but to aid these stricken countries in achieving stability in their economic life. It has become common custom to assert that the great financiers and economists were wrong in their predictions as to what would follow, in the business world, upon a declaration of war; but events have demonstrated that these predictions in the main, were sound—that the credit and industrial interests of the world, at bottom, are one.

Canada undoubtedly assumes great risks in lending such vast sums to Roumania and in the following up of that programme elsewhere. Nevertheless, is becomes clear that the stronger financial nations will be obliged to come to the support of the weaker if industry and labor are not to suffer everywhere. It is of imperative importance that the Dominion's export trade in manufactures and agriculture be maintained at a high level. The country has made great economic gains during the course of the struggle; Mr. R. H. Coats estimating that national savings during 1918 alone amounted to $800,000,000. Nevertheless, the Dominion's external indebtedness in August 1914, was not less than three thousand million dollars; and to meet the interest and principal thereof it is of the utmost importance that exports be continued at the highest possible figures. To secure orders from abroad for the country's basic industries, as well as to finance domestic requirements, the Dominion should rely as far as possible upon its own resources and economic power.

Negotiations are being pushed rapidly forward for the supplying of foodstuffs to the people of the Central Powers. It is expected that German holders of foreign approved securities will be required, by their own government, to hand them over to aid in purchasing the necessary supplies. The United States expects to get a large share of this business and find in Germany and Austria a considerable market for the wheat and other breadstuffs that its agricultural population was producing for the Allies. It is to be hoped that Canadian agriculture will benefit by such transactions also. If at all possible the exportable supplies of manufactured products and foodstuffs sent by Canada to Europe should be disposed of on this basis, where the countries concerned cannot pay cash. It must be admitted, however, that if Canadian producers are to get their fair share of the goods required by the European market the financing of the transaction must be conducted by our own government or through credits granted by the United Kingdom and the United States.

Upon the right solution of this, and similar problems, will depend in great degree the industrial stability of the country. It is safe to say that public international finance, having played so large a role during the war, will not be discarded for a considerable period after the signing of peace. It can assume risks that are beyond the power of private finance to sustain. Our readers will recall, for example, how Carranza appealed in vain to Wall Street for $75,000,000 or $100,000,000 dollars. Such a loan would have brought order out of the economic chaos into which Mexico had fallen, and from which it seemed almost impossible for the country to extricate itself notwithstanding that the rival revolutionary factions had been crushed. Carranza was compelled to issue large amounts of irredeemable legal tender notes, a measure that merely made a bad situation worse. There followed the confiscation of private property and extortionate, almost confiscatory, taxation upon the oil and mining properties of British and American investors. It is plainly in the interests of Great Britain and the United States to prevent similar conditions developing among the war-worn and poverty-stricken nations of Europe.

Admitting that the home market is the most important one for our manufacturers, it does not suffice for agriculture. During the war private enterprise could not be relied upon to grapple unaided with the tremendous problems in industry and agriculture that confronted the nation. The task was too great for any single group of interests. To find profitable markets and the money for Canadian products may rest mainly upon private enterprise, but certainly the government cannot ignore the problem. And if the Dominion must finance the sale of part of the nation's exportable surplus abroad every means should be taken to safeguard the soundness of the transaction.

PERSONAL NOTES

Mr. Robert Adair has been elected a director of the Royal Bank of Canada.

Mr. T. A. Gale has been appointed manager at the Sudbury, Ont., branch of the Sterling Bank.

Sir Edmund Walker, president of the Canadian Bank of Commerce, is leaving for Japan. He will be absent for several months.

Mr. F. S. Kumpf has been appointed managing director of the Dominion Life Assurance Company. He was for some time assistant manager of the company.

Mr. D. H. McDougall, president of the Nova Scotia Steel and Coal Company, has been elected president of the Canadian Mining Institute for the coming year.

Mr. J. W. W. Stewart, managing-director, and Mr. J. A. Macfarlane, A. I. A., secretary and actuary of the Monarch Life Assurance Company, were visitors to Vancouver recently on an annual inspection trip.

Captain Thomas Forwood, Q.O.R., a member of the Toronto Stock Exchange and of the firm of Tomenson, Forwood and Company, is home this week after three years and a half service in France, where he was with the 58th Battalion.

Mr. W. W. Symons has been appointed assistant manager at the main Vancouver branch of the Bank of Montreal. He was previously employed as accountant under the management of Mr. Campbell Sweeny, late manager and superintendent of British Columbia branches.

Major E. D. Sutherland, for many years assistant auditor-general, has been appointed to succeed the late John Fraser as auditor-general of Canada. Mr. Fraser, who died in Florida last week, had been absent from the capital for some time, Major Sutherland acting as auditor-general.

Lieut.-Colonel George T. Chisholm, of the firm of Osler and Hammond, returned from the war this week and will soon take up his former work. Col. Chisholm has been in the army for more than four years, having gone overseas as commanding officer of the 92nd Highlanders, and later being transferred to the Imperial forces. Latterly he was Area Commander of the 6th corps, and spent the last six weeks in Cologne.

Mr. K. Karasawa, a representative of the Hypothec Bank of Japan, visited Montreal, Ottawa and Toronto recently. This bank has its principal office in Tokyo and a branch office in Osaka. Mr. Karasawa has been about three years in the United States as a representative of this bank and has left for Europe from where he will return to Japan by way of India. He is making a special investigation of banking systems in other countries and also of trust company and mortgage loaning business.

OBITUARIES

Mr. Andrew Newlands, one of Galt's prominent manufacturers, died this week from influenza and pneumonia.

Mr. James C. Shook, manager of the Dickson Lumber Company, Peterboro, died last week after an illness of about five months.

Mr. W. C. Crawford, for four years a prominent insurance man in Chatham, Ont., and prior to that for many years the leading merchant and for some time mayor of the town of Tilbury, died at Chatham this week after two days' illness, following a stroke.

Mr. John H. Thom died recently in Toronto. For forty years he was the chief taxing master at Osgoode Hall, and until within a few months of his death was active in the discharge of his duties.

NEW DEPARTMENT OF UNION BANK

Mr. J. H. Hodgins has been appointed manager of a new statistical department in the Union Bank of Canada, at Toronto. Mr. Hodgins is being transferred from the New York agency, where he organized a statistical department two years ago, to take up the larger work of the new department. Prior to joining the New York staff of the Union Bank, he was well known as a Canadian newspaper man, having been on the editorial staffs of Kingston, Toronto and Montreal papers. He was for five years in financial journalism in Montreal, being at one time financial editor of the Montreal "Herald."

Statistical departments are important features of the New York banks, acting as aids for the foreign branches. The new department of the Union Bank in Toronto no doubt will function for the branches of the bank abroad, as well as for the branches throughout the Dominion.

ADDITIONAL BOND ITEMS

Messrs. G. A. Stimson and Company of Toronto, were the successful bidders for the purchase of $5,086.11, five per cent. town of Thessalon bonds. There were several tenders received. These bonds were issued for local improvement purposes.

The town of Amherstburg, Ont., has sold an issue of $25,000 six per cent., bonds, payable in 20 instalments. The price paid was 102.207, and at this price they are on a basis of about 5.73.

Tenders will be received by A. J. Pritchard, town treasurer, Weston, Ont., up till March 28th, for the purchase of $60,000, six per cent. 30 instalment, public school debentures.

BANK MERGER AWAITS CONSENT

The arrangements for the purchase of the Bank of Ottawa by the Bank of Nova Scotia are now complete, awaiting the consent of the governor general in council. The shareholders of the Bank of Ottawa approved of the purchase at a meeting held on March 4th. It is not necessary for the shareholders of the Bank of Nova Scotia to approve of the purchase as the bank act provides that this is necessary only where an increase in the capital stock of the purchasing bank is required.

Aldred and Co., Ltd., have completed arrangements in connection with the opening of a Paris office. This is established at No. 1 Rue des Italiens, and is in charge of Mr. P. Bon de Sousa, a vice-president of the company. This step is taken, looking forward to there being much greater reciprocity in investment of capital than has hitherto existed between France and the United States and Canada.

Grand Trunk Pacific in Government Hands

Management, Unable to Meet Further Payments, Turns Road Over to Dominion Government as Principal Creditor—Minister of Railways is Receiver — Operation Continuous — Grand Trunk Acquisition Problem Now Accentuated.

ON March 9th, the Grand Trunk Pacific Railway was taken over by the Dominion Government as a consequence of a notification received from the management of the road a few days previous to the effect that it was no longer able to meet its financial obligations. Hon. J. D. Reid, minister of railways, was appointed receiver, and operation of the road did not cease. The following official statement was issued:—

"Hon. J. D. Reid, Minister of Railways, has been appointed receiver of the Grand Trunk Pacific Railway System. The appointment follows an official notification which Sir Thomas White received on Thursday from the vice-president of the Grand Trunk Pacific Railway Company—a notification that, in view of the fact that the increased rates applicable to the Grand Trunk Pacific Railway have not been sufficient to meet the increased operating expenses, it would not be possible for the company owing to lack of funds, to continue its operation beyond March 10th.

"In view of this notification, it became necessary that the government should, in the public interest, immediately take steps to insure the continued operation of the system. Under existing legislation this could not be accomplished by an application to the courts for the appointment of a receiver. The war measures act, however, was found to provide adequate authority for action by the government, and consequently an order-in-council was passed appointing the Minister of Railways receiver of the Grand Trunk Pacific Railway System, which includes the branch lines, telegraph, steamships, hotel and development and other companies. Mr. W. P. Hinton, general manager of the Grand Trunk Pacific Railway System, has agreed to conform to the requirements of the order, and to facilitate the carrying out of the powers and duties required of the minister as receiver. The immediate object of the order, viz., to prevent interruption in the operation and management of the system, has therefore been already attained.

"An important feature of the order-in-council is that which preserves to the government any other and ultimate remedies which it possesses under the provisions of trust mortgages securing issues which it has guaranteed or otherwise as creditors of the system. Similarly, the rights and remedies of other parties are not interfered with by the order.

"The acting prime minister will on Monday make a full statement to the House respecting the matter. He will lay upon the table a copy of the order-in-council, and read the correspondence leading up to and connected with the action taken by the government. Legislation will be at once introduced for the purpose of obtaining the sanction of parliament to what has been done.

"In February the government informed the officials of the Grand Trunk and the Grand Trunk Pacific Railway Companies that it was not the intention of the government to ask parliament to provide a further vote for the Grand Trunk Pacific Railway while the negotiations with the Grand Trunk Railway 'remain in their present unsatisfactory condition.' "

The Order-in-Council

On Monday the acting premier laid upon the table of the House the order-in-council appointing Hon. J. D. Reid as receiver of the railway, and also stated that a bill would be shortly introduced validating the action of the government. The war-measure order-in-council recites the fact that last year $7,500,000 was voted by parliament to secure the continued operation of the line, and that this purpose would be defeated should the company suspend. It next quotes the letter of Mr F. Scott, vice-president and treasurer. Reference is made to the need of the service for the conveyance of passengers, returned soldiers, freight and the country's commerce, and the authority of the war measures act is cited.

The minister of railways is appointed receiver, and on the authority of the exchequer court he is empowered to issue receiver's certificates, which are to have priority over other claims. They are a first charge on the revenues. There is a further technically worded provision whose purpose is to maintain intact the rights now possessed both by the government and the holders of bonds guaranteed by the company as well as maintaining the obligations of the company. If the Grand Trunk should default on future bond interest, the right of the bond holders to apply to the exchequer court for a receivership is fully maintained, but the present receiver is entitled to be heard, having regard to the public interest involved. Rights of seeking foreclosure and other privileges of the bond holders are continued. Heavy penalties are provided for any officers or employes who should fail to exercise their functions as directed by the receiver. Borrowings by the receiver from the consolidated fund are authorized. All the books for the transfer of Grand Trunk Pacific are to be closed. The order embraces not only the Grand Trunk Pacific, but all the branch, subsidiary, hotel, steamship and development companies. The operation by the receiver is to be wholly distinct from the national railway system.

Position of the Grand Trunk Pacific

The Grand Trunk Pacific Railway Company was chartered in October, 1903, by the Dominion of Canada to construct a railway from Moncton, N.B., through the cities of Quebec and Winnipeg to Prince Rupert, B.C. The total length was to be 3,549 miles, exclusive of branches. The section from Winnipeg to Prince Rupert is complete and is owned by the Grand Trunk Pacific. According to an act passed in 1903, known as the "National Transcontinental Railway Act," the Canadian government was to construct the eastern division of the Grand Trunk Pacific. This line from Moncton to Winnipeg has also been completed.

The mileage actually taken over is, therefore, 1,746. The new arrangement will not alter the responsibility of either the Grand Trunk Railway Company or the government under existing mortgages or guarantees of bonds. The Grand Trunk Railway Company has long been anxious to rid itself of its obligations in respect of the Grand Trunk Pacific. As long ago as December, 1915, Chairman Smithers, writing to the prime minister, asserted that the Grand Trunk would find it quite impossible to meet the extra liabilities arising from the Grand Trunk Pacific Company. He proposed that the Grand Trunk Railway should retire altogether from the transcontinental enterprise and that it should transfer to the government the twenty-five million dollars' worth of Grand Trunk Pacific common stock it held. In return, he contended, it should be relieved of all liability for interest upon Grand Trunk Pacific bond issues and for all deficits in Grand Trunk Pacific operation, and should be repaid any money advanced to the Grand Trunk Pacific Railway Company or its subsidiary corporations. This proposition the government did not accept. Later it did open negotiations looking to the absorption into the government railway system of the Grand Trunk and the Grand Trunk Pacific on the basis of an annual payment computed upon the average for a period of years of dividends paid upon stock issues of the Grand Trunk Railway Company other than the common stock.

The Grand Trunk Railway and its branch lines, according to the Drayton-Ackworth report, in the year ending December 31st, 1916, showed a net income on operation of

$826,000 before meeting any fixed charges. Since then, until the year ended December 31st, 1918, cost of operation has about balanced revenue. Last year, however, there was a deficit of about one million dollars on operation alone, it is stated.

Its Financial Obligations

The obligations of the Grand Trunk Pacific amount approximately to $200,000,000, represented by a lengthy list of issues of bonds, debentures and notes and five cash loans by the government. These are secured by five mortgages as follows:—

First mortgage, $69,000,000, guaranteed by the government.

Second mortgage, $23,000,000, guaranteed by the Grand Trunk Railway Company.

Third mortgage, $25,000,000, guaranteed by the Grand Trunk Railway Company.

Fourth mortgage, $50,000,000, guaranteed by the Grand Trunk Railway Company.

Fifth mortgage, $33,000,000, securing loans made by the Dominion government.

The Dominion government has made in all five loans to the company, ten million dollars in 1909, fifteen millions in 1913, six millions in 1915, eight millions in 1916, and seven and a half millions in 1917, a total of $46,500,000. The direct investment of the Dominion government up to June, 1916, in the Grand Trunk Pacific enterprise by way of subsidies, purchases of bonds and loans was estimated by the Drayton-Ackworth report at $70,311,716. Since that time the loans of 1916 and 1917 have been made to the company.

AUTOMOBILE UNDERWRITERS' ASSOCIATION

New Organization Will Adjust Rates and Endeavor to Reduce Losses—Covers Ontario and Quebec

A NEW association has been formed of the companies writing automobile insurance which will replace two old associations, the one composed of companies writing fire and transportation and theft, and the other of companies writing the liability covering. During the last few years, a number of companies have had their licenses extended, permitting them to write several classes of insurance, and it is now found that a number of companies are writing all kinds of automobile insurance. It is believed that the new association will permit of a better exchange of experience, and result in rates which will be more closely adjusted to the actual results than has been the case in the past. The tariff issued by the new association makes a substantial reduction in the rates which have been fixed in previous years upon pleasure cars, and a still further reduction upon commercial cars.

There have been some radical changes in the charges for theft, which is a hazard that has been growing very steadily. Notwithstanding this, however, the new association has fixed rates about the same as in previous years, but has provided reductions in the rates when the car is of an easily distinguished type, such as a sedan or a limousine, and also a reduction if it is a touring car and equipped with an approved locking device. There is also a reduction in the rate for fire insurance if a proper fire extinguisher is carried on the car.

In several cities of the United States, the thefts have become so numerous that the companies have been forced to greatly increase their rates and in nearly all the large cities across the border the theft rate is from two to three times that charged in Ontario, while, in addition, there are half a dozen cities where the thieves have become so bold and the authorities have apparently made no effort to stop their practices, so that the rates have been still further increased by about 50 per cent. above the ordinary city rate, which would make the rates in those places from three to five times the rate charged in Ontario.

The new association expects to secure the co-operation of the Ontario Motor League and the Department of Justice of Ontario, so that effective steps will be taken to stop the theft of cars. If this should fail and the thefts continue, the companies will be forced to greatly increase the theft rates. It is understood that the energetic president of the Motor League, Mr. J. J. Gibbons, is a believer in co-operation along preventive lines, and it is hoped that with his help an increase in theft rates will be unnecessary.

It is expected that reductions will be made in the liability rates for cars which are owned and usually kept in the smaller towns and country districts at a reasonable distance from the larger cities, and where the owner only occasionally visits the larger cities for business or pleasure. At the same time, he would be protected wherever he might be, whether in any part of Canada or the United States against the liability to the public in the event of injuring any pedestrian.

Standard Policy Adopted

The association has also adopted a standard form of policy, which is the same as the form adopted in the United States after very careful consideration by all interests involved. The conditions of the automobile policy are clear and distinct, and are drawn with special reference to the insurance automobiles, being in that respect a decided improvement upon the practice of using the ordinary standard fire policy which was prepared for the insurance of ordinary property and which contains clauses which are not at all applicable, such provision as, for instance, if more than one gallon of gasoline is kept without permission the policy would be void. It is understood the new association intends to collect statistics so as to adjust the rates as closely as possible to the hazards, and wherever possible to give the public the benefit and so popularize the insurance on automobiles to a greater extent than has been in the past.

The president of the association is Mr. John B. Laidlaw, of the Norwich Union Fire Insurance Co., Toronto; the vice-president for Ontario is Mr. W. T. Perry of the Ocean Guarantee and Accident; the vice-president for Quebec is Mr. John Jenkyns, of the Employers' Liability, of Montreal. The work of the association for the time being does not extend beyond these two provinces. Mr. J. H. King is secretary, and offices have been secured at 8 Colborne Street, Toronto.

The new tariff issued by the association is applicable commencing March 1st. Annual policies only are permissible. All cars are divided into five groups according to their age. Each of these groups is again divided into pleasure, commercial and electric divisions. Rates are then given for each of these divisions in proportion to the value of the car. Separate rates are specified for fire and transportation on the one hand and for theft on the other.

WINNIPEG FIRM OPENS INVESTMENT BRANCH

An investment department has been opened by Messrs. Allan, Killam and McKay, Ltd., of Winnipeg. They will now deal in government and municipal securities in addition to their ordinary business of handling insurance, real estate, stocks, loans and farm lands.

The department will be in the care of Mr. Lawrence W. Hicks, a member of the firm.

BANK BRANCH NOTES

The Bank of Hamilton has opened a branch at Milo, Alta., in charge of Mr. A. McIvor.

The Dominion Bank has made an offer for property at Brantford and will probably establish a branch there within a short time.

The Bank of Hamilton has purchased the four-story building at Portage Avenue and Carlton Street, Winnipeg. Possession will be assumed next May.

The Bank of Montreal has opened a sub-agency at Whitney Pier, Sydney, N.S., to be known as "Whitney Pier branch," under the management of Mr. W. A. Tucker. The bank has also opened a sub-agency at 332 Portage Avenue, Winnipeg, under the management of Mr. C. B. L. Simpson.

Ontario Estimates Greatly Increased

Budget Speech of Provincial Treasurer Announces Discontinuation of Provincial War Tax—Surplus in 1918—Province Now Has Net Debt of Four Million.

HON. T. W. McGarry, provincial treasurer of Ontario, gave his budget speech in the legislature on Thursday, March 6th. The principal features of his address were the surplus for 1918, the statement that the tax on municipalities would be given up, and the large expenditures planned for 1919. A few years ago Ontario had no net debt; now it has a net debt of $4,000,000. The treasurer said:—

"In twelve months ending October 31, 1918, the province of Ontario received in actual cash from ordinary revenue $19,270,123, as compared with $18,269,000 in 1917, an increase of $1,000,000. The ordinary expenses in 1918 were $17,460,404, compared with $16,500,000 in 1917. Last year, deducting the ordinary expenditure from the ordinary receipts, there was left $1,809,719, the largest surplus in the history of the province. Last year it was $1,750,000. Although the money markets were not of the best, and the demands upon the government during the year were many, the year closed with the greatest cash balance known, of $5,195,244."

Sir William Hearst has been prime minister now for four years, and he proceeded to show how the finances of the province had improved during that period. In 1915 the ordinary revenue was $12,900,000, the net expenditure $12,700,000 and the surplus $271,000; in 1916 the ordinary revenue was $13,800,000, the ordinary expenditure $12,700,000 and the surplus $1,135,000; in 1917 the ordinary revenue was $18,269,000, the ordinary expenditure $16,500,000 and the surplus $1,751,000. The last year the surplus was $1,809,719. This made a total of $4,937,000 in four years, probably more than in any twenty previous years. The increase, he said, was not because of severe legislation or of any attempt to endanger the happiness of the public, but by legislation and taxation whereby the wealthier people, the people who were reaping the benefits from the carrying on of the affairs of the country and the people who violated the laws of the country were made to pay.

Revenue in Detail

The receipts from forests and mines had been increased from $2,700,000 in 1904 to $3,579,000 last year, and the succession duties had been increased from $450,000 in 1904 to $3,157,000 last year. He explained that the latter amount had been greatly increased during the last three years, whereby the province could appoint a commission to ascertain the correct value of estates. As a result the returns from two estates were increased last year by $125,000. The amusement tax for the year had netted $531,000. The receipts from the motor vehicles branch had grown from $1,200 in 1904 to $1,214,093 last year. From the department of game and fisheries they had increased from $47,000 in 1904 to $493,000 last year. The provincial war tax for the last year totalled $2,054,212. Mr. McGarry explained that this surplus did not include any receipts from war tax, because not only had all the money been spent that had been received in that way, but more money had been paid out for war purposes. Increases shown for the year by motor licenses were $280,000; by public institutions, $330,000; by game and fisheries department, $270,000; by casual revenue, $530,000; by the hydro-electric, $227,000; and by the Timiskaming and Northern Ontario, $50,000. Altogether the total increase in those receipts was $1,781,000, and the decreases were $781,000, principally in the department of crown lands.

Expenditures had also increased, he admitted, in response to increased requirements.

The province closed the year, said Mr. McGarry, with a balance in the bank of $5,195,244. The liquid assets were $71,000,000, the total liabilities $75,000,000, and the net debt $4,000,000. The provincial treasurer turned aside for a moment to criticize the United Farmers and their supporters for statements they were alleged to have made, that Ontario's debt was $75,000,000. He cautioned them next time to refer to the other side of the ledger and see what offset the debt.

The province had assets of $71,000,000 which it could convert into cash immediately. In addition to that amount there is $22,000,000 invested in public buildings, most of it during the last fifteen years, which would make a total of $93,000,000. In addition the province had assets of $503,000,000 in natural resources. Altogether, therefore, the assets were $600,000,000, as against a total debt of $75,000,000. The province had never gone into anything that required a large expenditure that it was not felt would result in benefit to the people of Ontario; nor had the government ever gone into any scheme that did not promise a return to the province either immediate or remote.

Borrowings

Mr. McGarry next turned to the matter of loans which he had secured during the last year. During the last fiscal year $15,000,000 had been borrowed. Early in the year it was impossible to borrow money either in Canada or the United States, because huge loans were being floated by the Federal governmnet. Then the Dominion finance minister fixed the interest rate at 6½ per cent., because some provinces were paying more than that. It had been necessary then for Ontario to borrow $2,500,000 at that rate. Since the end of the fiscal year he had been able to do better in raising a loan. He had gone to New York to get $1,000,000, and secured the money at less than 5½ per cent. Exchange was bought on Toronto by us and the net cost to the governmnet for the money for six months was 1.82 per cent. Contrasted with this was the loan floated by the Manitoba government for $1,000,000 at 5½.

In addition to that the government had made another loan, the money being chiefly required for capital expenditure and Hydro-Electric undertakings, at 5½ per cent. for three years, with the privilege to renew it at the end of that time. He said he was convinced that it would be folly for a government at the present time to enter into obligations for a long period at prevailing interest rates. At the end of three years he believed the financial market of Great Britain would be open to the province. Before the war, he said, Ontario had to pay more for money in England than the Dominion, as it was on the trustee list. Because of the British North America Act making it only possible for the Dominion government to disallow provincial acts, Ontario could not avail itself of an amendment made in the British regulations. The matter had been discussed at the conference of provincial ministers at Ottawa last fall, and Sir Thomas White had promised to take the question up with the proper authorities.

Dealing with the various government commissions, the speaker said that last year the Workmen's Compensation Board had dealt with 47,000 cases, and paid out to workmen and widows $3,518,000. The revenue of the Timiskaming and Northern Ontario for the year was $2,800,000, the total expenses $2,390,000 and the net earnings $429,000. The total loss upon the Timiskaming and Northern Ontario up to this time has been something like $900,000; added to that will be a loss this year of between $500,000 and $600,000. "If during 13 years the road has cost us $100,000 a year, and during the next few years it costs us half a million dollars, it was worth undertaking and it will prove that it is valuable to the province of Ontario," said Mr. McGarry. It was desirable that the government should own the road for the opening of that part of the country and the settling of the northern part of the province. He was convinced the road could be sold for every dollar invested in it.

Last year the Hydro-Electric had spent altogether $8,350,000, the chief amounts of which were: Niagara system, $1,781,000; Chippawa development scheme, $5,187,000; Severn

UNION TRUST BUILDING - - WINNIPEG

system, $377,600; St. Lawrence system, $142,000; Eugenia system, $221,000; Central Ontario system, $641,000; Rideau system, $151,000; constructing lines and maintenance, $188,-00. It is estimated that next year the expenditures of the Hydro will be $11,000,000, said the speaker, most of which would be divided between work near Port Arthur, in eastern Ontario and on the Chippawa scheme. Dealing with the demands on the treasury for the coming year, Mr. McGarry said that in addition to the $11,000,000 for Hydro, $4,000,000 would be needed to carry on capital expenditures under way now. Then there will be $3,000,000 bonds maturing in New York in the fall, so that $17,000,000 would have to be borrowed. Mr. McGarry also referred briefly to the success the government had achieved in selling fish to the people at cost. While previously the amount of fish consumed in Ontario amounted to only a few thousand pounds, last year the department had sold 3,000,000 pounds. The people of the province were saved $500,000, and the department had a profit of $14,000.

Mr. McGarry next told briefly of the results of the seed grain loans which the government had made. In 1917 $160,-000 had been loaned, and in 1918, $154,000 was advanced. All told, $93,000 was still unpaid, and there might be some loss in connection therewith. However, the organization of resources and the banks had paid out the money, and they still hoped to collect some of it. The motion picture bureau had been established, and during the year 70 educational films had been made, mostly for agricultural purposes. "I don't know of any class of people to whom has been brought home the actual expenditure of money in their interests as it has been brought home to the farmers," said Mr. McGarry. "If the farmer does not want to go to the agricultural college, we have a district representative in the towns on whom the farmers can call and get information."

Estimates for 1919

The minister next dealt with the estimates for the present year. The total estimated receipts were $18,408,428, divided as follows: Subsidy, $2,396,378; interest on common school funds and investments, $200,000; lands, forests and mines department, $2,750,000; public institutions, $600,000; education department, $63,000; provincial secretary's department, $200,000; motor vehicles licenses, $1,500,000; agriculture, $150,000; casual revenue, $500,000; insurance department, $74,050; amusements tax, $750,000; succession duties, $2,750,000; Corporation Tax Act, $1,800,000; Ontario Temperance Act, $200,000; law stamps, $125,000; game and fisheries, $500,000; Timiskaming and Northern Ontario earnings, $250,000; Hydro-Electric Power Commission interest, etc., $1,-600,000; provincial war tax, $2,000,000.

The estimated expenditures for the fiscal year were $14,-980,406, of which $1,766,500 is on capital account, including $200,000 for an addition to the Parliament Buildings. The $14,980,406, he said, did not include statutory expenditure, and there would be further supplementary estimates, including the $11,000,000 for Hydro-Electric purposes.

Deficit Next Year?

"It may be that, although we have been able to have a surplus of nearly five millions, there will be a small deficit next year," warned Mr. McGarry. "If there is, it will be because we are prepared to carry on with reconstruction and repatriation work to the limit. In addition," continued Mr. McGarry, "there would be $5,000,000 spent on highways, and $5,000,000 under the housing scheme, although the latter would be advanced by the Dominion government, but the province had promised $2,000,000 for that purpose; there would also be $1,000,000 spent on roads, bridges and other construction work, and $1,000,000 on Timiskaming and Northern Ontario extensions."

Referring again to the $11,000,000 estimated for the Hydro expenditures, Mr. McGarry said that the government had behind it the municipalities, and the benefit of their undertakings.

Mr. McGarry reserved his comments on the war tax until the last. In 1915, he said, he had introduced a Provincial war tax bill. At that time he had announced that every dollar secured by the tax would be spent on war purposes. During the four years ending October 31, $8,000,000 had been received, and $8,400,000 had been spent. Up to the present time, however, $9,900,000 had been spent, or $1,100,000 in excess of what had been received. The minister gave the principal details of the expenditure, including: Orpington Hospital, $1,359,000; Canadian Patriotic Fund, $2,000,000; Soldiers' Comforts, $362,000; British Navy and Relief of Belgians, $477,000; production campaigns, $740,000; farm tractors and increased production, $503,000; fuel investigation and control, $108,000.

Supplementary estimates tabled in the legislature on March 6th by Hon. T. W. McGarry totalled $3,370,285. This is an increase of $1,448,498 over last year. This brings the total for the fiscal year ending October 31, 1919, including the main estimates tabled last session, up to $14,980,406. Later in the session further supplementary estimates will be brought down for statutory and Hydro expenditures. The greatest single increase in the estimates is for technical education, $214,000 being provided, as against $98,958, which naturally foreshadows an extension in this department of school training.

Opposition Criticism

Mr. C. M. Bowman, the Opposition financial critic, discussed the treasurer's budget speech on Tuesday, March 11th. He declared that if the budget had been made up as it used to be, a deficit of $1,545,488 would be shown instead of a surplus of $1,800,000. Mr. Bowman first pointed to the manner the war expenditure had been dealt with in the books. During the year the total war expenditure was $3,600,000. The amount of war taxes that came into the provincial treasury was $2,000,000. The difference of $1,591,406 had been placed in capital expenditure. Mr. Bowman objected to this, contending that it was not a proper treatment of the amount to transfer it from ordinary expenditure to capital expenditure, as had been done by the treasurer. In former years, he said, all that expenditure was dealt with as current expenditure.

Mr. Bowman then went on to explain his reasons for saying that a deficit should have been shown this year instead of a surplus. The ordinary receipts as reported by Mr. McGarry were $19,270,123. On the other side of the ledger was the ordinary expenditure, including the total amount for war expenditure (including the amount placed in the capital column by the treasurer) of $19,051,811.

"In order to arrive at a true statement of the actual results of this year's business, according to the manner in which the financial statements were prepared under the Liberal administration and by Col. Matheson for some few years after he became provincial treasurer, I add to that amount the expenditure on additions to public buildings of $475,-146.26; also the amount expended on Northern Ontario development of $645,446.15, and the amount which appears in the statement as having been spent on capital account on highway improvement—$642,208.72, making a total of what I claim is current expenditure of $20,814,612.17, as against $19,270,123.71, or a deficit of $1,544,488.46."

BRITISH COLUMBIA MAY INCREASE COAL TAX

The British Columbia provincial government intends to increase the tax on coal. The tax is now 10 cents per ton, and will probably be made 15 cents. The coal companies will be allowed to retain the privilege of paying either the income tax on profits or the tonnage tax, whichever is the greater.

The Canadian Trade Commission has issued invitations to manufacturers to attend a conference at Ottawa for the purpose of forming groups through which information secured by the commission may be communicated to the trades.

DIVIDEND No. 91

Notice is hereby given that a dividend of two and one-half per cent (2½%) has been declared upon the paid up capital stock of this Corporation for the quarter ending March 31st, 1919, being at the rate of ten per cent. (10%) per annom and that same will be payable on and after the first day of April, 1919

The Transfer Books of this Corporation will be closed from Thursday, March 20th, to Monday, March 31st, 1919, both days inclusive.

ALBERTA TELEPHONES IN 1918

Net Earnings Estimated at $619,918—Exchange and Rural Plants Not Self-Supporting

THE net earnings of the Alberta government telephones in the year 1918 were $619,918, according to the annual report of Superintendent W. R. Pearce, handed in to Norman L. Harvey, deputy minister of railways and telephones, for submission to the legislature. The gross earnings of the system for the year totalled $1,393,543.

From this total are to be taken $529,964 for operation costs, $236,273 for maintenance, and $7,386 for extraordinary repairs, a total of $773,625, leaving the net earnings at the figure set forth above, $619,918.

The total capitalization of all the lines is placed at $9,758,970, divided as follows: Toll lines, $2,136,845; exchanges, $4,057,024; rural lines, $2,687,064; buildings and sites, $504,462; vehicles, $15,134; office equipment, $26,379; material, tools, etc., $332,040.

The plants are divided into the following sections:—

Toll lines, capitalization, $2,348,110; earnings, $590,150; per cent. earned, 25.13.

Exchange capitalization, $4,458,131; earnings, $530,610; per cent. earned, 11.90.

Rural organization, $2,952,729; earnings, $197,345; per cent. earned, 6.68.

Not Self-Supporting

Mr. Harvey, in his report to the premier on the subject in reference to these figures, says: "It will be noticed from the general superintendent's report that the percentages of gross earnings on capital of both exchange plant and rural plant are very low—as a matter of fact, these two plants are not self-supporting. It is hoped, however, by adjustments to be made during the present year, that these discrepancies will be remedied." This statement probably refers to the proposal for increased rates, the decision on which already has been announced. The superintendent's report shows that interest, sinking fund and miscellaneous payments totalled $470,364 for the year, leaving a total earned reserve for the lines of $145,553.

The report also shows there was expended during the year $753,085 in plant additions, of which $215,458 was for exchanges, $98,046 for buildings and sites, $70,175 for toll lines, while $334,043 is credited to stock on December 31st, 1918, the balance being made up of rural lines, custom work, and motor vehicles, and office equipment. Under the statement of capital account there is given $344,188 for stock on January 1st, 1918, and $450,300 for capital expenditure, 1918, a total of $794,403.

ST. THOMAS UTILITIES LOSS

The annual financial statement of the public utilities of the city of St. Thomas, made by the city auditor, shows that the Hydro-Electric for the year 1918 had a profit of $12,223.91, the waterworks $437.95, the municipal railway had a deficit of $11,171.75, and the gas department a deficit of $9,223.54. The amount of taxes not collected are $86,628.27.

TORONTO SCHOOL INSURANCE

The Toronto school trustees have placed insurance on school buildings amounting to a total of nearly three million, not including the insurance on the Technical School, among the hundred and more insurance companies. This must always be done about March 1st every three years. The insurance as placed was made of $2,409,150 on public schools, $17,250 on collegiate institutes, $3,800 on old buildings on the technical school branch sites, $78,000 on High School of Commerce, and $130,500 on general administration.

INCREASE IN NOVA SCOTIA REVENUE

Shown in Provincial Legislature—Increase in Motor Vehicle Tax Probable

AT the afternoon session of the Nova Scotia legislature on March 4th, Premier Murray laid upon the table of the House the report of the department of the provincial secretary during the year ended September 30th, 1918. "The scope of the department," said Premier Murray, "had been much enlarged during recent years, and included a variety of subjects. Last year there had been incorporated 122 companies, a small decrease as compared with 1917, but, with the resumption of normal business conditions, a marked increase in the number of companies applying for incorporation was apparent. In addition to the joint stock companies, the department had the supervision of the incorporation of rural telephone companies, farmers' fruit associations and fishermen's unions. Last year annual registration fees were paid in respect to 977 companies."

Increase Motor Vehicle Tax

Premier Murray said that the province might not be getting sufficient revenue out of automobiles. Only slight legislative changes might remedy this, and he did not think that it would be a hardship upon the owners of motor vehicles. The Automobile Society of Nova Scotia would probably be willing to assume a larger responsibility with the hope that increased revenue would mean greater road improvement.

The report also stated that certificates to act as agents or brokers in soliciting life or accident insurance were issued to 771 persons. There is also found in this report a list of the companies that have paid fees under the Supplementary Revenue Act, and the amounts thereof. A list of the various officials, such as registrars of deeds and of probate, judges of probate, prothonotaries, clerks of the county court and sheriffs, together with the amounts of fees received by them, is included. In addition to the fees so specified, the province received last year as a new source of revenue and collected by these officials the sum of $19,596.

Revenue is Growing

The department revenue for the past year was $268,678.02, which showed the very substantial increase of $101,397.24 over the previous year, and which is the largest revenue that has been collected through the department. The major portion of this increase comes from fees in respect of motor vehicles.

The Crown lands report was laid on the table of the House by Hon. O. T. Daniels. The actual total receipts of the office of Crown lands and for searches amounted to $24,109.53. The expenditure of the department was $8,931.55, thus leaving a net surplus for the year amounting to $15,077.98.

The total amount of taxes under the Land Tax Act for the year 1918 was $31,173.49, and the total amount collected up to the end of the fiscal year was $29,551.25.

CANADIAN NATIONAL RAILWAYS GROW

A further addition has been made to the Canadian National Railway system by the purchase on March 4th of the Quebec and Saguenay Railway. This line, which runs from Murray Bay to Cape Tourmont, Quebec, a length of 68 miles, will presumably be added to the combined system. The sale was arranged with the Quebec Railway, Light, Heat and Power Company, which owns all of the $2,500,000 capital stock, and the $3,000,000 bonds of the railway, but the actual transaction took the form of an auction sale in Montreal on Tuesday. The only bid was that of the Dominion government, the price being $3,489,314. At a meeting of the directors held immediately afterwards, it was decided to accept the government's offer. The bid of the Dominion government was authorized at the last session of parliament.

Tested by Time, Panic and War.

Mortgage Corporation Debentures do not fluctuate in value. Neither time, panic nor war affect them.

Stocks drop. Some disappear altogether. But through all the excitement and strife of war, Standard Reliance Debentures have stood the test for security of principal and permanency of interest.

A $100 Standard Reliance Mortgage Debenture is still worth a $100 and pays 5½% interest in cash on the day it is due.

Mortgage Corporation Debentures

The debentures are issued in amounts of $100 and upwards, and are repayable at a fixed period to suit your convenience.

Thousands of people have invested their savings in these debentures without the loss of one dollar invested.

SASKATCHEWAN MUNICIPAL HAIL INSURANCE

Effort Will be Made to Build Up Reserve Fund and to Find Plan of Supplementary Insurance—Excess Levy at End of Season

THE annual convention of the Saskatchewan Municipal Hail Insurance Association was held in Regina last week. The association decided to take advantage of the new legislation, empowering the use of an excess seeded acreage levy to supplement the flat rate of four cents an acre, provided the flat rate is not sufficient to cover the losses. While the amendment to the act made this a compulsory provision for 1920, and thereafter, its adoption was made optional by the legislature for the current year. The association decided, however, to place a limit of twenty-five cents an acre as an excess seeded levy.

The convention also decided that during years of light losses the directors should commence the accumulation of a reserve fund in order to enable the association to spread heavy losses over a period of years. C. M. Hamilton, of McTaggart, suggested that the aim should be to accumulate a couple of million dollars in the course of time. The resolution read as follows:—

"That the board of directors be empowered to accumulate, when conditions warrant, a reserve fund for future protection."

A third important decision of the convention was to provide, "that the directors be requested to use their best endeavors to have the act amended to permit minorities to have the benefit of the municipal hail insurance;" in other words, the principle of permitting individual farmers in municipalities which vote out of the hail insurance scheme to secure the benefit offered by municipal insurance, was approved. It was also decided that the directors should look into the question of formulating some scheme which would enable the farmers to operate for themselves, as a joint stock company, or in some other form, insurance supplementary to the municipal hail insurance.

Directors' Report

The directors' report gave a brief review of the work of the board during the year just closed, showing that five meetings were held during the year, in addition to seven meetings of the executive. The report spoke of the harmonious work of the board and the satisfactory work of the inspectors, especially those employed on a more permanent basis.

The auditors' report sets forth the following statements for the financial year: Receipts and payments, revenue account, tax adjustment reserve fund and balance sheet. The balance sheet showed a surplus brought forward from revenue account amounting to $39,462.80, but this was more than offset on the other side under assets by an item of $115,324.32 for total arrears of assessment, penalties, etc., due the association from various rural municipalities.

Example on New Amendment

In illustration of the workings of the new amendment, E. G. Hingley, manager of the association, cited the case of a man with 160 acres of land with 120 acres under crop. For this, under the new scheme, he would have to pay 4 cents an acre flat rate on the 160 acres. With 40 acres of the cropped land exempt, he would be liable for the excess rate on 80 acres which would be paid after the losses had been determined. Supposing the excess rate worked out at 5 cents an acre, the total cost of protection on the 160 acres for the year would be $10.40. The suggestion was made that this method of assessing would involve additional labor for the secretary-treasurers, but Mr. Hingley pointed out that the question of the assured's interest was the foremost consideration.

Mr. Hingley said that the farmer might withdraw his land from the operation of the hail insurance act altogether, or he must accept the entire scheme as it stood. In the case of withdrawal he would not be entitled to the protection afforded by the 4 cent flat rate, but, on the other hand, speculators' land, while not subject to the excess seeded rate, could not be exempt from the flat rate of four cents in any municipality operating under the act. He further pointed out that the amount of 40 acres exempt applied to all the holdings of one individual and was not the amount exempt per quarter section. That is to say, a man owning a section of land would still have only forty acres exempt from the excess rate.

The question of the date of making the excess levy and also of payment of indemnities was raised. Mr. Hingley replied that they would probably not be able to make the excess levy until after September 15.

Joint Stock Company

Murdo Cameron, in speaking of the formation of a farmers' joint stock company, or of some other organization among the farmers, to furnish supplementary hail insurance, said that in the past six years nine million dollars had been paid out by the farmers of Saskatchewan to private hail insurance companies and most of this money had gone out of the country. Leaving out of account the amounts paid out in indemnities in 1916, he declared that about 33 per cent. of the total collected had been paid back to the farmers in indemnities; cost of administration was responsible for another 33 per cent., leaving a balance of 33 per cent. as profit for the line companies. Including the 1916 indemnities, out of a total of nine million dollars collected from the farmer the line companies had paid back something over four millions. He did not see why the farmers themselves should not reap the benefit of this money. Mr. Cameron announced himself in favor of the policy of building up a surplus and stated in reply to the argument that this was making provision for a future generation; he said that it should be their aim to leave the world a little better than when they entered it. The successful mutual life insurance companies were providing reserves and in this way were able to set their rates in advance, and there was no reason why the same policy should not be pursued in the operation of hail insurance. He was satisfied that what the people wanted was positive insurance.

Additional Insurance

R. J. Moffat, Bradwell, raised the question of additional insurance. He characterized the amount of money being sent out of the province as insurance premiums as nothing less than a calamity, when this money might be retained in the country and used for development purposes. He was of the opinion that some scheme should be devised to enable the farmers themselves to handle a supplementary insurance scheme. He moved a resolution that the directors be empowered to formulate some scheme to enable the farmers to secure additional hail insurance, and the resolution was carried.

The three retiring directors were re-elected for another three-year term by acclamation, as follows: Murdo Cameron, M.L.A., Saskatoon; J. W. Cairns, Carnduff; and C. M. Hamilton, McTaggart.

ALBERTA SEED GRAIN LEGISLATION

Two seed grain bills passed through committee of the Alberta legislature on February 26th. The Hon. A. G. MacKay, minister of municipalities and health, stated that he knew the guarantee of loans was dangerous for both the province and the municipalities, but that they had to afford some relief. The first bill discussed was entitled: "An act to facilitate the borrowing of money for the purchase of Seed Grain." It permits the adding to any mortgage on land, of an undertaking to repay for a loan advanced for seed grain by the original mortgagee to the person farming the land. The undertaking is to be simple and inexpensive and gives the mortgagee a lien upon the crop for which the seed is advanced.

The other bill is to permit the renewal of notes and guarantees for advances for seed grain to farmers who had crop failures last year and were unable to pay off last year's notes. The renewal note embodies the principal amount equal to the principal and accrued interest remaining due and unpaid on the previous note.

We Own and Offer

7% Cumulative Preferred Shares

Loew's Ottawa Theatres, Limited

PRICE: 100

With each 7% Preferred Share the Purchaser will receive a bonus of One Share of Common Stock.

CAPITALIZATION

	Authorized.	To be Issued.
7% Cumulative Preferred Shares (Par Value, $100)	$1,000,000	$500,000
Common Stock (Par Value, $25)	860,000	650,000

The Cumulative Preferred Stock is preferred both as to assets and dividends, and at the option of the Company is redeemable at $115 per share, and accumulated dividends. No Bond issue can be made by the Company except with the consent of the holders of 66 2-3% of the Preferred Stock outstanding.

This Company has been formed to build a Theatre to supply Ottawa with HIGH-CLASS VAUDEVILLE entertainment, at popular prices, coupled with the latest and best Photo-plays. It will be operated and managed in conjunction with Loew's successful houses in Toronto, Montreal, Hamilton and the principal cities of the United States.

The Toronto, Montreal and Hamilton Theatres were financed and built in the same manner, viz.: By the sale of Preferred Stock carrying a bonus of Common Stock. In the five years of operation the Preferred Stock of the Toronto Company has paid 35 per cent. in dividends (7 per cent. per annum) and the Common Stock 49 per cent., or an average of nearly 10 per cent. per annum, and the net earnings will permit of a further increase in dividends.

ASSETS

LAND—The Company has purchased the property at the southwest corner of Bank and Queen Streets, with a frontage of 100 feet on Bank Street and 200 feet on Queen Street. The excellent location of this property, with entrances both on Bank and Queen Streets, and in the heart of Ottawa's principal retail district, is a valuable asset that should increase in value. Provision for four stores will add not less than $6,000 per annum to revenue from property.

The total cost of land and building will be in the neighborhood of $650,000, which will be financed out of the proceeds of this issue, together with a long-term mortgage for $150,000. The Preferred issue will be amply covered by actual assets.

MANAGEMENT—The success of any undertaking depends essentially on good management. Loew's Ottawa Theatre will be operated under a long-term agreement by the Marcus Loew Booking Agency of New York, who will have entire charge, as in Toronto, Montreal and Hamilton.

EARNINGS

It is estimated that the minimum net earnings will take care of the Preferred Share Dividends at least three times over, with a net surplus remaining of $80,000, which would be equivalent to almost 18 per cent. on the Common Stock.

Advance orders indicate an over-subscription. Further allotments will be made in the order of application. Reservations may be made by telegraph at our expense.

GUELPH TRUST COMPANY

The second annual report of the Guelph Trust Co. has just been made public and will be submitted at the annual meeting to be held in Guelph, Ontario, on May 7th. This company is under the same direction as the Guelph and Ontario Investment and Savings Society, the manager of both being Mr. J. E. McElderry. Assets totalling $310,551 are now shown including mortgages to the amount of $171,550; Dominion of Canada bonds, $65,691; and municipal debentures, $35,331. Apart from the paid-up capital stock of $292,500, the only liabilities are an accrued dividend, a reserve fund of $5,000 and a balance of $5,738 in profit and loss.

The results for 1918 showed earnings of $26,728, including a balance of $3,129 brought forward from 1917; $14,625 was paid out in dividends, $4,798 transferred to reserve fund and a balance of $5,738 carried forward. The company's funds are invested in first mortgages on improved real estate bonds of the Dominion of Canada, and municipal debentures. Its business is, of course, managed in connection with that of the Guelph and Ontario Investment and Savings Society. It is authorized and approved for appointment by the courts as executor, administrator, trustee, receiver, liquidator, assignee, guardian or committee in Ontario. The company's authorized capital is $1,000,000, of which $361,500 has been subscribed. The existence of local institutions, such as these two companies, in comparatively small cities indicate the growing financial resources of these old communities.

BEST YEAR FOR BRANDRAM-HENDERSON

Notwithstanding the larger expenses that must necessarily have occurred during the past few years, the earnings of Brandram-Henderson, Ltd., have steadily increased. During the year 1918 they were the largest on record. This year's statement is for a period of thirteen months in order to enable the company to have its fiscal year correspond with the calendar year. The earnings for thirteen months of $238,133 compare with $221,429 for the year 1917. As compared with the 1914 total, there is an increase of $107,658, or 82.5 per cent. Depreciation charges amounted to $17,500, made up of the usual allowance of $7,500 and $10,000, set aside for a contingency in connection with the Halifax disaster, which may possibly not develop. The bond interest at $24,431 was slightly higher, owing to the extra month in the calculations, while sinking fund requirements accounted for $19,300 and war tax $13,767, leaving $163,135 for the preferred stock, or equal to 32.6 per cent. on that issue, compared with $126,820, or 25.3 per cent., in 1917. In this connection the satisfactory development of the company is again illustrated by the fact that in 1914 the earnings on the preferred were equal to only 15.1 per cent. on outstanding preferred stock of only $350,000 as compared with $500,000 presently outstanding.

The distribution on the preferred stock called for $35,000, leaving for the common stock $128,135, or 13.2 per cent., compared with $91,280, or 9.4 per cent., in 1917. Payment on the common stock called for $38,800, leaving a balance for the year of $89,335, which, added to the previous balance of $412,184, made the total profit and loss surplus at the end of 1918 equal to $501,519, an amount in excess of the total outstanding preferred stock, and equal to 51.7 per cent. of the common stock, compared with $412,184, or 42.4 per cent., in 1917.

The balance sheet shows an increase in the value of plant, etc., from $1,785,920 in 1917 to $1,827,223 in 1918, while investments at $129,772 compare with $3,630 the previous year. In this connection it is pointed out by the president, George Henderson, that the increase is due to the purchase of the Alberta Linseed Oil Co., Ltd., which makes the company self-supporting in the matter of linseed oil, one of the most important raw materials it employs. This subsidiary is capitalized at $300,000, all the stock being owned by the Brandram-Henderson Co., with the exception of five shares allotted to the incorporators.

CITIES SERVICE ISSUE

The offering of $300,000 Cities Service Company Bankers Shares by a syndicate, of which Henry L. Doherty and Company and Montgomery and Company were managers, has been completed by the distribution of the shares offered. The demand for the Cities Service Bankers Shares from the purchasing public was large and the offering was heavily oversubscribed. This issue of Cities Service Bankers Shares was made in response to a general request from brokers and dealers and purchasers of securities that some plan be arranged whereby Cities Service Company common stock might be obtainable in smaller denominations than the shares of $100 par value, which are now selling around $350 per share. Each ten Cities Service Bankers shares represent one share of Cities Service Company common stock of $100 par value which has been deposited with the Bankers Trust Company, New York, under a trust agreement. Holders of Bankers Shares may at any time upon notice surrender their Bankers Shares to the depositary and secure therefor one share Cities Service Company common stock of $100 par value for each ten Bankers Shares surrendered.

OTTAWA GAS COMPLETES NEW PLANT

Arrangements have been completed by the Ottawa Gas Company for the sale to Royal Securities Corporation, Montreal, of $850,000 par value Ottawa Gas Company six per cent. 20-year refunding mortgage sinking fund gold bonds. The new issue is guaranteed absolutely as to principal and interest by the Ottawa Light, Heat and Power Company. Proceeds of the sale will provide the Ottawa Gas Company with funds for completing the construction of its new water gas plant, which has a capacity of 1,000,000 cubic feet per day. It is expected that the new plant will be completed in approximately 90 days, and with its operation the Ottawa Gas Company will possess one of the most modern and up-to-date gas plants in America, with a total capacity of about 900,000,000 cubic feet per annum. The new financing will place the Ottawa Gas Company in the same position as the Ottawa Electric Company, in regard to having in reserve a sufficiently large capacity to ensure its consumers against any interruptions in the supply of gas in Ottawa.

It is probable that the bonds will be offered privately by Royal Securities Corporation within the next few weeks, at which time further details of the financing will be forthcoming.

GLENS FALLS INSURANCE COMPANY

Assets of $7,908,544 are shown in the statement of the Glens Falls Insurance Company, of Glens Falls, New York, as at December 31st, 1918. Of this total about 55 per cent. is invested in bonds and stocks including war bonds of the United States to the amount of over $1,300,000, and war bonds of the Dominion of Canada to the amount of $150,000. Mortgage loans amount to $1,588,434; cash in banks and home office $921,949, and uncollected premiums $772,827. The reserve for unearned premiums is $3,569,543, and this, added to the other liabilities, including capital stock to the amount of $500,000, reaches a total of only $5,331,802. This leaves a surplus of $2,576,742, indicating the excellence of the security from the policyholder's point of view and also from the investor's point of view.

This company was founded in 1849 and is now, therefore, in its 70th year of business. During this period its assets, reserves and net surplus have shown practically a continuous growth. The company writes a general business including fire, marine, automobile and tornado insurance. Its chief agent in Canada is Mr. W. H. George, of Toronto. At the end of 1917 it held assets in Canada solely for the protection of Canadian policyholders to the amount of $285,412, including $193,900 of bonds and debentures on deposit with the receiver-general valued at the market. The reserve for unearned premiums at the same time was $130,843, or carried out at 80 per cent., $104,675. Total liabilities in Canada were $139,894.

300,000

Cities Service Company

Bankers Shares

Representing Its

Common Stock

Bankers Trust Company, New York, Depositary.

We summarize from a letter of Henry L. Doherty, President of Cities Service Company, containing a description of Cities Service Company Bankers Shares as follows:

There has been deposited, under an agreement with Bankers Trust Company, New York, Depositary, 30,000 shares, par value $100 each, of Cities Service Company Common Stock. The agreement provides, among other things, for the issuance of non-voting Certificates, in registered form, to be known as "Bankers Shares," against the Cities Service Company Common Stock so deposited, each such "Bankers Share" representing a one-tenth (1-10) interest in a share of Cities Service Company Common Stock of $100 par value.

Holders of "Bankers Shares" will have the right upon notice to the Depositary to surrender their "Bankers Shares" and receive therefor one (1) share of Cities Service Company Common Stock, $100 par value, for each ten (10) "Bankers Shares" surrendered.

The agreement provides that Cities Service Company or Henry L. Doherty and Company, its Fiscal Agents, shall have the exclusive right to deposit additional shares of Common Stock from time to time against which additional "Bankers Shares" may be issued.

Cities Service Company is at present paying monthly cash dividends of 6% per annum and monthly stock dividends at the rate of 12% per annum on its $100 par value Common Stock.

The agreement will provide for the sale of all stock dividends received on the deposited Cities Service Company Common Stock, and the disbursement of the proceeds from such sale, together with the cash dividends received on the deposited stock, in the form of a cash distribution on the "Bankers Shares" to be issued. At the present dividend rate and market price of Cities Service Company Common Stock, there should be available approximately forty cents on each "Bankers Share' per month.

Distributions to holders of "Bankers Shares" will be payable, under the present dividend policy of Cities Service Company, on the first of each month, commencing April 1st, to shares of record on the fifteenth day of the preceding month.

FORTY-THIRD ANNUAL REPORT

December 31st, 1918.

The Directors of the Guelph and Ontario Investment and Savings Society present to the Shareholders their report for the year ended December 31st, 1918.

After paying interest on deposits and debentures, war taxes, and all other charges and expenses, the net profits for the year amounted to $12[illegible],506.43, to which is to be added the balance brought forward from the previous year, viz.: $41,008.33, making a total of $164,514.76, which has been apportioned as follows:—

Dividend No. 84, paid 2nd July, 1918	$40,796,80
Dividend No. 85, payable 2nd January, 1919	42,302.11
Added to Reserve Fund	50,000.00
Amount carried forward	31,415.85

The Reserve Fund now amounts to $789,435.00, the paid-up Capital Stock is $847,847.90, and the total assets of the Society are $4,-[illegible]5.38.

The securities held by the Society have been carefully examined by the Board and found very satisfactory. Payments on mortgages were well met during the year.

Our investments in the Dominion of Canada War Loans amount to $577,323.57.

The sum of $1,500.00 was subscribed by the Society to the Canadian Patriotic and Red Cross Funds in 1918.

The accounts have been audited each month, and the Auditors' Report is presented herewith.

All of which is respectfully submitted.

A. B. PETRIE, President.

SECOND ANNUAL REPORT

DECEMBER 31st, 1918

The Directors of the Guelph Trust Company present to the Shareholders their report for the year ending December 31st, 1918.

After paying all expenses the net profits for the year amounted to $22,234.05, to which is to be added the balance brought forward from the previous year viz., $3,129.00, and premium on stock $201.67, making a total of $25,363.05, which has been apportioned as follows:—

Dividend No. 2 paid 2nd July, 1918	$7,312.47
Dividend No. 3, payable 2nd January, 1919	7,312.50
Transferred to Reserve Fund (premium on stock)	201.67
Transferred to Reserve Fund from profits	4,798.33
Amount carried forward	5,738.08

The Company's funds are safely invested in first mortgages on improved real estate, bonds of the Dominion of Canada and Municipal Debentures. The securities have been carefully examined by the Board and found very satisfactory.

The accounts have been duly audited, and the Auditors' Report is presented herewith.

All of which is respectfully submitted.

CHARLES E. HOWITT,
President.

Montreal, 15th February, 1919.

To the Shareholders of
BRANDRAM-HENDERSON, LIMITED:

Your Directors submit herewith their Twelfth Annual Report with Statement of Assets and Liabilities and Abstract of Profit and Loss Account for the period ended December 31st, 1918. It will be noted the fiscal year has been changed to coincide with the calendar year and that the period covered by this report is one of thirteen months.

The net profits amounted to $238,133.35, which, with the balance of $412,184.92 carried forward from the previous year, makes the sum of $650,318.27 to the credit of the Profit and Loss Account. Out of this sum has been paid the interest on bonds to September 30th, and a reserve for interest accruing for October, November and December, amounting to $24,431.37; also the dividends of $35,000 and $38,800 paid and accrued on the Preferred and Common Stock at the rates of seven and four per cent. respectively. The sum of $7,500 has been provided for a reserve for depreciation, and a further $10,000, as in the last report, as a special reserve for depreciation by way of provision for a contingency arising out of the Halifax disaster, which we still hope will not eventuate. The reserve for the third year's War Tax of [illegible] has been provided, and the sum of $19,300 has been applied for Sinking Fund purposes, leaving a balance of $501,519.30.

The cost of Upkeep and Renewals at the plants at Montreal and Toronto, although amounting to a much larger sum than in previous years because of the pressure of constant maximum production, has not altered the policy of the past, and all such outlay has been charged to operating expenses.

The increase in the Current Liabilities is due to the extension of the territory covered, both in the home and foreign field, which, with the greater volume of business, has necessitated larger and more numerous stocks, as is shown by the inventories.

Messrs. P. S Ross & Sons, as in the past, have audited the books and accounts, and their report is herewith submitted.

Your Directors are pleased to report that the sales are much in excess of any previous year, and that all Divisions of the Company's operations have contributed to this increase.

The progress made in developing a demand for the products of the Company in the Province of British Columbia has justified the formation of the provincial organization of Brandram-Henderson of B.C., Limited, and the establishment of a depot at Vancouver.

In June last your Directors announced the purchase of the property and plant in Medicine Hat, known as the Alberta Linseed Oil Mills, and the organization of your subsidiary, the Alberta Linseed Oil Company, Limited. This is one of the most important and progressive steps as yet taken, as it makes the Company self-supporting in the matter of linseed oil, which, taking into consideration all the manufacturing operations of the Company is the most important raw material it employs. The Alberta Linseed Oil Company is capitalized for $300,000, all the stock being owned by Brandram-Henderson, Limited, with the exception of five common shares allotted to the incorporators. Against the amount of $299,500, carried under the head of Investments, has been set a depreciation reserve of $173,862.18, so that in keeping with the conservative policy of your Directors the investment is carried in our statement at the exact figure involved in the purchase, in spite of the fact that the dividends accruing up to December 31st, for the seven months period ended then, were $10,915.06, which demonstrates the high earning power of the investment carried in our assets at a net figure of $125,637.82.

The volume of foreign sales, in a great range of the Company's products, has heavily increased during the past year, and a diligent attempt will be made to develop business connections under peace conditions, which, in some cases, owe their inception to a situation created by the great world struggle, now so gloriously concluded.

The Company has established business relations and is conducting export shipments to Australia, New Zealand, South Africa, China, Newfoundland, West Indian Islands, etc. As a means of sounding out further export possibilities, the Company has sent a sales representative to the Lyons Fair, France, where an exhibition has been established of such products as the Company is in a position to offer in European markets and other foreign fields.

For the purpose of consolidating the finances of the Company, meeting necessary Capital expenditures and providing for the continuous [illegible] of the business, your Directors have approved of an issue of $1,250,000 twenty-year six per cent. Consolidated Mortgage Sinking Fund Gold Bonds and are asking your authorization of same at a special general meeting to be held for this purpose. It is proposed that [illegible] shall be issued immediately, $345,000 be put in escrow to retire a like amount of First Mortgage Bonds outstanding, and the balance, [illegible] be held in the Treasury, only to be issued at some subsequent date to the extent of 75 per cent. of the cost on any future Capital expenditure.

Your Directors recommend a continuance of the present dividend of seven per cent. on the Preferred, and four per cent. on the Common Stock, payable quarterly to Shareholders of record one month prior to dates of quarterly payments.

On behalf of the Directors.

GEORGE HENDERSON,
President and General Manager.

[illegible] 1919

Guaranty Trust Company of New York

One of the OLDEST AMERICAN Fire Insurance Companies

GUELPH AND ONTARIO INVESTMENT AND SAVINGS SOCIETY

The annual report for 1918 of this company shows earnings of $278,038, compared with $285,768 last year. The balance brought forward from 1917 was $41,008, making a total of $319,047. The sum of $115,959 was paid out as interest on deposits and debentures. This is about $4,500 less than last year. The other items of expenditure were practically the same as in 1917; $50,000 was again transferred to reserve fund and $83,000 paid out in dividends. The amount carried forward is $31,415, compared with the balance of $41,008 brought forward. The assets and liabilities statement shows the following changes as compared with last year:—

	1917.	1918.
Savings deposits	$ 581,836	$ 569,252
Currency debentures ..	1,943,481	1,818,881
Sterling debentures	171,184	162,536
Mortgages, government bonds and municipal debentures	3,747,032	3,817,811
Total assets	4,353,513	4,409,255
Surplus assets (liabilities to shareholders)	1,602,186	1,711,001
Reserve fund (included in above)	739,435	789,435

This statement will be submitted at the annual meeting to be held in Guelph on May 7th. The directorate of the company, which has been in existence since 1876, is composed of well-known local men, and under the management of Mr. J. E. McElderry, the company has enjoyed a reputation for careful handling of funds. The falling off in deposits and debentures in 1918 was, of course, due to the financial conditions and was experienced by practically all loan companies in Canada.

GUARANTY TRUST GROWTH

Total resources of $754,422,617 are shown in the financial statement of the Guaranty Trust Co., of New York, as of February 21st, which has just been issued. Compared with the statement of March 14th, 1918, the nearest corresponding date last year, the resources show an increase of $51,639,789. Total deposits on February 21st, 1919, were $582,219,167.83; on March 14th, 1918, the deposits were $537,363,116.82.

TWO LOEW'S THEATRE ISSUES

Two firms of Toronto brokers are offering $500,000 preferred stock, par value $100, in Loew's Ottawa Theatres, Ltd. This organization has secured a site in Ottawa at the corner of Bank and Second Streets, and will immediately erect a theatre thereon, which will be one of the best on this continent. The Toronto, Montreal and Hamilton theatres of the Loew circuit were financed and built in the same manner—namely, by the sale of preferred stock carrying a bonus of common stock. These have all been successful. The Ottawa issue is being offered at par with a bonus of one share of common stock, par value $25, with each share of preferred. A considerable proportion of the issue has already been sold. The firms making this offering are Graham, Sanson and Co. and T. A. Richardson and Co.

The other issue at present on the market is that of Loew's London Theatre, Limited, 7 per cent. cumulative preferred stock. These shares have a par value of $10 and are offered by the Oxford Securities Corporation, at par with a bonus of 25 per cent. common stock. The London company has an authorized capital of $500,000 preferred and $500,000 common, of which $300,000 preferred and $500,000 common is to be issued now.

The Labor Conference in Halifax last week decided in favor of an Independent Labor party for Nova Scotia and for a federation of the labor unions of the province. The delegates also pronounced in favor of a labor newspaper, to be a weekly at first and ultimately a daily.

Fire Underwriters' Association Vindicated

Justice Masten, Reporting on Fire Insurance Business in Ontario, Commends Work of Canadian Fire Underwriters' Association—Finds Cause of High Rates in Losses, Not in Profits of Companies—Recommends Discretionary Control by Provinces

MR. JUSTICE MASTEN, K.C., who has for over a year past been engaged for the Province of Ontario in making an investigation into fire insurance, at the instance of Hon. I. B. Lucas, attorney-general, has prepared a report of about eighty pages. This report has just been submitted to the Ontario Legislature for consideration. It will be printed shortly. Suggestions and recommendations embodied in the report are summarized as follows:—

"1. Supervision and control by the province of the Canadian Fire Underwriters' Association.

"2. Similar supervision and control of all other rate-making organizations in the Province of Ontario, including associations of insurers writing automobile, casualty and boiler insurance.

"3. Prohibition of any rate which discriminates unfairly between risks of essentially the same hazard with power to the superintendent to cancel a discriminatory rate.

"4. Power to the superintendent to enquire, mediate and report in respect of any difference respecting any insurance matter.

"5. That all companies be required to keep their records in such a way as to classify the business done by them, and to show in their annual returns to the department not only the amount of business done in the province, and their underwriting profit made, but also the profits made in each of the several classes of risks assumed by them, and for this purpose that a form of return be agreed upon and settled with the Dominion Insurance Department, so that the return made to Ottawa and to Toronto may be identical.

"6. A real scrutiny and examination by the insurance department of every applicant for a license as agent, broker or adjuster as to his fitness. Refusal to grant a license to be subject to an appeal to a judge.

"7. Power to the superintendent of insurance to cancel the license of any agent, broker or adjuster for cause.

"8. The annual fees payable by agents to be increased to a minimum of $5 throughout the province and graded upwards from that figure, according to the size of the town or city to a maximum of $100, applicable to and uniformly throughout the city of Toronto.

"9. Consideration by the legislature of the desirability of limiting commission by statute.

"10. Appointment of a board of business men and experts to co-operate with the fire marshal and make recommendations, which may be given the force of law by order-in-council with respect to building regulations and fire prevention generally.

"11. Additional inspection risks, either by the companies or under the direction of the board and fire marshal, or both.

"12. Compulsory annual stock-taking in certain cases, and deposit of the stock sheets with an independent custodian outside warehouse or factory.

"13. Compliance with certain of the suggestions of the Mutual Fire Underwriters' Association.

"14. Providing that where any action is brought to recover on a claim for loss, all insuring companies shall be joined as defendants in one action.

"15. A general revision of the Insurance Act.

Reported But Not Recommended

"On the following subjects, the facts were investigated and are submitted in the report without recommendation:—

"The imposition of a tax on all unlicensed insurance.

"A bill authorizing reciprocal of inter-insurance without deposit.

"Automobile insurance.

"Casualty insurance.

"Boiler insurance.

"An act respecting individual liability for fires.

"A suggestion that policies of unlicensed companies writing insurance in Ontario should be deemed by statute to contain the clause set out in this report.

Adverse Recommendation

"I advise that the following suggestions be not adopted:—

"Suggested form of a uniform policy.

"Prohibition of insurance of property in Ontario through agents resident outside the province."

Economy in No Insurance

He points out that the amount of property insured in the province totals $1,700,000,000, and in addition insurance to the amount of $137,000,000 is placed with foreign unlicensed organizations. The premium income of all licensed companies in 1917 amounted in round figures to $13,500,000, and the losses upon property insured by these companies to $8,500,000. Regarding the suggestion for the abolishing of fire insurance and making every person bear his own loss, His Lordship considered that at least $5,000,000 per annum, or the difference between the amount of premiums paid to the insurance companies and the amount returned to the public for losses, would be directly saved, and there is little doubt that carelessness, which is so largely responsible for the deplorable fire loss, would be considerably checked.

Not In Favor of State Insurance

With regard to the other suggestion of state insurance, he believed it would do away with much overhead expense and adjustment and settlement of losses could be combined with investigations made by the fire marshal, and that compulsory insurance would mean every person bearing a fair share of the burden. "Great as are these advantages," says the report, "I am clearly of the opinion that government insurance of property is neither desirable nor practicable in Ontario at the present time." The reasons given are the involving of a reinspection by experts of all risks, lack of data available for determining a scientific system of rating and because such a course would not merely destroy the present business but dislocate business in general in many ways. For the same reasons, Justice Masten considers it undesirable to establish a rating bureau, since the fixing of insurance rates by the province involves the question of moral risk, coupled with the right of the insurance companies to refuse the risk.

In view of the fact that the conclusion is reached that insurance is to be carried on by companies, His Lordship then dealt with the difficulties and objections experienced, whether there is a combination among the insurance companies to fix and maintain rates, whether the rates are exorbitant, whether effective competition exists, and how the government can best exercise control and supervision.

Commends Underwriters' Association

As to the methods of fire insurance, the investigator files the fire marshal's report, and as to any inclination of the companies to fix rates, he outlines the objects of the Underwriters' Association, and finds that this association "has been and is to the advantage and in the interests of the public, and that such a combination tends strongly to maintain the solvency of the companies, to stabilize rate, to eliminate discrimination and to assist in controlling the expenses of carrying on the business. I find that the Canadian Underwriters' Association, though a combination which largely controls the premium rates in Ontario, ought not to

be abolished or hampered in its legitimate work, but being a combination, ought to be fully subject to supervision and control by the state."

Regarding the local situation in Ontario, His Lordship reached the conclusion that it is not in the interest of the public to require that schedule of rates be filed by the insurance companies with the superintendent, with the limited function of determining the question as to whether the rate was or was not discriminatory. He recommends instead "That neither the Canadian Fire Underwriters' Association nor any other rate-fixing bureau or association shall be required by law to file their schedule of rates on any specific rate as a preliminary to the placing of insurance, but that the superintendent of insurance be empowered on written complaint by the insurer or on his own motion to require the Canadian Fire Underwriters' Association or other bureau or any insurance company to file details showing how the particular rate in question is made up and any other information which he deems necessary or desirable."

He further advises: "Giving power to the superintendent of insurance on written complaint or upon his own motion to review any rate fixed by the Canadian Fire Underwriters' Association, or by any other rating bureau or association for insurance upon property within the province for the purpose of determining whether same is discriminatory, and with power to the commissioner to order the cancellation of the rate for that cause.

Conciliatory Function

"That the superintendent of insurance shall be empowered to inquire into any other question which either the insured, the insuring company or any other rating bureau or association may bring before him, both as to whether a rate is unjust, apart from discrimination, and also in regard to any other question arising out of the relationship or proposed relationship of the parties in reference to the insurance in question, but in the exercise of this power the superintendent should not make an order, but should act like a board of conciliation, affording an opportunity to both parties to explain and exploit their points of view.

"The facts and the findings of the superintendent should be reported and stated by him in his annual report. If these reports indicate an improper situation on the part of the companies or the association, legislation might then be enacted upon the evidence so accumulated to cure the evil. Such a course of procedure would, it seems to me, disorganize business as little as possible, and would be more in the public interest than any more drastic legislation."

No Profiteering Found

As regards the profits of insurance companies, he finds that "having regard to the world-wide nature of the fire insurance business, to the keenness of competition, and to the fact which I have ascertained that those who are most intimately associated with the business rarely invest their surplus capital to any great extent in the stock of fire insurance companies, I incline to think that the profits are not excessive. If a legislative remedy were undertaken it would necessarily assume the form of establishing maximum rates fixed by the superintendent of insurance. For reasons stated elsewhere I am of opinion that the situation as disclosed does not at present warrant any such legislative action. I recommend that all companies be required to keep their records and make their returns in such form that the profits or losses on Ontario business are ascertained and that these be stated in the annual returns."

Higher Agents Fees

While pointing out that the matter of the reduction of expenses of companies was deserving of the fullest consideration by the legislature, the chairman gives also as his opinion that only fit persons making a business of writing insurance should receive a license and that those agents who prove unworthy to be trusted should have licenses cancelled. "I am of the opinion also that the licenses granted by the department should permit an agent to act only in certain classes of insurance," says the report. "I am of the opinion also that the fees payable by the licensees ought to be increased to a minimum of $5 in all classes throughout the province with a graded increase in towns and cities up to $100 as a minimum in the city of Toronto.

Adjusters

"I would also recommend similar provisions with respect to insurance adjusters. In the states of New York and Massachusetts the Insurance Act draws quite a clear distinction between agents and brokers, the agents representing the companies and their acts binding the companies, while brokers are in all cases representative of the insurer. It may well be a proper subject for consideration by the legislature whether a similar distinction should be made in our act; in that case the conditions under which a broker may procure a license should be similar to the provisions with respect to the granting of a license to an agent. The ruling of the superintendent of insurance refusing or cancelling a license should be subject to appeal to a judge of the High Court on originating summonses."

Fire Prevention the Remedy

On the question of fire prevention and the reduction of fire losses, the latter is, in His Lordship's opinion, the main avenue along which progress must be made if the burden of fire insurance premiums is to be reduced. After showing that Ontario's total loss for 1917 aggregated $11,538,429, or $4.61 per capita, which greatly exceeds any other country, he expresses the opinion "that a general diffusion of effort in attempting to prevent all fires is less likely to accomplish reduction of fire loss than a concentration of effort in preventing and controlling the spread of fires in situations where large losses are likely to occur."

His Lordship, after reviewing the various influences brought to bear from educational, financial and compulsory standpoints to reduce fire losses, makes recommendations under the heads of prevention of fires, prevention of fire losses and the placing of responsibility.

With respect to the first head, he deals with powers of investigating fires, building supervision and provincial inspection, additional inspection of risks, and suggests the creation of a central provincial board of practical experts and business men, with a staff of inspectors to enforce its regulations, such enforcement to cover the local municipal regulations as well as the provincial requirements. Dealing with the second head, the chairman submits the important recommendations along this line presented to him by a representative of the Associated Fire Chiefs of the Dominion. With regard to the third head, the placing of individual responsibility for fires, His Lordship suggests the draft act of the National Fire Protection Association, with a Canadian branch, receive the careful consideration of the legislature.

Miscellaneous Insurance

In concluding his report His Lordship merely recommends for careful consideration the question of taxing of premiums to unlicensed companies which are outside the province, makes no recommendation in regard to reciprocal or inter-insurance; states that it would be desirable with respect to automobile insurance to wait till the parties interested have more fully developed a form of contract as to the terms of a policy, when it will be in order for the legislature to enact statutory conditions; refers similarly to casualty insurance as to automobile insurance, and recommends no legislation regarding boiler insurance.

His Lordship finds with regard to auto casualty and boiler insurance a similar association to the Fire Underwriters' Association, to establish and maintain rates, and recommends "that the statutory provisions to be drawn up in this regard should be of a general character, applicable to all insurance in the way of supervision, and control should be the same in respect of these three classes of insurance as with respect to fire insurance."

His Lordship is unable to recommend in connection with the Canadian Bar Association request regarding uniformity

of insurance laws. He does make recommendations in regard to actions to recover claims against insurance companies, first, that among other amendments to the Insurance Act it be enacted where any property is destroyed by fire all insurance companies against whom a right of action is alleged to exist must be joined as defendants, and that where the value of the property of a factory or mercantile risk exceeds $5,000 it shall be obligatory upon the person insured to take stock annually, and a stock sheet duplicate delivered to the banks

Views of Insurance Men

Insurance men express general satisfaction with the report "I think that for a layman he has dealt very well with a very technical and intricate subject," said Mr. John B. Laidlaw, of the Norwich Union, "and at any time that I attended the sessions he seemed desirous of getting at the facts in an eminently fair way. I quite agree with him that the chief cause of a high insurance rate is the very heavy losses, and I am thoroughly in accord with his suggestion that the time has come for the government to cease persuading people to be careful and to oblige the careless to be careful. The whole aim of the underwriters has been to avoid discrimination. They have nothing to conceal. They would have no objection to showing at any time that a rate was a reasonable one, and if they could not show it, I am sure they would be glad to change it."

"I am glad to see," said Mr. Laidlaw, "that Justice Masten recognizes the fact that in the past the fire insurance men have been pioneers in fire prevention, but that the time has come for the public to take a hand, too. I think he has prepared a very masterly report, which will probably be considered a classic on the subject of fire insurance."

"We have shown the indispensable character of the Underwriters' Association, if you are going to do insurance at all," said John A. Robertson, secretary of the association. "Provincial control is suggested, not because there was any impropriety, but on the general principle that in a large body there should be some supervision. This was shown by the tenor of the remarks all through the investigation."

Manufacturers' View

A different view was expressed by F. W. Wegenast, of the Manufacturers' Association, to *The Monetary Times*:—

"The position of the Canadian Manufacturers' Association," he said, "has been sustained on all points. The commissioner finds that the Canadian Fire Underwriters' Association exercises a substantial control over rates in Ontario, and that the non-tariff companies do not afford any substantial competition with the tariff companies. The proposal of the insurance companies of a tax of 10 per cent. on unlicensed insurance by way of 'protection' to licensed companies is distinctly negatived. The commissioner holds that nothing should be done which would hamper competition of unlicensed insurance, which is the only effective means of controlling the rates of the tariff companies. The association was frankly sceptical as to the efficacy of government control in the matter of rates, and in this it is sustained by the commissioner, who, though he recommends a form of tribunal to hear complaints of discrimination, points out that the insurance company is not in the position of a common carrier, who is obliged to accept the business offered. Moreover, there is always the moral hazard to differentiate risks. The complaints that manufacturers have been subject to arbitrary ratings and rulings are also sustained by the finding of the commissioner that the Canadian Fire Underwriters' Association has not been sufficiently ready to justify its ratings and rulings."

The minister of finance gives notice of a resolution providing for the weight, fineness, etc., of the bronze cent. This is necessary in order to make provision for the coinage of a smaller cent piece, it being announced some time ago that this would be done. The larger coins now in circulation will continue to be current and a legal tender.

ONTARIO METALLURGICAL PRODUCTS IN 1918

Output Reaches Highest Point—Increase of Eleven Per Cent. Over 1917

According to the annual report of the Ontario Bureau of Mines, which was presented to the legislature on March 5th, last year the value of the mineral and metallurgical products for Ontario exceeded that of 1917 by $8,071,888, or over 11 per cent., and marked much the highest point yet recorded in the history of the province. This increase was due to larger production and in part to higher prices. This was especially true of nickel and copper, which were essentially war materials. The signing of the armistice was instantly felt, for the demand for war metals decreased. The effects, the department points out, will be noticeable in the production statistics of 1919.

The gold output in 1918 totalled 411,879 ounces, worth $8,502,543, or a decrease of 2 per cent. as compared with 1917 production. However, the outlook for 1919 is bright. There was an increase of $1,181,710 in the value of silver mined in 1918, but a decrease of 2,070,428 ounces in output as compared with the previous year. This was due to the enhanced prices for silver, the average price for the years 1917 and 1918, respectively, being 81.417 and 96.772 cents per fine ounce.

During the past year 1,643,040 tons of nickel-copper ore were raised. Ores smelted totalled 1,559,892 tons, from which 87,184 tons of Bessemer matte were produced, containing 45,886 tons of nickel and 23,483 tons of copper. Of the total of 198,882 tons of iron ore shipped during the year, 91,609 tons went to Ontario blast furnaces and the balance to the United States. The production of ferro-alloys in the electric furnace is a growing industry. As compared with 1917, shipments of molybdenite ore and concentrates fell off considerably, owing to increased mining costs. Likewise, non-metallic products show a decrease of $1,216,047 in value. Crude petroleum shows an increase in production of 85,769 barrels, due largely to the new Mosa field in Middlesex county, which contributed 108,908 barrels, or 37 per cent., of the total output. Natural gas shows marked decrease in output, due to the regulations placed upon the industry. The supply is now being conserved for domestic uses chiefly.

INCOME TAX MINIMUMS TOO LOW

Speaking before the Open Forum in Hamilton, Ont., on March 2nd, Dr. Horace L. Brittain dealt with the critical subject of taxation. He said the proper method of taxation was to make each person pay for what he received from the community. In the police and education departments it was difficult to do this, but if it were not done where it could be, other citizens had to make up the deficit. Every dollar taken above the amount needed was confiscation, and was morally wrong. He advocated the issue at short intervals of financial statements that could be understood, instead of the involved, camouflaged statements that were issued by all governments. Dr. Brittain then gave some statstics, showing the costs of taxation in Toronto and Hamilton. Hamilton's uncontrollable expenditure had increased in greater proportion during the past four years than had Toronto's, and Hamilton's council charges were higher. The speaker attacked the word "uncontrollable" as used in connection with expenditures, and said that no expenditure was uncontrollable if properly managed. If a tax rate of 30 mills were required it should be levied. If this were not done it would be 40 mills later on, when it should be only 30, because of bad management.

Discussing income tax, Dr. Brittain stated that he thought no income under $2,000 should be taxed, even for single men. He believed in making the rich people bear the greater burden of taxation, and thought appeals against assessment should go to an expert, rather than to courts of revision as at present constituted. He also thought assessors should be paid higher salaries, so that thoroughly competent men could be secured to do this work.

Lown, J. H. Ingram, A. Ferguson.

CANCELLATION OF HAIL INSURANCE POLICIES

Companies writing hail insurance in Manitoba have opposed a clause in the bill before the provincial legislature which provides for the cancellation of the policy by the farmer by giving notice to the company by registered letter and surrender of the policy. In this case the company was to retain the amount necessary to cover the period while the insurance was in force and repay to the insured the balance of the premium.

Chas. Heath, superintendent of insurance, said that this clause had been adopted in Alberta and Saskatchewan, and insisted upon the rights of termination of a policy for legitimate cause. A farmer's crop was frequently destroyed by other causes than hail, and if the victim had to continue the policy on a destroyed crop it would be an additional hardship. D. W. McQuaig, representing the Manitoba Farmers' Mutual Hail Insurance Co., protested against this clause, contending that the policy must remain in force during the year in which the crop was covered or his company would be forced out of business. Eventually, the committee decided to refer the clause to Superintendent Heath and the Farmers' Mutual for a satisfactory solution of the difficulty.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt for the week ended March 7th, 1919:—

O'Brien Mine, 64,000; La Rose Mine, 65,909; Trethewey Mine, 81,101; Dominion Reduction Co., 66,000; McKinley-Darragh-Savage Mines, 86,486. Total, 363,496.

The total since January 1st is 3,799,490 pounds, or 1,899.7 tons.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended March 6th, 1919, compared with the corresponding week last year:—

PULP AND PAPER EXPORTS

Canadian exports of paper, pulp and pulpwood for December, 1918, reached a total value of $7,235,699, as against $5,930,162 for December, 1917, an increase of $1,325,537. For the first nine months of the fiscal year, their value amounted to $72,624,428, as compared with $54,509,136 for the corresponding period in 1917, a gain of $18,115,292. The details follow:—

Month of December.	1917.	1918.
Paper and manufactures of	$3,424,906	$3,884,759
Chemical pulp	1,562,549	2,314,212
Mechanical pulp	337,851	288,364
	$5,325,306	$6,487,335
Pulpwood	604,856	748,364
Total	$5,930,162	$7,235,699
Nine months' period.	1917.	1918.
Paper and manufactures of	$27,564,980	$33,380,632
Chemical pulp	14,634,884	24,074,950
Mechanical pulp	5,374,653	3,673,618
	$47,574,517	$61,029,200
Pulpwood	6,934,619	11,595,228
	$54,509,136	$72,624,428

DEBENTURES FOR SALE

TOWNSHIP OF FITZROY

Sealed Tenders will be received by the undersigned up to noon, Friday, March the 28th, 1919, for an issue of seven thousand dollars ($7,000) debentures, bearing 6% interest and payable in 20 equal annual instalments, for the purpose of buying a site and building a one-room School House in S.S. No. 8, Fitzroy Township.

WM. BOYLE, Clerk.

Fitzroy Township, Kinburn P.O., Ont.

QUEBEC ROMAN CATHOLIC SCHOOL COMMISSIONERS

Public notice is hereby given that the Board of Roman Catholic School Commissioners of the city of Quebec calls for tenders for the sale of $400,000.00 of its debentures payable in ten or thirty-five years.

All suggestions as to sinking fund and interest will be considered.

The capital and interest shall be payable at Quebec, Montreal, Toronto, or New York.

The city of Quebec will guarantee the capital and interest of these debentures and every tender must be handed to the undersigned Secretary-Treasurer before eight p.m., on the 24th March instant.

Each tender must be accompanied by an accepted cheque for $4,000.00 accepted by a Canadian Bank.

ANTOINE C. TASCHEREAU,
Sec.-Treasurer of the Board of Roman Catholic School
Commissioners of the city of Quebec.
Parliament Buildings, Quebec, P.Q.

Quebec, 5th March, 1919.

PROVINCE OF MANITOBA

TREASURY DEPARTMENT

TENDERS

The undersigned will be pleased to receive tenders up to and including the 20th instant, at noon of that day, for an issue of Provincial bonds amounting to **$1,580,000.00.**

Term.—15-years.

Interest Rate.—5½%, payable half-yearly at Winnipeg, Toronto, Montreal or New York.

Denominations.—$1,000.

Issue to be dated April 1st, 1919.

Definitive Bonds can be delivered within one month from the date of receiving tenders, and, if it is any advantage to the purchaser, Interim Bonds can be delivered within ten days.

The issue will be a direct obligation of the Province and a charge upon the Consolidated Revenues thereof.

The Bonds will be delivered to the purchaser in Winnipeg, but the proceeds of the issue may be deposited to the credit of the Government in Toronto, Montreal or Winnipeg, at the option of the purchaser.

It is clearly understood that the Government will not be under any obligation to accept any of the tenders unless the most advantageous offer is satisfactory to the Administration.

EDWARD BROWN,
Provincial Treasurer.

Winnipeg, March 7th, 1919.

TOWN OF VERMILION

Tenders will be received by the Town of Vermilion, Alberta, for $5,000.00 six per cent. twenty-year Local Improvement Debentures. These debentures are guaranteed by the town at large. Tenders will close at noon, March 31st, 1919

H. P. LONG, Secretary-Treasurer.

Vermilion, Alberta.

TOWN OF WESTON

Tenders will be received by the undersigned up to and including March 28th, 1919, for the purchase of $60,000 Town of Weston 6% thirty-year, annual payments, Public School Debentures. The highest or any tender not necessarily accepted.

A. J. PRITCHARD,
Treasurer,
Town of Weston.

March 11th, 1919.

Quebec, Que.—The Board of Roman Catholic School Commissioners of the city of Quebec is calling for tenders for the sale of $400,000 of its debentures, payable in ten or thirty-five years, up till March 24th. The city of Quebec will guarantee the capital and interest of these debentures.

Hamilton, Ont.—Tenders will be received by S. H. Kent, city clerk, up till March 20th for the purchase of $517,000 debentures, viz., $400,000 at 5½ per cent. interest and $117,000 at 6 per cent. interest, payable half-yearly. Separate tenders for each amount. The whole payable in twenty annual instalments.

Manitoba.—The province of Manitoba is calling for tenders up till March 20th for the purchase of $1,580,000 5½ per cent. 15-year bonds. The issue will be a direct obligation of the province and a charge upon the consolidated revenues thereof. Further particulars can be obtained from the advertisement, which appears on another page of this issue.

OFFERING WINDSOR BONDS

The National City Co., of Toronto and Montreal, is offering $115,000 city of Windsor, Ont., 5½ and 6 per cent. bonds, the 5½'s being for local improvement purposes and the 6 per cents. being for patriotic and school purposes. The bonds, which are offered at prices to yield 5½ per cent., are due serially March 1st, 1920 to 1949, inclusive.

BRANDON SEEKING LEGISLATION

Legislation will be asked by the city of Brandon as follows:—

1. To empower the city to capitalize its floating debt of $400,000.

2. To alter the date for the final payment of the school levy from January 31st of the year following to December 31st of that year. To make unoperative for the year 1919 the clauses of the Municipal Act, confining the city's levy to 20 mills, this not including the school levy, the municipal commissioner's levy or local improvement assessments.

Legislation will also be asked to empower the city if necessary to submit a by-law to the people for a $250,000 debenture issue for the purpose of erecting a memorial to the heroes of the great war. Legislation is also to be prepared to empower the imposing of a poll tax.

A meeting of the Guelph city council was held on March 5th for the purpose of giving the required readings to a by-law which goes to the people, giving free taxation for ten years and a loan of $50,000 for fifteen years, repayable in ten instalments, with interest the same as paid by the city, to the Partridge Rubber Footwear Co., which is to erect a building there.

MAY SELL BONDS LOCALLY

It is estimated that approximately $200,000 will be required for the carrying out of a school enlargement programme for Fort William. There is the question of raising the money after the debentures are issued. The mayor is of the opinion that if they were made 6 per cent. debentures, and sold at par, and issued in denominations of $50 and $100, it would be an excellent opportunity to sell them to their people over the counter.

WILL TRANSFER BONDS

For the convenience of holders of fully registered bonds of the Victory Loan of 1918 the department of finance is prepared from the 10th to the 31st of March, 1919, to make transfers of fully registered bonds into coupon bearer bonds. On account of the necessary work to complete the issue of the loan the department will not be in a position until the 1st of May, 1919, to make transfers of fully registered bonds from one holder to another, or to transfer coupon bearer bonds to fully registered bonds.

PROVINCE OF MANITOBA FINANCES

The balance sheet of the province of Manitoba as at November 30th, 1918, shows capital liabilities of $36,500,000, in addition to which there are indirect liabilities, consisting principally of Canadian Northern Railway guarantees, to the amount of $29,122,689. The amount of provincial stocks and bonds outstanding, which, of course, forms the principal item in the capital liability, is $33,890,870. Provincial capital assets are valued at $51,045,497, so that there is a capital surplus of $14,415,993. The assets include the capitalized subsidy received from the Dominion government. Current assets are $3,601,927, exceeding current liabilities by $239,000.

The statement of revenue and expenditure for the year shows a revenue of $7,631,548, or slightly more than the estimated revenue. The expenditures were $7,308,681, leaving a balance of $322,867.

TORONTO WILL BORROW NEARLY FIVE MILLION

Capital expenditures to the amount of $4,937,356 are planned for 1919 by the city of Toronto. This will mean an additional interest charge of $271,555 and principal instalments of $246,552. These figures are from an estimate of the finance commissioner, submitted to the Board of Control on March 4th.

The expenditures will be on civic car lines, local improvements, schools, water systems, etc. The city's debt will be increased by about $1,500,000, the difference between the new borrowings and the amount paid off annually, which is about $3,500,000. The city's tax rate will probably be in excess of 30 mills, although an effort is being made to keep it down to that figure. Last year the rate was 31.5 mills.

Pending the passage of the estimates by the city council, Toronto will make application to the Ontario legislature for power to issue debentures amounting to $1,500,000 without having first secured the consent of the ratepayers. In spite of the fact that this by-law was not advertised six weeks prior to the session of the House, it is believed that the bill can be put through, as there is the precedent of the private bills committee giving the city power two years ago, to issue debentures amounting to $800,000. The issuing of these debentures is to cover works department capital charges. Even though the bill is passed by the legislature, the work may not be proceeded with this year; the idea in asking for the legislation is to be in readiness with work if the unemployment situation becomes acute.

INVESTMENT · SERVICE

Industrial Progress and Peace

As we see it. Canada's industrial response to war's demands was but a preparation for greater progress in times of peace.

During the war we financed such companies as Nova Scotia Steel & Coal Company, Canadian Car and Foundry Company, Riordon Pulp and Paper Company, Mattagami Pulp and Paper Company, Canadian Salt Company, and others.

Now, with peace, our facilities are more than ever at the disposal of Canadian corporations who desire financing.

We stand ready also to serve discriminating Investors who wish to purchase Mortgage Bonds of representative Canadian industries.

Write for our Investment recommendations.

RIORDON PULP AND PAPER RESULTS

As was intimated in these columns recently, the annual statement of the Riordon Pulp and Paper Co., Ltd., for the year 1918 shows net earnings of over $1,200,000. The exact figures are as follows:—

Net earnings, after deduction of expenses of manufacturing, etc.	$1,225,597
Provision for exhaustion of timber areas	208,215
Balance	$1,017,382
Income from investments and interest	425,663
	$1,443,046
Depreciation and interest	556,483
Balance of profit	$ 886,563
Brought forward from 1917	1,851,813
Dividends	520,000
Surplus	2,218,376

The balance sheet now shows total assets of $12,779,354, including timber limits, land, buildings, etc., valued at $7,363,788; investments in the capital stock of the Ticonderoga Pulp and Paper Co. and other companies and advances to the Kipawa Fibre Co., $2,207,017; and current assets of $2,819,380. At the end of the year there had been $2,435,000 of the 6 per cent. 30-year first mortgage debentures issued, of which $401,500 were held in the treasury or redeemed by sinking fund, leaving a total outstanding of $2,033,500. The interest on this amounts to slightly over $120,000, so that the profit for the year, after paying manufacturing costs, depreciation, interest on bank loans, etc., was about eight times the amount required for bond interest.

TORONTO PURCHASES METROPOLITAN RAILWAY

The city of Toronto has finally acquired that section of the Metropolitan Railway immediately north of the city, at a purchase price of $590,000. The company, however retains a franchise giving them the right to have packages transported over the line until the city acquires the Toronto street railway.

The programme of the city, as outlined, includes the establishment of a terminal at the Union Station for the transhipment of freight, and the paving and double-tracking of the section acquired immediately the agreement is ratified. It is hoped that the absorption of the remaining part of the Metropolitan, either by the Canadian National Railway or the Hydro, may follow within the course of a few years.

Under the provisions of the agreement the city is to bear the cost of power for shipping freight cars over its lines between the hours of midnight and 6 a.m. The purpose of this clause is to encourage the handling of freight during the morning hours and so avoid congestion of traffic. Terminals established within the city are in no case to be located in public streets and the transfer of freight will not take place in the streets.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first week in March, 1919:—

Canadian Pacific Railway.

March 7	$2,617,000	$2,469,000	— $148,000

Grand Trunk Railway.

March 7	$ 834,742	$1,224,388	+ $389,646

Canadian National Railway.

March 7	$1,110,260	$1,286,614	+ $176,354

MONTHLY BANK CLEARINGS

The following are the bank clearings for the month of February, compared with the same month last year:—

The Directors of the Canadian Crocker-Wheeler Company, Limited, have declared a One and Three-Quarters per cent. (1¾%) dividend on the preferred stock of the Company for the three months ending March 31st, 1919, to shareholders of record March 21st, 1919. Also a dividend of One and Three-Quarters per cent. (1¾%) on the common stock of the Company for the three months ending March 31st, 1919, to shareholders of record March 21st, 1919.

The stock books will be closed from the 21st to the 31st of March, both days inclusive.

Cheques will be mailed to shareholders on March 31st, 1919.

By order of the Board.
L. R. GRIMSHAW,
Secretary-Treasurer
St. Catharines, March 4th, 1919.

PROVINCIAL PAPER MILLS COMPANY, LIMITED

Notice is hereby given that dividends of One and three quarters per cent. (1¾%) on the Preferred Stock, and One per cent. (1%) on the Common Stock of this Company, have been declared for the current quarter, both payable April 1st, 1919, to shareholders of record at the close of business, March 15th, 1919.

S. F. DUNCAN,
Secretary-Treasurer.
Dated Toronto, March 5th, 1919.

THE OGILVIE FLOUR MILLS COMPANY, LIMITED

DIVIDEND NOTICE

Notice is hereby given that a quarterly dividend of three per cent. has been declared on the Common Stock of The Ogilvie Flour Mills Co., Limited, payable Tuesday, the first day of April, 1919, to Shareholders of record at the close of business, Thursday, the twentieth day of March, 1919.

By Order of the Board.
G. A. MORRIS,
Secretary.
Montreal, March 11th, 1919.

PATON MANUFACTURING CO. OF SHERBROOKE

Notice is hereby given that a Dividend of (4%) Four per cent. and a bonus of (2%) Two per cent. for the half-year ending January 31st, have been declared payable on the 15th day of March next, to Shareholders of record of the 28th instant.

By order of the Board.
A. D. BRODIE,
Secretary
Sherbrooke, February 19th, 1919.

GREENSHIELDS CONNECT PRIVATE WIRES

Greenshields and Co., of Montreal, have announced that their direct wire from their Montreal and Ottawa offices to New York will be connected with the offices of Messrs. Logan and Bryan, members of the New York Stock Exchange, the New York Cotton Exchange, the Chicago Board of Trade, and other markets of the United States. The Logan and Bryan private wire system is one of the most extensive on the continent, reaching all the large Canadian and United States centres, including Vancouver and San Francisco on the Pacific Coast.

WOMAN, GOOD COOK AND MANager, desires home for self and child of 7; small remuneration. Box 1216 Star. G

GENERAL HOUSEWORK — YOUNG MOther, quick, capable worker will be glad to hear of a comfortable home, where she can keep her baby with her. Box 694 Free Press.

HOUSEKEEPER, widow desires post where little girl allowed. Box 4675 Telegram.

The Tragedy of the "Want Columns"

These advertisements from recent issues of daily newspapers tell heart-breaking stories. Called by death in the worktime of life---uninsured---the husbands of these women left widows to work or starve.

Don't let *your* wife come to this. Provide for her while you have the chance by means of an Imperial Life assurance policy.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Dome Mines, Ltd.—The proposed optioning of the Dome Extension property to the Dome Mines was agreed to at a special meeting of the Dome Extension shareholders held this week. Some 1,7[illegible]0,000 shares were cast for it and none against. Under the terms of the option, Dome agrees to spend an average of $[illegible],000 a month in development and exploration, and has until March 15, 1920, to take over the property, paying therefor 76,667 shares of Dome stock.

Canada Cement Co.—According to the statement of Mr. Frank P. Jones, vice-president and general manager of the company, there will be no dividend or bonus paid this year. He said: "I can assure you that, so far as I am concerned, there will be neither an increase in the dividend of Canada Cement, nor a bonus this year. The board of directors may do as they please in the matter, but my vote will be against both." Mr. Jones stated that while in England he obtained no contracts for cement or for anything else in the company's business, and that he didn't think there would be a big demand for cement products from Europe.

Black Lake Asbestos and Chrome Co.—The directors of the company, in their annual report, show an increased profit from the past year's operations. The profit for 1918 was $152,51[illegible], compared with $131,680 in 1917. During the year the company made two payments at the rate of 6 per cent. per annum on the income bonds, amounting to $71,490, as compared with payment of $59,575 the previous year. In 1916 no payment was made. The company's current assets now amount to $278,977, compared with $244,526 in 1917. Total assets are now practically unchanged at $5,239,337. The sum of $[illegible]0,084 was written off for depreciation on plant. Operations in 1918 were hampered by scarcity of labor, but the development of the asbestos and chrome pits has been carried forward according to plan. It is expected that the output in 1919 will show a substantial increase. The market for asbestos and chrome is somewhat unsettled, but the directors speak hopefully of the outlook.

International Coal Co.—President Charles Fergie, in his address to shareholders, stated that the production at 176,814 tons shows a slight falling off from the production for the previous year, owing to labor shortage, which, particularly during the second half of the year, was very acute, besides which there was a stoppage of work in September owing to wage disputes. But as the demand was greater than the supply during the early part of the year, a good business was done, although after the signing of the armistice the demand showed a marked falling off. Nevertheless, the company was able to show profits of $150,457, which were only $30,000 below the previous year's, out of which the balance of the company's first mortgage bonds, amounting to $15,000, fell due and was redeemed, besides which the company redeemed $1[illegible],500 of the 6 per cent. issue, and $23,000 of the 5 per cents, leaving outstanding at the end of the year only $136,500 of the former and $24,500 of the latter. Besides paying dividends at the rate of 7 per cent. on the preferred stock, the dividends on the common were resumed during the year, and 2½ per cent. was paid for the first half of the year and 3½ per cent. for the second, being at the rate of 6 per cent.

The balance of earnings left after depreciation, fixed charges and all expenses, including war tax, etc., amounted to $92,5[illegible]3, equal to 18.5 per cent. on the common stock outstanding, as compared with $107,618 the previous year, equal to 21.5 per cent. Dividends of $12,500 were paid on the common stock, as against nothing the previous year, and the surplus after those and preferred amounted to $64,781, equal to 13 per cent. on the common. This added to the previous surplus of $179,087 brings the present surplus up to $243,868, or $48.77 on each share of the common stock outstanding.

Dominion Canners, Ltd.—The annual meeting of the shareholders of the company was held at the head office at Hamilton on March 5th. The financial statement for the year ended December 31, showed that profits for the year, before deducting bond interest, but after providing for business profits war tax, were $745,324. After paying bond interest of $103,099 and dividends of 7 per cent. on the preferred stock, amounting to $160,342, the company was able to add to profit and loss account $481,882, making the undivided balance now $1,472,221. In addition, there is a reserve for insurance of $150,000. The active assets are listed in the statement at $4,178,942, real estate, factories, patent rights processes, etc., at $6,334,791, and the total assets at $11,248,856.

The president announced the prospects for the future very bright. The directors have declared a dividend of 1¾ per cent. on the preferred stock, payable April 1 next. All the arrears of preferred dividends have now been paid and the regular quarterly dividends were paid throughout the year, with the balance now in profit and loss, the directors feel that the uninterrupted payment of preferred dividends is now reasonably assured. It was decided to reduce the number of directors by two and the rest of last year's board was re-elected as follows: J. J. Nairn, R. L. Innes, F. H. Lawlor,, M.P., D. Marshall, Samuel Nesbitt, M.P.P., and W. R. Drynan.

British Columbia Fishing and Packing Co.—The annual report of the company shows that the operating company, the British Columbia Packers' Association, made total profits, after making provision for depreciation of $435,360, as compared with $453,080 in 1917. This shows but a small falling off in earnings in a year, which, from the salmon packers' viewpoint, was considerably below the average, while 1917 was a very good year in respect of pack. After deduction of $110,000 to cover estimated taxes and $214,590 covering preferred dividends, which were up from $171,672 in 1917, net profits amounted to $110,770, as compared with $281,408 in the previous year.

An adjustment of $12,319 is made in last year's accounts to cover taxes, and this sum must be taken into consideration when making comparisons. Adding balance carried forward from previous year to surplus profits, total credit at balance of profit and loss account amounts to $1,439,695, as compared with $1,347,945, to be carried forward to 1919. Total assets of the operating company are given in the balance sheet as amounting to $4,659,059, against $4,309,894, an improvement of about $300,000 during the year. Plant equipment, etc., amount to $2,610,539, as against $2,764,936. Investments are up slightly from $502,970 in 1917 to $580,252. A large increase is shown in inventories, which are itemized at $1,035,553. In 1917 these were $697,168, the increase here largely accounting for the increase in total assets. A considerable shrinkage is shown in cash on hand, which is given at only $6,117, compared with $102,659, although accounts receivable are up to $421,264, as compared with but $28,540. Two items fail to appear in the 1918 account, these being sundry debtors $111,029, and drafts in collection $97,395.

The principal item on the liability side is that of accounts payable, which have been reduced sharply to $92,207, as compared with $109,605 in 1917. Bank loans make their appearance at $145,000. Reserves now amount to $726,257, as compared with $706,445 in the previous year.

The city of Montreal is planning to have a civic pension scheme for municipal employees. It is to be supported partly by contributions from the employees and partly by a municipal grant.

THE KEYSTONE OF THE ARCH

Nothing known in building is stronger than the arch. The symbol of the Mutual Principle in Life Insurance. The centre of the arch is the keystone—and "The Keystone of a Life Insurance Organization," says W. O. Chapman, "is management." The three leading constituents in good management are INTEGRITY, ECONOMY and EFFICIENCY. It is well known that the secret of the extraordinary success of the Mutual Life of Canada has been the rigid adherence of managers and directors through fifty years of history to these essential things. It is due to these that in spite of more than four years of devastating war, followed by a blighting pestilence, with the immense losses entailed, yet the strength of the Mutual Life of Canada is unshaken. The keystone ensures the solidity of the organization, and there is no other better qualified to defy the tooth of time than—

USE FORESIGHT

The time to prepare for a rainy day is when the weather is fine.

That is a truism. Yet many a person that would never for a moment dispute so obvious a piece of common-sense forgets that the time to prepare for a financial "rainy day" is NOW, and that the way to do so is by means of Life Insurance. To the great majority Insurance offers the only way within their reach of taking care of the future—not only the future of dependent ones but their own as well.

The Great-West Policies provide such Insurance on exceedingly attractive terms. Premium rates are low and profit returns are remarkable. Personal rates and full explanations will be gladly given on request. State age.

RECENT FIRES

The Monetary Times Weekly Register of Fire Losses and Insurance

Calgary, Alta.—March [illegible]—The Western block, at the corner of Tenth Ave. and First Street, was damaged. Estimated damage to building, $10,000; to contents of occupants, $1[illegible].

Chatham, Ont.—February 24—Automobile painting and [illegible] shop of Fred. Lennox was damaged. No insurance a[illegible].

Delisle, Sask.—March 11—Large part of town reported damaged. Estimated loss, $70,000.

Fredericton, N.B.—March 6—Five potato houses, containing several thousand barrels of potatoes, two large hay sheds partially filled with hay, a car loaded with potatoes and another loaded with fertilizer were destroyed at Lakeville, Carleton county. Estimated loss, $25,000.

Hamilton, Ont.—March 8—Premises of J. C. Cooper, grocer, and W. Bridgewood, butcher, James Street, were damaged. Caused by defective wiring. Estimated loss, $8,000.

Midland, Ont.—March 5—The Midland Opera House Building was destroyed. Estimated loss, $45,000. The building was owned by Duncan Brothers, who will be the heaviest losers, as contractors state it could not be replaced to-day for less than $40,000, though its original cost was $23,000. A. Bugg, D. H. Wray, V. G. Edward and E. L. Swan all sustained losses.

Montreal, Que.—March 5—Bottle factory of Dominion Glass Co. was damaged. Caused by bursting of a retort used for melting glass.. Estimated loss, $100,000.

Newmarket, Ont.—March 6—House of S. West was damaged.

New Sarum, Ont.—March 8—The New Sarum Hotel was destroyed. Loss not known. Caused by defective pipe.

Nipigon, Ont.—March 4—Houses of J. A. Goodridge and I. L. Abrams were destroyed. Estimated loss, $5,000, covered by insurance.

Ottawa, Ont.—March 5—General store of D. Deguire, [illegible] Montreal Road, together with adjoining stores occupied by R. Basset and J. O. Lanoue, were damaged. Estimated loss, $15,000.

Sherbrooke, Que.—March 4—Building of A. E. Zakaid, confectioner, 30 Wellington St., was damaged. Caused by rat gnawing matches.

Toronto, Ont.—March 6—The Standard Stock Exchange Building, and the Owl Shoe store at 56 King Street W., were damaged. Caused by overheated furnace. Estimated loss, $[illegible],000.

March 1[illegible]—Building at 1224 Dundas Street W., was damaged. Caused by defective wiring. Estimated loss, $100. House of J. McFarlane, 122 Sherwood Street, was damaged. Caused by spontaneous combustion. Estimated loss, $300, covered by insurance.

Vancouver, B.C.—March 1—Home of Mr. C. Peck was destroyed. One life lost.

Victoria, B.C.—March 4—The Cloverdale Hall was damaged. Caused by defective stove pipe. Estimated loss to building, $1,[illegible], and furniture and fixtures, $1,600. Only $[illegible] insurance carried.

Woodbridge, Man.—March 5—Home of Mrs. H. Mixer was destroyed. Two deaths.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Alberton, P.E.I.—March 1—As reported in *The Monetary Times* last week the business section of the town was destroyed. The following is a list of insurance companies interested: Northern, $[illegible].100, Canada Accident, $5,000; Phœnix of London, $[illegible]; Union of London, $4,500; Scottish Union and National, $[illegible]; Empire Liability, $3,200; Phœnix of Hartford, $3,200; Guardian, $3,000; Springfield, $3,000; North Britis and Mercantile, $3,000; Altas, $3,000; Canadian, $2,236; St Lawrence Underwriters, $1,769; British American, $1,638 Prince Edward Island Mutual, $1,600; Phœnix of Paris, $1,500; Yorkshire, $1,500; Norwich Union, $1,500; Nova Scotia $1,310; Royal, $1,250; Union of Canton, $1,069; Queen, $1,000; British Traders, $1,000; Fidelity-Phenix, $1,000; Genera of Paris, $700; Phœnix of Hartford, $250; General of Perth $138; total, $61,710. Loss about $85,000.

Edmonton, Alta.—Edmonton's fire loss for 1918 wa $215,000, according to the annual report of the fire department, which has been sent to the city commissioners. In the previous year the loss was $69,000. The amount of insurance involved was $3,449,900 as against $4,807,000 in the year before.

There were 628 fires responded to and 65 false alarms. The largest number of fires in one month was in April, when the brigade had 174 calls. In other months the average was 50 fires.

Sherbrooke, Que.—February 21—The premises of I. M. Nault, Ltd., dry goods, were damaged. Insurance as follows: On stock: Royal Exchange, $8,000; Union of Paris, $3,000; Mount Royal, $8,000; Nova Scotia, $10,000; Globe and Rutgers, $5,000; National of Paris, $2,000; Occidental, $3,000; North British American, $7,000; London Mutual, $4,000; Northern, $4,000; Strathcona, $3,000; London and Lancashire, $2,000; Springfield, $3,000; North-West National, $5,000; British America, $2,000; Fidelity, $2,000; London Assurance, $2,000; North America, $2,000; Phœnix of Paris, $5,000; Liverpool-Manitoba, $2,000. Total, $83,000. Loss about 90 per cent. On other contents: National of Paris, $1,300. Loss about 50 per cent. On building: Guardian, $2,000; Royal, $5,000; Lancashire Union, $2,000; North British and Mercantile, $8,000; North America, 5,000; London Assurance, $5,000; Caledonian, $2,000. Total, $32,000. Loss about 20 per cent.

Vancouver, B.C.—Fire Chief Carlisle submits the following report for the month of February to *The Monetary Times*:—

The total loss sustained by fire for the month (exclusive of the Parson and Haddock loss, the adjustment of which has not as yet been completed), amounted to $6,665, of which amount $6,593 was covered by insurance, leaving the property loss above insurance at $72. The total value of the property involved was $323,550. The following will show the causes of fires for the month: Cigarette butt left on lounge, 1; candle left too near mattress, 1; clothes left too near stove, 1; clothes left to dry on stove-pipe, 1; defective fireplace, 1; defective range, 1; hot ashes placed in wooden receptacles, 2; hot ashes placed against wooden shed, 1; incendiary origin (presumed), 1; leaky acid drum, 1; lighted torch too near oil burner, 1; lighted match too near gasoline (leaking from carburetter), 1; rubbish papers, etc., left too near furnace (basement), 1; sparks (flying), 1; spontaneous combustion, 1; unprotected stove-pipes, 2.

Vancouver, B.C.—Fire Chief Carlisle submits the following report for the month of January to *The Monetary Times*:—

The estimated total damage resulting from fire for this period, excluding all figures in connection with the T. A. Walsh Construction Co. (7 Alexander Street) loss of January 23rd, and which has not as yet been adjusted, was $17,602, of which amount $16,920 was covered by insurance, leaving the property loss above insurance at $682. The total value of the property involved (excluding Walsh Co. figures) by fire for the month was $464,967.

The following shows the cause of fires for this period: Carelessness with cigarettes 2, children playing with matches 1, defective chimneys 2, defective fireplaces 1, electrical origin 3, firewood drying on top of furnace catching fire 1, gaspipe leaking 1, gasoline stove upsetting 1, hot ashes falling on floor from stove 2, hot ashes placed in wooden receptacles 3, lightning 1, lighted match near gasoline tank 1, overheated furnace pipes 1, overheated stove 1, overheated stovepipes 3, sparks (flying) 1, spontaneous combustion 2, stove (gasoline) too near wall 1.

No Uniformity in Taxation Views

Manitoba Commission Receives Conflicting Evidence—Some Maintain Burden on Land is Too High—Others Say That Heavy Land Taxation Will Prevent Speculative Boom—Income Tax is Generally Favored

PROBABLY the only definite conclusion that could be reached from the evidence so far received before the Manitoba Taxation Commission is that the income tax is generally agreed as being an equitable and efficient method of raising public funds. It is merely a question as to how the tax should be levied and to what extent it should supplant other taxes.

The Manitoba Taxation and Assessment Commission was appointed in pursuance to a resolution passed by the Manitoba Legislature at its last session affirming the expediency of an inquiry being made as to the most equitable method of levying taxation throughout the province to meet public requirements. Acting on this resolution the lieutenant-governor appointed a committee of the executive council to take up the subject and the committee reported in favor of such a commission being appointed. This report was approved by the lieutenant-governor on July 26th, 1918, and the commission was appointed. It was constituted of the following members, representing the organizations named:—

The legislature—Hon. Edward Brown, provincial treasurer, and J. W. Breakey, M.P.P., member for Souris; the government—E. M. Wood, deputy municipal commissioner, and L. W. Donley, assessment commissioner, city of Winnipeg; the grain growers—Peter Wright, and W. R. Wood, M.P.P.; Union of Municipalities—D. D. McDonald, Robert Forke; City of Winnipeg—Aldermen Frank Fowler and H. Pulford; Board of Trade—W. J. Christie, J. H. Parkhill; Labor Party—E. Robinson; Winnipeg Real Estate Exchange—W. H. Gardner; Retail Merchants Association—J. H. Curle; Suburban Municipalities—Reeve J. Fielde, (of municipality of Fort Garry); Local Branch of Canadian Manufacturers' Association—N. M. Warren. Mr. E. M. Wood was appointed chairman.

Purposes of the Commission

The objects of the commission were specified as follows:—

(1) The operation of the laws now in force relating to the assessment of different classes of property for the purposes of municipal taxation in the province of Manitoba.

(2) The present method in force in the province respecting the preparation of municipal assessments with the view of improving the same and to secure, if possible, greater uniformity in this respect.

(3) The most equitable manner of equalizing municipal assessments throughout the province to meet the annual statutory levies required to be made by the municipal commissioner.

(4) The advantage or disadvantage of rating land values only instead of the value of lands and buildings, and extent to which and with what results, as far as can be ascertained, the rating of land values only has been adopted elsewhere.

(5) The advisability and justness of taxing incomes in addition to or substitution for other methods of taxation now in force in the province.

(6) The most equitable method of assessing stocks and other property of mercantile firms or corporations.

(7) The most equitable mode of assessing companies operating public utilities under any statutes in force in the province of Manitoba or under agreements with municipal corporations, such as companies who supply water, light, heat and power to the municipalities and the inhabitants thereof, telegraph and telephone companies and companies operating electric street railways.

(8) Improvements in the assessment laws of the province suggested by recent legislation in other countries.

(9) The statutory exemptions from taxation now in force and as to what, if any, changes it is desirable should be made therein.

(10) The re-arrangement, revision, amendment and consolidation of the provisions of "The Assessment Act" and all amendments thereto.

(11) Generally to inquire, hear and consider and report upon any other matters connected with the assessment and taxation of property within the province which may be brought to the attention of the commission, or which might appear to such commission to be proper subjects for consideration.

The commission commenced to receive evidence three weeks ago, the more important statements being reported in *The Monetary Times* of March 14th. Prof. A. B. Clark, one of the members of the commission, has been making an investigation into the taxation systems of the other three western provinces, and has already reported on taxation in Alberta and British Columbia. On March 14th the commission adjourned indefinitely. It will shortly resume its sittings, however, and after obtaining further information in Winnipeg will visit the other sections of the province of Manitoba for the purpose of giving full opportunity to the people to present their respective views on the subject.

Retail Merchants' Views

The Winnipeg branch of the Retail Merchants' Association of Canada, Inc., appeared before the Manitoba tax commission at the court house on March 11th. On behalf of the tax committee of the Winnipeg branch, S. W. Melsted, manager of the J. A. Banfield furniture store, presented their views. He reviewed the history of the business tax as imposed in Winnipeg from 1893 up to the present time. He said the tax on rental values was introduced in 1893 to take the place of the old personal property assessment. Up until 1907 the tax had as one of its features floor space running from three cents to seven and one-half cents per square foot according to the relation existing as between the size of the premises and the rental value of the premises. In 1907 a straight charge of eight and one-half per cent. of the rental value of the premises was enforced and the space feature discarded. In 1908 the former system was again introduced. In the same year the city was given power to appoint a taxation commission. Meetings were called and many appeared before them to give evidence, but Mr. Melsted pointed out that the retail merchants were not there owing to the fact that they were not then organized. The commission recommended the rental tax as imposed in 1907, except that the rate was fixed at six and two-thirds per cent. of the annual rental value, being a tax equal to one-fifteenth of the rental value for the year

The retailers soon discovered the business tax was a direct discrimination against them because they occupied premises along the front streets where the rents were highest and they found upon investigation that the other business interests and the professions were escaping their proper share of the tax so collected. In 1911 a strong movement was commenced to have this unfair tax abolished. Delegations of merchants appeared before the city council and although the council admitted that there was a great injustice being done, yet no action was taken to provide a remedy. The agitation continued. Conferences were held with the board of control and the city legislature committee. In 1915, the retailers decided to ask for relief through the adoption of a scale of percentages to apply to rental values similar to the scale which applies to premises in the Ontario act. The city council finally took action on October 16th, 1916, when they requested the board of valuation and revision of the city of Winnipeg to hold public sessions at which all persons interested or affected might give evidence or information on methods of taxation which might be considered as applicable or appropriate for adoption in the city of Winnipeg, and to obtain such further information as might be considered advisable and that the board of control be instructed to provide the necessary funds. Meetings were held in the schools of the city, 17 in all, the retail merchants and others presented their views. On June 25th, 1917, the board of valuation and revision made its report to the city council after the members had visited many cities and interviewed the leading tax experts on this continent. In their report they say: "This commission recommends that the business tax be abandoned. Your commissioners recommend that a system of income tax be forthwith adopted in place of the business tax."

Mr. Melsted submitted numerous figures to show the injustice imposed upon retailers under the present system and made a strong plea for the introduction of a tax based upon [illegible]. He said that the proper system would be to get the main revenue from a tax on real property assessed uniformly according to value supplemented by a tax on the incomes of individuals, firms and corporations progressively according to ability to pay, with reasonable exemptions for individuals based on the cost of living. He suggested a permanent tax commission for Manitoba from the standpoint of [illegible]

Property Taxes Too High

Particulars of the decreasing of the value of heavily [illegible] city property was given to the commission by local business men. One large city business block, it was claimed, was unable to pay for its operation with the present high taxes and high cost of upkeep. One prominent builder stated that he would not build another building in the city with the present cost as he would never derive any income from it. Mention was made of different buildings throughout the city, whether business or dwelling houses, which, it was claimed, were costing their owners more than they were able to provide.

The city of Winnipeg can never become any greater than at present with the present system of taxation, according to N. T. MacMillan. High wages and high cost of building material have increased building costs by over fifty per cent. he said. Contractors cannot build if the cost is prohibitive, with the result that without new buildings the city would remain at its present size. By the lessening of taxation on real estate, argued Mr. MacMillan, the cost of home-building will be reduced.

B. W. Thompson also gave his views, strongly advocating income taxation by the province. By the provincial application of such a tax, present municipal taxes could be taken over by the province, including school taxes, he argued. Mr. Thompson strongly denounced the application of the income tax system to the city alone, arguing that it would be unfair. Residents outside the city limits could still avail themselves of the city benefits without paying for them.

Single Tax on Land

Single tax methods of taxation were also advocated before the commission on March 12th, by D. W. Buchanan and Hugh McKenzie, representing the Single Tax league of western Canada. The abolition of all present systems in force and taxation by a single tax on all vacant lands, the tax being based on the rental value of the land, was the system advocated. They proposed that taxation on present vacant lands should be increased by 100 per cent. This, he claimed, would enable the cities to reduce their taxation on buildings by 10 per cent. yearly until it ceases to exist. The value of land is made by the community and not by the individual; lands held for speculation should, therefore, be taxed heavily.

Drastic changes in municipal government were suggested by R. H. Shanks, of Winnipeg's board of valuation, on the same day. There are too many municipal governments by far, he says. In the old days it was all right, because of the slow method of travel in rural areas, but with the advent of the auto many of the sparsely settled areas could be united and one set of officials do the work which was now distributed among probably a dozen. Mr. Shanks said he had no slur to make on the rural councillors; it was simply the overlapping of government he was criticizing.

He urged that land speculation had been too harshly hit by taxation. A man should be allowed to invest in land just the same as in a mercantile business. Rents in the city, said Mr. Shanks, went down 20 per cent. through the war, but it would require 100 per cent. increase to rehabilitate them. He argued that the city assessment should be reduced by $25,000,000. Property in the city was much over-valued, he said. He would also have the business tax readjusted if the proposed income tax scheme does not materialize.

Another Winnipeg representative was heard on March 13th, in the person of Mr. E. W. Watts, of the city assessment department. The present system of taxation could be replaced by methods which would place the burden more evenly upon the shoulders of the tax payers and at the same time would simplify the handling of the collections, he considered. Mr. Watts advocates that an income tax should be imposed by either the Federal or the Provincial Government. Allowing it to be administered locally and thereby reducing duplication. Each locality under this scheme could receive their share of the monies raised. Out of this expenses which include educational, policing and other expenses could be paid. An unearned increment tax should be placed on all lands sold, after allowing a profit of eight per cent. This tax would be worked similar to the excess business profit war time tax. Out of the proceeds of this all local improvements would be met and it could be used similarly to a sinking fund.

Whereas local improvements are assessed to those immediately benefiting by them, Mr. Watts advocates the assessments be shared evenly by all the citizens. This applies to new sidewalks, improved streets and other improvements. The present business tax, levied on the rental value basis should be abolished, claims Mr. Watts, and replaced by a two per cent. business tax levied on the net profits. The present auto license tax imposed by the province should be abolished, he claims, and handled locally by a tax imposed on all wheel vehicles, thereby supplying funds for the local improvements of the roads.

Mr. Watts explained at some length to the commission the present system of working the assessments, giving them all the details necessary for the comparing of the system with other ones which the commission may inquire into.

Private Parties Heard

Besides the city assessment officer, other experts explained their views on March 13th. R. R. Nicholl, tax commissioner for the Canadian National Railway, explained to the board that in his opinion the system of assessment in the country was unfair as some farmers and corporations were over assessed while others were under assessed. The system, he complained, was radically wrong. A. S. Bond, of the National Trust Company, gave details of a number of pieces of property in the city which were overburdened with taxes resulting in a deficit to the owners.

Individual citizens of Winnipeg were also present before the taxation commission. They all stated that properties were being overtaxed, while citizens not owning land got off free from most of the taxes.

W. A. Irish, a contractor, declared he would not build now in the city even if the property were given him free. "It is unfair," he argued before the commission, "that land owners should be compelled to pay for the educational system of the province while those not owning property are able to obtain the benefits free."

On behalf of clients, J. A. Machray, K.C., placed statistical tables before the board showing the various revenues and taxes derived from different properties throughout Winnipeg.

T. L. Hartley, of the Northern Canadian Mortgage Co., said that unless taxes went down rents would increase. Income taxation should be established by both the province and the Dominion, which would relieve the property taxation, he said.

SIBERIAN TRADE NOT PRACTICABLE

Economic Conditions are at Present Too Disorganized to Permit of Profitable Business Being Carried On

THE Canadian Economic Commission, which has been investigating Siberian conditions reports that it is impossible to develop active trade with Siberia under present political and transportation conditions. The work of the commission in Siberia has been completed, but a final meeting will be held soon in Ottawa. The chairman, Col. J. S. Dennis, has already left for Canada, and the other members are also coming soon, with the exception of Mr. A. D. Braithwaite, who has gone to Omsk to study financial conditions. Commenting on the decision, the chairman says it is useless to continue the existence of the commission merely as a forwarding agency for orders of goods required by the Siberian Supply Co., which has been appointed sole agents for the Canadian and British governments. Anyway, the company itself is unable to purchase merchandise in Canada or Great Britain owing to the impossibility of shipping inland despite the fact that Siberia has a market of $100,000,000 for Canadian and British goods. The unsettled financial condition of the country and the finances of co-operative concerns make it necessary that the Siberian Supply Co. furnish credit in the distribution of goods. The commission has exhaustive reports prepared on all phases of the trade question.

Writing recently to *The Monetary Times*, Mr. L. D. Wilgress, lately Canadian trade commissioner at Vladivostok, said:—

"The outstanding feature of the present trade situation in Siberia is the great shortage of all kinds of manufactured goods and the difficulties of railway transport into the interior. The insufficiency of rolling stock and the poor state of the roadbed are the most serious factors to be considered in connection with the economic restoration of Siberia. The shortage of goods may be said to have crippled the economic life of the country. The peasants are reluctant to bring in supplies to the towns, since in exchange they receive only paper money, with which they are unable to purchase the goods they so urgently require. The most practical way in which the allied countries can help Siberia is therefore in the restoration of adequate railway facilities and the shipment of merchandise for the relief of the present situation.

"Economic relief in Siberia presents a splendid opportunity for Canadian products to become established in this market. Canada can assist in two directions: (1) By giving Siberians the benefit of their practical experience acquired through dealing with similar problems in Canada; (2) by supplying the manufactured goods which suit the conditions in Siberia. Canada is the country which most resembles Siberia in respect to natural conditions and resources. Siberia, therefore requires the assistance of Canadian engineers and technical men and the equipment, machinery and material which are manufactured in Canada to meet conditions similar to those prevailing in this country. The appointment of the Canadian Economic Commission to Siberia has created a very good impression among commercial and professional circles, supplementing as it does our military effort. Enquiries are being received at this office from official bodies, co-operative and private undertakings regarding the ability of Canada to supply agricultural machinery and implements, [illegible] railway and mining equipment, hardware articles and warm clothing, footwear, etc. Two of the chief obstacles which have to be overcome in connection with the shipment of goods to Siberia are ocean transport and finance. The former is a problem which is being solved from Canada. In regard to the latter a difficulty is experienced in adjusting the terms upon which Siberian importing organizations wish to purchase and those stipulated by the Canadian shipper. The importer as a rule desires to place a deposit of say from 25 to 50 per cent. with the order in a local bank, payment of the whole amount of the order being made on delivery of shipping documents at Vladivostok. The development of banking facilities to cater more to the wishes of reliable importing organizations is one of the chief questions to be considered in connection with Canadian economic relief in Siberia.

"In order to provide tonnage for return cargoes and to assist in stabilizing the exchanges, a market must be found for such products as Siberia can offer at the present time. Canada should be able to purchase such products as hides and skins, furs, bristles, wool, etc. By so doing they will be promoting trade relations between the two countries and widening the market for Canadian goods.

"Siberia is a country with a population of 10,500,000 and is practically dependent upon outside sources for manufactured goods. It should therefore be worth while for Canadians to make an effort to obtain their share of the trade with this market and to do so may require at least some relaxation in the conditions upon which exporters have hitherto found it possible to do business with this country."

INSURANCE CLAIMS TO AWAIT INVESTIGATION

A recommendation was submitted to the Montreal Chamber of Commerce recently by the Commission of Municipal Affairs regarding the investigation of fires. The Chamber of Commerce decided to act upon this recommendation. The proposal reads as follows:—

"The Commission of Municipal Affairs, after study of the ameliorations that the Fire Commissioners of Montreal have suggested bringing into the functioning of that commission, has the honor of recommending to the Chambre de Commerce that it declares itself favorably upon the following modifications.

"1. That the fire insurance companies be allowed to establish the claim for a fire only after having taken into consideration the report of the Fire Commissioners' enquete upon the origin of the fire, provided that this enquete and report be made within a determined time.

"2. That the municipal administration be asked to have, according to need, one or several detectives present at the enquiries into the origin of fires. The detectives to be specialists, or at least to be particularly competent in this matter.

"3. That the municipal administration be asked to designate in each station a fireman, if first among the firemen to arrive upon the scene of a fire, who could take all statements and make inquiries in view of informing the Detective Department."

A return tabled in the Commons shows that at the present time 2,766 policies are in force under the provisions of the Civil Service Insurance Act, the amount of insurance provided being slightly in excess of seven million dollars.

PRINCE ALBERT FINANCIAL SETTLEMENT

Interest Payments to be Extended for Forty-Five Years. With Lower Rates for Earlier Years

A TWO-DAY conference was held this week in Regina, Sask., between representatives of the city of Prince Albert and representatives of the city's bondholders. Our Regina correspondent wires that arrangements were made for the consolidation and extension of time for repayment of the capital indebtedness totalling nearly $4,000,000, and also of the bank overdraft in favor of the Imperial Bank of Canada, amounting to $400,000. Premier Martin and Hon. Charles Dunning represented the province of Saskatchewan and acted as intermediaries between the city and the bondholders. The Prince Albert delegation includes Charles MacDonald, M.L.A., S. McLeod, T. C. Davis, A. M. Hueston, J. Finn, P. W. Mahon, A. Matthieson and E. Webb. The bondholders' delegates were J. H. Gundy, of Wood, Gundy, Toronto; C. Ruby, general manager of the Mutual Life of Canada; D. M. Saunders, treasurer of the Canada Life; T. T. Smythe, of the Montreal City and District Savings Bank, R. W. Steele, of the Dominion Securities Corporation, Toronto; and E. G. Long, barrister, of Toronto.

The conference was of a harmonious nature. The city showed every desire to meet all the interest as well as principal and the bondholders displayed an attitude of moderation and a desire to assist the city to rehabilitate itself financially. The consolidated debenture debt is to be spread over a period of 45 years with an ascending scale of interest rates during the period. Interest is to be paid at the rate of 1 per cent. for the first five years; 2 per cent. for the second five years; 3 per cent. for the third five years; and 4, 5 and 6 per cent., respectively, for each of the ensuing ten-year periods. The object of this is, of course, to relieve the city of as large as possible a proportion of the capital charges during the next few years. It will obviously be essential that the city take advantage of this opportunity to place itself in a strong position to meet the heavier interest payments which will be necessary during the later years. Provision is also made for a review of the terms at the end of any of the periods during the lifetime of the issue, should either the city or the bondholders consider that conditions warrant such action. In this event the situation will be reviewed by a board of arbitration two of whom are to be appointed by the city, two by the bondholders and a fifth by the other members of the board. A provision is inserted in the agreement that the average interest rate for the whole period shall not exceed 5 per cent.

As mentioned above the city owes the bank on current account approximately $400,000 and the Imperial Bank is also interested in the debenture issue to the extent of $86,000. Repayment of the bank overdraft is to be spread over a period of ten years with an interest rate of 3 per cent. for the first five years and 4 per cent. for the second five years.

The city has on its books tax arrears totalling about a million dollars which have been hypothecated to the bank. Under the agreement provision for the original owners has been made, whose property has been sold at tax sale, to redeem their property on similar terms to the agreement for the repayment of the bank overdrafts. Owners may have their arrears consolidated and spread over a period of ten years, the penalties being dropped. Advantage can only be taken of this concession, however, provided current taxes are kept paid up.

The population of the city is about 7,000. Over a million dollars was lost by the city in the effort to construct a great water power on the Saskatchewan River at La Colle Falls. The money was borrowed chiefly in Britain.

PROVINCIAL BANK ISSUE

The issue of $1.000.000 of stock in the Banque Provinciale du Canada has been oversubscribed to the extent of about 40 per cent. The shares were offered at 110. This brings the paid-up capital of the bank from $1,000,000 to $2,000,000, the total authorized.

LOAN COMPANIES TO MEET

Matters of more than passing importance will be dealt with at the annual meeting of the Dominion Mortgage and Investments Association, which has been arranged for March 28th in Toronto. Professor Adam Shortt will deal with the functions of loaning and insurance institutions. Their importance and the service rendered by them to the public are not very well understood. The part they have taken during the war in contributions to loans and at the same time in meeting the demands of farmers for capital is a very important one.

F. C. L. Jones will take up the subject of instalment mortgages, with respect to which some interesting questions arose as the result of certain cases which came up in the law courts in the west. Progress in land transfer reform is a subject which will be handled by George H. Muirhead, deputy master of titles for Ontario. The position of mortgagees in urban districts of Alberta will be discussed by S. W. Woods, K.C.

In addition to these special subjects, two important reports will be considered, one with respect to municipal finance, and another dealing with the question of increased taxation, both on normal and war accounts. The president, Mr. Hume Cronyn, M.P., who is an outstanding figure in the investment field, will doubtless review present conditions as to investments.

Last year witnessed really the first annual meeting of the association, created to represent loan, trust and insurance institutions in Canada, and was well attended. It is anticipated that this year those present will not only be larger in number, but will be more representative of the lending institutions from one end of the Dominion to the other.

OTTAWA GAS BONDS OFFERED

A public offering is being made by Royal Securities Corporation, Limited, of the unsold balance of a new issue of $850,000 Ottawa Gas Co. twenty-year 6 per cent. refunding mortgage sinking fund gold bonds, guaranteed unconditionally as to principal and interest by Ottawa Light, Heat and Power Co., Ltd. The issue was purchased by Royal Securities Corporation two weeks ago, and it is understood that in the meantime a successful private offering of the bonds has been made. The remainder of the issue is now being offered for public subscription at 101 and interest, yielding over 5.90 per cent.

Its purpose is to partly reimburse the Ottawa Gas Co. for expenditures, amounting to $1,250,000, made on its properties during the past six years, and to provide funds for the completion of its new water gas plant and other extensions to keep pace with the growing demand for its service. With the completion of the new plant, within ninety days, the Ottawa Gas Co. will have one of the most modern gas plants in America, with a total capacity of over 2,750,000 cubic feet of gas per day. This company is one of the oldest on the continent, its beginnings antedating confederation by thirteen years. It was back in 1854 that it was given a perpetual charter and franchise for operation in the cities of Ottawa and Hull by act of parliament of the province of Canada. It is the only gas company doing business in Ottawa to-day.

The new issue is secured not only by assets and earnings of the Ottawa Gas Co. itself, but by the unconditional guarantee of Ottawa Light, Heat and Power Co., the holding company of the Ottawa Gas Co. and the Ottawa Electric Co., the latter being the only private company doing an electric light business in Ottawa to-day. Property values of the Ottawa Gas Co. are conservatively estimated at more than three times the total of its bonds outstanding. For 1918 net earnings of the Gas Co. were more than three times, and the combined earnings of both companies more than six times, the annual interest charges on the new issue.

PRODUCER AND CONSUMER

THE contest between protectionists and free-traders has been generally looked upon as a struggle between producers and consumers. The argument for protection has always been that the government should restrict the importation of foreign commodities, manufactured at lower cost than similar domestic commodities, to enable the home producer to compete on favorable terms in his own market. The free-trade argument has been that such protection has always been at the cost of the consumer who has been obliged to pay the higher prices, and that this was unfair class legislation in that it taxed the many for the benefit of the few, while from the economic point of view it was unwise in that it forced the investment of labor and capital from more profitable to less profitable lines of enterprise. This argument is clear and familiar. It assumes that each individual, if entirely free to act, will seek the most profitable employment for his capital. The fact that a protective tariff is needed in order to maintain an industry in a given community shows that that industry is less adapted to the character of the natural resources, or the character of the producing population, than an industry which can support itself without extraneous aid. Protection, therefore, is supposed to be either useless or harmful —useless, where the home producer can sell his goods cheaper than the foreign producer; harmful, where the goods can be imported more cheaply from abroad, since it brings investment in less profitable lines.

In the face of this seemingly inevitable logic, the protectionists have been endeavoring to justify their faith; and some of their arguments have been profound, while others have been shallow. While we do not here discuss these arguments, we must remember that when the tariff becomes an issue of practical politics, as it is now between the agricultural and the manufacturing classes of this country, the necessity of appealing to different classes of people for support is almost certain to result in an array of inconsistencies. The most common and obvious inconsistency of the free-traders is their maintaining at one and the same time that protection is not needed in order to maintain a given industry and that the result of protecting such an industry is to divert labor and capital into less profitable undertakings. One charge may be true of one industry and the other of another, but they cannot both be true of the same industry at the same time. But the great inconsistency has been that of the protectionist party, which after saying that protection is necessary because of the inability of the home producer to meet the competition of foreign cheap goods, and mindful of the fact that the consumer wants his goods as cheap as possible and is willing to buy them from the foreign manufacturer rather than pay tribute to the domestic manufacturer, turns about and replies that under a system of protection domestic goods can be purchased as cheap as foreign goods under a system of free trade, because the growth of the domestic industry will lead to competition which will ultimately reduce the home price to the level of the foreign price. The obvious reply to this is that if the manufacturer has come to the point where he can sell as cheap as the foreigner he would not be injured by a reduction of the tariff.

Now, either the tariff raises prices here or it does not. If domestic prices are no higher than foreign prices, what is the good of protection? But if protection does maintain a higher level of prices for the benefit of the producer, then is there any way of escaping the conclusion that the consumer pays the price, and that the benefit of one domestic class is paid out of the pockets of another?

But let us not prejudge the question; for when we talk of the relation of the tariff to the price of a commodity we are inclined to talk rather glibly as if there were but one price for an article at a given time, when in reality there are various prices. Not only are different producers selling the same article at different prices, but the same producer frequently sells different parts of the same product at different prices in different markets. It is a common practice for producers to sell at different prices in different markets. In other words, the principle adopted in railway rate making of "charging what the traffic will bear" is now a common rule of trade. But, apart from these divergences of price, we must emphasize a much simpler but usually overlooked fact that at any given time for any standard article there is a producer's price, a jobber's price, and a retailer's price. Apart from the tariff entirely, a reduction of 25 cents in the mill price of a commodity is frequently accompanied by no change in the consumer's price; so it is quite possible that a reduction of a tariff by 25 cents, even [illegible] to sell that much lower, would have no effect upon the consumer. On the other hand, just as [illegible] of 10 cents in the mill price has frequently led to an increase of 20 cents to the consumer in the ordinary course of trade, so it is quite possible that an increase of the tariff by the amount of 10 cents might increase the consumer's price by [illegible]. In regular business the relation of the price which the producer receives for his commodity to the price which the consumer pays for it seems to follow no rule [illegible]. The point of interest seems to lie here, that if any [illegible] argument can be made for the [illegible] of a certain scale of protective [illegible] will be found in this consideration of the relation of producer to consumer. Indeed, after a consideration of facts of this nature, we may have to admit that what seemed hopeless inconsistency in the protectionists [illegible] is not so hopeless after all. And from a careful study of such facts as those mentioned above, it is conceivable that a protective tariff can be so arranged as to raise the producer's price while not increasing the consumer's price.

THE CONTROL OF INDUSTRY

THERE is a constitutional way of dealing with labor demands and the relation of labor to any particular industry, and there is the way of the I.W.W. and the Bolshevist. In the United Kingdom, the Dominions and the United States both labor and capital have made most progress by negotiation, deliberation and compromise. Some of the labor unions have achieved prosperity for their members and the good-will of the employers by the fairness of their attitude to capital and the judicial stand they have taken. There is not wanting evidence, however, that goes to show that the tried leaders of some of the most important unions on both sides of the water are being browbeaten and threatened by that type of agitator who has done his best—or his worst—work in Russia. In the United Kingdom, for example, the shop "stewards" have usurped functions never entrusted to them, and are virtually ignoring trade union leaders in all matters of dispute that arise between master and men.

The high wages, high prices and general scarcity of labor during the war have caused many workers to lose all sense of proportion in presenting their demands to capital. It was possible to pay high wages during the past two or three years for the simple reason that market prices were high. But these high prices cannot continue: already there has been a sharp decline of prices in some directions and a heavy falling off of orders. It is certain that the European countries devastated by war will buy only imperatively necessary supplies at present prices. They will wait, to secure the materials required, until prices have fallen, or until they can be supplied by their own labor and industry. Labor cost is almost always the biggest factor in the costs of production, and it cannot go beyond a definite level without putting an end altogether to the industry in question.

The Colorado Iron and Fuel Corporation has made remarkable progress within the last two or three years in harmonizing the interests of employer and employes. Boards, in each industrial centre, have been established upon which the men and the company are alike represented. By friendly negotiation and compromise, wages, hours of work and general social conditions have been established to the satisfaction of all concerned. Those who recall the strikes, the turmoil and disturbances that almost approached civil war in Colorado, because of the gulf that formerly separated the company and the men, will realize best what a wonderful change has taken place. And in Great Britain Lord Leverhulme, the director and business manager of the great industries at Port Sunlight, has announced recently that he proposes to overwork machinery rather than men, and cut the working day to a minimum. It is the sheerest absurdity to assert that it is impossible, under the present organization of business, to get labor and capital together to their mutual benefit.

The Russian Soviets have demonstrated what the common ownership and control of the machinery of production will do for a people. To-day Russia is not merely on the brink of starvation—the people are actually dying by the thousands from want and starvation. Yet, in the United Kingdom and the United States and elsewhere, labor agitators and visionaries demand that private enterprises be appropriated for the benefit of the working class. It is even suggested at Washington that the railroad brotherhoods take over and operate the railways of the United States. How efficient and effective committee management by workers can be is shown by the fact that Lenine and Trotzky have been compelled to appeal, and pay high salaries, to former industrial managers of mines, factories, railroads and the like. Canadian and American workmen have achieved the highest standard of wages and living conditions in the world; and their sound sense can be relied upon to reject the appeal of the agitator to throw upon the scrap heap what has taken generations of effort and sacrifice to construct.

COMPLETING THE RAILWAY PROGRAMME

WESTERNERS are practically unanimous in urging that the Dominion government railway from Hudson's Bay be completed, as is indicated by the fact that a recent resolution of western members of the House of Commons to this effect lacked only the names of two members from the Prairie Provinces.

They go still further than this, however, and want a number of extensions, branch lines, etc. While this is more in accord with the policy as announced by the management of the Canadian National Railways, there are many proposals which could well be postponed in preference to the completion of the larger project which has already involved the expenditure of many millions of dollars. This expenditure will be quite unproductive unless the work be completed, as there is no local traffic through the unsettled country served by the Hudson's Bay road.

As an instance of one of the additional proposals a deputation from Prince Albert has asked that a line be built joining Prince Albert with the Pas. This line would be of little value excepting as a shorter route from Prince Albert to Port Nelson. If the Hudson's Bay Railway route is going to be a failure, as is quite possible, this branch line would be of little value and it would appear wiser, therefore, to confine the experiment to a minimum cost.

The Alberta Government has decided that it will not abolish private employment agencies, at least until such time as the government bureaus have proved their ability to meet all demands.

The office for Western Canada of *The Monetary Times* has been moved from 1208 to 1206 McArthur Building, Winnipeg, the new telephone number being Main 3409. This office was opened more than twelve years ago and the new quarters have become necessary for our increasing requirements.

The Ontario Government is considering granting partial exemptions in the case of municipal assessments of low priced dwellings. This would be a more logical means of assistance than the government housing schemes. It is a question, however, if the principle of progression has not already been sufficiently applied in Canada through our income taxes and succession duties.

The municipality of the district of Fraser Mills, B.C., is to be disincorporated and be placed directly under provincial taxation or incorporated with the municipality of the district of Coquitlam. Notice of resolution to that effect was given by Premier Oliver. The notice recites that "it is apparent that the municipality of Fraser Mills was created and exists for the purpose of evading the burden of a fair measure of taxation."

LAND MORTGAGE ASSOCIATION OF ONTARIO

Returns Made at Annual Meeting Reveal Importance of Ontario Institutions

THE annual meeting of the Land Mortgage Companies' Association of Ontario was held in Toronto on March [illegible], and was attended by representatives from the leading loan companies of the province. The report of the executive committee showed an increase in the aggregate assets of the twenty-three companies composing the association to [illegible]. Reference was also made to the committee's work during the year with regard to loan company legislation. Mr. R. S. Hudson, who has ably filled the presidency of the association since 1910, asked to be allowed to retire and Mr. George H. Smith also desired to be relieved after a record of nineteen years' service as secretary-treasurer of the association. A unanimous resolution of the association expressed the appreciation of all members for the valuable services rendered for so many years by these officers. Mr. Hudson and Mr. Smith were then elected honorary president and second vice-president respectively.

The officers elected were:—R. S. Hudson, Toronto, honorary president; C. W. Cartwright, Hamilton, president; Edward Saunders, Toronto, first vice-president; George H. Smith, Toronto, second vice-president; T. D'Arcy Leonard, Toronto, secretary-treasurer; Messrs. V. B. Wadsworth, Walter Gillespie, and F. B. Fisher, Toronto; J. W. Stewart, St. Thomas; A. M. Smart and Hume Cronyn, London; E. F. Dwyer, St. Catharines; J. E. McElderry, Guelph; and J. H. Kittermaster, Sarnia.

Ontario Legislation Criticized

In its report the executive committee detailed its work of the past year with particular reference to Dominion and provincial legislation affecting loan companies. As a result of their efforts the Ontario government's proposed amendments of the Loan and Trust Corporations Act were modified to the advantage of all concerned. The adoption of the report was moved by the president, who said: "The proposed amendments to the Loan Corporations Act and the revision of the government's return have made heavy demands upon our time. Most of our companies have had long and honorable records, are admittedly sound and of unquestioned stability. The management of these companies are as deeply interested as any one can be in preventing losses to the public through investments in what may have been miscalled a loan company.

"There is little in the proposed bill which will prove of advantage, while the new return to be made annually is so involved and complex that very few of the limited number which take the trouble to peruse it will be able to comprehend its intricacies. What was needed instead of a more complicated return was a much simpler one, containing such salient information as would indicate almost at a glance any weakness there may be.

"The great success of the 1918 Victory Loan, no doubt, has had the effect of again largely reducing the deposits with many of our companies. The inherent strength and soundness of these companies is most clearly manifested by the fact that, notwithstanding the drains upon their borrowed capital (the raw product of their business) for more than four years, they have been able to continue to submit to their shareholders annual statements indicating a reasonable measure of success and a most healthy condition. Moneys which our depositors withdraw for investment are in many instances the savings of years. They are paid to the government for war bonds and immediately go to swell the deposits with the banks. A long period of thrift and careful saving will be necessary to enable these depositors to reinstate the balances at the credit of their accounts.

The Manitoba Board of Trade is being reorganized.

PERSONAL NOTES

MR. M. S. MILLIARD has been elected a member of the Standark Stock and Mining Exchange, Toronto.

MR. T. S. ENGLISH, of Winnipeg, has been appointed manager of the Vancouver office of the Great West Permanent Loan Co., Rogers Building.

MR. J. P. JACOBSEN will head The Pas, Manitoba, board of trade again this year with Geo. R. Bancroft as vice-president, and W. J. Young secretary and treasurer.

MR. F. H. RUSSELL, manager for Canada and Newfoundland of the Railway Passengers Assurance Company, is at present in the western provinces on a business trip.

MR. F. W. HARTLEY, who for a considerable number of years has been with the Royal Trust Co., at Winnipeg and in Vancouver, has resigned his post with that corporation.

MR. THOS. K. MCNAIR, formerly associated with W. G. Mitchell and Co., of Toronto, has been admitted as a partner in the firm of J. F. Stewart and Co., bond dealers, Toronto.

MR. T. B. MACAULAY, president and managing director of the Sun Life Assurance Company of Canada, has been elected a power director of the Montreal Light, Heat and Power Co., to fill the vacancy caused by the death of Sir Rodolphe Forget.

MR. JOHN WARDROP has been appointed to an important post in Canadian National Railways service. With the recent reorganization of the Canadian National Railways colonization and industrial development work, central offices have been established in Toronto, Winnipeg and Chicago and the department will hereafter be known as the Industrial and Resources Department. Mr. Wardrop has been appointed general agent at Winnipeg with jurisdiction extending from Port Arthur to the Pacific Coast.

OBITUARIES

MR. W. A. KEMP, vice-president of the Sheet Metal Products Co., died suddenly on March 17th, in South Carolina.

MR. W. J. HANNA, president of the Imperial Oil Co. of Canada, died suddenly in Georgia on March 20th. The late Mr. Hanna was also vice-president of the International Petroleum Co. and a director of the Imperial Bank. He was a member of the Ontario bar, for some years provincial secretary of Ontario, and food controller for Canada from 1917 to 1918.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt for the week ended March 14th, 1919:—

McKinley-Darragh, 85,975; Buffalo Mines, 161,334; Coniagas Mine, 236,000. Total, 483,307.

The total since January 1st is 4,382,797 pounds, or 2,191 tons.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

CANADA'S MINERAL OUTPUT

Valued at Over $210,000,000 in 1918—Classification by Provinces and by Products

A preliminary statement in regard to the mineral production of Canada in the calendar year 1918, issued by the Department of Mines, gives the value as $210,204,970, an increase of $20,558,000 over the figures of 1917. The production by provinces in 1918 was as follows:—

Nova Scotia	$ 22,754,780
New Brunswick	2,111,816
Quebec	19,534,409
Ontario	94,084,420
Manitoba	3,197,697
Saskatchewan	894,591
Alberta	23,298,118
British Columbia	42,080,741
Yukon	2,248,398
Dominion	$210,204,970

The substances included in the tables are divided into three classifications, metallic, non-metallic and structural materials and clay products.

Metallic.

Antimony ore (exports)	$ 1,430
Cobalt metallic and contained in oxide	3,368,860
Copper, value at 24.628 cents per lb.	29,163,450

Grand total, 1918	$210,204,970

DOMINION FARM LAND VALUES

Average For 1918 is $46 An Acre—Wages Increased

The Dominion Bureau of Statistics has published its annual report on average farm values for the year 1918, consisting of estimates of (1) the values of farm land; (2) of the wages paid for farm help; and (3) the value of farm livestock and of wool. These estimates have been compiled from the returns of a numerous corps of crop correspondents throughout Canada. The report reads as follows:—

According to the returns received, the average value of farm land for the Dominion, including both improved and unimproved land, together with dwelling houses, barns, stables and other farm buildings, is $46 per acre, as compared with $44 in 1917, $41 in 1916, $40 in 1915 and $38 in 1914. By provinces, the value is highest in British Columbia, viz., $149, this being exactly the same figure as in 1917. The higher value per acre in this province is due to orcharding and fruit-growing. Quebec and Ontario have the same average value per acre, viz., $57, the average for 1917 in Quebec, being, however, $53, whilst in Ontario it was $55. In Prince Edward Island the value is $44 as in 1917; in Nova Scotia it is $36 against $34; in New Brunswick $35 against $29; in Manitoba $32 against $31; in Saskatchewan $29 against $26; and in Alberta $28 against $27.

The average wages paid for farm help in 1918 show a substantial increase as compared with the previous year, and are again the highest on record. For the whole of Canada, the average wages per month of farm help during the summer, inclusive of board, are for males $70, as compared with $64 in 1917, and for females $38, as compared with $34. For the complete year, including board, the wages averaged for males $617 and for females $416, as compared with $611 and $364 respectively in 1917. The average value of board per month is $21 for males and $17 for females, as against $19 and $15 in 1917. Compared by provinces, the average wages per month for male and female help, respectively, in the summer season, including board, were in 1918 in order of value as follows: British Columbia $89 and $57; Alberta $86 and $50; Saskatchewan $86 and $49; Manitoba $78 and $45; New Brunswick $69 and $31; Quebec $65 and $33; Ontario $62 and $35; Nova Scotia $60 and $30; Prince Edward Island $46 and $25.

INVESTMENT OPPORTUNITY

On page forty of this week's issue of *The Monetary Times* will be found particulars of a timber property that is offered for sale. The enterprise in question is firmly established, its product having found a ready market in the eastern portions of Canada for years past. At the present time the company has valuable contracts on its books for the supply of large quantities of material for consumption in eastern Canada and the New England States. Those interested in an investment opportunity of this character should get in their replies as soon as possible.

CANADIAN FINANCIAL INSTITUTIONS

Insurance companies and loan and trust companies have subscribed over $120,000,000 to the two Victory Loans. The following are the totals for each class for the different loans:

	1917.	1918.
Life companies	$41,665,000	$50,539,050
Loan and trust companies	6,380,000	8,338,000
Fire and general	4,257,600	9,241,000
	$52,302,600	$68,118,050

It is probable that these returns do not include all the subscriptions as many companies preferred not to make them public. Thus far the Dominion government has not made public such lists of large subscriptions.

In addition to these voluntary contributions to war loans these financial institutions have borne a substantial share of the war taxation in Canada. In the case of trust companies the increase in corporation taxation, exclusive of the war tax, during the four years from 1914 to 1918, was 31 per cent. This does not include ordinary property taxes, etc. When the war tax is included the increase is found to be 188 per cent. At the end of 1914 taxation of trust companies amounted to .44 per cent. of capital. At the end of 1918 it was 62 per cent. of capital. These figures are exclusive of war tax, which, when included, brings tbe percentage at the end of 1918 to 1.29 per cent. of capital. The increased burden upon the other financial institutions is similar.

BANK OF HAMILTON REPORT

The annual report of the Bank of Hamilton for the year ended February 28th, 1919, has just been issued and shows a growth in assets during the year from $66,541,680 to $77,404,120, while the net profits were $571,226, which is not far short of the $598,522 earned in the fifteen-month period covered by the last report. Current loans in Canada have expanded from $33,134,198 to $37,719,378, thus showing an increased participation in the country's business. A new item appearing in the statement is government wheat loans on demand, which amount to $5,918,000. Call loans in Canada stand at $4,421,577, as compared with $3,487,456 a year ago, but in the previous year there was also an item of call loans outside Canada of $1,400,000.

In addition to the net profits of $571,226, there was recovered $100,000 from over-appropriation, making, with previous surplus of $232,421, some $903,647 available for all purposes. The usual dividends and appropriations were paid, after which $573,000 was set aside for reserves and reduction of bank premises account, still leaving a balance of $85,114 carried forward. Some items in the profit and loss statement are as follows:—

	1918-19.	1916-7-8.*
Balance from previous year	$232,421	$209,556
Net profits	571,226	598,522
Dividends	360,000	450,000
Carried forward	85,114	232,421

*Fifteen months.

BANK OF MONTREAL CAPITAL INCREASE

The Bank of Montreal has decided to increase its paid-up capital from $16,000,000 to $20,000,000. The capital authorized is $25,000,000. This has been to a large extent made necessary by the issuance of 30,750 shares of capital stock to the shareholders of the Bank of British North America in accordance with the agreement by which the latter was taken over by the Bank of Montreal. As this would necessitate the raising of the Bank of Montreal's capital to $19,075,000, there would be a surplus of 9,250 shares. These shares the bank proposes to allot to shareholders of record at the close of business February 28 last, at the rate of one share of new stock for twenty-one shares then held. The shares will be issued at $187.50 per share The latest sale of Montreal Bank shares on the Montreal exchange was at 210.

BRANDRAM-HENDERSON BOND ISSUE

At a meeting of the shareholders of Brandram-Henderson, Ltd., held on March 13th, authorization was given for an issue of $1,250,000 20-year 6 per cent. consolidated mortgage sinking fund gold bonds; $655,000 of these have been sold to Nesbitt, Thomson and Co., and are being placed upon the market by them. In explaining the purpose of the issue, Mr. George Henderson, the president, stated that it was for the purpose of consolidating the finances of the company, meeting necessary capital expenditures, and providing for the continuous expansion of the company's business. It was also announced that it was proposed that $655,000 would be issued presently, that $345,000 would be held in escrow to retire a like amount of first mortgage bonds outstanding, and the balance of $250,000 would be held in the treasury, only to be issued at some subsequent date to the extent of 75 per cent. of the cost of any capital expenditure.

F. N. BURT REPORT GOOD

The annual report of the F. N. Burt Co., Ltd., for 1918 is an exceptionally good one. Profits for the year show an increase of $100,000, as compared with the previous year. Comparative figures in the profits and loss statements for the last two years are:—

	1917.	1918.
Balance at credit	$232,518	$272,864
Profits for the year	369,999	470,377
Total	$602,517	$743,241
Transferred to reality and plant reserve account	94,710	120,000
Transferred to reserve for federal taxes	26,000	37,306
Written off patents	25,678	25,886
Preference stock dividend	138,264	138,264
Common stock dividend	45,000	45,000
Balance carried forward	272,864	376,784

Total assets are now $4,258,336, an increase of approximately $400,000. The principal increase, to the amount of $183,000, is in the accounts and bills receivable item; this is the result of the increased business, and the good condition of the accounts is indicated by the fact that at the end of the year there was less than $20,000 more than 90 days due. Other items in the assets' statement show increases in proportion to the large growth of the business. In the liabilities' statement accounts and bills receivable have increased by $166,000 corresponding to the increase in the accounts receivable. The reserve for federal taxes is now $40,000, a small balance being brought forward under this head from last year. This reserve is necessary in view of the fact that the company is a United States corporation. There is also a Dominion Paper Box Co. reserve of $29,185, which was derived from the increase in price of merchandise and is retained to offset a corresponding possible decrease in prices.

NO WINNIPEG INCOME TAX THIS YEAR

Committee of Manitoba Legislature Decides Not to Empower City to Levy Income Tax—Whole Subject Under Discussion

The income tax as drafted by the Winnipeg City Council, which was described in *The Monetary Times* of March 7th, will not be in force this year as was originally planned. In order that the city would have power to levy such a tax it was necessary that authority should be obtained from the provincial legislature and as other amendments to the city charter were being considered, this was included. The first bill submitted by the city council was criticized as being hastily prepared and inequitable. A second draft bill was, however, shortly afterwards presented. When the law amendments committee of the legislature took it up, however, strong opposition developed and this amendment was omitted.

Arguments in favor of the tax were presented by Mr. T. A. Hunt, city solicitor. He pointed to the heavy burden which was borne by real estate. The solicitor stated that any person who conducted a business in the city although living outside the city will be taxed on total income. Head offices, business firms, etc., who are situated in the city will also be taxed on their total revenue. This would mean that the Union Bank, for instance, whose head office is in Winnipeg, would be forced to pay an income tax on its entire business.

Lengthy evidence was received by the committee from Mr. John B. Leenhouts, a tax expert from Wisconsin, representing the city of Winnipeg. He expressed the view that the income tax was just as applicable to a city like Winnipeg as to any other municipality or state and gave evidence as to the success of the civic income tax in Milwaukee.

Opposition to Tax

On March 3rd, representatives of the Winnipeg Board of Trade and of the Manufacturers' Association appeared before the committee and urged that the bill be laid over for a thorough investigation. The Manufacturers' Association submitted the following argument:—

"This association is opposed to any taxation proposals for the city or province which are not based on a comprehensive survey of the whole situation in the province with regard to the methods now employed to raise taxes, showing to what extent, if any, the method of taxation now practised works injustice or fails to secure adequate returns of revenue. Such survey should contain a report of supplementary or alternative methods of taxation, showing in detail the probable effect of the joint workings of the proposed law, and such old methods as might be retained, and the revenues likely to be derived therefrom. And this association is convinced that it is imperatively necessary that an expert and comprehensive survey along the lines above suggested, by one or more competent persons, should be obtained by the government, and that such persons should render assistance in drafting such legislation as may be necessary."

The Board of Trade offered the following resolution along similar lines:—

"This bureau recognizes that the equitable distribution of community costs is the foundation of future development, and believe that the income tax is one means of attaining this end. While we realize the necessity of immediate relief to those at present bearing the burden of taxation, we urge, however, that no action be taken by the city of Winnipeg in regard to income tax legislation until the report of the provincial commission on taxation has been received. In the meantime we suggest that the taxation committee of this bureau investigate and prepare a report on other methods that may be suggested for raising the necessary revenue with which to meet the immediate community costs; that this report, if adopted by the bureau, be forwarded to the council for [illegible] to the provincial tax commissioner; that the representatives of the board of trade on that commission be [illegible] to arrange that its recommendations include definite suggestions regarding the best methods of making assessments for municipal taxation. We desire in making these representations to the council to express our appreciation of the city council's efforts to arrive at an equitable solution of this vital problem."

Mr. Edward Parnell appeared as the representative of both these organizations. He pointed out the danger of income taxes being imposed at the same time by federal, provincial and municipal governments with separate machinery for collection maintained at unnecessary expense. He expressed the view that it would be better for the province to take over part of the municipal tax burden such as the provincial levy on municipalities, the patriotic tax, etc., and raise the necessary funds by means of a provincial income tax. The Board of Trade and the Manufacturers' Association, he said, were not opposed to an income tax, if it were applied as part of a carefully worked out system.

Among the evidence submitted against the bill was that of Mr. D. W. Buchanan, representing the Single Tax League, who maintained that the city was now over the crest of financial difficulty; that there was no reason for changing the system, and that real estate men merely wanted to relieve the land taxes in order to bring again boom conditions such as had resulted in the present financial difficulty. Some also referred to the fact that as Winnipeg and St. Boniface were adjoining municipalities, a Winnipeg income tax would result in the shifting of much business and population to St Boniface.

PRICE BROTHERS FORM SYNDICATE

A circular has been sent to shareholders of Price Brothers and Company, informing them that a syndicate, composed of the president of the company and certain directors, bought last fall, a property on the Sault-au-Cochon River, 180 miles below Quebec. This syndicate is capitalized at $500,000, and participation is offered to the shareholders of Price Brothers to the extent of 10 per cent. of their holdings of the company's stock. The offer is made to all shareholders of record March 15th, 1919, and payments will be required to be made as follows:—20 per cent. on or before April 15th; 40 per cent. on or before May 15; and 40 per cent. on or before April 15th of this year.

MINIOTA FARMERS MUTUAL FIRE

During the year 1918 the Miniota Farmers Mutual Fire Insurance Co. of Beulah, Manitoba, increased the amount of insurance in force by $2,948,031, making a total at the end of the year of $25,511,518. Cash assets now total almost $100,000, and total assets are $468,774. This includes, however, $358,122 of premium notes unassessed. Details of the company's financial affairs are given elsewhere in this issue.

The following comparative table shows the increase in the company's business during a period of five years:—

Dec. 31st, 1888, business in force		$ 589,295.00
Dec. 31st, 1893, business in force		1,303,416.00
Dec. 31st, 1898, business in force		1,733,092.00
Dec. 31st, 1903, business in force		3,134,046.00
Dec. 31st, 1908, business in force		5,358,164.00
Dec. 31st, 1913, business in force		12,058,918.00
Dec. 31st, 1918, business in force		25,511,518.00
Business written in 1918		9,715,041.00
Number of policies issued, 1918	4,445	
Total policies in force	12,052	
Total volume of business in force		25,511,518.00
Average amount of each policy		2,116.00

Saskatchewan Association of Rural Municipalities

Good Conditions in Municipal Finance are Reported—Assessment Not Yet Satisfactorily Arranged—Joint Financing of Hospital Construction—Wild Lands' Tax

THE fourteenth annual convention of the Saskatchewan Association of Rural Municipalities was held in Regina early this month, in conjunction with the convention of the Saskatchewan Municipal Hail Insurance Association. An account of the latter was given in *The Monetary Times* of March 14th. Much of the municipal legislation enacted by the Saskatchewan Assembly first sees the light of day at these gatherings, though a considerable percentage of the resolutions passed by the conventions do not become incorporated in the statutes. Last year one-third of the requests made by the convention were granted wholly or in part.

At the municipal convention the excellent financial condition of the rural municipalities was referred to by J. N. Bayne, who has just been promoted from Deputy Minister of Municipal Affairs to Commissioner of the Local Government Board, in the following words:—

"It is a source of much satisfaction to the department and to all rural municipal officials, to know that not one rural municipality has failed to meet its annual debenture coupons. Not one is in default. A similar statement can be made regarding the present state of villages. To cut down, or refuse altogether a proposal to borrow by debenture is not always a pleasant duty, but when later results show the wisdom of such action, there is room for gratification.

"The debentures of rural municipalities are easily classified as 'gilt edged' on account of the very substantial security upon which they are based. What is better in any province, and particularly in Saskatchewan, than farm land? However, rash borrowings on the part of even a few municipalities might make their debentures as a class exactly the reverse of gilt edged. Municipalities cannot generally be too careful in making debenture loans. It was at one of your conventions about ten years ago that I reiterated the old fashion truism that it is easier to go into debt than to get out of it. I also intimated that no matter how easy credit might be, taxes should be collected with all promptness. In those days it seemed easier, in many instances, to borrow money than to collect it by way of taxes—a dangerous and treacherous condition.

"There may be a tendency in some quarters now that the war is over, to throw discretion to the winds and to borrow to the limit. I would say beware of the reaction which may come after the compulsory tightening of our belts during the last four years. You will notice that the prices of labor and materials have not come down since the signing of the armistice and we are told that they are not likely to abate for probably another year at least. Improvements taken for 1919 under such conditions would be secured only at the maximum of cost. These prices will doubtless lower in coming years, but the fixed annual charges will remain fixed at the original high figure. Only a few days ago I asked an applicant who wished his community to borrow heavily for a certain purpose, if he would care to buy wheat at present day prices for his use five years hence? I have learned that municipal borrowings should be attempted only after close and careful deliberation. As a rule the rural municipalities of Saskatchewan have not been inclined towards over borrowing, a fact which assists in giving their securities a high rating when they are put on the market."

Wild Lands Tax

In the past the municipalities have enjoyed a substantial revenue from the proceeds of the surtax levied on uncultivated lands, as much as $4,000 annually accruing to some municipalities containing a large percentage of speculative land. Two years ago the government withdrew this privilege, substituted a Wild Lands Tax and deflected the revenue to its own coffers. At the same time for the purpose of this tax the government decided to equalize the assessment as between the rural municipalities, appointing for the purpose an officer of the municipal department as Wild Lands Tax commissioner. The equalization of the assessment was made at the request of the municipal association and was made to apply to all municipal revenue.

Last year the association registered a protest at the loss of revenue as a result of the conversion of the tax to the government treasury and this year a resolution was passed requesting that one-half of the revenue be returned to the municipalities, though members of the government at this convention and on previous occasions have stated positively that the government requires the money and has no intention of returning it to the local bodies. A resolution was also passed requesting "that lands owned by large landholders and fenced for pasture purposes for the sole benefit of the resident farmer be exempt from the Wild Lands Tax."

Addressing the convention, J. J. Smith, Wild Lands Tax Commissioner last year and now deputy minister, outlined the method adopted in equalizing the assessment in the following words:—

"The most important work undertaken under the Wild Lands Tax Act during the past year was the adjustment of the general scale of assessment in the different municipalities. For some time past the inequity in the scale of assessment as between the different municipalities in the province has been fully realized in municipal circles. With the passing of the Public Revenues Act and the Wild Lands Tax Act, it became absolutely necessary that some equalization of the general scale of assessment throughout the province should be made, in order that the lands in all rural municipalities should pay an equitable share of taxes under these acts.

"Under section 10 of the Wild Lands Tax Act and section 238a of the Rural Municipality Act, power is given the wild lands commissioner to fix the basis of value for purposes of assessment in each rural municipality. These sections empower the commissioner, upon such information and after such inquiries as he may deem suitable, to direct the assessor of each municipality to raise or lower in and for the purpose of the assessment for the following year, the general scale of assessment of all lands within the municipality as shown on the assessment roll for the current year. These sections further provide that the values so determined shall be the values for the purposes of the taxation of wild lands under the act as well as for the purposes of the assessment and a taxation of all other lands for general municipal purposes.

"During the past year four inspectors attached to the Wild Lands Tax branch of the department visited the different municipalities of the province, inspected the character of the land, and collected such information and data as they could relative to the general scale of assessment in each municipality. Needless to say, a number of striking instances of inequity in the assessed values of lands as between neighboring municipalities were discovered. In more than one case the scale of assessment between adjoining municipalities was found to differ by fully fifty per cent. The reports of the inspectors show that the general scale of assessment in the great majority of municipalities has not been raised with the advance in the value of the land. In many municipalities there is a tendency to assess the poorer lands reasonably high while the better lands are almost invariably assessed at much less than their actual value.

"When the work of inspection was completed, the wild lands tax commissioner held a conference with the inspectors and the general scale of assessment in each municipality was fully discussed and considered. The necessary changes in the scale of assessment were then decided upon and the order of the wild lands tax commissioner, raising, lowering or confirming the scale of assessment, was issued.

"The need for such adjustment as we have made will be apparent to you when I tell you that the wild lands tax

commissioner raised the general scale of assessment in 206 rural municipalities by amounts varying from five per cent. to eighty per cent.; lowered the general scale of assessment in [illegible] rural municipalities by amounts ranging from five per cent. to fifteen per cent., and confirmed the scale of assessment in eighty-five rural municipalities. The average increase for the whole province was fourteen and one-sixth per cent. While there is no doubt room for further adjustment in the cases of a number of municipalities—and this will be given attention this year—I am quite convinced that the taxes paid under the Public Revenues Act and the Wild Lands Tax Act by the owners of land in the rural municipalities will be very much more equitable this year than they have ever been before."

While supporting the principal of equalization numerous protests were made at the work being left in the hands ot one man. It was stated that as a result of the increased aggregate assessment the total revenue from the wild lands tax had been increased by $136,000 annually and a delegate expressed the fear that this might be still further increased another year. As a result of the discussion a resolution was passed urging the government to create an assessment equalization board comprised of members of the association. Another resolution was passed asking the government to provide for an equalization of the assessment as between the rural municipalities on the one hand and the cities, towns and villages on the other for the purposes of the Public Revenues Act.

Municipalities and Seed Grain

The question of the municipality's security for the repayment of monies advanced to farmers for the purchase of seed grain is one which has been to the fore at several recent conventions. The government has steadily refused to allow the municipalities to make the seed grain lien a charge against the land, holding that a lien should not take priority over a first mortgage. The municipalities again passed a resolution asking power to realize from the land upon which a seed grain caveat is registered and are also asking for permission to levy against the crop or goods and chattels of the owner on any of his property, this concession only previously being given with respect to the land in connection with which a seed grain advance was made. It was also decided to ask the government to make it a criminal offence for a licensee to apply the proceeds of his crop to other purposes without first satisfying the lien and to extend this liability to the purchaser of such crop where the purchaser was aware that an undischarged lien existed against the grain.

Finances of Municipalities

The defalcations of secretary-treasurers and the laxity of audit methods came in for a good deal of notice, and coupled with this was some sharp criticism of the fidelity guarantee companies, and particularly Canadian companies who were accused of resorting to every technicality to evade their responsibilities.

A. G. Hawkes, vice-president of the Saskatchewan Grain Growers' Association criticized auditors for failing to notify the reeves and councillors directly of defalcations or irregularities, citing as an instance a loss of $7,000 which had occurred in his own municipality. The result was the passage of resolutions asking the government to require the financial statement of the first ten months of the year prepared by the auditor to be read at the nomination meeting by the returning officer, taking this duty out of the hands of the secretary-treasurer, and also requiring auditors to notify the reeve and all councillors at once upon discovery of "negligence, irregularity or discrepancy" in the municipality's books.

The protection afforded the municipalities against loss under the guarantee bonds of the fidelity companies was a farce, said vice-president Murdo Cameron. He said that all sorts of excuses of a technical character were offered by the companies when it came to making good any losses which they had guaranteed and the bonds were so worded that they easily escaped their responsibilities. He had yet to hear of a single instance where a company had made good its bond when called upon to do so. From the body of the hall it was stated that deficiencies in municipal books totalling $70,000 had been recorded yet in only one instance had any of the companies made good the loss. A resolution was then passed calling upon the department of municipal affairs to to prepare a standard guarantee bond calculated to meet the requirements of the municipalities.

Hospital Debenture Issues

The government has had on the statute books for several years legislation enabling municipalities to co-operate for the construction of union hospitals to serve the needs of two or more adjoining municipalities. Comparatively few have taken advantage of this legislation to date, local jealousies in deciding the location of the hospital having in many instances been responsible for failure to act. To remove this objection at the recent session of the legislature the government was empowered to determine the location of hospitals where municipalities decided to take advantage of the legislation and legislation was passed permitting the incorporation of portions of municipalities into hospital districts, geographic features in some instances making it unfeasible for a whole municipality to join with another.

While approval was expressed of this legislation the convention thought a further step should be taken and a resolution was passed requesting the government to divide the whole province to be divided into hospital districts with the object of eliminating awkward corners and pieces which would be bound to occur if the municipalities were allowed to organize without reference to a general plan.

Provisions taken to safeguard investors in debentures for union hospital purposes were outline by Mr. Bayne in the following words:—

"Just a word or two regarding a new kind of debenture which may appear this year and in which at least some of your communities may be interested. I refer to 'hospital district debentures' which were provided for in legislation passed just last month and regarding which you are practically all informed. These new securities are somewhat similar to school debentures. They will have as their basis rural municipalities, or parts of them, and urban municipalities as well. The major portion in area, however, will always be farm lands and I think you can feel sure that no hospital district will be allowed to be so small that it will be weak.

"As you are aware, the lieutenant-governor-in-council fixes the area and municipal boundaries need not be observed; but it may be taken for granted that no contributing city, town or village, will be divided for hospital purposes. The security on which hospital debentures will be based can be relied upon as substantial—a fact which the investing public will soon learn.

"Right here I should like to say some word that would encourage all municipalities, school districts, rural telephone companies and hospital districts, to sell locally all debentures which they may issue. Up until a year or two ago the nature of a bond or debenture was not so generally understood as now. The Victory bond campaigns were indeed instrumental in acquainting the public as to the advantages of the people's investing in their own securities. In many parts of Saskatchewan there are those who might, to their advantage as well as to that of the community, invest funds in municipal offerings issues right in their midst."

The question of centralizing the administration of rural schools was freely discussed and a number of resolutions seeking to make the municipality the administrative area for purposes of taxation as well as for the government of the rural schools. This was one of the most important recommendations made to the government last year by Dr. Foght of Columbia University who was engaged by the Saskatchewan Assembly to make a complete survey of educational facilities in the province. The proposal, however, was not endorsed by the convention, it being generally felt that while the scheme in theory might be sound, the varying conditions in the different parts of the province made it impracticable at the present time. A compromise resolution giving such municipalities as might choose to adopt the scheme by popular vote the right to put into effect was defeated.

"Profits from Savings"

FIRE DEPARTMENT ORGANIZATION

A Plan for the Administration of a Fire Department in Cities—Suggestions for Handling Business

THE Toronto Bureau of Municipal Research has issued a series of suggestions for the betterment of fire department organization. These suggestions are accompanied by a chart illustrative of fire department organization. This chart is reproduced below.

Recommendations along similar lines were made by the Bureau five years ago and these have in part been carried out. The recommendations are as follows:—

1. The appointment of a fire commissioner and a redistribution of the functions of the chief.
2. The immediate establishment of a training school for firemen.
3. Improvements of methods of discipline.
4. The inauguration of a fire prevention campaign and the appointment of a fire prevention commission.
5. Appointment of additional firemen.
6. Adoption of definite rules governing appointments and promotions.
7. Establishment of definite procedure governing trial and punishment.
8. Designation of a department surgeon.
9. Establishment of a board of honor.
10. Revision of pension system.
11. Placing fire alarm wires underground in congested parts of city.
12. Furnishing fire halls and headquarters with proper maps.
13. Transfer of the duty to inspect city lights to another department.
14. Establishment of a central purchasing agency for all supplies.
15. Relieving the secretary of many of his present functions.
16. Adequate test of hose to replace present insufficient tests.
17. Budget estimates on scientific basis.
18. Standard specifications for department supplies.
19. Procedure for disposition of condemned property.
20. Establishment of check and control upon store-room.
21. Inventory of all property.
22. Inspection of supplies.
23. Standardization of fire-halls.
24. A searchlight for night fires.
25. New records and reporting system.

TERMS OF LONDON INSURANCE DEAL

The details of the transaction by which the London and Lancashire Fire Insurance Company purchased the Law Union and Rock Insurance Company have been received here. The Law Union and Rock had outstanding two classes of stock; there were 150,000 shares of a par value of ten pounds each, of which ten shillings per share had been paid and two shillings added from profits, making a total paid up of twelve shillings per share. The other class comprised 75,000 one pound shares fully paid. This makes a total paid-up capital of £165,000.

The report states that the price was ten pounds per share for the former shares and ten guineas per share for the latter. This would mean that the holder of a ten pound share who had made an investment of only ten shillings would receive ten pounds for his share and the holder of a one pound fully paid share would receive ten guineas. The discrepancy between the two prices is probably accounted for by the fact that the first mentioned shares carry a large contingent liability to the amount of the unpaid balance, whereas in the case of the second class there is no such liability.

Early in January the market price of the £10 shares was £7¼, and that of the £1 shares was £7⅝. As soon as the negotiations were rumored, however, the price advanced.

Payments are to be made as follows:—

Four pounds in London and Lancashire debentures; four pounds six shillings and eight pence in London and Lancashire shares and balance in war bonds or cash.

The London and Lancashire also announces a scrip bonus of 100 per cent., making shares five pounds paid instead of two pounds ten shillings paid. It also intimates that the dividend will be increased to forty shillings per share.

Subscription lists will close on or before March 26th, 1919

Issue of *MONTREAL, March 19th, 1919*

$850,000

OTTAWA GAS COMPANY

6% Twenty-Year Refunding Mortgage Sinking Fund Gold Bonds

GUARANTEED UNCONDITIONALLY AS TO PRINCIPAL AND INTEREST BY OTTAWA LIGHT, HEAT AND POWER COMPANY, LIMITED

Dated March 1st, 1919. Due March 1st, 1939.

Interest payable 1st March and September. Principal and semi-annual interest payable in gold coin at Montreal, Ottawa, Toronto, New York or London, Eng. Coupon Bonds with privilege of registration as to principal. Redeemable as a whole or in part, at the Company's option on sixty days' notice, on any interest date at 103 and accrued interest. Montreal Trust Company, Trustee.

DENOMINATIONS: $1,000 and $500

CAPITALIZATION

	Authorized	Outstanding
Common Shares (paying 6 per cent.)	$2,000,000	$2,000,000
5 Per Cent. Consolidated Mortgage Bonds, due 1934	250,000	150,000
6 Per Cent. Refunding Mortgage Bonds	1,000,000	850,000

SECURITY FOR BONDS

Bonds will be secured—subject only to lien of an issue of $250,000 Consolidated Mortgage 5 Per Cent. Bonds of which $150,000 are now outstanding—by a direct and specific mortgage and charge upon all the Company's real and immovable properties, gas mains and plant both present and future and by a floating charge on all other assets. $150,000 of present issue will be held by Trustee for redemption of Consolidated Mortgage Bonds. Additional Bonds, amounting to $2,000,000, ranking equally with the present issue, may be issued to the extent of 75 per cent. of additions and betterments to plant, but only if Earnings for last preceding year shall have been at rate of 1¾ times interest on Bonds outstanding and to be issued. Trust Deed provides for Sinking Fund sufficient to retire over 50 per cent. of Bonds before maturity, at not over 103 and interest.

Complete prospectus, copies of which will be forwarded on request, contains a letter from Mr T. Ahearn, President of the Company, from which we summarize as follows

1. **Perpetual Charter and Franchise** to carry on a gas business in Cities of Ottawa and Hull was granted the Company by a By-law of the Town of Bytown (now Ottawa) passed in 1854, and by legislation of the Parliament of the Province of Canada, passed in 1853-1854 and 1865.
2. **Company's System** for the distribution of gas has a mileage of pipes of 141 miles. Production for the year 1918 amounted to 394,382,000 cubic feet of Gas; 14,227 tons Coke; 415,000 gallons Tar and 155,000 pounds Ammonia.
3. **Property Values** of the Company $3,100,000, against total of $1,000,000 Bonds outstanding, including this issue.
4. **Net Earnings** for 1918 available for interest on Refunding Mortgage Bonds $167,166, or *more than three times amount required*
5. **Unconditional Guarantee.** Ottawa Light, Heat and Power Company, Limited (The Holding Company of The Ottawa Electric Company and The Ottawa Gas Company), unconditionally guarantees principal and interest of The Ottawa Gas Company Refunding Mortgage Bonds. Combined Net Earnings of The Ottawa Electric Company and The Ottawa Gas Company for 1918 amounted to $310,119—*six times the amount required to pay interest charges on the present issue*

We offer the unsold balance of this issue at a price of:

101 and Accrued Interest, Yielding Over 5.90%

Payable as follows: *20 of the par value on application.*
40 of the par value on May 1, 1919.
41 of the par value on June 1, 1919.

The right is reserved to allot a portion only of the amount applied for. If only a portion of the amount applied for be allotted, the balance of the deposit will be applied towards payment of subsequent instalments. Payments may be anticipated in whole or in part at any time. Interest will be allowed on payments at the rate of 6 per cent. per annum. Accrued interest will be adjusted upon final payment.

Application may be made on the accompanying form.

British Columbia Estimates Heavy

Millions Will Be Borrowed This Year—Contingent Liabilities Reduced, on Account of Canadian Northern Being Taken Over by Dominion and Nakusp and Slocan by C.P.R.—Provincial Credit Good

HON. John Hart, minister of finance for the province of British Columbia, gave his budget speech in the legislature on March 12th. He said:—

"In dealing with the revenue and expenditure for the year ending March 31 last, we find that the revenue which my predecessor, our late premier, estimated would be collected was $9,868,325, and against this was estimated an expenditure of $2,032,225 on capital account, and $8,768,579 on current account, a total of $10,800,804, leaving an estimated deficit of $932,479. For the sake of comparison I am treating the accounts on the same basis as [illegible] for many years past, and on this basis we find, from the public accounts, which I presented at the opening of the session, that the net revenue for the year was $8,882,846 and the net expenditure on current and capital accounts was $[illegible], leaving a surplus of net revenue over net expenditure of $[illegible].

"This net expenditure showed a saving of $470,955 on the estimates presented a year before. Deducting the capital expenditure, the net expenditure on current account, as shown by the public accounts, was $8,073,565. The figure of $8,[illegible] does not, however, cover sinking funds, which I think should be taken into the calculation when figuring out whether there is a surplus or a deficit. Taking this into account we will find a deficit of $466,501. It has also been the practice in former years to exclude from the calculation certain payments considered as recoverable at some future date, such as moneys paid on account of Pacific Great Eastern interest.

"The revenue for the year fell short of the estimate by $[illegible]. The chief heads of revenue which showed a larger collection than was expected were poll tax by $179,500; in[illegible] by $[illegible]400, motor traffic regulations act by $73,000, coal and coke tax by $72,000, land sales by $46,000, amusement tax by $24,700, interest on the investment of sinking funds by $[illegible],000, log scaling fees by $20,000. Under the prohibition act liquor sales brought in $17,200.

"Sources of revenue which fell short of the estimate were: Income tax by $420,000, real property tax by $316,000, personal property tax by $179,000, wild land, coal land and timber land tax by $224,000, timber royalties and licenses by $[illegible],000, succession duties by $159,000.

"On the other hand the actual expenditure on capital and current accounts was less than the estimated expenditure by $[illegible]. There was a saving of $47,000 on public debt, of $[illegible] on the cost of civil government, of $114,000 in the department of lands, of $85,000 in the expenditure on education, of $[illegible] on the administration of justice, other than salaries, of $124,000 on miscellaneous, and $45,000 on the cost of maintenance of public institutions. Services which exceeded the estimate of expenditure were hospitals and charities by $[illegible], public works by $[illegible]7,000, revenue services by $[illegible], legislation by $[illegible],000.

"As compared with the previous fiscal year all the general sources of revenue showed increases, real property tax by $[illegible], personal property tax by $230,000, wild land tax by $[illegible], income tax by $574,000, motor traffic fees by $59,000, and liquor receipts by $[illegible]7,000. On the other hand items of expenditure which showed a decrease as compared with 1916-17 were: Public works by $679,000, civil government by $[illegible], legislation by $[illegible],000, administration of justice [illegible], hospitals and charities by $79,000. There was [illegible] spent on education than in 1916-17, the department of agriculture expenditure was greater by $14,000, [illegible] by $[illegible]7,000 and miscellaneous expenditure by $[illegible].

"The [illegible] the figures which I [illegible] to the House for the current year [illegible] revenue. For nine months up to the end of the calender year the receipts were only $657,759 short of the estimated revenue for the twelve months of the fiscal year, while the receipts for the corresponding period in 1917 were over three million dollars behind the estimated revenue for 1917-18. On the other side we find a reduction in the comparative expenditure by half a million dollars, the outlays in the nine months of last year being $3,388,692 less than the estimates for the year, while the year before the expenditures for the nine months were $2,815,345 below the full estimates.

"There should really be deducted from both revenue and expenditure a sum of $660,395, which was paid into the consolidated revenue fund in error in connection with the Pacific Great Eastern settlement and which was paid out again under authority of special warrant. This would leave the revenue for the nine months at $8,581,899 and the expenditure at $7,562,605.

"Towards the $9,900,055, which is expected to be the revenue for the twelve months we have collected at the end of December $9,242,295. Already we have received, for three-fourths of the fiscal period, in excess of the estimated revenue for the year by $161,735 on account of personal property tax, by $109,672 on account of the mineral tax, by $47,639 on account of wild land, coal and timber tax, by $41,500 on account of timber receipts, by $39,200 on account of land sales, by $13,500 on account of interest. Several of the heads of revenue which showed a shortage have since filled out, such as motor license fees, poll tax and Dominion subsidy payments. There still remained to be paid at the end of the year on account of income tax some $800,000. This is in large part made up of amounts expected to be derived from mining corporations and following an audit which has just been completed will probably be paid into the treasury before the end of the month.

Estimates of Expenditure and Revenue

"I come now to a discussion of the estimates of revenue and expenditure for the fiscal year ending March 31, 1920. The various services of government call for an expenditure during the coming twelve months of $11,071,113 on current account and $2,242,190 on capital account, or $13,313,303 in all. Against this we estimate a revenue of $10,209,960.

"In the department of agriculture we expect a revenue of $53,000, the increase of $23,660 being accounted for by larger receipts from horticultural inspection fees and collection from those who purchased seed grain last year. The revenue looked for in the department of the attorney-general is $833,000, or $255,415 more than it was in the current year. By an increase in the motor license fees $100,000 will be collected, and $50,000 additional is estimated for from land registry fees. The revenue from the administration of the Prohibition Act is set down at $25,000, and old sources which are expected to yield more, are game license fees, company incorporation fees, fines and fees of court and law stamps.

"Under the head of the department of finance, we estimate for a revenue of $6,358,215, the first item being the Dominion subsidies. These stand at the same figure as before, $625,135.06. The reduction of $287,000, which we allow for in my department, is much more than made up by a lesser collection of income tax as compared with the current year, due to the fact that last year there was included in the estimate the amount which will be got in from the mining companies for 1917, as well as for 1918. Mineral tax is expected to bring in $150,000, an increase of $65,000 on the last estimate. Closer collection of personal property tax justifies us in placing the figure from that source at $750,000, which is higher than I put it last year. To the receipts from the taxation of unworked Crown granted mineral claims, we have added $20,000, making it $60,000.

To Presidents, Sales Managers, Corporations & Financial Companies

IF you could locate and secure the services of a high-grade business getter, would it pay you to get him? That is the question.

THE man in question has all the natural aptitudes for creating, planning, organizing, promoting and selling to put his persuasive ability to good account, and has the right stuff in him that makes for executive ability.

NATURALLY, he is forceful, active and energetic, and industry is one of the most prominent traits of his character. Through his personality he can inspire co-operation, and through his ability win confidence. He is a keen student of human nature, and finds it a pleasure to meet people with ease and grace.

MAPPING out a selling campaign, determining its policy and directing its conduct are lines in which he can find increasing success. He can accept and properly discharge such duties with poise and dignity, coupled with that tireless, enthusiastic vigor requisite to maintaining in smooth, rapid operation a large working personnel engaged on wide, diversified tasks.

DURING the last four years of strenuous times his sales have been constantly on the increase. He is thirty-five years of age, with a strong physique, and it is his ambitious nature, together with his natural desire for a broader knowledge in the business world, that prompts him to offer his services to an organization sufficiently large to make a place for the personality described above.

TO corporations doing business with the agricultural community in the Western Provinces his services would be most valuable, therefore managers of Trust and Loan, Mortgage, or allied companies, are especially invited to investigate.

Central Chambers, Ottawa

"Another tax in which we look for an increase is wild, coal and timber lands, which we estimate at $750,000. In the case of these four items the collections up to the end of December were practically at what we have placed the coming year's revenue from them. By bringing the coal mining companies under the alternative of income tax or mineral tax, in common with other mining companies, we can hope for a revenue of $200,000 instead of the $160,000 at which it appeared in last year's estimate. With a larger sum invested in sinking funds the income from interest will be increased by $20,000 to $210,000. Rents have been put at $38,000, an increase of $23,000, which is explained by the rental of offices in British Columbia House, London. Amusements tickets tax, real property tax, miscellaneous interest, probate fees and succession duty fees are left at the former figures. Poll tax is set down at $250,000.

"The estimated expenditure by services is given in the estimates as follows:—

	1918-19.	1919-20.
Public debt	$1,409,678	$1,412,050
Legislation	101,500	100,000
Premier's office	12,750	13,430
Department of agriculture	240,201	271,334
Department of attorney-general	941,300	917,822
Department of education	1,780,990	1,844,540
Department of finance	754,035	727,277
Department of fisheries	17,175	16,955
Department of lands	713,608	866,001
Department of labor	29,000	103,880
Department of mines	335,504	330,238
Department of provincial secretary	1,923,921	2,331,880
Department of public works	1,996,840	2,092,874
Department of railways	41,730	42,830
Chargeable to capital	1,764,590	2,242,190

Assets and Liabilities

"The balance sheet of the province for the year ended March 31 last shows a balance of assets over liabilities of $18,260,032, as against a balance of $17,477,345 at the end of the previous fiscal year, an increase of $782,686.

"The statement of capital assets and liabilities shows for last year an excess of assets of $16,821,989, which is an increase over 1916-17 of $686,716. This has been brought about by an increase in sinking funds and other capital assets against which stands the transfer of items aggregating half a million dollars from capital assets to current assets. These are printing plant and equipment, road machinery and colony farm livestock.

"The excess of current liabilities over current assets at the end of March, 1918, was $3,062,984. The increase of $1,400,000 each in our temporary loans and in accounts payable, against which is to be placed an increase on the credit side of $900,000 in cash and advances in the hands of government agents and the amount transferred from capital assets.

"The excess of deferred assets over deferred liabilities at the end of the last fiscal year was $4,501,027, an increase of $1,730,373 over 1917. The items which are placed under the heading of deferred assets are outlays for which we expect to be repaid, but the ultimate realization of which we cannot at present determine. The sums which make up the increase mentioned are a payment of $29,033 on account of interest on Nakusp and Slocan Railway bonds, a payment of $874,117 on account of interest on Pacific Great Eastern bonds, and a payment of $827,222 to the Pacific Great Eastern on loan account.

"The public debt at March 31, 1917, stood at $23,153,146, less sinking funds amounting to $3,429,136, or a net public debt at that date of $19,724,010. At March 31, 1918, the debt had been reduced by $861,358, the total funded debt being $23,071,936, the accumulated sinking funds $4,209,284, or a net debt at the end of the last fiscal year of $18,862,651. This reduction has been brought about by the repayment of the 1887 loan of $381,210 and by an increase in our sinking funds of $780,148, against which must be placed the 1917 loan of $300,000 on account of the land settlement board. The floating debt in March, 1917, stood at $2,094,289. This had increased to $3,550,000 at March 31, 1918."

WANT OLD BASIS OF GRAIN TRADE

At a general meeting of the Grain Exchange at Winnipeg recently, Dr. Robert Magill and Ald. James Fisher gave a report on their mission to England in regard to the grain trade. The following resolution was passed unanimously:—

1. That a conference of representatives of all the grain exchanges in Canada should be called at an early date at some convenient place to consider what action the grain trade of Canada as a whole should take with regard to the handling of next year's grain crops, and especially to do their utmost to abolish government control of the grain trade established during the war and to restore the grain trade to a commercial basis.

2. That the Winnipeg Grain Exchange hereby empower the council of the exchange to send representatives to such a conference of the grain exchanges in Canada, and also that the Winnipeg Grain Exchange empower the council of the exchange to arrange to send one or more representatives to London in accordance with the recommendations made.

CONTRACT BREACH LOSES INSURANCE CLAIM

A claim brought against the Yorkshire Insurance Co., Ltd., by the Co-operative Agricultural Society of Quebec under the terms of an insurance contract was recently defeated owing to a breach in the terms of the contract. The company had undertaken that no gasoline should be kept on the premises concerned, but the adjuster discovered that this had not been complied with. The court consequently held that the insurer was not liable.

COULD JOINT STOCK FARMING SUCCEED?

Use of Capitalistic Methods is Feasible—Labor Conditions Must Attract High-Grade Employees

By F. Maclure Sclanders, F.R.G.S., F.R.H.S.,

Member Royal Agricultural Society of London, England

THE gulf dividing the farmer from the manufacturer widens rather than dwindles. To the farmer, agriculture is the source of all wealth. Consequently, he believes himself to be the most important cog in the wheel of human activity and entitled, therefore, to special dispensations from governments and the gods. Apparently, he has overlooked the inseparable interdependence of all the human family. He almost seems to have assumed the attitude of a being apart from, and independent of all, who are not farmers,—an independence which really relieves him of that measure of national responsibilities shared by other sections of the community.

Perhaps, the above unfortunate attitude constitutes the reaction from the past. It is beyond denial that, in former years, the treatment accorded to the farmer by those who were not farmers was frequently disgraceful and even criminal. Nevertheless, the offenders were traders, elevator men and such like,—not manufacturers.

However, the problem is how to modify and if possible extinguish an unfortunate antipathy existing between the farmer and the manufacturer,—an antipathy illustrating as it were, the house divided against itself which, from a national standpoint, is so thoroughly undesirable.

Joint Stock Farming

Now, my solution is that manufacturers should become farmers. That they should form joint stock companies generously capitalized, which would take over and operate large areas of eastern farm lands, on the same strictly efficient business lines now characteristic of the successful industry. In other words, I contend that agriculture should be conducted as an industry in an exactly literal sense; that the directors of such companies should be able to bring to the venture all the guidance, force and experience which have won them success in their factories.

I further contend that factory hours—except during seeding, harvest and other busy times—should prevail as should factory wages. Further, that workers should have homes of their own and not a corner in the cottage of their employer. It is my confident belief that such joint stock companies could operate to a handsome profit.

Is it reasonable for the farmer to expect that labor should be philanthropic in his case? Why should labor work for him at less—far less—than a factory wage? Our factories are full of the best agricultural labor in the country,—labor, however, that is embued with some slight ambition. In my respectful opinion, it is nonsense to assume that the farmer is the only one who finds cheap labor economical. Long ago, every other line of livelihood demonstrated beyond all peradventure that the very dearest labor was cheap labor. Last season, I saw factory hands with previous agricultural experience, working on the land at factory wages. They worked just as hard and as quickly as though they had been assembling automobiles at Ford's; they did three times the work of the ordinary farm hand;—and, their work was thoroughly good. Pray, what kind of labor can the farmer expect at the money he is willing to pay? The bigger wage offered in the factory draws the good man from the land,—which is perfectly natural. The unambitious culls and windfalls remain on the land, as a rule.

No, my scheme is not so absurd: Let me ask how many bank shareholders know anything of the operations of a bank, of the science of banking? How many railway shareholders know a thing about railway operation? How many industrial shareholders have any practical knowledge of the mechanical appliances and methods involved in the production of the article which produces their dividends? How many steamship line shareholders could take a sight or steer a course? However, such ignorance is unimportant. Knowledge can be purchased. Business ability and experience the manufacturer already possesses; for, to successfully run a factory nowadays, a man must be very able.

Further, it is stated that the most successful farmers in the United States are business men who have gone upon the land and focused their trained business brains upon the production of crops and the raising of live stock, buying and paying generously for the practical knowledge and guidance that is necessary, just as they pay skilled craftsmen in factories. It is management that will count on the farm just as in the factory.

More Capital Required

Now, one great drawback in our agricultural life is the effort of so many to farm without adequate capital. Like every other business, capital is necessary to the farmer. Unfortunately, there are so many farmers, particularly in the older portions of this country, who are content to grow their own food and almost nothing more. Such men are of scant economic value. Their land is largely run out and unproductive. There are thousands of them in the maritime provinces,—and, thousands elsewhere. They are very poor and they have no real productive value.

In the old days, the craftsman worked at his bench with his apprentices turning out a small quantity of excellent hand-made goods. Later, however, steam power became a factor. Machinery cost money. Therefore, manufacturers in similar lines pooled their capital and formed partnerships. By and by, industry developed and largely capitalized joint stock companies became the order of the day; and, finally, we have great mergers embracing many large concerns in one huge whole.

So much for industry; but, with agriculture, no such evolution has been apparent. The farmer still labors with his apprentice in the same old way.

There is but one way, in my humble opinion, that agriculture can be raised to the proper place and plane, and that is by the formation of joint stock companies operated by business men on efficient factory principles. Such operation would mean the standardizing of products for export; it would involve the introduction of model agricultural methods which, under the law of emulation, would be productive of a general uplift. Further, it would mean good roads; a brightening of rural life and the adding thereto of these social amenities which are now so insistently demanded by intelligent workers. It would also mean the transformation to productivity of tens of thousands of acres of land more or less adjacent to centres of population and markets. And, lastly, it would demonstrate to the farmer that, after all, the business man could beat him at his own game, which he assuredly could. This accomplished, it is my sincere conviction that these two highly important sections of the community would then come together in a full and frank understanding of each other and of each other's problems, which consummation so devoutly to be wished, will, in my respectful opinion, never materialize otherwise.

CIVIC INSURANCE PROPOSED IN OTTAWA

The insurance on the civic buildings of the city of Ottawa expires on April 1st of this year. The council thinks that the present rate of two per cent. is too high for a three-year period, especially as the water system and the fire department have been improved since the present business was placed. A plan has been prepared for carrying the insurance by means of a civic fire insurance reserve fund. This fund would consist of $80,000 of ten-year debentures which would be sold only to replace property destroyed by fire. A special rate would be levied each year during the currency of the debentures to pay the interest on them, and to provide for a sinking fund to retire them upon maturity.

This plan has been incorporated in a bill which is being submitted to the provincial legislature at Toronto.

WINNIPEG WATER FINANCES UNSETTLED

City Maintains Old Agreement Should be Enforced—Other Municipalities Want Relief from Taxes and Maintain Consumer Should Pay all Expenses

The dispute between the city of Winnipeg and the other municipalities which are included in the Greater Winnipeg Water District has been before the Law Amendments Committee of the Manitoba legislature during the past few weeks. No agreement has been reached, however, at the time of writing and it is probable that a commission will be appointed to make a thorough investigation of the subject. Such a commission would probably be selected by the city of Winnipeg and the other municipalities, but failing this it would have to be appointed by the provincial government.

A review of the district's history was given before the committee recently by Mr. H. A. Robson, K.C., who was public utility commissioner for the province in 1913, when the district was organized. He expressed the hope that this would be the last instance of the old familiar practice of coming to the legislature to have contracts upset. Replying to the suggestion that this thing had been done in a hurry, he said the fact of the matter was that a very long period of time had been occupied with negotiations. The question was one of public notoriety for Winnipeg and the municipalities included or partially included in the scheme. The matter of distribution had been given close consideration, and in proof of his statements Mr. Robson read from documents that had come before him as utility commissioner and from reports in the papers of proceedings of the Winnipeg city council, of the municipalities, and the law amendments committee of the legislature. Everything, he said, looked most hopeful at the time, no one anticipated the war, and the fact was that some people could not reconcile what had taken place and what could not be replaced. They wanted to shirk their obligations or throw them upon someone else because the city and the municipalities found themselves in a situation no one ever could have imagined.

City of Winnipeg's Case

At the last meeting at which evidence was received, final arguments from both sides were submitted. The committee first heard the case of Winnipeg against the bills put forward by T. A. Hunt, K.C., city counsel, Mayor Gray and Ald. Fowler. They pointed out that if the principle of taxation is changed from a levy on the land to a levy upon the consumer, it will mean that the water rates in the city will be increased 15[illegible] per cent., from 23 to 58 cents. Winnipeg's share of the interest on the debt would be increased by $130,000 annually, which would mean $4,500,000 for the term of the bonds, 34 years. In regard to the other contention, that the water should be delivered at the boundary of each municipality instead of the reservoir in Winnipeg being the distributing unit, it was pointed out that when the original bill was before the committee of the House the change had not been made without consideration, and that as a set-off Winnipeg had agreed to pay half of the cost of the laterals or branch lines from the main to the boundaries of the municipalities, under which arrangement the outside districts benefited by $127,000. In general the case of the city was that a solemn agreement had been entered into that the municipalities should not be allowed to abrogate, especially in view of the fact that they bad approached Winnipeg to get advantage of the water scheme the city was contemplating, and had also taken the initiative in forming the Greater Winnipeg Water District.

Maintains Consumers Should Pay

Isaac Pitblado, K.C., representing the other municipalities, argued in reply that the consumers should pay as they were getting the advantage, the same as consumers of electric light. He pointed out that the cost of the laterals would not have to be borne for years until the population of the municipalities was such as necessitated the bringing in of the water supply. Counsel was particularly strong on the exclusion of land that, he declared, would never get any of the water the people were being compelled to pay for, such as in St. Norbert and in St. Charles. He took the stand that no matter what reeves or councillors had done they could not enter into an agreement to bind the ratepayers of their municipalities to pay when the people had not had a chance of voting upon the proposition. It could not be a binding contract, he maintained, under such circumstances.

Commission This Year

The actual proposals of the municipalities came before the committee of the legislature in the form of two bills. One of the bills would have thrown the cost of the laterals from the reservoir in Winnipeg, the point of distribution for the Shoal Lake water supply to the outside municipalities, upon the water district, which would mean that Winnipeg would have had to bear 80 per cent. of the expenditure, and the other would have taken out of the water district lands which it was contended should not have been included, as they are farm lands and cannot derive any benefit from the scheme. J. W. Wilton, the member for Assiniboia, who was the principal advocate on behalf of the municipalities, moved that the bills be reported, whereupon E. A. McPherson, member for Portage la Prairie, proposed the resolution which became the finding of the committee after a vote of seven to five. The decision of the committee was approved when the report was submitted to the House.

The parties interested are given until June 1 to agree upon a commission. If they have not arrived at a decision by that time the government will be called upon to intervene.

The resolution of Mr. McPherson reads: "Your committee have given most careful consideration to bills 51 and 104, respecting the Greater Winnipeg Water District, and have decided they cannot report in favor of the passage of these bills, but recommend that an investigation be had into the circumstances under which the district was formed, the fairness of the provisions of the original act as between the parties thereto, and what remedies can be properly applied for any inequalities or hardships which apparently now exist or which may be found to exist. For these purposes your committee would recommend that the investigation be entrusted to a person or body who would be entirely disinterested, and who may be agreed upon by the representatives of the interested parties prior to June 1, 1919; and if there then be no agreement, to be appointed by the government. That the report of such person or body be presented to this legislature at its next session."

Reeve C. L. Richardson, of Assiniboia, expressed himself as not at all satisfied with the provincial government's decision to refer the dispute between the city and outside municipalities on the cost of Shoal Lake water to a joint commission. "I think the government is giving to somebody else what they should have settled themselves," he said.

On the other hand, Mayor C. F. Gray and Winnipeg members of the water board think the government acted very wisely. Mayor Gray said: "The careful study which the law amendments committee gave this matter, and the decision they arrived at, should be satisfactory to all and bring happy results."

Board Must Borrow Again

The committee also struck out of a bill promoted by the water district administration, a clause that would have enabled the taxation of the property of the railway companies, taking the view that the district was bound by an agreement that had been arrived at some years ago between the city of Winnipeg and the railway companies which excluded such property from taxation for water purposes.

The Greater Winnipeg Water District maintains that the railway lands should not be exempted from taxation in regards to the water levy. An amendment to the original act, which had previously exempted the railways, has been inserted in the act now before the legislature. Coming up before a recent meeting of the board for discussion, the members emphatically refused to withdraw the amendment as sug-

gested by one of the members of the board. This suggestion was made on the stand that the amendment was likely to be rejected.

The question of raising further funds for the water district was brought up by Commissioner R. D. Waugh. At present there is over $350,000 to the credit of the district in the bank. For the completion of the water line, another million or even more will be necessary. Mr. Waugh placed himself on record as being opposed to any further short-term bonds. By waiting until later in the year, he declared, no difficulty should be experienced in floating the bonds on a long-term period. "Conditions are such, with the end of the war," he declared, "that no difficulty should be entertained in placing our debentures on a long term. With a short-term bond, the arrangements have to be continually renewed." It was stated that by next spring the first two million bonds will come due and arrangements will have to be made to renew them.

Suggestions for members of the Greater Winnipeg District Sinking Fund being desired, the members of the board selected six prominent citizens for the authorities to choose from. These were: H. C. Thompson, W. H. Cross, E. F. Hutchings, A. L. Crossin, W. J. Christie and M. Bull.

OTTAWA ELECTRIC RAILWAY WILL APPEAL

The Ottawa Electric Railway Company will appeal to the Supreme Court of Canada from the recent decision of the Railway Board which refused to give the company permission to increase its fares to points outside the city of Ottawa. The appeal will be on the ground that the board lacks jurisdiction in this matter. In reaching its decision the board was influenced by the fact that the company had continued to make profits at its present rates during the past few years. The Ottawa Electric Railway Company is controlled by the Ottawa Traction Company, which owns nearly all the shares.

MONTREAL BOARD OF TRADE MEMBERSHIP

Preparations are being made to launch the biggest membership campaign the Montreal Board of Trade has ever indulged in, by which it is expected to increase the membership from 1,400 to at least 2,800, while it is hoped to bring the number up to 3,000. Nine teams have been appointed to take up this work, with 250 workers in all, including a large number of the leading business men of the city, both English and French-speaking. The campaign will start on Tuesday, the 25th, and conclude on Friday, the 28th, by which time it is hoped the objective will have been reached.

MANITOBA HAIL INSURANCE AMENDMENT

As stated in *The Monetary Times* last week, objection was raised in Manitoba to the amendment proposed to the Hail Insurance Policy Act providing for the cancellation of a policy by a farmer. The object of this amendment was to prevent the farmer from carrying unnecessary insurance in the event of his crop being destroyed by some cause other than hail. The bill as now being submitted provides that the insurance, if on the cash plan, can be terminated in the event of the crop being damaged by a natural cause other than hail; in this event the assured upon surrender of the policy is entitled to a balance of his premium after the company has deducted its customary short rate for the time the insurance has been in force. The reason for inserting this provision was that the Manitoba Farmers Hail Insurance Company issued five-year policies and do not wish for cancellation except for cause

HYDRO RADIAL TO BE COMMENCED

Assent of Municipalities Now Secured—Expenditure of $30,000,000 is Involved

On Saturday, March 15th, two more municipalities voted in favor of supporting the project of the Ontario Hydro-Electric Commission to build a radial line connecting Toronto with Niagara Falls and also with London. There were just three municipalities which had not yet given their support to this project; the city of Hamilton and the township of Nelson approved of it, but the township of Saltfleet defeated it. Sir Adam Beck, chairman of the commission, announced, however, that the work would be proceeded with. The one line runs from Toronto, through Port Credit, Hamilton and Bridgeburg to Niagara Falls and the other goes through Port Credit, Guelph, Kitchener, Stratford and London, connecting with the London and Port Stanley Railway to Lake Erie.

For some days previous a campaign was conducted by Sir Adam Beck, chairman of the commission, urging the citizens to support the project. With reference to the city of Hamilton guaranteeing the bonds of the road to the extent of $6,000,000, he pointed out that $2,250,000 will be spent in Hamilton in station terminals and repair shops; these would also bring industries to the city. He criticized the Hamilton Radial Railway which ceased operation in the middle of this winter merely because operation was no longer profitable. In reviewing the growth of the Hydro-Electric project in Ontario, he stated that by 1921 the total investment would be over $100,000,000. "We are a bigger spending body than the legislature itself," he said. "We are responsible for more money than the whole of the province of Ontario in its affairs." The local press opposed the scheme.

Thirty Millions Required

The provincial commission will proceed at once with the first section of the $30,000,000 scheme which has been mapped out. This will be the section from Toronto to Niagara Falls via Hamilton, of which the cost will be approximately $20,000,000. The survey work will be rushed to completion, and while the preliminary work of acquiring right-of-way will require some time, it is quite possible that actual construction will be commenced by next September. It is pointed out that if it comes to a question of furnishing work for skilled labor, contracts for cars and steel and other supplies can be let quite soon. Hamilton, it is understood, will be in a favorable condition to secure some of these contracts as it has several industries which will be natural competitors for the work.

Toronto, in 1916, gave a favorable vote upon a by-law providing for a Hydro Radial to London, Ont. This was to cost $13,734,155, of which Toronto was to pay one-third. It so happens that this line will not be the first built, but as far west as Port Credit the line is the same as that to Niagara Falls, so that Toronto's section goes on no matter what happens and Toronto's share of the cost will be the same as that in the Toronto-London project—namely, $4,240,196, with a margin of 10 per cent. for possible higher expenses.

CANADIAN MONEY IN THE UNITED STATES

A recent decision in a high court of the United States held that citizens who accepted Canadian money in payment for a debt cannot demand an additional payment on account of the exchange. The plaintiff had accepted $3,000, and then sued to recover exchange to the amount of $67.50. The court also held that a mere protest that there would be an exchange rate added is not sufficient; the demand must be rejected in its entirety before an action can be sustained that would compel the payer to bear the exchange.

BANK BRANCH NOTES

Branches of Canadian banks have been opened recently as follows:—

[illegible], Alta., Royal Bank of Canada.
[illegible], Sask., Royal Bank of Canada.
Murray River, P.E.I., Royal Bank of Canada.
Peachland, B.C., Royal Bank of Canada.
Stalwart, Sask., Royal Bank of Canada.
Stockholm, Sask., Royal Bank of Canada.
Niagara Falls Centre, Ont., Canadian Bank of Commerce.
Murray Harbor, P.E.I., Canadian Bank of Commerce.
Semans, Sask., Canadian Bank of Commerce.
Kelvington, Sask., Canadian Bank of Commerce.
Leamington, Ont., Bank of Montreal.
Krydor, Sask., Imperial Bank of Canada.
Campbellton, N.B., Provincial Bank of Canada.

It is the intention of the Union Bank to open a total of six new bank branches in the city of Winnipeg. Two of these have already been opened at the stock yards and the others will follow shortly.

The Dominion Bank has opened an agency in New York. Although the bank has had a branch at London, Eng., for some years, this is its first entrance to the United States. The office will be at 51 Broadway. Mr. C. S. Howard, formerly assistant manager at Montreal, has been appointed agent. Mr. Howard has had a varied experience with the Dominion Bank in many positions, and has been stationed during the past few years in Toronto, Winnipeg, London, England, and Montreal. By this agency the bank expects to participate in foreign business arising from after-war conditions.

The town of Oakville, Ont., is to have a branch bank. The Merchants Bank has secured a site and will build an up-to-date building in the spring.

Mr. W. M. McKie, of Radville, Sask., has succeeded Mr. Winstanley as manager of the Bank of Commerce at Swan River, Man.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended March 13th, 1919, compared with the corresponding week last year.—

	Week ended Mar. 13, '19.	Week ended Mar. 16, '18.		Changes.
Montreal	$ 87,672,570	$ 70,642,097	+	$17,030,473

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the two weeks in March, 1919:—

Canadian Pacific Railway.

March 7	$2,617,000	$2,469,000	—	$148,000
March 14	2,496,000	2,645,000	+	149,000

Grand Trunk Railway.

March 7	$ 834,742	$1,224,388	+	$389,646
March 14	846,554	1,159,337	+	312,783

Canadian National Railway.

March 7	$1,110,260	$1,286,614	+	$176,354
March 14	1,147,790	1,397,986	+	250,196

The Ottawa civic tax rate for 1919 is 24.15 mills on the dollar for public school supporters, and 28 mills on the dollar for separate school supporters. Last year the total rate was 20.6 for public school and 24.85 for separate school supporters.

THIRTY-THIRD ANNUAL REPORT

MINIOTA FARMERS MUTUAL FIRE INSURANCE COMPANY

OF BEULAH, MANITOBA

January 1st, 1918 to December 31st, 1918

Officers.—President, Jas. A. Frazer; Vice-President, Gilbert Rowan; Treasurer, H. E. Hemmons; Secretary, Manager—M. G. Doyle.
Directors.—Jas. A. Frazer, Gilbert Rowan; M. G. Doyle, Andrew Doig, I. J. Colyer, J. R. Lynch, R. W. Brethoor.

Directors' Report.

The Directors have pleasure in submitting herewith their 33rd Annual Report, showing statement of the Receipts and Expenditures of the Company as at the 31st December, 1918, together with the Assets, Liabilities and Summary of Business for the year ending on that date.

NEW BUSINESS.—Despite the influenza epidemic which raged throughout the entire West during many months of the year, and which interfered with the work of our Agents, considerable new business was written; the increase in amount at risk being $2,948,031.00, and at the end of the year the total amount at risk was $25,511,518.00.

ASSETS.—These now amount to $468,774.45, an increase of $49,496.62 over last year. Cash assets are now $99,457.09, an increase for the year of $8,135.25 being the largest in proportion to amount of risks of any Mutual Fire Insurance Company in the West.

Investments.—At date $15,000.00 is invested in Dominion Government Securities, an additional $20,000.00 having been put into Victory Bonds during the year. Balance of assets consists of First Mortgages on good security.

Loss Claims.—These amounted to $41,079.06, including those paid which occurred prior to 1918, which is a slightly lower ratio than that of 1917, taking into consideration the increased amount at risk.

General Information.—The Assessment rate of 15 per cent. of the Premium Notes has been maintained despite the increased expenses of Management. Collections were extremely good, over 86 per cent. of assessment levied being paid before December 31st, 1918. The Books of the Company have been audited and the report in detail follows:—

RECEIPTS, 1918.

Balance in Bank, Dec. 31st, 1917	$ 25,449.55
Balance in Treasurer's Hands, Dec. 31st, 1917	250.41
Premium Revenue	73,197.01
Interest Revenue	4,255.06
Exchange on Cheques	37.60
Rentals	310.00
Reinsurance	791.70
Rebates	43.72
Repayments of Mortgages	3,152.20
	$107,487.25

EXPENDITURES, 1918.

Expense of Management	$ 23,733.30
Losses	41,079.06
Head Office Additions and Office Furniture	1,983.82
Investments	35,286.80
Rebates	334.02
Re-Insurance	3,960.94
Balance in Banks, Dec. 31st, 1918	1,069.88
Balance in Treasurer's Hands, Dec. 31st, 1918	39.48
	$107,487.25

ASSETS, 1918.

Cash on Hand, Dec. 31st, 1918	$ 39.43
Cash in Bank, Dec. 31st, 1918	1,069.88
Real Estate Mortgages	39,986.77
Real Estate Head Office Building	8,242.09
Invested in War Bonds	45,000.00
Interest on Accrued Mortgages	1,126.19
Office Furniture as per Inventory	992.43
Premiums in Course of Collection	11,195.24
Residue of Premium Notes Unassessed	358,122.12
	$468,774.45

LIABILITIES, 1918.

Reinsurance Reserve	$ 10,276.96
Losses Notified, but not paid	1,650.00
Commissions due to Agents	2,620.51
	$ 14,447.50

Comparative Table.—December 31st, 1913, Business in force was $12,058,918.00. December 31st, 1918, five years later, shows business in force $25,511,518.00. Licensed in both Manitoba and Saskatchewan.

Borrower.	Amount.	Rate.	Maturity.	Tenders close.
Quebec R.C. schools	$400,000.00	..	10 & 35 years	Mar. 24
Smith's Falls, Ont..	10,203.09	6	20 inst.	Mar. 24
Weston, Ont.	60,000.00	6	30 inst.	Mar. 28
[illegible] Twp., Ont.	7,000.00	6	10 inst.	Mar. 28
Vermilion, Alta..	5,000.00	6	20 inst.	Mar. 31
Walkerville, Ont.	30,000.00	6½	15 inst.	Mar. 31
Walkerville, Ont.	15,000.00	6	10 inst.	Mar. 31
McGillivray	12,135.00	6	10 inst.	Apr. 7

Bridgewater, N.S.—Messrs. W. F. Mahon and Co., of Halifax have been awarded an issue of $12,500 6 per cent. bonds, due July 2nd, 1948, at 102.19.

Humberstone Township, Ont.—On March 25th a by-law, which provides for the issuance of $7,000 road-crusher purchasing bonds, will be submitted to the people.

Walkerville, Ont.—March 31—$30,000 6½ per cent., 15-instalment, paving debentures, and $15,000, 6 per cent., 10-instalment, patriotic fund debentures. A. E. Cock, town clerk and treasurer.

Ottawa, Ont.—The city will ask permission from the provincial legislature to issue debentures amounting to $921,000 without the consent of the ratepayers. The debentures are for construction and other purposes.

York Township, Ont.—The council has authorized the issuance of $10,000 6 per cent. 20-year school-building debentures. A vote will be taken on April 5th on a by-law providing for an issue of $200,000 hydro-electric service debentures.

Welland, Ont.—Messrs. A. E. Ames and Co., of Toronto, have purchased $50,000 6 per cent. 20-year bonds. The proceeds will be used for financing the construction of a new fire hall. The following is a list of tenders:—

A. E. Ames and Co.	105.11
Canada Bond Corporation	105.05
A. Jarvis and Co.	104.77
Mulholland, Bird and Graham	104.76
National City Co., Ltd.	104.55
Housser, Wood and Co.	104.51
R. C. Matthews and Co.	104.17
Wood, Gundy and Co.	103.64
Mackay and McKay	103.27

Saskatchewan.—The following is a list of authorizations granted by the local government board from February 22nd to March 8th, 1919:—

School Districts.—Avonlea Village, $2,500 20-years not ex. 7 per cent. LeRoss, $2,000 10-years 8 per cent. instalment. Sussex, $700 10-years not ex. 8 per cent. annuity. Dinsmore, $10,000 10-years not ex. 8 per cent. annuity. Whiteshore, $2,500 10-years not ex. 8 per cent. annuity.

Rural Telephone Companies.—Valley, $850 13-years not ex. 7½ per cent. annuity.

The following is a list of debentures reported sold from February 22nd to March 8th, 1919:—

School Districts.—Jackfish Creek, $1,500; E. Aarcon. Newpark, $1,200; J. F. Stewart and Co., Toronto. Orange Valley, $2,700; G. A. Stimson and Co., Toronto.

Rural Telephone Companies.—Viewfield, $600, Beaver $3,500, Lewiswyn, $700, Wheat Valley, $1,100; W. L. McKinnon and Co. Northern, $19,000; F. Somerville.

City.—Moose Jaw, $10,000; city of Moose Jaw sinking fund trustees.

Edmonton.—Tenders closed on March 10th on nine blocks of Alberta school debentures, amounting to $33,700. The blocks were awarded as follows:—

Block No. 1, Minburn, 10-years, 7 per cent.—J. F. Stewart and Co., 101.366. Block No. 2, Skiff, $3,500, 10-years, 7 per cent.—Harris, Read and Co., 101.37. Block No. 3, South Valley, $2,500, 8-years, 7 per cent.—Canada Landed and National Investment Co., Ltd., 101.42. Block No. 4, Plaxtol, $1,500, Greenlawn, $2,000, Giffen, $2,500, Craig Murray, $1,800; total, $7,800, 15-years, 7 per cent.—Wood, Gundy and Co., 101.92. Block No. 5, Carlshill, $1,000, 10-years, 7 per cent.—J. F. Stewart and Co., 101.366. Block No. 6, Lovedale, $2,000, Beehive, $1,600, Mount Vernon, $2,500; total, $6,100, 10-years, 7 per cent.—J. F. Stewart and Co., 101.366. Block No. 7, St. Mary's, $2,000, Garrett, $2,000; total, $4,000, 10-years, 7 per cent.—Wood, Gundy and Co., 101.21. Block No. 8, Cheviot Hills, $800, 10-years, 7 per cent.—J. F. Stewart and Co., 101.366. Block No. 9, Sacred Heart Roman Catholic Separate School District, No. 15, $2,000, 10-years, 7 per cent.—Dominion Loan and Securities Co., Ltd., 100.839.

St. Boniface, Man.—The city of St. Boniface, Man., has awarded its issue of bonds, totalling $464,373.02, to Æmilius Jarvis and Co., of Toronto, at 95. The money is to be spent on various local improvements, and the bonds are of different interest rates and periods of maturity, ranging from 5 to 6 per cent., and extending over five to thirty years in different amounts. One block of the bonds, amounting to $60,000, is guaranteed by the province of Manitoba. The following is the list of tenders:—

A. Jarvis and Co.	95.
A. E. Ames and Co.	94.77
Edward Brown and Co.	93.08
R. A. Daly and Co.	91.83
Campbell, Thompson and Co.:	
30-year 6's	99.00
30-year 5's	85.50
20-year 6's	99.00
20-year 5's	87.50
10, 7 and 5-year 6's	98.50
7-year 5's	93.00
20-year 6's (guaranteed by province)	103.00
W. A. Mackenzie and Co.	91.75
Terry, Briggs and Co.:	
10-year 6's	98.13
20-year 5's	88.17

Versailles, Vidricaire and Boulais, Ltd., $429,431 for the total issue. Bond and Debenture Corporation, $172,338.53 for 6's, exclusive of block guaranteed by province, $61,620 for $60,000 guaranteed by province, and for total 5's, $192,270.65.

The highest tender originally was from La Corporation des Obligations Municipales of Quebec for 97 cents in the dollar for both 5 and 6 per cent. debentures, the amount coming to the city being $450,441.83.

The second highest tender was for $440,086.31 from A. E. Ames and Co.

As there was an error in the tender of La Corporation des Obligations Municipales de Quebec by which mention was made only of 6 per cent. interest debentures, while the wire of the same firm made it plain that the tender was for both 5 and 6 per cent. debentures, the firm was wired to give it an opportunity of stating that their bid included both rates of interest.

In the tender of A. Jarvis and Co., 5.87 was offered, to which a wire added 0.30, which, if carried, would mean that this firm wants to buy at 6.17, or at a premium of 17 cents in the dollar. The clerk was directed to wire this firm to endorse their figures, as it was thought that 5.87, which was not plain, meant 5.57.

NEW TORONTO BONDS

Messrs. G. A. Stimson and Co., Toronto, have purchased $2,100 town of New Toronto bonds, bearing 6½ per cent. interest, repayable in fifteen instalments, issued for water main purposes.

SPECULATIVE BUILDING LOANS IN REGINA

According to deputy mayor Ald. H. H. Campkin, loaning conditions in Regina and the province generally are showing a marked improvement during the past two or three weeks. He stated that loan accommodation was more readily available now than it had been at any time since the outbreak of war. Ald Campkin said that two or three loan and insurance companies who have not been lending money on mortgages since 1914 are resuming operations in Saskatchewan, and, while money could be secured during the war on farm property, it was now possible for the city man to get this accommodation.

A number of loans on city property are now under consideration, Mr. Campkin said, and there is every prospect that these loans will be put through. The only loans which have been made in the cities during the war were on property where the property owner was building a residence for himself, but it is now possible for property owners to secure money to build houses on a speculative basis. There is no change in the relationship between the amount loaned and the value of the security.

When asked what effect the reduction on the assessed value of property during the past four years was likely to have on the renewal of loans maturing now and in the immediate future, Ald. Campkin said he did not think that the companies would request a reduction in their loans at maturity, provided the borrower had kept up the payment of their interest.

DIVIDENDS AND NOTICES

CANADIAN GENERAL ELECTRIC COMPANY, LIMITED

ANNUAL GENERAL MEETING

Notice is hereby given that the Annual General Meeting of the Shareholders of the Canadian General Electric Company, Limited, will be held at the Head Office of the Company, corner King and Simcoe Streets, Toronto, on Monday, March 24th, 1919 at 12.00 o'clock noon, for the purpose of receiving the Annual Report of the Directors, the election of Directors for the ensuing year, and for the transaction of any other business which may properly be brought before the meeting.

By order.
J. J. ASHWORTH,
Secretary.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

McKinley-Darragh Mining Co.—The present board of directors, with J. R. L. Starr, president, was re-elected at the annual meeting this week. The reports of the past year's operations showed that, despite war interruptions, production and profits equalled those of the last preceding year, and justified the declaration of a quarterly dividend of 3 per cent., payable April 1st.

Grand Trunk Railway Co.—The company reports for the year ended December 31 last gross revenue of £12,655,000, against £10,725,[illegible] in 1917; net revenue of £1,857,000, against £1,7[illegible] in the preceding year and net revenue charges of £1,[illegible], compared with £1,196,700 in 1917 and a surplus of £1,8[illegible], compared with £26,300 in 1917. No dividends were paid during the year on the guaranteed or preference stocks.

British Columbia Cement Co.—An amalgamation of the Associated Cement Co. of England and the Vancouver Portland Cement Co., Ltd., took place recently, the new company to be known as the British Columbia Cement Co., Ltd. R. P. Butchart has been elected president of the new company. The other directors are H. A. Ross and Edwin Tomlin, of Victoria, C. St. Leger Brockman, of London, Eng., and E. R. Wood, of Toronto.

Lake Shore Mines.—Directors of the Lake Shore Mines of Kirkland Lake have declared another quarterly dividend of 2½ per cent., payable March 27 to shareholders of record March 20. The mill is small, only 60 tons capacity, but the grade of the development ore treated has been so high, between $24 and $27 to the ton, that the profits have been large, over $15 to the ton. This enabled the company to start paying dividends after five months operations.

Calgary Power Co., Ltd.—The company for the year ended December 31, 1918, will show gross earnings of $274,694 and net earnings of $230,770, an increase of $9,568 over the previous year, as against bond interest of $149,990. Average annual net earnings for the years 1915 to 1918 inclusive, have amounted to approximately one and one-half times bond interest requirements. The position of the company is very liquid. It has $150,000 of net current assets, consisting chiefly of Dominion war loans; no money is owed to the banks nor are there any debts outstanding.

Mattagami Pulp and Paper Co.—The company for the first eight months of its fiscal year, which ended December 31 last, showed net earnings of $344,580, of which $101,793 was written off to reserve for depletion of timber account, this reserve standing at $200,000 at the end of 1918. This deduction left $242,787 available, equal to three times the bond interest. During the year the company's third digester was completed, and all that is required to increase the capacity of the plant to 45,000 tons per annum is the installation of a new drying machine, which is now being proceeded with.

La Rose Mines.—The total production of silver made by the company in 1918 was 288,556 ounces, as compared with 427,337 in 1917, a decrease of 138,781. The average price received was 9[illegible]3 cents per ounce, compared with 82.94 cents the previous year, but this advantage was more than offset by the increased cost of production, which was 87.17 cents as compared with 68.64 cents per ounce in 1917. The gross value of the ore produced was $297,414, compared with a gross value for the 1917 production of $371,538, and the net value of $2[illegible],524, compared with a net of $328,750 in 1917. The surplus of $47[illegible],064 compares with a surplus of $509,927 at the end of 1917.

International Coal and Coke Co., Ltd.—A net profit of $189,77[illegible] was made by this company in 1918 and $86,584 was brought forward from 1917. Dividends at the rate of 3 per cent. per annum were paid, requiring $90,000, and $70,126 was transferred to reserve for depletion of coal lands and depreciation of plant, equipment, etc. After paying taxes amounting to practically $18,000, the balance of $98,221 was carried forward. The shareholders have reason to be satisfied, therefore, with the results attained, as the financial position is improved and a small dividend has been received. In the balance sheet, assets now total $4,365,971, as compared with $4,293,343 at the end of 1917. They consist principally of coal lands, rights and development, valued at cost, and plant, railroad and equipment valued at cost. The company's authorized and paid-up capital is $3,000,000, and there is a reserve fund of over $1,000,000. Current liabilities are very small, totalling just about $75,000, the balance consisting of the reserve, surplus and profit and loss.

Canada Cement Co., Ltd.—The annual report of the company shows that the usual $735,000 was absorbed by preferred dividends. After making these deductions, net profits for the year amounted to $910,644, as compared with $1,294,182 in 1917 and $1,040,085 in 1916. The balance available on the common stock is equivalent to 6.66 per cent., and compares with 9.59 per cent. in 1917 and 7.70 per cent. in 1916. The net for 1918 is $383,538 lower than for 1917 and $129,441 lower than for 1916.

Common dividends took up $810,000 and left a balance to be carried forward into 1919 operations of $100,644, which sum added to the previous amount at credit of the account makes a total surplus at profit and loss of $2,677,643, against $2,577,000 in 1917 and $2,092,317 in 1916. While the amount of $100,644 added to surplus as a result of the year's operations compares with the large total of $484,182 in 1917, an abnormal year in many respects, it also compares with the comparatively small amount of $27,585 carried forward from 1916 operations. The principal changes in the liabilities is a reduction of $1,160,953 in the bonded debt through sinking fund operations, an increase of over $600,000 in accounts payable to $798,523, and an increase of about $150,000 in reserves to $1,325,000, which compares with $1,170,000 in 1917. Total current assets amount to $6,295,271, and set against total current liabilities of $1,287,358, leaves a net working capital of $5,007,913, against $4,667,581 the previous year, an increase of $340,332.

Nova Scotia Steel and Coal Co.—In the statement of earnings the net profit for 1918 is given as $3,535,525, against $3,069,449 in 1917, and $4,222,373 in 1916. Depreciation account at $1,206,968 was larger than 1917, but below 1916, and bank interest was nil, against $144,040 in 1917. Net profits therefore amounted to $1,716,492, against $1,340,477 in 1917 and $2,202,427 in 1916.

Balance available for common dividends, after all charges, taxes and preferred dividend, etc., amounted to $1,636,492, equal to 10.9 per cent., against 8.4 per cent. in 1917, and 13.5 per cent. in 1916. Surplus for the year at $886,492 was equal to $17.44 for each share of common stock outstanding against $11.53 in 1917 and $22.57 in 1916. Added to the previous balance of $4,230,092 less deduction of $2,500,000 last year for stock dividends present surplus amounts to $2,616,584.

The company's total assets showed a slight decrease from 1917, but they have improved over $7,000,000 since 1916, also the surplus of liquid assets over current liabilities at $10,065,078 fell slightly below that for the previous year, but compared with that of 1916, when the surplus amounted to $4,193,176, this year's working capital shows an increase of 140 per cent.

The principal changes in the balance sheets of the past three years were the addition of the liabilities of $750,000 of Eastern Car Company's preferred stock in 1917, against the liquidation of $693,903 bank loans the same year, and the continuation of a clean slate in that item in the past year. Bills payable, which had been reduced to $258,288 in 1917 from $1,051,000 in 1916, were reduced to nothing in 1918. Investment in war loan bonds were increased to $2,025,133, and cash increased to $2,527,624. Accounts receivable were down $1,500,000 from 1917. Inventories were cut down to $3,158,661 from $5,555,323.

"SOLID AS THE CONTINENT"

HEAD OFFICE - TORONTO

YOU MAY BE A RICH MAN, SOME DAY—

Opportunities for making money are many but it takes time for capital to accumulate even under the most favorable conditions. Every man of ability expects in the course of years to have sufficient to ensure to his family during their life time the comforts to which they have been accustomed. Unless an unexpected reverse of fortune occurs there is little doubt but that you will make money. But "many things may happen" while the money is being made. This is where Life Insurance comes in and makes available the means that would have been yours if health and life had been spared. You will be rich "some day," if you live, but *the Insurance policy will anticipate for your family the accumulations of future years* and render sufficient means available even should you not survive to realize your ambition.

Is your prospective income insured?

The Mutual Life Assurance Co. of Canada

Winnipeg, Man.—March 18—The St. Mary's Cathedral was destroyed. Particulars not yet available.

MASTEN REPORT COMMENDED

"For years the Canadian Fire Underwriters' Association lived in fear of being condemned as a combination in restraint of trade," said Mr. Leighton McCarthy, K.C., to the Insurance Institute of Toronto at their meeting held on March 20. Mr. McCarthy represented the association at the investigation held by Justice Masten, whose report has already been summarized in *The Monetary Times*. This investigation commenced in August, 1916, and lasted until January, 1919. Mr. McCarthy's comments were therefore of much interest to insurance men. This fear was now done away with, he continued, and it had moreover been demonstrated that profits were an insignificant and a quite justifiable fraction of premiums collected.

It is in fire losses and in expenses, which represent, respectively, over 60 per cent. and 33 per cent. of premiums, that a remedy is to be found. The speaker had little hope regarding the campaign of general education, believing that results could be more easily obtained in reducing the losses from large fires. As to expenses, he called attention to the statement of the commissioner to the effect that if agents' commissions could not be reduced by the companies or the association, it should have the attention of the legislature. The commissioner thinks that the basis of agents' remuneration is wrong, and does not work out in the public interest. Mr. McCarthy also pointed out that the commissioner recommended that the marshal be given the power not to fix rates, but to act as a conciliation agent between the assured and the company, in case of dissatisfaction.

UNION BANK APPOINTMENTS

The announcement has been made from the head office of the Union Bank, Winnipeg, that an advisory committee for the province of British Columbia has been appointed. Mr. W. H. Malkin, of Vancouver, a director of the bank, will act as chairman, and those associated with him are George Kidd, Vancouver, general manager of the British Columbia Electric Railway Co., and W. J. B. Wilson, of Vancouver, who is director of P. Burns and Co., Ltd.

WANTED

Gentleman with broad Canadian casualty experience, capable operator, producer and underwriter is open to make a change. Would consider management of casualty company, branch office, or casualty department.

Ontario Legislation to Protect Investor

Bill as Now Drafted Provides for Appointment of Commissioner With Wide Powers—Includes All Bonds and Stocks Except Government, Municipals and Bank Shares—Similar to Manitoba Act—Strong Objection Being Registered.

THE proposed "blue sky" legislation of the province of Ontario has now taken shape in the form of a draft bill which has been revised and has been submitted to the House by the attorney general. The bill was discussed with representatives of the Toronto Stock Exchange, the Standard Stock Exchange, the Bond Dealers Association, the Canadian Bankers Association and mining interests of Northern Ontario. The latter, of course, are most directly interested in the legislation as the development of the entire mining community is dependent upon the flow of capital into its industries and mining issues are most in danger of being restricted by such legislation as is now under discussion.

The bill is similar in most respects to that which was passed by the province of Manitoba in 1913, under the title of the "Sale of Shares Act." The Ontario act is to be cited as the "Sale of Shares Act, 1919." After preliminary clauses dealing with interpretation, etc., and authorizing the lieutenant-governor to appoint a commissioner of shares, the bill proceeds as follows:—

4. This act shall not apply to the sale of any shares:—

(a) Of or guaranteed by the Dominion of Canada or of or guaranteed by any province in Canada;

(b) Of any Dominion or Provincial governmental commission.

(c) Of or guaranteed by any municipal corporation in Canada;

(d) Of any school corporation in Canada;

(e) Secured by and payable out of the proceeds of any rate levied by any municipal corporation in Canada on property situate in the municipality.

(f) Of any bank incorporated under the laws of the Dominion of Canada.

(g) Authorized by the commissioner to be sold or listed on any stock exchange which has been approved of by him for the purposes of this section, nor shall this act apply to commercial paper or mortgages or real estate in Canada.

5. (1) With respect to a company incorporated by or under the authority of the parliament of Canada or under the authority of the legislature of Ontario or licensed under The Ontario Insurance Act or The Extra Provincial Corporations Act, it is declared that it shall not be a violation of this act for any such company or its officers or agents or for any person who owns shares in such company to sell or attempt to sell such shares when such sale or attempt to sell is not made in the course of continued and successive acts.

(2) The printing, publication or advertisement in any newspaper, magazine or other periodical, or by any other means of display whatsoever, or the issue, putting forth or distribution of any advertisement, circular, letter or other paper containing any offer to sell or solicitation to purchase or intimation of the fact of the issue of any of such shares, or solicitation by agents or employees or persons to buy, acquire or invest money in or upon the security of such shares shall be evidence of an attempt to sell in the course of continued and successive acts and in violation of this act.

6. Subject to the provisions of this act no shares of a company shall be sold or offered for sale in Ontario until the company has been registered under this act.

7. No printer, publisher, newspaper proprietor, or other person shall print, publish or advertise in Ontario, in any newspaper, magazine or other periodical printed and published in Ontario, or otherwise in Ontario, issue, put forth or distribute, any advertisement, circular, letter or other document containing any offer to sell or solicitation to purchase any shares, unless the company whose shares are so offered for sale is registered under this act.

Procedure to Obtain Registration

8. (1) Any company desiring to be registered, or any person desiring to have a company registered, shall pay the prescribed fee and shall file in the office of the commissioner, unless the commissioner sees fit to dispense with the filing of the same or any of them:—

(a) A statement showing in detail the plan upon which the company proposes to transact or is transacting business;

(b) A copy of all contracts, shares or other instruments which the company proposes to make with or sell to its contributors.

(c) A statement containing its name and head office;

(d) An itemized account of the company's financial condition, and the amount of its property and liabilities, and

(e) Such other information touching the company's affairs as the commissioner may require;

(f) In the case of a co-partnership or an unincorporated association, a copy of its articles of co-partnership or association, and all other papers pertaining to its organization.

(g) In the case of a company not incorporated or licensed under the laws of Ontario a copy of the law under which it exists or is incorporated, and also a copy of its charter, articles of incorporation, constitution and by-laws and any amendments thereof and all other papers pertaining to its organization.

(2) Such statements and documents shall be verified by oath in the prescribed form.

(3) When the charter, articles of incorporation, constitution and by-laws of any such company are filed under this act, any amendment thereof affecting the plan upon which a company transacts its business, or its shares, or its name and head office, shall immediately be filed with the commissioner for his approval, and until the same are filed and are approved by the commissioner the registration of the company shall be suspended.

9. (1) Every company not incorporated under the laws of Canada or Ontario or licensed under The Extra Provincial Corporation Act, shall file its written consent, irrevocable, that actions may be commenced against it, in the Supreme Court of Ontario, by the service of process on the commissioner, and stipulating and agreeing that such service shall be taken and held, in all courts, to be valid and binding as if service had been made upon the company.

(2) Such consent shall be authenticated as may be prescribed.

(3) The commissioner forthwith after being served with process under this section, shall immediately notify the company by mailing a copy of such process addressed to the company as the address of its head office, appearing on record, with the commissioner.

10. (1) It shall be the duty of the commissioner to examine the statements and documents so filed and if deemed advisable he shall make or cause to be made an examination of the affairs of the company at the expense of the applicant for registration and unless it appears to him that the company is insolvent or that its articles of incorporation or association, its constitution and by-laws, its plan of business, contracts and shares do not contain and provide for a fair, just and equitable plan for the transaction of business or do not promise a fair return on the shares to be offered for sale, the commissioner shall register the company and thereafter it shall be lawful to sell the shares of such company in Ontario; otherwise the commissioner shall refuse to register the company.

(2) Upon any application, the commissioner may grant registration in respect of any class or classes of shares of a company, and exclude the others therefrom.

(3) If the commissioner registers a company he shall issue a certificate of registration to the applicant, and shall upon request issue a duplicate or duplicates thereof on payment of the prescribed fee.

(4) The certificate shall be in the prescribed form and shall state in bold-faced type that "the commissioner of shares does not recommend the purchase of any shares of this or any other company."

(5) Any reference to the said certificate or to the fact that the company has been registered under this act contained in any prospectus, circular, advertisement or other written document, shall state in bold-faced type in a prominent position—"The registration of this company and the issue of a certificate under The Sale of Shares Act does not constitute or imply a recommendation of the purchase of the shares of the said company, and the commissioner of shares does not recommend the purchase of any shares of this or any other company."

Control Over Companies Under Act

11. (1) This section shall apply to a company incorporated under the laws of the Dominion of Canada or of the province of Ontario or licensed under The Extra Provincial Corporation Act or The Ontario Insurance Act.

(2) Where it is made to appear to the commissioner that the objects of any such company are the establishment or undertaking of commercial, manufacturing or industrial enterprises in Canada, or the development of the natural resources of any province in Canada, and it has not at the time of application for registration yet appeared that the business of the company promises a fair return upon its shares, the commissioner may, if he considers that the company is organized in good faith for such a purpose and will be managed with due consideration for the rights and interests of persons acquiring its shares, grant to it registration upon such terms and conditions as he may think proper.

(3) The terms and conditions which may be imposed may include the following:—

(a) Limiting the proportion of the proceeds of shares which may be applied in organization or preliminary expenses or other purposes than direct application to the actual object of the company;

(b) Requiring the payment of all money, consideration for such shares, to a trustee pending payment in of a certain aggregate sum and providing for the *bona fide* application thereof by means of such trustee and fixing a time within which such application shall be made;

(c) Requiring any person who has subscribed for or underwritten, or to whom has been allotted or to whom it is proposed to allot the whole or part of any issue of the company's shares, to set aside a portion of the proceeds thereof for the actual objects of the company;

(d) Requiring the approval of the commissioner to the selling, mortgaging, charging or leasing of the whole or major part of the property and assets of the company;

(e) Providing for equality of rights of investors of each class and defining the relative rights of each class of investors;

(f) Limiting the nominal value of shares which may be issued for property or services or otherwise than for cash;

(g) Regarding the rendering of accounts and reporting upon affairs of the company to the commissioner as he may require from time to time;

(h) Providing other safeguards of investment by way of amplification of such terms and conditions or otherwise as to the commissioner may seem proper.

(4) In case of non-observance of or of departure from any of the terms or conditions so imposed the commissioner may after notice to the company and hearing what may be said in its behalf, revoke the registration granted to it.

(5) The offering to sell shares of any such company in disregard of any of the terms or conditions so imposed, shall be an offence against this act.

12. (1) Every registered company shall file with the commissioner at least once in every period of twelve months and at such other times as may be required by the commissioner, a statement setting forth in such form as may be prescribed, its financial condition and the amount of its assets and liabilities, and furnishing such other information concerning its affairs as the commissioner may require.

(2) Each such statement shall be accompanied by the prescribed fee.

(3) Any company failing to file such statement or failing to file any other or special report herein required within thirty days after the receipt of a request or requisition therefor, shall forfeit its right to continue its business of selling its shares in Ontario.

13. (1) The affairs of every registered company shall be subject to examination by the commissioner at any time the commissioner may deem it advisable, and the commissioner for that purpose shall have all the powers of a commissioner appointed under The Public Inquiries Act, and the commissioner may order that such company or any applicant for such examination, shall pay the costs and expenses of such examination as fixed by the commissioner.

(2) Such costs and expenses may be recovered in the manner prescribed, and in addition thereto the failure or refusal of any such company to pay such costs and expenses shall work a revocation of the registration granted to it and such revocation shall be effectual upon notice to that effect published in the Ontario Gazette.

Registration May be Revoked

14. Whenever it is made to appear to the commissioner that the assets of any registered company are impaired so that they do not equal its liabilities, or that it is conducting its business in an unsafe, inequitable or unauthorized manner, or is jeopardizing the interests of the holders of any of its shares, or whenever any such company fails or refuses to file any papers, statements or documents required by this act, without giving satisfactory reasons therefore, or violates any provision of this act or of any regulation, decision order, term or condition made by him, the commissioner may revoke the registration granted to such company and may cause notice of such revocation to be published in the Ontario Gazette, and thereafter no shares of such company shall be sold in Ontario.

15. The commissioner may reinstate any company, the registration of which has been revoked or suspended, upon

receiving evidence satisfactory to him and upon payment of the prescribed fee.

16. (1) Any company or person affected by any order or decision of the commissioner shall have the right of appeal therefrom to a Board of Appeal within thirty days after the date of such order or decision, and the decision of such board on any appeal shall be final and without appeal.

(2) The lieutenant-governor in council may appoint one or more boards of appeal, each consisting of three persons.

(3) The notice of appeal shall be filed with the commissioner, who shall thereupon designate the board of appeal by which the appeal is to be heard and determined.

(4) The person or company appealing shall give such security for the costs of the appeal as may be prescribed, and in case the appeal is dismissed, the costs shall be paid out of such security, otherwise they shall be paid out of the consolidated revenue fund.

17. In case the registration of any company is revoked or suspended, any person who has in good faith acquired as owner or by way of security any shares in such company prior to such revocation or suspension, may thereafter sell, charge or otherwise deal with them, notwithstanding such revocation or suspension.

18. The commissioner shall not require the disclosure of any secret or formula of any company on the application for the registration of such company, and shall treat all information furnished to or prescribed by him in connection with the business of a company as confidential, and it shall not be disclosed by the commissioner unless in his opinion it is in the interest of the general body of shareholders of the company or in the interest of the public generally that such information should be disclosed.

Additional clauses after clause 18 provide penalties for failing to comply with the provisions of the bill.

FEBRUARY BANK STATEMENT

The advance figures of the statement of chartered banks to the Dominion government have just been received and indicate considerable declines in most of the important items. Demand deposits have fallen off by $57,000,000, but savings deposits show an increase of $28,000,000. The statement will be given in full in *The Monetary Times* next week. The following figures indicate the principal changes:—

	Feb., 1919.	Changes from Jan., 1919.
Reserve fund	$ 116,870,214	+ $ 741,089
Note circulation	204,779,750	+ 1,355,478
Demand deposits	566,775,434	— 57,143,976
Notice deposits	1,018,184,512	+ 28,184,427
Total deposits in Canada..	1,584,959,946	— 28,959,549
Deposits outside Canada ..	200,560,308	— 2,455,489
Current coin	80,178,615	— 385,062
Dominion notes	185,932,418	— 10,391,059
Deposits central gold reserve	103,750,000	— 1,900,000
Call loans in Canada......	79,154,121	— 8,444,306
Call loans outside	155,983,681	+ 15,164,025
Current loans in Canada...	1,095,301,791	+ 14,960,930
Current loans outside	130,590,063	+ 4,076,725
Total liabilities	2,325,014,654	— 31,759,885
Total assets	2,575,191,491	— 28,084,093

QUEBEC AMUSEMENT TAX

The amusement tax in Quebec province, as fixed by a bill just introduced into the provincial legislature, is as follows: Two cents on admissions of less than 35 cents; three cents on admissions from 35 cents but less than 75 cents; five cents on admissions from 75 cents but less than $1.50; 10 cents on admissions of $1.50 and over. Patriotic, agricultural, etc., entertainments are exempted.

DOMINION FIRE PREVENTION PLANS

Commissioner Maintains Legislation is Only Remedy—Educational Propaganda a Failure

A MEETING of the Canadian Credit Men's Association in Toronto on March 25th was addressed by Mr. J. Grove Smith, Dominion fire commissioner. His subject was the reduction of Canada's fire waste, and he outlined what had been done to prevent fires in Canada and what the Dominion government intended to do. Some of his remarks brought forth pointed criticisms from members of the association on the one hand and from Mr. Arthur Hewitt, president of the Ontario Fire Prevention League, who was present at the meeting, on the other hand.

Mr. Smith remarked that there had been three lines pursued in the effort to reduce fire waste. The first was the campaign of education. This had, he said, been a failure, and he cited a statement made by Mr. Franklin H. Wentworth, secretary of the National Fire Protection Association, to the effect that the educational propaganda which had been carried on for twenty years by that organization had produced no result. The reason, said Mr. Smith, was that it dealt only with generalities, which practically everyone already knew, but which the education could not force them to apply. The second method had been the adoption in 1905 by the Fire Underwriters' Association of a system of schedule rating which showed how the rates for any class were made up, and how the cost of insurance on a certain property could be reduced by changes in construction and by the installation of fire prevention equipment, etc. This, said the speaker, had also failed, and in support of his statement he referred to the fact that losses in proportion to the insurance in force were just as high now as they had been prior to 1905. As regards the third method, legislation, he admitted that most of the provinces of Canada had already done something along this line, which was mainly in the form of permissive legislation, however, and left the onus of responsibility on the municipalities. These were under the influence of powerful citizens, and the consequence was that the regulations were not enforced on the large properties, which were the scenes of the heavy fire losses.

The fire commissioner's office of the Dominion government would, he said, reflect public opinion on the subject of fire prevention. A conference was held last December in Ottawa, where representatives of various organizations made certain suggestions. None of these had been adopted merely on the strength of that conference, but he would take them up, one by one, and more thoroughly ascertain the public view by sending out questionnaires. This had already been done regarding an amendment to the criminal code, making carelessness resulting in fire a criminal offense. Questionnaires had also been sent as to the advisability of having every application for insurance signed by the applicant. Under the ordinary methods used here, he pointed out, insurance was a one-sided contract, the only party being the company. There could be no misrepresentation on the part of the applicant where he did not sign an application form.

Mr. Arthur Hewitt questioned Mr. Smith's statement regarding the educational propaganda. This was one of the principal methods adopted by the Fire Prevention League of Ontario, and would be pursued by it. He caustically remarked that he was glad to know that the federal government was free from the control of influential citizens.

With reference to the signing of applications, Mr. T. W. Learie, chairman of the association's fire insurance committee, stated that at the Ottawa conference in December the Credit Men's Association had opposed any regulation of this kind. The Retail Merchants and the Manufacturers' Association, however, had upheld it. Mr. W. H. Lamont also expressed himself as being opposed to such a law.

The Excelsior Life Insurance Company has received to date over $2,250,000 of business, or over $900,000 more than during the corresponding period of 1918.

PERSONAL NOTES

Mr. J. F. Clement, vice-president and general manager of the Fire Insurance Company of Canada, left Saturday last for a business trip to the north west provinces.

Mr. H. P. Briggs, upon his return from overseas, has rejoined the international banking organization of Harris, Forbes & Company, Incorporated, and is now representing them in Ontario with headquarters in Toronto.

Mr. M. R. Grant who was formerly connected with the real estate department of the Great West Permanent Loan Company, at Vancouver, has been appointed manager of the Toronto branch of that company and entered upon his new duties this week.

Mr. C. Edmond Taschereau, M.P., of Quebec, has been appointed a director of La Sauvegarde Life Insurance Company of Montreal. He is also a director of the Municipal Debenture Corporation and of the Industrial Life Insurance Company of Montreal.

Mr. A. E. Millington, manager of the Whalen Pulp and Paper Mills, Swanson Bay, B.C., made the announcement at the last monthly meeting that he was retiring from the management and that K. J. Carney had been appointed acting resident manager in his stead.

Mr. F. A. Beddard, formerly inspector in Alberta for the Huron and Erie Mortgage Corporation and the Canada Trust Co., with headquarters in Edmonton, has been appointed manager of that branch. Mr. R. J. Russell, of Edmonton, succeeds him as inspector.

Mr. Alexander Mackenzie of Rio de Janeiro, has been included in the list of Knights of the British Empire, the honor being conferred upon him for services rendered to the Empire in Brazil. Sir Alexander was for many years a member of the law firm of Blake, Lash, Anglin and Cassels, having gone to Brazil some fifteen years ago as vice-president, later becoming president, of the Brazilian Traction Company.

CANADIAN GENERAL ELECTRIC CO.

Good financial results for the year 1918 were obtained by the Canadian General Electric Co., Ltd., the annual meeting of which was held on March 24th in Toronto. The profits were over $2,000,000, and after setting aside a substantial reserve for depreciation of plant, a net profit of $1,436,483 remained; dividends required $780,000; $600,000 was transferred to reserve, in which there is now a balance of $4,600,000, in addition to over $500,000 in the profit and loss account. The financial results in comparison with the previous year were briefly as follows:—

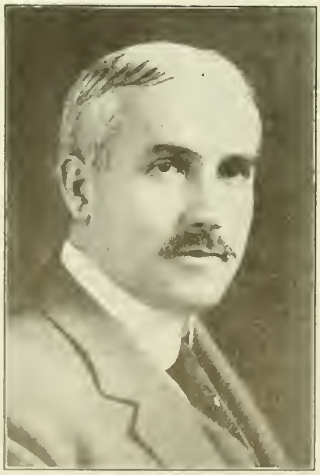
	1918.	1917.
Gross profits	$2,013,996	$2,051,609
Depreciation	577,512	524,317
Amortization	......	393,694
Net profit for year	$1,436,483	$1,133,596
Dividends	780,000	780,000
Surplus for year	$ 656,483	$ 353,596
Previous balance	466,293	612,696
Total profit and loss	$1,122,776	$ 966,293
To reserve	600,000	500,000
Balance	$ 522,776	$ 466,293
Reserve	4,600,000	4,000,000
Surplus	$5,122,776	$4,466,293

Assets and Liabilities.

Total assets	$21,692,471	$20,095,137
Capital assets	12,299,192	11,537,190
Current assets	9,393,278	8,557,946
Capital stock	10,000,000	10,000,000
Reserve for depreciation	4,336,182	3,810,313
Surplus	5,122,776	4,466,293

Mr. Robert Gibb Fleming, aged eighty-one years, died at Chatham, Ont., on March 25th. For twenty-nine years he was Treasurer of the city of Chatham, resigning from that position just about a year ago.

Major E. D. Sutherland,
Auditor General of Canada in Succession to the Late John Fraser



Mr. Robert Adair,
New Director, Royal Bank of Canada.
President Hartt and Adair Coal Company

J. M. Mackie,
General Manager, United
Financial Corporation, Limited

THE COMMUNITY AND INDUSTRY

INDUSTRIAL difficulties of the past few decades have demonstrated essential differences in the relations between various industries and the public. The tying up of railroad or street railway service or of that of a telephone company results in an obstruction to all classes of business of a most serious kind.

In the early days of the capitalist system public sympathy was, generally speaking, with the capitalist; he was supposed to be the only responsibile party interested in the dispute and the law was entirely on his side. It soon became apparent, however, that a combination of workers was not necessarily any more in restraint of trade than a combination of employers and the right to form unions and to strike was gradually obtained by the labor forces; in other words, it was recognized that there were two parties who had an interest in industrial disputes. With the growth of large scale industry, a third group grew up, the managing class; this group is allied to the wage earners in as much as its members themselves work for a fixed remuneration; on the other hand they are allied to the employer because their remuneration depends in large degree upon the success of the undertaking. For the latter reason this group has generally been regarded as being on the side of capital. Meanwhile no consideration was given to the interest of the citizen upon whom in his capacity of consumer the success of any industry is built.

In many industries an industrial war may be carried on until either party is forced to succumb without causing the public grave inconvenience. With the increasing solidarity of economic life, however, the number of such industries has been gradually reduced. The Hon. W. L. Mackenzie King is right in emphasizing the fact that there are these four parties to industry and that the recognition of the interests of the first three must be supplemented by a recognition of the fact that the community is also a constructive factor in the control of industry, not merely a body of consumers ready to be served when an industry so chooses and when its members can agree.

THE NATIONAL COUNCIL FOR MENTAL HYGIENE

IT is not generally known, at least not well enough known, that in the early days of the war a group of Toronto medical men and others launched the National Council for Mental Hygiene that now concerns itself not merely with mental deficiency problems in Ontario but in the whole of Canada. It is worth while referring to the work of the council not merely because of the solid and splendid work already done but of the economic possibilities of that work in the future. From the economic point of view alone the activities of the council for mental hygiene, if wisely directed, are of vital significance. Recently a survey was undertaken of conditions among the mentally deficient in Manitoba; and while, at the time of writing, the results have not been published, sufficient is known to indicate that Canada has a very serious economic and social problem on its hands. Like most difficult and disagreeable questions of national importance only the light of publicity and scientific investigation will get us anywhere.

There is no reason to believe that the Canadian situation is any better than that obtaining in the United States. With the drafting of men into the army of the Republic it was discovered that, of the 2,500,000 soldiers examined, upwards of 50,000 had finally to be rejected because of mental deficiency. In addition to that it is calculated that 500,000 persons frequent the larger towns and cities and 500,000 the country villages and highroads who, although ordinarily called "tramps" and regarded as merely idlers, are mentally deficient or suffering from alcoholism, the drug habit and the like. That means one person in every 110 of the population for that class alone. A recent study, just concluded, in several of the richest and most prosperous counties of Indiana shows that 2.4 per cent. of the entire population is made up of the mentally deficient. As remarked above, there is no reason to assume that conditions in Canada are any better.

Neither in Canada nor the United States has the problem been squarely faced before. These deficients have been a fertile source of crime, poverty, moral depravity and economic waste. They have placed a tremendous financial [illegible] upon the whole community met from public expenditures and by private charity. It will cost money to remedy the situation, but it is—whether we realize it or not—costing the nation huge financial outlays now, in the upkeep of jails, hospitals and houses of refuge. The only remedy that is worth anything is the segregation of the mentally deficient so that they can not reproduce their kind, and the rigid enforcement of our immigration laws. These laws are perfectly good; the officers honest and capable; but the staff furnished for the work, if it is to be adequately done, is altogether too limited. Inspection should be undertaken on the other side of the water as well as at Canadian ports of entry if results worth while are to be secured. It is far better to pay out public money in this way than for the erection of jails, orphanages and asylums.

The simple truth is that, among the very fine types of immigrants that the Dominion has received there has been a considerable percentage of the physically and mentally unfit. First the United States and then Canada was used as the "dumping ground" of undesirables, particularly from the United Kingdom. Let the plain facts be faced; for a continuance of this policy places the life of the nation in jeopardy. The data gathered in Manitoba shows that Canadian born deficients afford the lowest percentage, in proportion to population, of all; then Austrians, Russians and Italians; and the British born the highest of all. Let there be no misunderstanding here. The British stock has made Canada what it is among the nations of the world; it has given us brilliant, resourceful and able men; and of these, of course, nothing but good can be said. More, and still more, immigration from the United Kingdom of this quality is desired, but an end must be placed to the making of Canada a place of refuge for the mentally and physically unfit.

The Manitoba Public Welfare Commission is to be congratulated for having encouraged the making of this social survey. Such surveys should be undertaken in all the provinces, so that stock may be taken of our human resources, of unsurpassable importance in comparison with anything else the Dominion may possess.

There is a difference between government subsidizing of railways and government construction of railways. The former permits economies of private management and the earning of profits. The latter assures that no such results will be obtained.

* * * * *

The government of Saskatchewan, which guaranteed the bonds of some of the branch lines of the Grand Trunk Pacific is not yet certain whether it will have to pay the interest on them. In this case, however, it is maintained that the province would have the right to foreclose on these lines as its claims would rank ahead of those of the Dominion Government in respect of the general advances made by the latter.

CANADIAN BANKS AS RESERVE INSTITUTIONS

THE importance of Canadian banks as financial stabilizers was illustrated recently in Vancouver by the part which one of them played when a run took place on the Japan and Canada Trust Savings Co. On March 11th, as the result of a baseless rumor, about $80,000 in deposits was withdrawn from the trust company in the afternoon. The following morning many out of town depositors arrived, and the company obligingly opening its doors at 8 o'clock instead of 9 o'clock in order to accommodate the crowd, about $80,000 was withdrawn. Large quantities of money were still visible behind the wickets, however, and soon demands began to fall off. Many depositors whose faith in the institution had not been shaken had made additional deposits to help it stand the strain. The company's reserve had nevertheless been dangerously reduced, and after it had drawn on its deposit in the chartered bank, the Japanese consul arranged for further credit.

This affair was of course limited to one institution in one city. It nevertheless illustrates the fact that the Canadian banking system is not merely an institution for accepting and loaning money. It is an agency for maintaining equilibrium among different branches of business and among different sections of the country.

The Right Hon. Austen Chamberlain, Chancellor of the Exchequer of the United Kingdom, stated a few days ago that the treasury control of capital would be removed so far as it applied to investments inside the United Kingdom. Issues of foreign securities, however, can still be made only under license.

* * * * *

After a conference held in Ottawa on March 21st, it was decided to call for tenders for 250,000 ties to be used in further construction on the Hudson Bay Railway. It would appear, therefore, that it is the intention of the Dominion Government to proceed with this work. Interests throughout Canada have discovered that constant pressure at Ottawa is necessary to secure progress in any work, no matter what its economic advantages may be.

* * * * *

A genuine case of political patronage has been unearthed in the accounts of late New Brunswick government. Commissioner James McQueen, who was empowered to make an investigation, made his report in the provincial legislature on March 19th. In 1914, the New Brunswick government purchased 68,603 barrels of potatoes in order that a patriotic shipment might be sent to the Imperial government for distribution. The cost of this to the provincial government was $153,506. The orders were distributed among the members of a patronage list, not by public tender.

THE RELEASE OF EXCHANGE

Last week the government regulation of French exchange was removed and this week similar action has been taken regarding sterling exchange. The result has been a substantial decline in each case. In September, 1915, sterling exchange in New York had fallen to about $4.50, and more than six francs could be purchased for a dollar. This represented an extreme situation, and it was decided to maintain quotations at a more stable level. The British government appointed J. P. Morgan and Co. as its agents in America, and through them secured sufficient funds to hold the sterling cable transfer rate at about $4.76 7-16 to the pound. The methods adopted in the French exchange were not quite so thorough, but quotations were nevertheless fairly stable, especially compared with exchange on Italy.

LOOKING OVER PACIFIC FIELD

Mr. A. Van R. Schermerhorn, manager of the insurance department of the United Grain Growers' Securities Co., Ltd., with headquarters at Calgary, with Mr. W. Laidlaw, superintendent of the Car and General Insurance Corporation, Ltd., a British company which has recently entered the Canadian field, and whose policies are guaranteed by the Royal Exchange Assurance Co., were recently at the Pacific Coast looking over the field with a view to establishing agencies in the British Columbia territory, the United Grain Growers being general agents of the Car and General for the territory from Port Arthur to the Pacific Coast. Both Mr. Laidlaw and Mr. Schermerhorn were well pleased with the outlook, and were of the opinion that the Car and General, as soon as it got established in British Columbia, would be doing its fair share of business.

STIMULATE INTEREST IN MINERAL WEALTH

International Mining Convention Wants Removal of Fixed Price on Silver Bullion—Capital Prospectors Needed

The International Mining Convention was held in Vancouver on March 17th, 18th and 19th. Most of the time was devoted to the discussion of the most promising fields for prospecting throughout British Columbia. That there is now a dearth of men engaged in the pursuit of locating new mineral deposits was admitted by the speakers, and in the case of William Brewer, Nanaimo, it was stated that twenty years ago there were about 500 prospectors throughout the province, while to-day there are not more than ten.

Geo A. Clothier, Prince Rupert, who is in charge of district No. 1, after relating the geological conditions of the north-western section, described the geographical advantages offered. "Six hundred miles of coast line is what we have there," he said, "which is a natural solution to the transportation problem that exists in many places in this country. Notwithstanding the Bear River boom of 1910-11, in which many people gathered considerable experience, the first district will ultimately prove to be the greatest mining country on the continent.

"One of the errors that has been made in the past by men who undertook to cash in on natural resources is that, instead of being satisfied with $25,000 for their claims, they have held out for $100.000, and thereby scared away the investor." Continuing, the speaker stated that the production in his district last year amounted to $10,000,000. In concluding, Mr. Clothier expressed the hope that every effort would be made to have prospecting included in the vocational training programme for returned soldiers, that they would be fitted to take advantage of the untold wealth now lying dormant, waiting for the hand and mind of man to bring it to the surface and convert it into wealth.

John D. Galloway, of Hazelton, in describing the conditions existing in district number two, said that the section over which he has jurisdiction contained an area of 100,000 square miles. "The history of placer gold mining in the district goes back to the early sixties," said Mr. Galloway. "At that time the old town of Barkerville was in the hey-day of its career. Production reached a maximum in 1863, when the total output was around $4,000,000. The values fluctuated thereafter until last year the production was valued at $200,000."

District Number Two

Speaking of the coal deposits in district No. 2, Mr. Galloway declared that there is 8,200,000 metric tons as yet undisturbed. He specified the Babine range as being particularly rich in gold deposits. "In the Peace River section of the district, where a cretaceous sedimentary formation is found, are huge deposits of high-grade bituminous coal," continued the speaker.

"In No. 4 district there are platinum values that will of necessity be brought into prominence before long," said Mr. P. B. Freeman, of Grand Forks. "With the Russian supply, which has heretofore practically supplied the world on a production of 300,000 ounces a year, being rapidly diminished, other sources from which to secure the metal must be found, and I believe that it is then that the southern holdings will come into its own."

Capital Prospectors Needed

A. G. Langley, Revelstoke, who is in charge of the eastern district, No. 5, stated that there are over one hundred producing mines in his district and as many more in various stages of development. "It might be interesting to note," he said, "that in 1917 the district returned the entire lead-zinc production of the province; over 70 per cent. of the silver output; 27 per cent. of the gold and 28 per cent. of the coal mined." He gave the 1918 production a value of [illegible].000.

"What we need is more capital and prospectors. Many [illegible] are lying idle which could undoubtedly be worked at a profit. There are many small high-grade deposits that can be worked by two or three men, and to these I hope the attention of men returning from the field of battle will be directed."

"The opportunities are boundless," said Mr. Wm. Brewer, of Nanaimo, "but it takes prospectors to locate the claims. Twenty years ago there were over 500 prospectors hereabouts; now there are not more than ten real ones," he added. "The prospector is a lonesome man," continued Mr. Brewer. "He has no family, as a rule, and when he dies there are no sons to carry on where he left off. Prospectors are born with each generation, and it is thereby necessary for us to train new material to foster the industry on which the future of British Columbia depends to a large extent."

Fleet Robson, provincial mineralogist, also gave a short address, outlining developments during the past year and presaging a bright future for the industry throughout the province.

Stimulate Interest

Efforts to stimulate interest in the mineral resources of British Columbia crystallized in the adoption of a resolution at the closing session of the convention on March 18th.

Chief among the actions urged by the delegates in attendance was that the University of British Columbia make more adequate provision for the enlargement of its departments relating to mineralogy. It was shown that, while the university budget contains a yearly grant of $75,000 for agricultural extension, that the geological and mining departments combined receive less than $15,000.

The resolution as adopted in this respect was:—

"That the mining industry receive from the university the attention rightly due to us, and urge that the departments of geology and mining receive budgets commensurate with their importance."

The concensus of opinion, as expressed in the discussion following the motion, was that the mineral resources of British Columbia is the chief provincial asset, and that the provincial educational system should be so designed to exact therefrom all possible benefits. Resolution carried unanimously.

Price of Silver Discussed

Considerable discussion attended a resolution:—

"That the Canadian government be asked to urge the discontinuance by Great Britain and its Allies of the present fixed price for silver, which keeps below its fair value based on demand. As a silver producer Canada has lost and is losing heavily through the present price limitation." Champions of the resolution contended that Canada is deprived of between five and six million dollars annually under the fixed scale, and insisted that the British valorization be removed. It was stated that silver is a commodity, and should, therefore, be allowed to find its level of valuation under the law of supply and demand. Those in favor of the fixed price asserted that the demand for silver would exceed the supply for some years to come.

Those opposing the measure based their objection on a contention that the question was of an Imperial nature, and that the fixation had been established by Great Britain in conjunction with the United States to stave off financial panic in India.

BRANDRAM-HENDERSON BONDS

Nesbitt, Thomson and Co., of Montreal and Hamilton, are offering on the Canadian markets an issue of $655,000 of 20-year 6 per cent. consolidated mortgage sinking fund gold bonds of Brandram-Henderson, Ltd. The Brandram-Henderson Co. has recently closed the most successful year in its history. For some years past the business has shown steady growth and expansion, and it was stated that the purposes of the present bond issue are to consolidate the finances of the company, to meet necessary capital expenditures and provide for the continuous expansion of the company's business. The bonds are being offered at 94½, to yield 6½ per cent.

Increased Dominion Taxation Necessary

Federal Estimates Show Inadequacy of Present Scale of Taxation — Finance Minister's Budget Speech Awaited With Interest—Some Public Works This Year.

On March 19th, Sir Thomas White, minister of Finance and acting prime minister, presented estimates for the year 1919-20 totalling $437,679,071, exclusive of war expenditures. This figure is an increase of $137,996,832 over the expenditure of the year which is just closing. The largest increase is in public works, which will be largely in connection with harbor improvement. The estimates are as follows:—

Service	Total, 1919-20.	Total, 1918-19.
Public debt, including sinking fund	$106,847,443	$ 78,119,501
Changes of management	571,850	529,350
Civil government	8,295,764	8,173,207
Administration of justice	1,554,083	1,555,383
Police	187,000	149,607
Penitentiaries	966,700	991,600

Note Circulation

Subsidiary questions of finance were dealt with by Sir Thomas White in a speech given on March 20th. He expressed the opinion that Canada had, of all the nations who had been in the war from the beginning, come through with the best financial position. The minister dealt with a resolution to extend the excess note circulation for a further period of two years, at the end of which time he anticipated conditions would again be normal. He said:—

"This excess note legislation is necessary in order that the present conditions under which the banks are operating, and which have been found so effectual during the war, may be continued. It may be of interest to the House to know something of the conditions of our bank and Dominion note circulation at the end of the war. Comparing it with that of other countries, to me it is an exceedingly gratifying one.

"On January 31th, 1919, the Dominion note circulation amounted to $319,315,689. That represents the total amount of outstanding Dominion notes. The percentage of gold and securities held against that total issue is 88 per cent. The percentage fully covered by securities is 51.8 per cent. The percentage of the balance of the issue covered by gold is 75.2 per cent., and the percentage of gold held against the total issue, irrespective of securities also held, is 36.2 per cent. Dominion notes, to the extent of $82,275,000 are outstanding against securities under the Finance Act. Against that amount of Dominion notes we hold a total of over $90,000,000, in round figures, of the highest class of securities. Then we have Dominion notes issued against railway securities under legislation which was passed in 1914 to the amount of $16,000,000. The net result of what I have said is this: We hold against our Dominion note circulation, in addition to gold, Dominion Government, Imperial Government, Provincial and municipal securities to the amount of $90,000,000, railway securities guaranteed by the Dominion to the extent of $20,000,000, and securities owned by the Imperial Government and lodged with the Bank of Montreal for account of the Dominion Government in London to a market value of eleven million pounds. Then the Dominion holds gold against Dominion notes at the present time to the total amount, in round figures, of $120,000,000. The last-named figures compare with $91,000,000 of gold which we held on July 31st, 1914. It will be observed, therefore, that the Dominion Government has in hand today thirty million dollars more in gold than on July 31st, 1914.

"The total Dominion note circulation in 1914 was $112,000,000. That has been expanded during the war to $319,000,000."

On account of the general unsettled financial conditions, Sir Thomas explained, and the necessity of conserving gold reserves, it is undesirable that we should revert to pre-war conditions. He, therefore, asked that the measures which had been so effectual during the war should be continued for a period not exceeding two years after the war, subject to being terminated by order in council at such time as they are considered no longer necessary.

Sir Thomas said the gold held by Canadian banks had also been substantially increased. In July, 1914, it amounted to $54,000,000, and on January 31, 1919, it amounted to $91,000,000, an increase of $37,000,000; so that both the banks and the Dominion of Canada had come through the war with a very substantial increase in the gold reserves they held.

Sir Thomas White introduced the resolution, which was passed unanimously, which has for its purpose to provide for the issue of a new one-cent piece smaller than the pre-

37

[illegible] he had had this under consideration [illegible] but the pressure of other business had [illegible]. He said the weight of the present coin was eighty-seven and a half grains, and the new coin would be fifty grains. The present coin weighs eighty to the pound, while the new coin will weigh one hundred and forty to the pound. It will approximate the American bronze cent, which weighs forty-eight grains. It will be a little larger than the ten-cent silver piece and thicker, so that it will be easily distinguished by the touch. The old one-cent piece will continue in force, and the new one will be issued by proclamation. Sir Thomas observed that it was not intended to withdraw the present one-cent pieces from circulation, but as they became smooth and worn they would be redeemed. This would take a long time.

Sir Herbert Ames inquired if there was any intention of issuing a two-cent copper coin, and Sir Thomas replied that he had not thought it necessary. He added that he would not like to change the present silver coinage, as he thought it beautiful.

War Appropriation to be Lower

On March 22nd, the finance minister gave notice regarding the war appropriation for the fiscal year 1918-19. His resolution reads:—

(1) That it is expedient to provide that a sum not exceeding three hundred and fifty million dollars be granted to his Majesty toward defraying any expenses that may be incurred by or under the authority of the governor-in-council during the year ending March 31th, 1920, for: The defence and security of Canada; the conduct of naval and military operations in or beyond Canada and the demobilization of the Canadian forces; the promoting of trade and industry and transportation facilities therefore; the carrying out of any measures deemed necessary or advisable by the governor-in-council in consequence of the war, and payments made or expenditure incurred during the fiscal year ending March 31th. 1919, for the purposes mentioned in the War Appropriation Act, 1918, and in excess of the amount authorized by the said act.

(2) That the governor-in-council be empowered to raise by way of loan, temporary or otherwise, such sums of money, less any amount borrowed in excess of the amount authorized by any War Appropriation Act, as are required for the purpose of making any payment authorized by any act founded on these resolutions.

(3) That the principal raised by way of loan under this act, and the interest thereon, shall be chargeable on the Consolidated Revenue Fund.

UNITED FINANCIAL CORPORATION, LTD.

The name of the corporation which has just been formed by the arrangement between the Guaranty Trust Co., of New York and C. Meredith and Co., Ltd., is the United Financial Corporation, Ltd. The president is Sir Charles Gordon, who was president of C. Meredith and Co., Ltd. Vice-presidents are D. C. Macarow, general manager of the Merchants Bank of Canada; Major H. B. Macdougall, and Harold Stanley, of New York. The other directors are: W. A. Black, Geo. Chahoon, Jr., C. R. Hosmer, A. Breton, W. P. Conway, Wm. McMaster, A. J. Brown, A. E. Holt, Charles Meredith, J. R. Swan and E. W. Stetson. J. M. Mackie is general manager of the new organization, and A. P. B. Williams, secretary-treasurer.

Word has been received in Vancouver to the effect that Alvo von Alvensleben, former large property owner and unofficial representative of the ex-kaiser in that city, will be deported back to Germany with thirty other aliens from Fort Douglas, Utah.

FARMING IMPLEMENT INDUSTRY

The Dominion Bureau of Statistics has completed a preliminary census of the agricultural implement industry in Canada for the calendar year 1917. The census covered ninety establishments. The total capital invested amounted to $70,493,801, divided as follows: land, buildings and fixtures, $13,381,463; machinery and tools, $6,140,082; materials on hand, stocks in process, finished products, fuel, etc., $23,127,626; cash, trading and operating accounts and bills receivable, $27,844,630. The total capital invested represents an increase over 1919 of $10,964,710, or of 18.4 per cent.

The total salaries paid in 1917 amounted to $1,329,736, an increase over 1915 of $273,938, or of 25.9 per cent. The total wage payments rose in 1917 to $8,027,036 from $3,125,066 in 1915, or by 156.8 per cent. The average amount paid to wage-earners in 1917 was $838. The total number on salaries in 1917 was 10,131, having risen from 6,737 in 1915. The average number of wage-earners employed monthly in 1917 was 9,563, the least number was 9,003 in September, the greatest number was 10,027 in December. The total number of different individual wage-earners on the pay roll in 1917 was 24,895. From a total summary of 10,051 wage rates it was found that 1,118 were paid from $12 to $15 a week, 4,271 from $15 to $20 a week, 2,033 from $20 to $25 a week, and 1,163 at a rate over $25. The balance were paid at a rate below $12 a week.

The total cost of materials used in 1917 amounted to $15,599,691, being an increase over 1915 of $9,616,451, or of 160.7 per cent., and the total value of products rose from $13,372,506 to $32,364,340, or by 142.10 per cent. The net value of products, or the value added by manufacture, was $16,764,649 in 1917; in 1915 it amounted to $7,389,270. The net value is found by subtracting the total cost of materials used from the total value of products.

ONTARIO APPOINTS PUBLIC TRUSTEE

A bill has been introduced by the Ontario Government providing for the appointment of a public trustee. Up to the present time these duties have been attended to by the attorney-general, who will continue to do so until a trustee is appointed. The public trustee is to be a corporation sole with a perpetual succession and an official seal, who will have such duties as were imposed on the attorney-general acting in the capacity of public trustee under the Crown Administration of Estates act and the Charities Accounting act of 1915. He will have powers of inquiry such as are conferred upon commissioners under the Public Enquiries Act. He may be appointed to act as executor or administrator but it shall not be necessary for him to give security. Fees will be charged in the usual way. The public trustee will be liable just as would a private trustee but his losses will be made good from the consolidated revenue fund.

Trust companies doing business in Ontario are objecting to the clauses empowering the public trustee to be appointed as an executor or administrator in exactly the same way as a company is appointed. They maintain that the trust companies have looked after business of this kind successfully, that they pay taxes and are subject to overhead expenses which the public trustee will not be required to meet. A public trustee may be necessary to attend to escheated estates, lunacy funds, etc., but the power to accept private trusts is, it is maintained, not necessary.

The American Alliance Insurance Co. has received a license from the Dominion Department of Insurance authorizing them to transact automobile insurance in the province of British Columbia. Mr. William Robins is chief agent for Canada.

ALBERTA BUDGET SPEECH

Provincial Treasurer Gives Figures of Debt, Revenue and Expenditure for Year

Hon. Chas. Stewart, provincial treasurer of Alberta, delivered his budget speech on March 17th, and supplemented it by additional information given on the following day. He said that the past year had been a good one financially and quoted figures to show that agricultural, mining and manufacturing products amounted to $324,704,180, an increase of more than $7,000,000 over the previous year. He reviewed the progress of the different industries, and said that Alberta's coal production was now the greatest of any province in Canada. The total capital revenue for the year, made up principally of loans, was $3,368,128, and the capital expenditure $2,372,835. The public debt at the close of 1918 was $30,746,149. The province finished the year with a cash balance of $1,117,191. The total assets of the province were $136,810,688.

Estimates

Mr. Mitchell gave the total estimated revenue for 1919 for the province as $13,121,470, adding a balance of $1,117,191 carried over from 1918 to make a total of $14,238,661. The total estimated expenditure for 1919 he put at $14,207,319, divided as follows: $4,864,010 for capital expenditure and $9,343,309 for income expenditure. This gives a cash surplus of $31,342. This, however, includes items of borrowed money. The real income revenue for 1919 is placed at $9,362,470 and the income expenditure at $9,343,309, leaving an income surplus of $19,161.

The expenditure estimate includes public debt, $1,275,[illegible]; legislation, $140,755; civil government, $579,115; administration of justice, $715,585; public works, $1,372,190; education, $1,574,093; agriculture, $505,254; dairy and poultry, $470,000; public health, $298,460; telephones, $1,660,000; general administration, $168,905; municipal affairs, $118,080; miscellaneous, $545,877. Total, $9,343,309.

The total expenditures estimated for public works for the year are put at $1,372,190, exclusive of $1,600,000 on the telephone system. They include a new court house for Medicine Hat, $150,000; Institute of Technology, Calgary, site and to commence construction, $200,000; provincial share of Tuberculosis hospital, Bowness, $200,000; schools of agriculture, $250,000; alterations to the parliament buildings, $75,000; improving grounds of government house, $7,500; improving grounds of parliament buildings, $12,500; new hospital building for insane at Ponoka, $267,500; hospital for returned soldiers, Red Deer, $5,000; repair shop, Lethbridge jail, $6,000; sites and construction for public buildings, $75,000; home for mentally deficient children, $100,000.

The budget contains an estimated item of half a million dollars for capital expenditure on bridges.

Under highways, an item of $300,000 is included for income expenditure, and $100,000 for capital expenditure on main highways, while $300,000 is placed in the income expenditure estimate for district and local highways.

Other items of estimated expenditure under public works include $45,000 charged to income expenditure for ferries and $50,000 to capital expenditure for the same, and $98,740 capital expenditure for surveys and compensation for lands.

The university budget shows that the total estimated expenditure is $483,273 and estimated revenue, $143,780, leaving an estimated net expenditure of $339,493. The principal expenditures all along the line, are, of course, for salaries of professors, assistant professors, lecturers, demonstrators, etc., and operating expenses.

Included in the revenue account is $1,621,075, of which $190,000 is under the heading government and legislation, $463,200 on the population basis of 579,000 at 80 cents a head, $405,375 as debt allowance and $562,500 as compensation for public lands. Other items of revenue include school lands, $575,000; treasury, $491,855; attorney-general, $368,260; provincial secretary, including license fees, $1,158,475; public works, $218,015; education, $31,250; agriculture, $181,500; dairy and poultry, $450,000; railways and telephones, $1,625,000; municipal affairs, $2,058,000; public health, $11,500; king's printer, $7,500; public utilities commission, $3,000. Total, $9,362,470.

Direct Taxes Will Stay

Mr. Mitchell confirmed the previous forecast that the government intends to maintain direct taxation through the supplementary revenue tax, an estimated item of revenue from this source for 1919 being placed at $1,100,000. It will be recalled that last year the government placed the estimate to be raised under this tax at approximately the same figure, but a total of $1,600,598 was raised, of which, however, only $613,269 was actually collected, the remainder being an asset to be collected this year. Since 1905, he said, the government has been obtaining money by direct taxation. When the population was small, the tax was applied mostly to corporations and came from the Dominion treasury. The expansion of population and the increasing needs of the province had made other forms of direct taxation such as the supplementary revenue tax necessary.

Increasing Expenditures

The speaker cited the increasing pressure brought to bear upon the government by various organizations for the expenditure of money, remarked on the institution of such things as the government labor bureau, and the maintenance of the provincial police. In this connection, he also cited some figures which cannot be found in the printed public accounts and are therefore not readily available to the public. He remarked briefly in regard to the proposal of the Dominion government to loan money for housing schemes, that the provincial government had only been able to obtain meagre information on the need of housing, but such as was at hand indicated that there was no acute situation of this kind.

Mr. Mitchell recapitulated some figures concerning the public debt of the province, none of which appear in the printed budget. The total public debt of Alberta he places at $31,500,200, against which is a sinking fund of only $754,000, leaving a net debt of $30,746,139. However, the provincial treasurer pointed out that there must be taken into account that a large part of this debt is on the capitalization of revenue-producing utilities and investments, chiefly the government telephone system. The total revenue-producing debt he put at $10,102,000. In addition, there is another class of debt such as loans to the Alberta Farmers' Co-operative Company and other loans aggregating $3,000,000, makng in round numbers a total revenue-producing debt of $13,000,000 odd.

In the class of non-revenue-producing debt, he put the debt for bridges at $2,500,000, for trunk roads at $3,500,000 and for surveys at $700,000, while some $7,734,000 is invested in public buildings. Other items brought the non-revenue debt up to approximately $18,000,000.

On the basis of the total debt of $31,500,200, the per capita debt of the province would be $54.40, but it should be calculated only against the non-revenue debt, and then the per capita debt would only be $31.18, which, said Mr. Mitchell, compares favorably with other provinces in the Dominion.

Opposition Criticism

The government's figures came in for criticism at the hands of Hon. J. Ramsey of the opposition. Mr. Ramsey pointed out that the Alberta budget only has one balance sheet purporting to cover all the finances of the province lumped together, and showed in comparison the Manitoba budget with a separate balance sheet for every department of financial activity in that government. The member also touched briefly on some other points, urging that the province should issue domestic loans. He declared that if the province could get the people to take $2,000,000 of a loan locally, it would increase their interest in its financial affairs. The speaker had previously criticized Mr. Mitchell for con-

gratulating himself that the province had no loans maturing until 1922, when a lower rate of interest would be available. He pointed out that in ordinary business, prudent men always figure that a new loan may have to be borrowed at current rates of interest. He declared also that the government should have a system of writing off entirely bad accounts, charging them against current revenue.

He also criticized the government for the inadequacy of its sinking fund. He pointed out that in the case of telephones, the average life is figured at ten years and the Bell company has renewed its entire system in seven and a half years. The sinking fund of $750,000 against the $13,500,000 revenue debt of the province was unthinkable. Mr. Mitchell put in that the $750,000 sinking fund was against the entire $31,500,000 debt of the province. Mr. Ramsey said that made the matter still worse. The speaker also criticized the budget for failing to take any account of the indirect liabilities of the province in the shape of guarantees on railways which were hastily constructed and which were the only securities now against some $18,000,000 of guarantees. If the province had to take these lines over, another million dollars annually would be placed against its revenue.

GEOGRAPHICAL LIMITATIONS TO COMPENSATION

The wreck of the "Princess Sophia" involved the Canadian Pacific Railway Co. in many claims under the Workmen's Compensation Act of British Columbia, as mentioned in *The Monetary Times* of March 7th. On March 14th, however, Mr. Justice Clement gave judgment in Vancouver in favor of the company, which had appealed against the claims being paid by the Workmen's Compensation Board. The order of the court restrains the board paying out further compensation to the dependants. The judgment is based on the view that the jurisdiction of the act does not extend to the scene of the wreck, which took place in American waters.

ROYAL SECURITIES INVESTMENT ITEMS

The Royal Securities Corporation has just issued the first number of "Investment Items." This pamphlet will be issued every two months commencing with March, 1919. It gives a review of the financial position together with investment suggestions. The first issue also contains a review of the history of the corporation, which was incorporated in 1903, and has handled securities of some of the largest industrial enterprises in Canada, as well as those of provinces and municipalities. Commenting on reconstruction business the March issue refers to the possibilities for Canada securing a share in this business. "We do not believe," it says, "that the debts of European countries to the United States and Canada will all be paid off by the export of foreign securities to America. It is our judgment that in years to come much of their war debt will be paid off by the export into America of manufactured products which they can produce much more cheaply than can America. Such reconstruction orders as Canada obtains will be received solely on a competitive basis, for sentiment will play a very small role in after-war trade. In fact, so far as the French, Belgian and British markets are concerned, we believe our larger opportunity will lie in the export of raw materials, such as foodstuffs, iron ore and pig iron, petroleum, copper, nickel, asbestos and other mineral products, and last, but not least, lumber and pulp and paper products. Of these commodities Europe has, and always will have, need. In these products Canada can compete successfully both in European and American markets, in spite of the fact that to production costs must be added transportation charges. The untold wealth of Canada's resources in raw materials will alone provide her with the sufficient basis for lasting prosperity."

MUNICIPALITIES MUST SELL BY TENDER

Few Quebec Municipalities Whose Financial Position is not Good—New Borrowing Restrictions

"As a general rule, the municipalities of the province of Quebec are in a fine financial standing," said Hon. Walter Mitchell, provincial treasurer, in the Legislative Assembly recently while the House was discussing the Mitchell bill respecting municipal affairs.

"There are just a few whose financial position is not what it ought to be," added Mr. Mitchell, "but such cases are very rare."

Explaining his bill, Mr. Mitchell stated that it was necessary to get the vote out in municipalities when a vote on a municipal by-law was taking place. With this object in view, the polling date was being extended, and the ratepayers would have the right to vote another day. "We are also introducing legislation," continued Mr. Mitchell, "to prohibit the giving of bonuses and the guaranteeing of bonds by municipalities. We have found that some municipalities have gone a little too far in this matter, and they have incurred heavy indebtedness. Consequently, we think the legislature should prevent municipalities from giving bonuses or guaranteeing bonds of any sort.

Sell Bonds by Tender

"We are also prohibiting municipalities from starting or carrying on work unless they have the money in their treasury. If they have not the money in their treasury, they must first submit a by-law to the ratepayers, authorizing them to make the loan to carry out the work."

Mr. Mitchell also explained how money by-laws must receive 10 per cent. of the votes in municipalities of over 2,000 population; 15 per cent. in municipalities between 1,000 and 2,000; in large municipalities, except Montreal and Quebec, 25 per cent. must vote to carry a money by-law.

Brig.-General Smart, Conservative member for Westmount, said that he considered that the new law, making it compulsory to have debentures sold by tender, was very desirable. He held to the principle that no loans should be made by municipalities without first being submitted to the people.

After the provisions of the new law had been further explained and justified by the provincial treasurer, the bill was given third reading.

REARRANGE HAIL INSURANCE RATE

Hail insurance is attracting increasing attention in Saskatchewan, there being 35 licenses to do business in that province this year, as compared with 22 last year. Some changes have been made in the rates according to a statement by Mr. H. H. Campkin, secretary of the Hail Underwriters' Association. Last year the rate for practically the whole province was 6 per cent. for cash premiums and 8 per cent. for note premiums due in the fall. A few companies charged an extra premium in some of the districts of the province which, during the last few years, have had a bad hail record.

This year all the companies in the hail insurance association have adopted a uniform rating system with the result that the charge throughout the province by the line companies for protection against hail will be at the rate of $6 and $8 for cash and time premiums respectively per each hundred dollars of protection. Two large areas in north-west and north-east Saskatchewan which have been comparatively free from hail will be charged a smaller rate of 5 and 7½ per cent., while three or four small districts which have had hail records will be charged 8 and 10 per cent.

The Saskatchewan government, it is understood, will grant the claim of the city of Regina to the $60,000 difference between insurance and loss on the Winter Fair building.

Irreparable Negligence

When a man dies, leaving an Estate of intricate interests without appointing a carefully chosen trained Executor, he is guilty of an irreparable negligence for which the Estate is sure to suffer Our 37 years' experience qualifies us to administer Estates involving all manner of business enterprises and investments

PRIVATE BOND SALE STILL POSSIBLE

Manitoba Government Refuses to Adopt Resolution Providing For Sale of Bonds by Tender Only—Is Favorable, However

ON March 13th a resolution was introduced into the Manitoba Legislature proposing that future sales of Manitoba Government bonds should be made only by public tender. This resolution was introduced by Mr. P. A. Talbot, a member of the opposition; it was defeated by a government vote. The Hon. Edward Brown, provincial treasurer, strongly upheld his method of conducting the sales. He declared that it was in the best interests of the province for the bonds to be sold in the manner in which they are at present.

F. E. McPherson, of Portage la Prairie, said that generally speaking, he approved the method of calling for public tenders for the sale of bond issues, still he did not deem it wise to make it compulsory for the government to follow that policy. Mr. McPherson moved the following amendment to the resolution moved by Mr. Talbot:—

"That whereas the province of Manitoba sold an issue of debentures of one million dollars, term twenty years, bearing interest at five and one-half per cent., by private sale, at par plus accrued interest;

"And whereas the issue of the province of New Brunswick, referred to in the resolution, was free from succession duties, and was issued at a term of twenty-five years, it would appear that the sale made by the province of Manitoba was more advantageous than that made by the province of New Brunswick;

"And whereas while it may be generally advisable to sell the debentures of the province by public tender;

"And whereas circumstances might arise making it inadvisable for the province to call for tenders;

"Therefore be it resolved that, this legislature expresses its approval of the sale made by the province of Manitoba;

"And that while this legislature generally speaking approves of the policy of calling for public tenders, in view of the possibility of circumstances arising in which sale of debentures by public tender would be inadvisable and not in the interests of the province, it does not deem it wise for the administration to commit itself irrevocably to such policy."

Premier T. C. Norris, in supporting Mr. McPherson's amendment, declared that the hands of the government should not be tied in the manner suggested by Mr. Talbot's resolution. He said that no sale of bonds had been carried out by the provincial treasurer without closest consultation with the government.

As regards Mr. Talbot's reference to the fact that in New Brunswick, where such a course had been taken, an issue at five and one-half per cent. bonds was sold at $100.35 against $91.50 for a six per cent. issue of Manitoba. Mr. McPherson pointed out that there was a difference of twelve months between the Manitoba and New Brunswick issues, the state of the market being favorable to the eastern sale. He reminded the house that Manitoba had recently sold at private sale an issue of one million of five and one-half per cent. bonds at par plus accrued interest.

Finances Criticized

The provincial finances have come in for much criticism recently. Mr. Joseph Hamelin, member for St. Rose, said recently in the legislature:—

"The public accounts show that although the bonds issued during last year, with one exception, bear interest at the rate of six per cent. they had to be sold at a heavy discount; in one case, that of series W, as much as eight and one-half per cent. This particular issue, Mr. Speaker, would net the purchaser 6.56 per cent. interest, and this, in spite of the claim of the provincial treasurer that the finances of the province are in a flourishing condition. It would be interesting to learn from the provincial treasurer why two bond issues, made in the same year, one in February and the other in August (I refer to series W and Y), realized such different prices. Series W realized $91.50 and series Y, realized $96.77, or a difference of $5.27.

"The exception referred to just previously is that of an issue of $500,000 for the Manitoba Farm Loans Association which sold at par and only bear five per cent. interest. I can only presume, Mr. Speaker, that this is an investment of some sinking fund, probably the telephones, which is being milked to the tune of at least one per cent. for the benefit of consolidated revenue and to help to bolster up that glorious surplus."

Speaking of the new parliament buildings, Mr. Hamelin said, "I am not at all surprised at the reason why the minister of public works was so long in presenting the report asked for relating to the parliament buildings. In his speech the other day he said that the total expenditure to November 30th, 1918, was $4,373,581, and taking the report laid on the table the total expenditure to November 30th, 1918, is $5,460,424. This is a very large difference of over $1,000,000 and should be explained."

Accounts Found Correct

On March 7th the final report of the Public Accounts Committee was submitted, the public accounts having been found to be correct. Mr. P. A. Talbot, however, stated that he did not agree with the policy of the department of the treasury. He drew attention to the $60,000 paid out of revenue for expenses in connection with the Manitoba Farm Loans Association debentures. He also took exception to the borrowing of $1,000,000 for patriotic purposes when apparently the money was not needed. Mr. Talbot, contended that borrowing money at a high rate of interest, when it was not needed, was a bad policy when the money was placed in the bank at a lower rate of interest. He also pointed out that interest charges on public buildings were all lumped together instead of being listed separately.

Mr. Talbot took objection to the borrowing of $1,000,000 for the work on the parliament buildings during 1918; this amount cost the province $86,000. The speaker also pointed out that many of the provincial buildings had been valued at a much greater worth than they really are. He took, for instance, the old parliament building. At the appraisal made of buildings in 1915, this was valued at $54,000. In the year of 1918, it is listed at $234,000, in spite of the fact that building material has only increased 50 per cent. According to that, the building would be worth approximately $110,000 now. He made examples of several other government buildings with the same result.

In concluding, Mr. Talbot said that after investigating the public accounts he had found that all money had been properly received and disbursed.

Will Need Over $12,000,000

According to the statement made by Hon. Edward Brown in the Manitoba Legislature this week, the province is entering on a considerable borrowing scheme. Mr. Brown said that arrangements would have to be made by the government for the borrowing of $12,678,000 this year. This will include $6,548,000 required for refunding debentures maturing. A supply bill in the present session would authorize capital expenditures of $2,580,000. Another $1,250,000 will be required for the automatic telephone scheme and rural telephone extensions; $500,000 for good roads, $350,000 for power transmission lines and electrification at Portage la Prairie, $300,000 for seed grain purposes, and $750,000 for patriotic purposes. Mr. Brown announced that $1,000,000 had been already secured on the New York market at a good price, namely, par plus accrued interest.

FIRE CHIEFS TO MEET IN CALGARY

Members of the executive committee of the Association of Fire Chiefs of Canada met at Calgary in session on Tuesday, March 25, to decide the date of the convention which is to be held in that city this year, and to make any other arrangements for the event. The last of August is being suggested. Members of the executive who were in the city include Chief Armstrong, of Kingston, secretary of the Dominion Fire Chiefs' Association; Chief Heath, of Saskatoon; Chief Baines, of Moose Jaw; and Chief Smart, of Calgary.

Before Investing

You should see that your judgment regarding the security is backed by facts.

Not a dollar has ever been lost by an investor in Standard Reliance Mortgage Corporation Debentures

Mortgage Corporation Debentures

The Debentures of the Standard Reliance Mortgage Corporation yields 5½ interest payable half-yearly. One thousand dollars invested in Standard Reliance Mortgage Debentures at 5½% (compounded) for 5 years amounts to $1311.65: A gain of $311.65, or over 31%.

SOUTHERN ALBERTA IRRIGATION PLANS

Probable that Heavy Borrowing Will be Necessary to Finance Development

On Wednesday and Thursday, March 12th and 13th, a conference of 500 southern Alberta farmers was held in Lethbridge to organize an association to bring about irrigation of five hundred thousand acres. A program was prepared for the consideration of the Dominion and Provincial governments, which are being asked to aid in the scheme which will involve an expenditure of $15,000,000. Mr G. R. Marnoch, president of the Lethbridge Board of Trade, presided.

An organization, called the Irrigation Development Association, was formed. This is composed of 25 local associations A membership fee of $2 per annum is charged. The most important resolution passed at the convention was the following:—

"That this conference, representative of the whole farming and business population of the districts within an 80-mile radius of Lethbridge, and representing the wishes of 100,000 people, records its acceptance of the fact that our mountain stream waters can be further beneficially used for assisting us to improve our farming operations, and that the surveys that have been made by the Dominion government demonstrate that, speaking generally, these waters could be brought to our lands at such costs as we could well afford to pay and make a profit in money by their use, besides improving the condition of our soils. We therefore ask the Dominion government to continue to proceed with all the survey works expeditiously and the making of plans and estimates for the various irrigation projects that can be watered from the Old Man, Milk, St. Marys, Belly and Waterton Rivers, and the communication of the results to us.

"We also ask our governments, both the Dominion government and the Alberta government, to help and guide us in the formation of irrigation districts and in the financing and constructing of the necessary works, as we recognize that the prospects involve the expenditure of such capital sums would be difficult for us to raise on our own initiative. And we look to our governments to get together promptly and devise ways and means to these ends."

Government Assistance

The attitude of the Dominion Government was stated in a wire from the Minister of the Interior sent to Mr. G. R. Marnoch, president of the Lethbridge Board of Trade, as follows:—

"Am ready to undertake surveys for irrigation work referred to provided provincial government give clear understanding that responsibility from that on is provincial or local and not Dominion, we affording appropriate engineering supervision. If province in discharge of such responsibility purchase districts bonds and desires Dominion loan against same, such will be considered. Cannot undertake expenditure necessary without understanding above described."

Hon. Chas. Stewart, premier of Alberta, expressed the intention of the province in a letter as follows:—

"With reference to my meeting with your committee and the memorandum presented regarding your irrigation project. I desire to make the following observations regarding the position of the government of Alberta in connection with this matter. In the first place, the Dominion governments have always maintained jurisdiction over irrigation, and the wire of the minister of the interior, embodied in your memorandum, is the first official intimation of the Federal government that it was the desire that the province should accept this responsibility.

"Secondly, if the province did accept the responsibility, it would be necessary for the province to investigate by its own officials the surveys, etc., already laid out by Dominion government officials, to which the province has had no access whatever, and this would require some considerable time.

"Thirdly, this province does not propose to borrow money from the Dominion government, and other financial arrangements would, if this responsibility was accepted by the province, have to be made.

"Following these observations, it seems to me that the federal authorities should advise this government definitely as to their future position in connection with irrigation matters. If they decide to drop it altogether, then this government will endeavor to find a solution of the difficulty and protect the interests of those so vitally concerned. In order that there will be no delay, it is my intention to open this matter with the federal authorities at once."

LONDON AND NEW YORK SILVER MARKET

The following table shows the high and low prices of silver at New York and London in 1918:—

Date.		(Pence per ounce) London, High.	(Pence per ounce) London, Low.	(Cents per ounce) New York, High.	(Cents per ounce) New York, Low.

The London prices are for silver of the British government standard (.925 fine), while the New York prices are for pure silver.

Splendid Record Achieved
during 1918

THE year 1918 was for the business of life assurance a year of supreme achievement. Owing to the combined effect of the war and the influenza epidemic, death claims were unusually high. The payment of these claims enabled the Companies to render an unprecedented measure of public service, and to fulfill to a more noteworthy degree than ever previously the beneficent purpose for which they were founded.

The record achieved during 1918 by the Sun Life of Canada was one of particularly striking success. For the first time in the Company's history new assurances paid for exceeded Fifty Million Dollars. The growth in size, strength and prosperity accentuates the Company's position as not merely the leader among Canadian Life Offices, but one of the great insurance corporations of the world.

The Company's financial power is emphasized by its large Assets, Income and Surplus. During the year $7,460,000 was added to the Assets, which at December 31st, has reached the huge total of $97,620,000. The Income is now $21,651,000, while the undivided Surplus is $8,027,000.

THE RESULTS FOR 1918.

ASSETS	
Assets as at 31st December, 1918	$97,620,378.85
Increase over 1917	7,460,204.61
INCOME	
Cash Income from Premiums, Interest, Rents, etc., in 1918	21,651,099.69
Increase over 1917	2,362,102.01
PROFITS PAID OR ALLOTTED	
Profits Paid or Allotted to Policyholders in 1918	1,546,607.16
SURPLUS	
Total Surplus 31st December, 1918, over all liabilities and capital (According to the Company's Standard which is more severe than that laid down by the Insurance Act.)	8,027,378.55
TOTAL PAYMENTS TO POLICYHOLDERS	
Death Claims, Matured Endowments, Profits, etc., during, 1918	9,768,564.28
Payments to Policyholders since organization	78,862,881.15
ASSURANCES ISSUED DURING 1918	
Assurances issued and paid for in cash during 1918	51,591,392.04
Increase over 1917	3,779,824.56
BUSINESS IN FORCE

CANADIAN PACIFIC EARNS DIVIDEND

The earnings of the Canadian Pacific Railway Co. for the year ended December 31st, 1918, were at the rate of 10.97 per cent. on the common stock. This is considerably less than the 15.89 per cent. earned in 1917 and the 16.76 per cent. for the twelve months ended June 30th, 1916. The surplus available for dividends on the ordinary shares of the company—including in that surplus the special income earned, as well as railway account—amounted to $28,532,373, against $41,[illegible]4,214 in 1917, and $43,585,113 for the twelve months ended June 30th, 1916. For the broken period from the latter date to December 31st, 1916, the amount available for common dividends was $29,199,857, or equal to 22.46 per cent. on the ordinary stock. Owing, however, to the fact that the period includes the heavy-earning autumn months, without reflecting the leaner summer ones, comparison with this showing is not significant. Of the 1918 earnings available for disbursement among holders of the common shares of the road, 7.85 per cent. came from railway account, while special income account furnished 3.12 per cent. According to the preliminary statement of revenue and expenditure, gross earnings of the railway reached the record figure of $157,537,698, an increase of $5,148,364 over 1917. A sharp increase of over $17,000,000 in operating expenses, following the heavy increases in wages and equipment, however, reduced the net earnings by over $12,000,000. Special income, too, fell off by over two-and-a-half millions. The latter account, nevertheless, was able to show a small margin over the 3 per cent. which the company disburses to ordinary shareholders, while the operations of the railway proper exceeded the 7 per cent. dividend portion by nearly 1 per cent.

The amount transferred to special income account shown in the following table and amounting to $193,977, represents net earnings of the company's commercial telegraph for January and February, 1918, and not, as in the case of previous years the income from coastal steamers, commercial telegraph and news department. Comparisons of results for three years, as made available in these preliminary statements of the company, are tabulated below:—

	1918.	1917.	1915-16.
Gross earnings	$157,537,698	$152,389,334	$129,481,885
Working expenses	123,035,310	105,843,316	80,255,965
Net earnings	$ 34,502,388	$ 46,546,018	$ 49,225,920
Fixed charges	10,177,513	10,229,143	10,306,196

LONDON MUTUAL MANAGEMENT BUYS CONTROL

Mr. A. H. C. Carson, president, and Captain F. D. Williams, managing director of the London Mutual Fire Insurance Co., have bought the shares of the London Mutual, which for the past seven years have been owned by the London and Midland Insurance Co., Ltd. This ends the litigation which has been threatening the company for some years. It is the intention of the new owners to permanently continue the business of the company on the same lines as heretofore.

BANK BRANCH NOTES

Branches of Canadian banks have been opened recently as follows:—

Coniston, Ont.	Canadian Bank of Commerce
Yarmouth, N.S.	Canadian Bank of Commerce
Kenaston, Sask.	Canadian Bank of Commerce
Brighton, Ont.	Canadian Bank of Commerce
Semans, Sask.	Canadian Bank of Commerce
Armada, Alta.	Bank of Hamilton
Brantford, Ont. (East end branch)	Bank of Hamilton
Krydor, Sask.	Imperial Bank of Canada
Bruce, Alta.	Royal Bank of Canada
Midland, Ont.	Royal Bank of Canada

The Bank of Montreal property at the corner of Jasper and Howard Avenues, Edmonton, has been sold to the Bank of Toronto which, it is believed, will shortly open a branch in the city.

The Bank of Nova Scotia is extending its field of operations and contemplates opening a branch at Millville, York County, Ont., in the near future.

Mr. H. C. Samis, manager of the Swift Current branch of the Union Bank for the past four years, has been appointed inspector for southern Saskatchewan for that bank, with offices in Regina.

Mr. Hector Laperriere, son of Mr. J. F. H. Laperriere, has been appointed manager of the main Ontario branch of the Provincial Bank of Canada.

Mr. E. S. Hopper, who has been manager of the North Vancouver branch of the Bank of Hamilton for the last two-and-a-half years, has been transferred to Port Hammond, B.C.

Mr. C. C. Pineo has been appointed supervisor of the new branches of the Royal Bank of Canada, which are being established in Brazil, the Argentine Republic and Uruguay. Mr. Pineo was trained in the service of the Royal Bank of Canada, but about four years ago left that institution to assume the direction of the branches of the National City Bank, of New York, in Brazil.

A number of officials of the Royal Bank of Canada will leave New York, April 12, for South America, to establish branches of the bank in Rio de Janeiro, Brazil; Montevideo, Uruguay and Buenos Aires, Argentine. The party will include F. T. Walker, senior agent of the Royal Bank of Canada, New York; T. F. Dever, late manager of the bank's branch in Barcelona, Spain; G. V. Long, late manager of San Jose, Costa Rica branch; Charles O. Hodgkins, late manager of Port of Spain, Trinidad branch; also Messrs. W. C. Lowry and A. R. Gordon, of the head office staff. All of these officials, with the exception of Mr. Walker, will be connected with the new branches.

Meggs Brothers, insurance agents of Gananoque, Ont., have severed their connection with the Mutual Life of Canada, and have been appointed district representatives of the Great-West Life Assurance Co.

J. C. Mackintosh and Co., Montreal and Halifax, have issued a pamphlet describing their plan for the sale of securities on a partial payment basis. It is stated, however, that listed securities are not sold in this way. Interest at 6 per cent. per annum is being charged.

F. N. BURT COMPANY, LIMITED

Report of the Directors to the Shareholders for the Year Ended December 31, 1918

The Directors present to the Shareholders their Tenth Annual Report, with the accompanying statement of Assets and Liabilities as of December 31st, 1918:—

The Balance at Credit of Profit and Loss Account, December 31st, 1917, was...	$272,863.76	
Profits for the year were	470,376.84	
		$743,240.60
The Appropriations were as follows:		
Transferred to Realty and Plant Reserve Account	$120,000.00	
Transferred to Reserve for Federal Taxes	37,306.16	
Written off Patents	25,886.76	
Dividends on Preference Stock, Nos. 34, 35, 36 and 37, at the rate of 7% per annum	138,264.00	
Dividends on Common Stock, Nos. 33, 34, 35 and 36, at the rate of 6% per annum	45,000.00	
		$366,456.92
Balance to carry forward to 1919		$376,783.68

The profits exceed those of the previous year by $100,377.82. After deducting the transfers to Reserves, the amount written off Patents account, and dividend payments on the Preference and Common shares, the balance in Profit and Loss account has been increased by $103,919.92, and now stands at $376,783.68.

This balance is subject to deduction of the United States Excess Profits Tax on the 1918 earnings of the Buffalo business, the amount of which cannot be ascertained as yet. A Reserve of $40,000.00 has been set up to provide for income taxes, both United States and Canadian.

By Order of the Board,
S. J. MOORE, President.

AUDITORS' CERTIFICATE.

We have audited the accounts of F. N. Burt Company, Limited, for the year ending 31st December, 1918, and we certify that in our opinion the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the Company's affairs according to the best of our information and the explanations given us and as shown by the books of the Company.

We have received all the information and the explanations we have required.

(Signed) CLARKSON, GORDON & DILWORTH, Chartered Accountants.

At the tenth Annual General Meeting of the shareholders, held on the 24th of March, 1919, the President, Mr. S. J. Moore, reviewed the operations of the Company.

The Board of Directors and Officers were re-elected.

Canadian General Electric Company
LIMITED

DIRECTORS

LT.-COL. THE HON. FREDERIC NICHOLLS, President and General Manager.

SIR HERBERT HOLT.
COL. THE HON. SIR J. S. HENDRIE, C.V.O.
F. GORDON OSLER.
SIR WILLIAM MACKENZIE.
W. G. ROSS.

ANNUAL REPORT OF THE DIRECTORS

Submitted to the Shareholders at the Annual General Meeting of the Company in Toronto, on Monday, March 24th, 1919

Your Directors submit herewith the Balance Sheet of the Company as upon the 31st day of December, 1918, the Statement of Profit and Loss for the year, and also the Certificate of the Company's Auditors, Messrs. Price, Waterhouse & Company, Chartered Accountants

The policy of making ample provision for Depreciation has been continued, the sum of $577,512.87 having been reserved for this purpose.

The net Profit for the year shows an increase of $302,-[illegible] over the preceding year, and, after the payment of Dividends at the rate of 8% per annum on the Common Stock and 7% on the Preference Stock of the Company, there remains a surplus of $656,483.67. This amount, added to the balance at the credit of Profit and Loss from the preceding year, made a total of $1,122,776.67, from which must be deducted the sum of $600,000.00 which has been transferred to our Reserve, making a total of $4,600,000.00 at the credit of Reserve, which, together with the balance of $522,776.67 at the credit of Profit and Loss, makes a total Surplus of $5,122,776.67, which is equal to over fifty per cent. of the par value of the Company's shares, both Common and Preference.

The total amount reserved for Depreciation amounts to $4,[illegible]6,182.20, or over thirty-five per cent. of the book value of the entire Capital Assets of the Company.

The Company has no outstanding Bonds, Debentures, Mortgages or prior liens of any description other than a nominal charge of $22,500.00 on property purchased, on which an existing mortgage which is still current is not yet due.

Following the usual policy of the Company, our Inventory has been taken at or below cost, and adequate reserves have been provided for shrinkage in the value of materials, which, in the case of copper and other metals, has been very considerable. Ample allowance has been made for any articles not readily saleable, and any goods that may have become obsolete have been inventoried at their scrap value.

During the year the Company inaugurated a new sales department for the distribution of Automobile Accessories and Supplies. This department has shown satisfactory development, and has become an important factor in the distribution of the Company's output.

FIRE INSURANCE.

The Company has made it a practice to see that all of its buildings and contents are fully covered by insurance, and some idea of the importance of this item may be realized when our Shareholders understand that the aggregate of fire insurance that we consider it necessary and advisable to carry amounts to $14,820,540.00.

EXTENSIONS TO IRON FOUNDRIES AT TORONTO AND MONTREAL WORKS.

At our Davenport Works in Toronto our foundry capacity has been inadequate to handle the large tonnage and work required for marine engines, etc. The main building was 120 x 300 feet, with a floor area of 36,000 square feet. In August last an extension 160 x 120 feet was decided upon, and this has now been completed at a cost of about $70,-000.00. The additional floor area secured amounts to 19,200 feet, or more than 50% increase. The extension is served by the same cranes as in the original building, that is to say, two twenty-ton cranes, but a new five-ton crane has been added to one of the lean-to's at a cost of $7,000.00. The design of the building, which is of concrete, brick and steel, has been carried out to correspond to the original structure, and it was completed and put into use late in December.

At our Montreal Works the original Grey Iron Foundry building was 200 x 100 feet, equal to 20,000 square feet, and during the year an extension was authorized and completed, 100 x 100 feet in area, or an additional 10,000 square feet of floor space, giving a 50% increase of available floor area. Work was started in April and the new building was in use in July, the twenty-five-ton cranes in the original building being used in the new extension, the craneways having been extended the full length of the building. A new Core Oven building was also added to balance up the complete unit for the increased capacity. The cost of these improvements and extensions amounted to $27,236.24.

NEW WAREHOUSE BUILDING.

The growing demands of our business resulted in a lack of accommodation at our Head Office building for our Executive, Engineering and Clerical staff, as well as Warehouse and Show Rooms for our Electrical Supplies Department. In order to provide adequate facilities a handsome new building, devoted exclusively to the warehousing and sale of electrical fittings and supplies, and automobile accessories, has been erected at a cost of about $175,000.00. This new building adjoins our present Head Office building, with a private lane in between, which affords splendid shipping facilities. The building is of mill construction, six storeys and basement, measuring 48 x 185 feet. A feature of the new building is the arrangement and organization which makes it possible to give an exceedingly prompt service.

REVIEW OF OPERATIONS DURING WAR PERIOD.

Now that active war conditions have ceased and we have entered upon a period of reconstruction, it may not be out of place to briefly review the rapidly changing conditions that have been experienced by the Company from the beginning of the war until the present.

Immediately after the declaration of war by Great Britain in 1914, this Company, in common with many other industries in Canada, experienced a very serious setback. New orders were not forthcoming, and many orders in hand were cancelled, and so serious became the situation that it was necessary to make a horizontal reduction of 20% in the wages of the staff. This drastic policy enabled us to keep our complete organization together without dismissals, and it is a matter of congratulation that, after a lapse of a few months, business commenced to revive as a result of war orders for munitions, foodstuffs, and other military requirements being diverted to Canada, and a period of stagnation was rapidly changed to one of great activity. By the end of the year we had so far recovered our position that your Executive were able to grant a bonus to our staff equal to the full amount of the 20% reduction previously made, and from that time until the Armistice was declared the difficulty had been to secure sufficient labor to take care of the contracts offering.

MUNITIONS.

During the years 1915, 1916, 1917 and 1918 the Company manufactured and shipped orders for munitions of various types amounting in value to $15,287,284.42. In order that Shareholders may have knowledge of the manner in which the Company adapted its policy to changed conditions, and how quickly it reorganized its plants in order to keep its manufacturing facilities employed, attention is drawn to the wide range of munitions for which contracts were accepted and completed, and, as the manufacture of munitions is one of the most difficult and precise of manufacturing problems, your Executive feel that our staff, including our Engineers, Experts and Workmen, are entitled to credit for their resourcefulness and for the successful accomplishment of a very difficult task.

Our output included:—

Shell Forgings	9,376,369 of various sizes and types.
Machining and Assembling	1,455,010 shells of various sizes and types.
Manufacturing	2,311,658 Brass Cartridge Cases.
Manufacturing	4,506,618 Brass Primers.
Manufacturing	2,275,311 Component Parts, such as plugs, discs, etc.

Of the gross total, there was supplied to the British Ministry of Munitions, through the Imperial Munitions Board, munitions to the value of	$13,682,539.95
To the British Admiralty	130,318.00
To the U.S. Army, Ordnance Department....	1,474,426.47

MARINE ENGINEERING.

Early in the year 1918 your Directors formed the impression that the end of the war could not be long delayed, and, therefore, the policy was adopted of casting about for new lines of manufacture that would keep our facilities employed after orders for munitions should cease, and fill the gap during the time intervening between the cessation of war orders and the reconstruction of trade channels through which we would again commence to receive orders in adequate volume for our normal output under pre-war conditions. Having in mind that the Mercantile Marine of the Allied Countries had been steadily depleted, and that many orders for cargo ships were being placed in Canada and the United States, we devoted our energies to securing orders for marine engines, boilers and other auxiliaries.

The great activity in the shipbuilding industry had resulted in the opening up of many new yards in both Canada and the United States, and, while the old-established plants were equipped to build the ship machinery required for their own requirements, the majority of the newly-organized yards, and many of the older ones, were compelled to enlist the co-operation of other machinery builders to enable them to meet the unusual demands and attain maximum production.

As our plants in Toronto were well equipped for undertaking the manufacture of marine engines, in sizes ranging from 200 H.P. up to 1,000 H.P., and of Scotch marine boilers of the largest size required for ships up to 10,000 tons capacity, as well as practically all other ship auxiliaries, important contracts were secured during the year for machinery and equipment for installation in ships building both in Canada and the United States.

Including the machinery required for the four 3,500 ton Steel Cargo Steamers building at our Niagara Shipyard, but not including the ships, the orders for Marine Engines, Towing Engines, Scotch Boilers, Condensers, Ships' Winches, Shafting, Propellers, and other Ship Auxiliaries, at the end of the year amounted to $5,490,707.00, the contracts in question being received either directly from or for account of:—

Imperial Munitions Board	$1,602,112.00
Dept. of Naval Service	
Dept. of Marine	
Government of the Republic of France. . .	853,187.00
U.S. Shipping Board Emergency Fleet Corp.	3,034,808.00
U.S. Navy	
U.S. Army Embarkation Service	
Total as above	$5,490,707.00

Of which amount approximately $1,000,000.00 is carried forward into 1919.

PATRIOTIC AND BENEVOLENT ACTIVITIES.

During the four years of warfare this Company assumed a generous and patriotic attitude in regard to contributions for patriotic and benevolent enterprises, and has subscribed and disbursed the sum of one hundred and fifty thousand dollars for such purposes as the Patriotic Fund, Red Cross Society, British Sailors Relief Fund, etc.

The Company raised and maintained a Detachment of twenty-five electrical and mechanical engineers; that is to say, the Government were under no charge whatever on account of these officers and men except for food and clothing, their normal wages being paid by the Company throughout the whole period of their service. Their duties were principally in connection with electrical and mechanical engineering work, such as the installation, repairing and operation of searchlights, electrical connection of mines, erection and wiring of buildings, installation, repairing and operation of electrical plants, oil and gasoline engines, and other duties usually assigned to the Royal Canadian Engineers.

This Company was further a generous subscriber to the various Dominion of Canada War Loans, the subscriptions of the Company in all, for the various Loans, amounting to $6,500,000.00, of which we were allotted $4,520,000.000. As the investing demand increased we effected sales, and at the close of the year our holdings of War Loan Bonds were reduced to about $2,000,000.00.

Your Directors have pleasure in advising the Shareholders of the very generous subscriptions to the several Loans by the employees of the Company, which amounted to upwards of half a million dollars, which is an illustration of the spirit which dominated all classes of the Canadian community, who supported Canada's participation in the war for freedom and justice to the fullest extent of their ability.

OUR HONOR ROLL.

Your Directors believe that our Shareholders will be much interested in having placed before them information as to the number of men previously employed by the Company who enlisted for service in the Canadian Army, and the following figures speak eloquently of the manner in which Canadians of military age in every walk of life assumed the responsibility of the defence of the Empire. While the figures below show that a very considerable proportion of our own employees enlisted for service, public records show that similar patriotic sacrifices were made by industrial workers throughout the Dominion.

PRESENTATION TO MR. W. D. MATTHEWS.

On December 27th, 1887, or thirty years ago, a syndicate of ten persons was organized by myself, each of the ten subscribing a sum of $1,000.00, or $10,000.00 in all, for the purpose of investigating opportunities for the profitable development of the electrical enterprise in Canada. Inquiries were made, and shortly after the formation of the syndicate the members organized the Toronto Incandescent Electric Light Company, and again, three years later, our present Company, the Canadian General Electric Company, which has since been operated along conservative lines, until to-day the paid-up Capital is $10,000,000.00; Reserves, $5,122,776.67; total Assets, $21,692,471.79. Perhaps the most gratifying feature of the history of the Company is the fact that it has earned and paid dividends since its inception amounting in all to $10,021,082.14, and to-day has a Reserve Fund equal to over 50% of its paid-up Capital, ample Reserves for Depreciation, and has practically no Bonds, Debentures or prior liens of any kind outstanding. The original Directors of the Company served continuously as Directors for the unusually long period of twenty-five years, with one exception, but to-day Mr. W. D. Matthews, one of our Vice-Presidents and Chairman of the Board, and myself are the only surviving members of the original Board.

The Directors of the Company took advantage of the occasion of the thirtieth anniversary of Mr. Matthews' connection with the Company, first as a member of the original syndicate and thereafter as Vice-President of the Company, to present him with a handsome hand-carved silver bowl and pedestal, and at the same time they gave expression to their appreciation of Mr. Matthews' valued services to the Company.

PROSPECTIVE.

It is quite impossible at the moment to forecast the future trend of business. In some quarters the greatest optimism prevails, and others hold the view that the period of dislocation of trade will be more or less prolonged. Fortunately, this Company has unfilled orders on hand to keep most Departments busy for some months to come, and by the next few months the future situation should become less obscured. The several Governments of Canada, Federal, Provincial, as well as Municipal, throughout the Dominion have forecasted the construction of public buildings and public works, railway extensions and good roads that will necessitate the expenditure of several hundred millions of dollars, but owing to the Canadian winter climate, outside operations cannot commence for some weeks. By the early summer, however, all of these enterprises should be under way and industry reaping an advantage in increased activity.

It is further expected that Canada will participate in a fair percentage of orders for manufactured products that will be required in connection with reconstruction in Europe, so that it may reasonably be hoped that this Company, as in the past, will be able to secure a satisfactory proportion of the business that may be offering.

Your Directors record with regret the death of Sir Rodolphe Forget, who had been a Director of the Company since April 15th, 1901.

FREDERIC NICHOLLS, *President.*

WILL REPRESENT IN MOOSE JAW

A well-known and firmly established investment house in one of the western provinces, would like to hear from stock and bond houses in the east who might be considering the matter of appointing western representatives. The firm in question is well and favorably known throughout the entire middle west and has already a large number of clients who depend to a great extent on its judgment in matters pertaining to investments. Eastern stock and bond houses who may be interested in this matter are advised to communicate in the first place with Mr. J. J. Salmond, president of *The Monetary Times*.

NEW TRADING HOURS ON TORONTO EXCHANGES

Commencing Monday, March 31, 1919, the Toronto Stock Exchange and the Mining Exchange will hold the morning session from 9 a.m. to 11.30 a.m., and the afternoon session from 1 p.m. to 2 p.m. The Saturday session will be from 9 to 11 a.m. This is to conform with American time.

The great trade movement of the next decade will be trans-Pacific in scope — the development of the markets of Australia, New Zealand, China, Japan, Siberia, etc.

HOW GRAND TRUNK PACIFIC WAS TAKEN OVER

In the Dominion House of Commons on March 20th, Sir Thomas White, minister of finance and acting prime minister, related the negotiations leading up to the taking over of the Grand Trunk Pacific Railway by the Dominion Government. He was addressing the House in connection with the justifying of the government's action in appointing the Hon. J. D. Reid as receiver for the Grand Trunk Pacific. The first offer, he said, was made by Chairman Smithers to Premier Borden in January, 1918, the company offering to sell the road on terms which at the end of 1930 would have resulted in an annual payment by the government of £[illegible] sterling. This offer was not accepted. The government, however, made an offer on March 7th, 1918, to take over the Grand Trunk Pacific and branch lines and the Grand Trunk Railway; to acquire all assets and to assume all obligations of both companies, for this the government was to make an annual payment of 2,500,000 dollars for the first three years, 3,000,000 dollars for the succeeding five years, and 3,600,000 dollars annually thereafter; such sums to be distributed by the Grand Trunk management as they might determine among the holders of four per cent. guaranteed and other stock. This offer was not accepted, but the railway made a counter offer, which was rejected by the government. The latter then refused to grant any more subsidies, and the receivership was the result.

DOMINION MORTGAGE ASSOCIATION

The annual convention of the Dominion Mortgage and Investment Association, the programme of which was announced in *The Monetary Times* last week, was held in Toronto on March 28th. The speakers were all present, and in addition to the addresses, subjects of interest to the companies as a whole, including taxation and moratoria legislation, were discussed. Mr. Hume Cronyn presided.

TORONTO RAILWAY DIVIDEND PASSED

On March 27th shareholders of the Toronto Street Railway Co. were notified that the directors had decided to pass the quarterly dividend payable on April 1st. The company has been paying 4 per cent. per annum. This action is explained by the unfavorable conditions under which the company has been operating due mainly to the excessive costs of labor and material. It is stated that the directors wish to maintain the company's property in efficient condition and to do this are compelled to cease dividend payment for the time being.

ONTARIO LOAN AND TRUST AMENDMENT

The bill to amend the Loan and Trust Corporations Act of Ontario, which has been before the special committee of the legislature for some months, and has been discussed with the companies in Ontario, was introduced in the legislature on March 26th, along with the report of the committee. A draft bill was printed some months ago for consideration, and it is understood that practically no revisions have been made. A summary of the more important provisions of the new bill was given in *The Monetary Times* of November 29th, 1918. The loan companies object to several of the clauses, principally clause nine, section (a), which adds to clause 27 of the Ontario Act, a provision to the effect that no corporation shall invest more than 15 per cent. of its own paid-up capital stock and reserve funds in the securities, mortgages, etc., of any one corporation, excepting in the case of securities issued or guaranteed by the Dominion of Canada or the province of Ontario. This provision remains in the bill. [illegible] opposition is anticipated in the House.

SUN LIFE ASSURANCE COMPANY

The statement for 1918 of the Sun Life, which has already been reviewed in *The Monetary Times*, appears in detail in this week's issue. The assets of this company are now near $100,000,000, having increased from $90,160,174 at the end of 1917, to $97,620,378 at the end of 1918. The company has been in business since 1870, has a thorough organization throughout Canada and does an extensive foreign business. Its officers include some of the best-known insurance experts in America, and the board of directors consists of leading Montreal men. The paid-up capital is $475,000, while the surplus over all liabilities and capital stock amounts to $8,027,378, making a net surplus of $8,502,378. Total insurance in force at the end of the year was $340,809,656.

ROYAL BANK CONTROLS MERCHANTS NATIONAL

Interests allied with the Royal Bank of Canada, by the recent purchase of fifteen thousand shares of the Merchants National Bank of New York, secured control of that institution The capital of the bank will probably be increased from $2,000,000 to $3,000,000, and a meeting will be held on March 31st to decide this question. The par value of the stock will also probably be changed from $50 to $100.

This block of shares had been purchased in 1915 by Louis G. Kaufmann, president of the Chatham and Phœnix National Bank, who was at that time endeavoring to secure control of the Merchants National.

"OLD LINE" COMPANIES ON TOP

"There never was a time when life insurance was so popular as the present," said Mr. I. B. Thayer, in addressing the Toronto Life Underwriters' Association, at their March meeting on the 27th, and demonstrated the statement by pointing to the wholesale adoption by the United States government of insurance on its soldiers and sailors. He added that assessment organizations, not long ago the chief competitors of regular insurance, were no longer active.

Mr. Thayer, who is head of the firm of I. B. Thayer and Son, agents in Canada for the Travellers' Insurance Co., of Hartford, is one of the most experienced underwriters in this country, and many years ago organized foreign business for several companies. He encouraged the members of the profession by pointing to the excellent opportunities of the present time, especially for large policies. The purchasing power of money is just half what it was some years ago, and increased protection is consequently necessary; he specially emphasized the advantages of instalment insurance, as a safeguard to dependants who are usually inexperienced in investing money.

Mr. Pratt, the president, announced the membership campaign of the local association. Three hundred members are wanted; Montreal is carrying on a campaign to secure two hundred members.

By an act of the British Columbia legislature, the Moratorium Act in that province has been extended until March 31st, 1920.

L. C. Owen, dealer in government and municipal debentures, has moved his office from the Standard Bank Building to the Bank of Toronto Building, corner of King and Bay Streets, Toronto.

One of our subscribers is anxious to get hold of a copy of *The Monetary Times* for February 14th, 1919. Any subscriber who sends in copy of that issue will have his subscription extended for one month.

The Hollinger Consolidated Gold Mines of Porcupine is now selling its gold to Ottawa, having arranged to secure from the Royal Mint there an allowance corresponding to the exchange which it would receive if shipped direct to New York.

REGINA ASKS HELP FOR CYCLONE LOSS

An important deputation of members of the Regina Cyclone Association, containing between fifteen and twenty members, waited upon Premier Martin, of Saskatchewan, last week, seeking the assistance of the provincial government in bearing the financial burden occasioned property owners who suffered loss in the disaster of 1912. The delegation submitted their proposed scheme, involving co-operation between the city, the provincial and federal governments in shouldering the burden, the proposal being that each of these governing bodies should contribute one-fourth of the entire loss, the individuals themselves carrying the remainder.

Premier Martin stated that he was unable to give any definite promise as to the action which the government would be prepared to take in connection with the request, but he assured them that it would receive every consideration at as early a date as possible.

NEWS OF MUNICIPAL FINANCE

Increased Borrowing Power in Manitoba—Vancouver Will Tax Tenants—Montreal Revenue Increased

Fredericton, N.B.—The tax rate for 1919 will probably remain at 22 mills, the rate of last year.

Saskatoon, Sask.—The municipal assessment roll of Saskatoon has just been completed, and shows a total of $30,-[illegible], from which are deducted $2,363,865 for exemptions.

Ontario.—An act passed by the legislature in amendment to the Municipal Act empowers municipalities to erect memorial homes or club houses for those who have served in the war and also to make allowances to returned soldiers or their dependants.

St. Catharines, Ont.—The city is appealing for the release of sinking funds of the municipality, amounting to $[illegible], on deposit with the provincial treasurer, to have it paid over to the municipal treasurer.

Moose Jaw, Sask.—The assessment as revised for 1919 is $21,[illegible], a decrease from last year of $3,066,773. The various items of this year's assessment are land, $14,889,058; improvements, $5,725,055; business tax, $509,697; income, $[illegible]. Last year the assessment on land was $17,963,265, and that on improvements, $5,698,330.

Pointes aux Trembles, Que.—The province of Quebec bills committee passed the Pointes aux Trembles bill with only one amendment, which is that the town must keep to the 1[illegible] per cent. borrowing limit instead of going back to the general law, which permits of loans up to 20 per cent. of valuation. Approval was given to two by-laws for loans amounting to $1[illegible],000.

Manitoba.—By a bill amending the Good Roads Act municipalities are empowered to borrow on 10 per cent., instead of [illegible] per cent. of assessment. Another amendment gives the minister of public works power to carry out the improvement or construction of a road where the municipality neglects to do the work, one-third of the cost to be charged against the municipality.

Vancouver, B.C.—The city is endeavoring to secure authority to levy a tax on tenants, in proportion to the rental value of the property which they occupy. The rates proposed are 12½ per cent. of rental value in the case of business premises, and 5 per cent. in the case of residences. It is the city's intention to levy it also on those who own premises in which they do business.

Alberta.—Amendments to the new act allowing municipalities to issue debentures up to 80 per cent. of the indebtedness incurred in fighting the influenza epidemic were brought into the Alberta House recently by Hon. A. G. Mackay, minister of municipalities. One of them defines a resident of a municipality for the purposes of the act as a person who resided in a municipality or local improvement district for at least two months prior to his contracting influenza, "and the fact that he may have been temporarily in another municipality when he contracted or was ill of the disease shall not constitute him a resident of the last municipality."

South Vancouver, B.C.—The tax on improvements recently adopted has been effective from the revenue point of view. The commissioner, Mr. F. G. Gillespie, writing to *The Monetary Times* regarding the finances of the municipality, says: "During the eight months that I have had charge of the municipality, up to the end of 1918, there were no new financial burdens placed upon the municipality, but instead the moneys that came in reduced the indebtedness slightly over $60,000.

"During the past ten months, Spitzer-Rorick and Co., who made a loan of $450,000 to this municipality in March, 1917, have been repaid $200,000 of that money, and a further sum of $[illegible],000 is now in the bank ready to be turned over to the same firm, and it is hoped that the municipality will be able to liquidate the balance of $450,000 in March, 1920, when the same matures.

"For a number of years past, buildings were not taxed in this municipality, but last year they were taxed to 1/3 of their assessed value, and this helped materially. I have every reason to believe that in the course of a few years the municipality will find itself in good shape financially. A tax sale will be held during midsummer, when some 3,000 lots will be offered for sale for arrears of taxes. It is confidently believed that this tax sale will be a success, and if so the future of the municipality is beyond question."

Montreal, Que.—Speaking before the Board of Trade on March 11th, Mr. E. R. Decary, chairman of the Montreal Administration Commission, stated that the city is not in a very good position financially, but that it is not by any means bankrupt. He said:—

"The consolidated debt is $120,000,000, against a city assessment of $825,000,000, of which $212,000,000 is nonassessable; that is to say, we have so far exceeded the powers given us by the legislature in borrowing for improvements and public works, that in future our city valuation will have to be increased to $1,000,000,000. I mean the assessment valuation which is now $613,000,000. Many people will consider it rather hard that, notwithstanding the raising of the assessment, we also come before you with the proposition that you must pay for your local improvements. I think you will realize, however, that since we have been in office we have done our best to keep down expenses in the different departments, but no matter how we economize, the high cost of living and the excessive cost of material overtake us faster than we can make retrenchments. It is true we have $18,-900,000 to spend per annum. Before we start to make our budget, on account of the heavy debt we now have, we must set aside $7,500,000 for fixed charges. If the school tax of $3,981,000 were added to the fixed charges, the balance left was about $7,500,000 to administer the entire city of Montreal. Of this amount $4,000,000 is required for salaries. We have cut these down by at least $500,000 during the past year, and of this we are rather proud. We thought it might mean that the amount could be applied to public improvements, but the police and firemen's strike came, and the increase of wages in consequence cost the city at least $500,000. The administration of the city, such as the running of the waterworks, the removal of snow and garbage and the expenses connected with the administration of the police and fire departments, all these, exclusive of improvements, cost $3,000,-000, and we are left with the large sum of $250,000 to repair the streets and sidewalks or make new streets as required. We have been asked to endeavor to reduce the taxation from $1.35, but we cannot attempt the impossible. Your fixed charges are already $1.16 of your real estate tax. It is true there is $4,500,000 collected outside of this, but the real estate tax is what we must rely on in our city. It may be that our successors will be in a position to reduce the taxation, but I believe it will take at least four years to pave the way for that."

According to returns which have been prepared for the Montreal city treasurer, the increase of revenue for last year from water rates and business and personal taxes amounts almost to three-quarters of a million dollars. This is due to the increased powers of taxation which the city secured from the legislature a year ago.

The grand total collectable for water rates in the city wards for 1918 amounted to $1,594,675, as compared with $1,054,999 for the year preceding. With regard to the personal and business taxes for 1918, the amount collectable was $1,234,047, as contrasted with $1,032,759 for the previous year. The total increase from these two sources of revenue amounts to $740,964. The same returns give details of the amounts still due at the end of 1918. For example, the collections on water rates during the year amounting to $1,398,-040, the balance due on January 1, 1919, was $196,635. The collections on the personal and business taxes in 1918 amounting to $1,166,270, the sum outstanding at the close of the year was $67,776.

PUBLICATIONS RECEIVED

Statistical Year Book of Quebec.—Issued by the Bureau of Statistics, Provincial Secretary's Department, Quebec. This is the fifth annual year book published by the province. Quebec is the only Canadian province which issues a volume of this kind, the work being similar to the Canada Year Book, issued by the Dominion government. It contains statistics of population, area, production, etc., of the province; chronological history; land settlement; vital statistics; immigration; education; resources and finance.

Swiss Commercial and Industrial Review, 1914-18.—Published by the Swiss Banking Society, Bale. This booklet, which contains 158 pages, gives valuable statistics covering the war period in Switzerland. It is divided into an agricultural and commercial, an industrial and a statistical section. The first describes developments in agriculture, trade and in the coal question; the second is devoted to manufactures; and the third contains tables of imports and exports, exchange quotations, commercial agreements, etc.

A Solution of the Valuation Problem.—Issued by the National Appraisal Co., of Boston, New York and Montreal. This volume of 126 pages describes methods of appraisal and the value of such appraisals for the purpose of obtaining loans, in the case of fires, in the purchase and sale of plants, adjustments of internal affairs, etc. The appreciation of such work is illustrated by testimonial letters received from a large number of companies. The book also includes a list of concerns for whom valuations have been made; this list includes a large number of Canadian companies.

Controlling Profits.—By Eugene Herz, Certified Public Accountant. Published by Laird and Lee, Chicago, at $1. This book takes up methods of accounting for the purpose of retail storekeepers, etc. It is written in a practical style, and will, therefore, be easily understood by those not familiar with the more theoretical side of bookkeeping. At the same time, accountants who are interested in the examining of retail businesses and in installing accounting methods for them will find much that is useful in the book, and particularly the sample forms of perpetual inventories, order blanks, etc., of which there are altogether twenty-seven included in the work.

The Banker at the Boarding House.—By Montgomery Rollins. Published at $1.50 by Lothrop, Lee and Shepard Co., Boston. Containing in the form of a novel, an exposition of the first principles of money, banking and finance, this work should find a wider appreciation than is the case with the ordinary treatise on such subjects. The author, who, it will be remembered, died in April, 1918, wrote a number of books on investment subjects, which he was well qualified to do by experience in the investment business. This is the last of his works, and has just been placed before the public. The banker undertakes to enlighten his hearers on the elements of finance, how to distinguish good investments from bad, and in doing so is required to answer just such a wide variety of questions as is met with in the course of actual business.

What is Democracy?—By L. H. Bailey. Published at $1 by the Comstock Publishing Co., 124 Roberts Place, Ithaca, New York. Much has been written on the subject of democracy but it can at least be said that this author deals with the subject in a novel and entertaining fashion. He first discusses some misconceptions regarding democracy. It is not freedom, he says, communism, nor public ownership, nor "the rule of the average man," in fact, he says, democracy is not a form of government any more than religion is a form of worship. He next discusses what democracy actually is. "It is such a constitution of the social order," he says, "as allows each member to develop his personality to the full and at the same time to participate in public affairs on his own motion." Towards the end of the book he takes up the intimate relation between society and agriculture, and maintains that this side of social development has been neglected excepting in China where it constitutes a permanent basis for a society which has outlived Greece, Rome and other empires.

The Taylor System in Franklin Management.—By Lieut.-Col. George D. Babcock, formerly production manager, H. H. Franklin Mfg. Co. Published at $3 by Engineering Magazine Co., New York. Not long ago industrial concerns were combatting the difficulty of meeting rapidly increasing expenses with a minimum increase in their selling prices. While manufacturing and operating costs have now practically ceased rising, the same difficulty is being experienced owing to the fact that selling prices cannot be kept up in the face of narrowing markets. The reduction in costs therefore by increased efficiency still remains of the greatest importance to manufacturing and other industrial concerns. This book describes a system under which a successful business was greatly increased in volume in five years by the application of certain principles of management which have become known as the "Taylor System." This was in the Franklin plant and the reforms commenced with the year 1908. The first chapter describes conditions as they existed in that year; this is followed by a description of the methods by which the Taylor system was applied to the concern in question. Many illustrations and diagrams are included, showing the work of the different departments.

Bank Deposit Building.—By W. R. Morehouse, assistant cashier, Guarantee Trust and Savings Bank, Los Angeles. Published by the Bankers' Publishing Co., New York. In these days when competition among Canadian banks is so keen and so many branches are being opened, the subject of building up the deposit side of the business is one which requires the careful consideration of all branch managers and employees. It is comparatively easy for a manager entering into a new territory to secure reliable loans, but it is the deposit totals that will be most rigidly watched by the head office to discover the progress which is being made in the new ground. The principles of deposit building are similar wherever banking business is done. A great deal that applies in United States, therefore, also applies to the ordinary Canadian branch bank. This book, written by a thoroughly experienced banker who is already the author of several books on banking gives many excellent suggestions for the development of a bank's business. Some of the methods discussed are, of course, more aggressive than are commonly favored by our conservative Canadian banking institutions, but there are other features such as the personal relationship of the banker in his community which apply here with equal readiness. As the author points out, much depends upon the impression given by the external features of the bank's premises and of the conduct of the employees.

Review of Economic Statistics.—Published by Harvard University Committee on Economic Research, Cambridge, Mass. This is a new statistical service just inaugurated by Harvard Univeristy. It aims, not so much at collecting statistics as at interpreting statistics already gathered by existing organizations. In the spring of 1917 Harvard University appointed a committee on economic research with a view to making more adequate provision for scientific investigation in economics. Prof. W. M. Persons was engaged to undertake a thorough study of existing methods and his investigations have now reached such a stage as is considered to justify the establishment of this Review. A Review will be issued quarterly, the first volume being for January, 1919. Commencing after April or May it will be supplemented by a monthly publication dealing with current data. The principle of the Review is to make economic statistics more accurate and valuable. Additional data will be collected where this may prove desirable or practicable. The cost of the service is $100 per annum.

The first issue is divided into two parts, the first being a study of statistical method. Prof. Persons, with his assistants, gives a thorough discussion of available statistics and points out many of their deficiencies. He also refers to the inadequacy of the interpretation which is customarily given to these statistics. The principal movements in statistics of this kind he finds to be: First, the secular trend; second, seasonal fluctuations; third, cyclical and irregular fluctuations. The second part of the January issue consists of an application of the method to individual series. The issue con-

Foreign Financial Control in China.—By T. W. Overlach. Published by the Macmillan Co., Toronto, at $2. Describing the relations of China with other nations, the author of this book says: "The foreigners were eager to build railroads, not because the Chinese needed the railroads, but because the foreigners needed the profit of the railroads. This then is a point of [illegible] significance, namely, that the bottom idea of the treaty stipulations and agreements as to intercourse, commerce, extra territoriality, spheres of interest, railway concessions and control was not the welfare of the people of China but the profit and ease of doing business by the people of the west." He describes thoroughly the various agreements, etc., formed by the principal nations of the world with China and the international agreements made among nations for the "control of China." In a preliminary chapter an account is given of foreign relations with China before 1895, commencing with the work of the East India Co. Then chapters are devoted to the special relations of Great Britain, Russia, France, Germany, Japan and the United States, with an additional chapter on international control. The author's conclusion is that since industrial and financial affairs in China have been brought to their present stage through external influence, China cannot now be left to pursue her own course. A mild and friendly form of international financial control is, therefore, necessary, at least in such matters as affect the foreigner. This, he says, is preferable to a dominant interest on the part of any one nation.

The Canadian Budgetary System.—By H. G. Villard and W. W. Willoughby, prepared under the direction of F. A. Cleveland, Ph.D., editorial preface by W. F. Willoughby. D. Appleton and Company, New York. (Institute for Government Research Studies in Administration); 370 pages; $2.50. The general increase in government business during the past few years has imposed somewhat of a strain upon the old methods of financial administration with the result that considerable attention has been directed in all highly civilized countries to finding the best method of handling a nation's business. The first of this series of books was devoted to an examination of the British system which is the foremost example of this kind. This system has been copied in a modified manner in Canada and it is thoroughly described in the abovementioned work. The authors find that the parliamentary control of estimates has been weakened and that more and more has been left in the hands of the administrative departments. Special chapters describe the Canadian constitutional system which forms the basis of the financial administration; a history of the control of expenditure before Confederation, and in the appendix are given the Department of Finance and Treasury Board Act. The Consolidated Revenue and Audit Act, the Appropriation Act, 1917, and the budget speech of the Minister of Finance in April, 1917. The book traces the preparation of the estimates by the executive departments; how they are dealt with by Parliament and in the Committee of Ways and Means and the Committee of Supply; how expenditures are audited by the different departments and then by the Auditor-General. A financial chapter discusses the political evils attending the budgetary method and gives a comparison between the British and Canadian system. The book is filled with voluminous quotations and also contains pages illustrating the public accounts and the estimates.

Mexico, To-day and To-morrow.—By E. D. Trowbridge. The Macmillan Co. of Canada, $2. This book gives a history of Mexico and a discussion of its present-day problems. A few chapters are devoted to the early history of the country, the Spanish conquest, etc., but, as the author states in the preface, no attempt is made at doing original work in this early history. Coming to the period of Porfirio Diaz, however, events are taken up in greater detail. The book is not merely an account of the political changes in Mexico, but also describes intimately the economic problems of the people. It includes the new constitution as set up under the Carranza administration, including the changes in the monetary system and in the law regarding the holding and transfer of land; the regulation of working hours and wages; the Mexican railway. The last few chapters are devoted to financial topics, including the financial requirements of the Mexican government, the relation of the country to the foreign investor and the agrarian problem. Regarding Mexico as an investment field, it says, quoting from a prominent Mexican leader: "Mexico needs foreigners in large numbers, not as promoters, but as people who will take up farms, ranches, plantations and industrial pursuits and help develop the agricultural and other resources of the country; that she must and will encourage immigration of the sort which will help to accomplish this; that she needs and will welcome foreign capital for large public works, for extensions of the railway system, for banking and for industrial purposes; that foreigners and foreign capital will be given cordial treatment, but that both must come with a national spirit and not for purposes of squeezing all they can out of the country and leaving as little as possible behind—or, in other words, that Mexico wants people who will work for the country as well as themselves, and capital which will reinvest some of its profits in further local development; that the talk of Mexico for Mexicans only is absurd, but that the government must first look to the welfare of its own people; and, finally, that the supposed hostility to foreigners or foreign money is idle talk, and based solely on the fact that foreigners and foreign capital in Mexico have, in the past, been selfish, with the result of creating a certain amount of anti-foreign feeling."

Results of Municipal Electric Lighting in Massachusetts.—By Edmond E. Lincoln, M.A., Ph.D. Houghton Mifflin Co., Boston, Mass.; 484 pages; $3. The state of Massachusetts has for some time kept definite records of both municipal and corporation electric lighting. The author of this book, however, has not merely made use of these state records, but has also actually inspected the plants themselves and examined the financial results of their operations. The book is one of the Hart Schaffner and Marx prize essays in economics. The author interprets the public and written data regarding both the municipal and private electric lighting enterprises in the state. Typical plants are used for more detailed examination.

One chapter is given to physical statistics, analyses and comparisons; three to financial statistics of generating plants; one to financial statistics of purchasing plants; and one to miscellaneous considerations—all this in the first division of the volume. In the second division are two chapters on the "local background" of generating plants, and one on the "local background" of purchasing plants. The author found that the municipal lighting companies are operating under much more favorable conditions than the private companies, the territory being more densely populated and with more manufacturing. He states that in physical development they have lagged behind the private plants, and "have probably tended to be too conservative in their extension policy." Financially, their showing is good, for here their conservatism counts for safety. Upon the whole, there has been little "grafting" in these public plants though the author declares that the larger the city, the greater the danger of corruption; in one important case "the conditions have been disgusting beyond belief." His general conclusion is that the public plants now in operation are not a conspicuous success, and that the cities might be as well served by private plants, or better. While public regulation continues as effective as it is to-day, there is no reason whatever why a municipality should invest in an electric plant. If it is determined to make such an investment, it had much better procure only a distributive plant, and leave the generation to others. Massachusetts would seem to have reached this conclusion already, for no municipal generating plant has been installed since 1904.

The stock brokerage firm of Geo. W. Fairbanks and Co., Montreal, will hereafter do business under the style of Fairbanks and Gosselin. The same partners, Geo. W. Fairbanks and Jules Gosselin, constitute the firm.

Ask the Subscription Department about our Special Book Offer

The Ontario Fire Prevention League has been incorporated with head office in Toronto. This is the organization which was formed last August at the instance of the provincial government. The directors are A. Hewitt, H. J. Waddie, C. E. Hamilton, G. F. Lewis, F. Cockshutt, J. S. France, F. G. Heustis, J. B. Laidlaw, R. Pritchard and J. Ross.

For the first two months of 1919 the policies issued by the Monarch Life Assurance Co. amounted to $1,152,018, representing premiums of $40,530. This is an increase over the corresponding two months of 1918 by 54 per cent. in volume and 58 per cent. in premium. By March 4th the company had already completed applications for $97,000, indicating a record month.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt for the week ended March 21st, 1919:—

Beaver Mine, 86,189; Dominion Reduction, 62,300; Kerr Lake, 60,000; McKinley-Darragh, 87,038. Total, 295,527.

The total since January 1st is 4,678,424 pounds, or 2,339.2 tons.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the three weeks in March, 1919:—

Canadian Pacific Railway.

	1918.	1919.	Inc. or dec.
March 7	$2,617,000	$2,469,000	— $148,000

McGuire Kirkland Gold Mines, Ltd., $350,000; K. A. McRae, V. M. Gray, E. Martin. Commercial Finance Corporation, Ltd., $2,000,000; A. W. Briggs, E. M. Dillon, M. Macleod.

COST OF LIVING LOWER

A slight decrease in the cost of living in Canada is shown in the report of the Labor Department for February. The departmental index number of wholesale prices fell to 279.8 for February, as compared with 286.5 for January. The decreases included hog products, eggs, potatoes and bread. In retail food prices, there were slight decreases in many of the twenty-nine commodities included in the calculations, including meats, eggs, butter, bread, flour, sugar and potatoes. The food budget averaged $13.41 for February as compared with $13.78 for January and $12.54 for February, 1918.

An order winding up the Globe Graphite Mining and Refining Co., of Port Elmsley, Ont., was made at Osgoode Hall, Toronto, recently by Mr. Justice Rose on the petition of George G. Fryer, of Syracuse, a creditor to the extent of $1,000 and a shareholder to the extent of $50,000. The Trusts and Guarantee Co. were named interim liquidators.

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Vermilion, Alta.	$ 5,000.00	6	20 inst.	Mar. 31
Walkerville, Ont.	20,000.00	6½	15 inst.	Mar. 31
Walkerville, Ont.	15,000.00	6	10 inst.	Mar. 31
McGillivray	12,135.00	6	10 inst.	Apr. 7
Kingsley, Sask.	3,500.00	8	10 yrs.	Apr. 5
Saskatchewan	3,000,000.00	5	20 yrs.	Apr. 9

Kingsley, Sask.—Tenders addressed to J. Kerlin at Kipling, Saskatchewan, will be received up to the 5th day of April, 1919, for the purchase of $3,500 10-year 8 per cent. debentures of the rural municipality of Kingsley, No. 124.

Advertise your Bond Issues in The Monetary Times

Provincial and Municipal officials will find The Monetary Times of Canada a most satisfactory medium for this purpose.

Reaches more institutional and individual buyers of Government and Municipal Securities in Canada and the United States than any other financial paper.

The Monetary Times is recognized as the authority on Government and Municipal Bond affairs by Banks, Bankers, Bond Dealers, Investment Managers, Insurance Companies, Trust and Loan Companies, as well as the private investor.

MONETARY TIMES OF CANADA
(Bond Advertising Department)
62 CHURCH STREET TORONTO
1206 McARTHUR BLDG. WINNIPEG

Swift Current, Sask.—The Public School Board has raised $50,000 for school financing for 1919 by the sale of bonds to the citizens. The money had previously been obtained from the bank at 8 per cent. and the bonds were issued at this rate.

Stratford, Ont.—Messrs. A. E. Ames and Co. have bought an issue of the city's bonds amounting to $20,500, at par, which have been sold to meet expenditures on account of patriotic, hospital and other purposes. The bonds are for ten years, bear 5½ per cent. and are being offered at 100.76 and interest, and thus yield 5.40.

Trail, B.C.—The following certificate has been issued by the municipal department of the province of British Columbia under date of March 15, 1919:—

"The Corporation of the City of Trail Local Improvement Sewer Debenture Consolidating By-law," No. 209, $56,500.00, payable within twenty years with interest at 7 per cent., payable half-yearly.

Guelph, Ont.—The by-law, which was voted on March 24 to grant a loan of $50,000, free taxes for ten years, with the exception of school, local improvements and garbage taxes, to the Premier Rubber Footwear Co., was carried by a large majority, which was considerably more than the two-thirds required. The new factory will be erected during the coming summer and will be a four-story one costing $150,000.

Saskatchewan.—The government of Saskatchewan is asking for bids on $3,000,000 of 5 per cent. debentures, 20-year maturity. It asks for two bids, one stipulating payment in Regina and Toronto, and the other payable in New York, as well as in Toronto and Regina. Tenders close on April 9. While it will cost a little more to have payment in New York, it will, on the other hand, enable the Saskatchewan government to get a little better price.

London, Ont.—An application will be made by the corporation of the city of London to the legislature of the province of Ontario at the ensuing session for an act to authorize the passing of a by-law without obtaining the assent of the electors thereto, for the issue of $200,000 debentures to pay for the erection of a building on the site of the building on the north side of Dundas Street, now occupied as a city hall, to be used as a city hall, in the city.

Toronto, Ont.—At a meeting of the Ontario Municipal Electrical Association last week a resolution, declaring in favor of the sale of small denomination Hydro-Electric bonds "over the counter," by the various municipalities, was moved by E. I. Sifton, of Hamilton, and seconded by Mayor Buchanan, of Ingersoll. It commended itself to the meeting and various members voiced their convictions that the public would advance on such bonds all the money needed.

Carleton County, Ont.—An application will be made by the municipal corporation of the county of Carleton to the legislative assembly of the province of Ontario at the ensuing session, for an act authorizing and empowering the applicant to issue debentures for the purpose of borrowing, without the assent of the electors, a sum or sums not exceeding $100,000, to provide for payment of the share of the cost of constructing a new bridge across the Rideau River at the westerly terminus of Main Street in the town of Eastview.

Alberta.—Separate sealed tenders will be received by the debenture branch of the department of education until April 7th, 1919, on seven blocks of school district debentures, amounting to $33,650, as follows: Block No. 1, Rurals, 10-years, 7 per cent.—Viewfield S.D., $2,500; Basin Lake S.D., $2,500; Hooper S.D., $2,250; Forks S.D., $1,800; total, $9,050. Block No. 2, Rurals, 15-years, 7 per cent.—Wheat Ridge S.D., $2,000; Hudson Heights S.D., $2,000; Devonshire S.D., $2,500; North Beaver Lodge S.D., $1,300; Slough Valley S.D., $2,000; total, $9,800. Block No. 3, Rural, 10-years, 7 per cent.—Allenby S.D., $1,000. Block No. 4, Rurals, 10-years, 7 per cent.—Roydale S.D., $2,200; West View S.D., $2,000; Molde S.D., $1,000; Endiang S.D., $2,500; Gordon S.D., $500; total, $8,200. Block No. 5, Rural, 5-years, 7 per cent.—Alma Mater S.D., $600. Block No. 6, Village District, 15-years, 7 per cent.—Erskine S.D., $2,000. Block No. 7, Rural, 10-years, 7 per cent.—East Cardston S.D., $3,000.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from March 8th, to March 15th, 1919:—

School Districts.—Rosthern, $35,000 25-years not ex. 8 per cent. annuity. *Buffalo Hill, $2,200 10-years not ex. 8 per cent. instalment. Dickson, $1,000 10-years not ex. 8 per cent. instalment.

---

*Being included in next sale held by the Local Government Board.

The following is a list of debentures reported sold from March 8th to March 15th, 1919:—

Rural Telephone Companies.—Flett Springs, $4,500, Oak Hill, $1,600; W. L. McKinnon and Co., Regina. Fairdale,

520 McIntyre Block, Winnipeg

$700; Wood, Gundy and Co., Saskatoon. Tipperary, $500; Nay and James, Regina.

School Districts.—Foxdale, $200; Allan, Gordon and Gordon, Regina. Spondon, $2,900; Waterman, Waterbury Manufacturing Co., Regina. Monmouth, $700; Nay and James, Regina. Paragon, $500; Wood, Gundy and Co., Saskatoon.

Town.—Kerrobert, $5,128.21; Nay and James, Regina.

Village.—Fielding, $750; W. L. McKinnon and Co., Regina.

Kenora, Ont.—Messrs. C. H. Burgess & Co. have purchased $10,474 6 per cent. 30-instalment bonds of the town of Kenora.

Smith's Falls, Ont.—Messrs. A. Jarvis & Co., of Toronto, have purchased an issue of $10,203 6 per cent. bonds, payable in 20 instalments. The bonds were issued for local improvement purposes. Jarvis & Co.'s tender was for 103.03, which is about on a 5.64 basis. Among the highest tenderers were:—

Canada Bond Corporation	102.47
Brent, Noxon & Company	102.40
A. E. Ames & Company	101.90

Quebec, Que.—The $400,000 bond issue of the Roman Catholic School Commission has been awarded to Messrs. Wood, Gundy & Co., of Toronto. The bonds were purchased at 101.21 for a term of 35 years at 5½ per cent. interest. There were fourteen tenders received by the commission. The rate to be paid for the money will be 5.42 per cent. Wood, Gundy & Co.'s bids for the bonds at various rates of interest and terms of maturity were:—

35 years, 5½ per cent.	101.21
10 years, 5½ per cent.	99.61
5 years, 5½ per cent.	99.28
35 years, 5 per cent.	93.33

Other bidders were; A. E. Ames & Co., who were second on the list with 99.83, and the Dominion Securities Corporation, with 99.08.

PINE PROPERTY
(British Columbia)
FOR SALE

Operating plant with well established connections and extensive timber holdings offered as a going concern.

Mill is fully equipped, annual capacity of 30 million feet, now in operation.

Property includes 32,000 acres of Western soft pine, 500 million feet located tributary and available.

Concern has excellent trade connections, and is now shipping its product extensively into Eastern Canada and New England States.

This is not a speculative offer. It is a bona fide proposition covering a thoroughly established and fully developed business.

For business reasons the property is offered at exceptionally advantageous terms which call for a moderate cash investment.

Principals only desiring full particulars, address Box 165, The Monetary Times, Toronto

Port Arthur, Ont.—Messrs. Wood, Gundy & Co. have purchased an issue of $11,700 6 per cent. 10-year bonds at 101.675. The proceeds will be used for fire apparatus purposes. The following is a list of tenders:—

Wood, Gundy & Co.	101.675
Brent, Noxon & Co.	101.53
G. A. Stimson & Co.	101.15
Canada Bond Corporation	101.08
McDonagh, Somers & Co.	101.00
A. Jarvis & Co.	100.89
Morrow & Jellett	100.53
C. H. Burgess & Co.	100.42
Dominion Securities Corporation	100.267
A. E. Ames & Co.	100.00
R. C. Matthews & Co.	99.75
Bond and Debenture Corporation	97.66

FUEL CONTROL NO LONGER NECESSARY

The office of the fuel controller for Canada will cease to exist about the end of this month. The last official statement was issued a few days ago by Mr. C. A. Magrath, announcing that supplies are now ample for requirements. The coal regulations will probably be allowed to remain in force until the actual declaration of peace, although importers and dealers will not be required to take out new licenses for the coming coal year. In the United States the fuel administration, as constituted under the Lever Act, officially continues until peace is declared, although the organization at Washington has been reduced to the vanishing point.

NEW POWERS FOR ONTARIO MARSHAL

Additional powers are given to the fire marshal of Ontario by a bill which is now before the Ontario legislature. This bill also provides for the appointment of the deputy fire marshal.

The fire marshal is given power to assist municipal officers in improving and enforcing by-laws for the prevention of fire or protection of life and property therefrom; to distribute information in the interests of fire prevention; to assist in the formation of local associations with this purpose; to order the removal of combustible material, etc.; to examine property upon complaint; to keep records of fires; to investigate the cause, origin and circumstance of any fire. He is also given authority, wherever he considers it advisable, to order the withholding of insurance money pending an investigation. The right of appeal is also provided from a local authority to the fire marshal and again from the fire marshal to a county judge.

UNIFORM CONDITIONS IN FIRE INSURANCE

The British Columbia government is enacting legislation providing for uniform conditions in policies of fire insurance. This act is known as the "Fire Insurance Policy Act." It provides that a company may not be allowed to discharge its liability under a policy by objecting that the conditions of a contract have not been strictly complied with. Conditions are set forth in the act which shall as against the insurers be considered part of every contract of fire insurance in British Columbia and shall be printed on every policy of fire insurance with the heading "Statutory Conditions." If any insurance company desires to vary these conditions the alteration must be written immediately afterwards in conspicuous type and in red ink. Where a coinsurance clause is included such fact must be indicated by stamping or printing in red ink across the face of the policy. The statutory conditions provided by the act are the same as those now in force in Ontario, Manitoba, Saskatchewan and Alberta.

The Terminal Agency, Limited, head office Metropolitan Building, Vancouver, has recently been incorporated for the purpose of taking over the insurance business in British Columbia of Little and Loomis. Mr. A. Z. DeLong, formerly manager of Little and Loomis, is president and managing director of the Terminal Company.

The province of Quebec private bills committee passed the Pointes aux Trembles bill with only one amendment, which is that the town must keep to the 15 per cent. borrowing limit instead of going back to the general law, which permits of loans up to 20 per cent. of valuation. Approval was given to two by-laws for loans amounting to $165,000.

DIVIDENDS AND NOTICES

All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance 50 per cent extra if charged.

I WILL PURCHASE, at fair price, small but established chartered accountancy business in Ontario, or will consider partnership proposition. Address in first instance, Chartered Accountant, c/o Box 173, *The Monetary Times*, Toronto.

WANTED

A Capable Canadian Representative

One of our clients, an old-established, high-grade American investment security house, requires a man to call on banks and investment houses in Canada. Experience in handling securities is not so important, but it is imperative that he have a good acquaintance among Canadian Financial Institutions. A permanent, pleasant connection with a substantial house is assured the right man. Apply by letter only.

BRITISH COLUMBIA WORKMEN'S COMPENSATION

Amendments to the provincial Workmen's Compensation Act are being enacted by the legislature of British Columbia. One change is that where dependants are aliens residing outside of Canada and are entitled to compensation, the board in place of awarding compensation on the scale provided, may award such lesser sum as they consider proportional to the cost of living in the country where they reside.

BANK OF NEW SOUTH WALES

The statement of the Bank of New South Wales for the half year ended September 30th, 1918, shows a net profit of £273,560, which, added to the undivided balance from the previous half-year, makes a total of £401,289. The sum of £195,242 was required for dividends at the rate of 10 per cent. per annum, £75,000 was transferred to the reserve fund and the balance of £131,046 carried forward. The bank's branches and agencies number 336, one branch having been opened during the year. Total assets are £62,115,135, of which over £41,000,000 represents deposits.

F. N. BURT COMPANY DIVIDEND INCREASED

At the annual meeting of the F. N. Burt Co., Ltd., which was held in Toronto on Monday, March 24th, it was decided to increase the dividend rate on the common stock from 4 per cent. per annum to 6 per cent. per annum. Shareholders of record of March 25th will share in the quarterly dividend payment on April 1st, which will be 2 per cent. The company pays 7 per cent. on its cumulative preferred stock. The rate on the common stock was 4 per cent. per annum prior to January, 1911, when it was increased to 6 per cent.; in September, 1914, it was reduced again to 4 per cent. and in December, 1916, it was increased to 6 per cent.

The annual report, which was reviewed in *The Monetary Times* last week, is given in full in this issue. The company had a decidedly successful year. Its profits were increased, its assets are in good condition and its reserves ample.

BANKRUPTCY ACT CRITICIZED

The annual convention of the Retail Merchants' Association of Canada, which took place at Ottawa recently, criticized the bankruptcy legislation proposed by the Dominion government. It was maintained that such legislation had not been asked for by retail merchants, but that the Credit Men's Association had been instrumental in bringing it about. Mr. Horace Chevrier, chairman of the executive, said: "The Retail Merchants' Association do not consider it possible to legislate a bankruptcy act that will not cost more than it will save to the commercial and financial interests of Canada in the way of expense." That the way the original act was drafted made it more like an addition to the criminal code than an act to facilitate trade and credit, was one of the assertions made by the chairman. "Even to-day, after many amendments, it bids fair to become a fruitful source of litigation and a waste of estates."

DEBENTURES FOR SALE

TENDERS FOR DEBENTURES

WALKERVILLE, ONT.

Sealed tenders addressed to the undersigned and marked on the outside "Tenders for debentures" will be received up till noon, Monday, March 31st, 1919, for the following debentures:—

$30,000 for lending assistance to the construction of pavement on the Walker Road in the township of Sandwich East. Debentures are payable in fifteen instalments, to carry interest at the rate of 6½%, payable yearly.

$15,000 Canadian Patriotic Fund debentures, payable in ten instalments, to carry interest at 6%. Debentures are coupon bearing and may be registered. Any or all tenders not necessarily accepted.

For further information, apply

A. E. COCK,
Town Clerk and Treasurer,
Box 329,
Walkerville, Ont.

March 14th, 1919.

TOWN OF VERMILION

Tenders will be received by the Town of Vermilion, Alberta, for $5,000.00 six per cent. twenty-year Local Improvement Debentures. These debentures are guaranteed by the town at large. Tenders will close at noon, March 31st, 1919.

H. P. LONG, Secretary-Treasurer.

Vermilion, Alberta.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Ontario Silver Mining Co.—The company, operating mines in the State of Utah, has announced that the usual quarterly dividend of 50 cents a share, due at this time, will not be voted, because of smaller earnings and development work which is under way. For the year ended December 31 last total receipts were $605,859. Disbursements were $276,735, leaving a balance for dividends of $329,124. There was disbursed in dividends $150,000, leaving a balance of $179,124. An assessment of $750 was paid on the New Quincy Mining Co., leaving a surplus for the year of $178,374. The total surplus as of January 1 last was $554,674.

Canada Northwest Land Co.—At the annual meeting held at the company's office in Toronto on March 26th the statement for the year, which was sent to the shareholders some weeks ago, was submitted. Over $14,000 shares were represented at the meeting; the board of directors was re-elected. During the year 1918, 54,635 acres of land were sold for $835,637, in comparison with sales in 1917 of 32,312 acres for $494,037. The amount of the original purchase by the English company was 2,200,000 acres, of which 1,928,318 acres were taken over by the Canadian company on December 31st, 1893. At the end of 1918 the unsold lands amounted to 248,628 acres. The balance of principal outstanding on contracts amount to slightly over $2,000,000, carrying interest at 6 per cent.

Northern Ontario Light and Power Co.—The annual report of the company for the year ended December 31, 1918, shows that its earnings were only slightly lower than those of the previous year. Gross earnings from all sources reached the sum of $908,050, a decrease of $9,309 from 1917, operating expenses including maintenance, taxes, etc., reached $260,428, a decrease of $1,164. The company's net profits amounted to $647,621, a decrease of $8,144. Bond interest shows an increase of $875. The net surplus of $371,261 shows a decrease of $9,020. Exchange and commission rates brought the company $5,679 in 1918, the preferred stock dividend for the past year totalled $142,968, transferred to reserves $200,000, and written off stores $1,907, the latter figures showing an increase of $1,755.

Wm. A. Rogers, Ltd.—The results of the year 1918 were not satisfactory to the shareholders of Wm. A. Rogers, Ltd., the annual meeting of which was held a few days ago. A loss of $5,208 was experienced for the year in comparison with a profit of over $80,000 last year. The comparative results are briefly as follows:—

	1917.	1918.
Brought forward	$226,148	$203,801
Net profits	81,855	— 5,208
Total	$308,003	$198,593
Interest on bonds and bank loans	$ 19,421	$ 74,226
Transferred to realty and plant reserve	......	80,000
Dividends	85,000	......
Balance carried forward	203,081	43,647

Referring to this unfavorable result the president, Mr. S. J. Moore, stated that production was greatly curtailed owing to war conditions. Raw materials, power and other supplies were difficult to secure, and there was also a shortage of skilled labor. After the signing of the armistice, however, metal prices quickly declined. This decline at the same time made necessary some reduction in inventory values. Since November conditions in the industry have rapidly improved. Labor and materials will evidently be abundant and the company reports that orders are plentiful.

Nova Scotia Tramways and Power Co.—The company carried 10,792,966 passengers in Halifax last year, according to the annual report sent out to shareholders. The report shows that, despite labor difficulties, influenza epidemic, which reduced traffic, and daylight saving, which cut demand for lighting currents, the gross earnings show a slight increase over the previous year. Permission being granted by the Board of Public Utilities to increase the price of gas, the directors believe this department will be able to operate with a margin of profit, which was not the condition prior to the granting of the increase. Mention is made of the Board of Public Utilities having ordered additions to rolling stock, and extensions and improvements in the present track layout. The report says the prospects for increased business in the various departments of the company's activities are bright. Passenger receipts were $445,955, and light and power $319,880. Net earnings were $135,974, and there was paid in dividends $124,644.

Union Bag and Paper Co.—Net earnings of the company for the year ended December 31st last amounted to $2,619,173 against $3,131,106 the previous year, and $2,832,277 in 1916. For the first time, the income account includes dividends earned on the company's holdings in the St. Maurice Paper Co., amounting to $46,875, bringing total income, after depreciation amounting to $460,710, to $2,205,337. Deductions included $187,150 for interest, and $601,466 for federal taxes, leaving $1,416,719 available for dividends, equal to 14.3 per cent. on the capital stock compared with 21.4 per cent. the previous year, and 16.8 in 1916. Surplus after dividends was $827,645, which, added to the carry-over of $2,347,715 from the previous year, brings present surplus up to $3,174,715. The current assets of the company totalled $5,790,839, made up of inventories amounting to $4,293,711, against $1,671,991 the previous year; accounts receivable of $999,806, against $1,358,561; and cash of $497,321, against $484,592. The company's quick assets over current liabilities amounted to $38,999, and, including inventories, to $4,432,710.

Abitibi Power and Paper Co., Ltd.—A gain in net earnings of nearly 25 per cent. is shown in the report of the company for the 12 months ended December 31 last, the total being $1,643,653, an increase of $320,652. The surplus available for dividend disbursements was $511,202, nearly $170,000 in excess of the 1917 figure. Allowing for the payment of a full year's preferred dividend, the balance of $441,200 represents earnings at the rate of 8.82 per cent. on the outstanding common shares of the enterprise, against 5.4 per cent. in 1917. With the surplus carried over from the previous year, the amount standing to the credit of the balance sheet as at December 31st last, amounted to $1,073,249. The allowances for depreciation are nearly $100,000 in excess of those for the previous year and include $353,650 for plant, $259,768 for timber and $50,000 for townsite investment, indicating generous action towards this portion of the statement.

The balance sheet for the year discloses a comfortable financial position, F. H. Anson, the president, pointing out to the shareholders in his annual report: "Since the date of the balance sheet submitted herewith $498,000 of the company's bank indebtedness has been liquidated through the sale of additional first mortgage bonds, so that at this date the company's net working capital is in excess of $1,200,000. Payment of $1,500,000 of convertible 6 per cent. notes, due August 1st, 1919, has been provided for by the sale of an equal amount of first mortgage bonds. As a result of these transactions the company goes into the year 1919 in excellent financial position, and hopes that within a reasonable time it will be able to pay off the dividends in arrears on its preferred stock, amounting to 19¼ per cent."

YOU MAY BE A RICH MAN, SOME DAY—

Opportunities for making money are many but it takes *time* for capital to accumulate even under the most favorable conditions. Every man of ability expects in the course of years to have sufficient to ensure to his family during their life time the comfort to which they have been accustomed. Unless an unexpected reverse of fortune occurs there is little doubt but that you will make money. But "many things may happen" while the money is being made. This is where Life Insurance comes in and makes available the means that would have been yours if health and life had been spared. You will be rich "some day," if you live, but *the Insurance policy will anticipate for your family the accumulations of future years* and render sufficient means available even should you not survive to realize your ambition.

Is your prospective income insured?

RECENT FIRES

Boiestown, N.B.—March 13—Sawmill of M. B. J. Thibodenu at Avery's Portage, and residence of J. Woodcock, were damaged. Estimated loss, $15,000. No insurance.

Brockville, Ont.—March 21—The Kemptville cheese factory owned by John Sparks, was destroyed. Cause reported as incendiarism. Estimated loss, $2,000, partially covered by insurance.

East Nissouri, Ont.—March 22—Home of H. Mahon was destroyed. Caused by defective chimney.

Fort William, Ont.—March 25—The Black and Muirhead cleaning elevator was destroyed. The elevator contained 13,000 bushels of grain valued at about $25,000. The building, which was of wooden construction, and of 150,000 bushel capacity, was valued, with machinery, at nearly $200,000. The loss is stated to be practically covered by insurance.

Hamilton, Ont.—March 21—Home of S. Buzza, 43 Imperial Street, was damaged. Estimated loss, $575.

Houston, B.C.—March 19—The Grand Trunk Pacific station was destroyed. Cause reported as incendiarism.

Montreal, Que.—Sohmer Park was destroyed. Estimated loss, $400,000. Insurance carried to the amount of $250,000.

Midland, Ont.—March 22—Double dwelling on the plant of the Midland Iron and Steel Co. was damaged. H. Sargent's furniture store was damaged. Building of A. Barrie and H. J. Kettle was damaged. Estimated loss, $2,000.

Montreal, Que.—March 26—The Prince Arthur Hall was destroyed. Estimated loss, $150,000.

North Toronto, Ont.—March 24—Garage and stable of H. A. Fleming, 54 Snowdon Ave. E., was damaged. Estimated loss, $1,000.

Oshawa, Ont.—March 21—The Dillon Manufacturing Co.'s plant on College Hill was damaged. Estimated loss, $15,000.

Ottawa, Ont.—March 23—The Water Street hospital was slightly damaged.

Rossmore, Ont.—March 26—The post office and two adjoining residences were destroyed.

Seven Persons, Alta.—March 18—Home of Mr. A. Maurer was destroyed.

Sherbrooke, Que.—March 15—Boston and Maine baggage room at the Grand Trunk Depot was damaged. Estimated loss, $1,000.

Strathroy, Ont.—March 24—Residence of Mrs. Almas, Front St., was damaged. Caused by defective chimney. Estimated loss, $250; covered by insurance.

Sudbury, Ont.—March 24—The DesRosier Block was destroyed. Estimated loss, $75,000. The heaviest loss is that of E. N. DesRosier, owner of the property and occupying all the main floor with a $50,000 drygoods stock, none of which was spared. Other stores affected are: Mrs. Bonhomme, millinery; Singer Sewing Machine, district branch store; Bourdon and Co., jewelry; Bedard and Co., stationers; Metropolitan Life Insurance Co.; and Alverz and Co., accountants and auditors.

Swift Current, Sask.—March 20—The Lloyd Pollock's livery stable at Abbey was destroyed. Insurance was carried to the amount of $5,000.

Toronto, Ont.—March 24—The Victor Maternity Home, 431 Jarvis Street, was damaged. Estimated loss, $425.

Toronto, Ont.—March 26—Home of F. J. Robbins, 37 Arundel Ave., was damaged. Caused by overheated stove. Estimated loss, $400.

Trail, B.C.—March 11—Residence of B. O. Bean, Eldorado Street, was damaged. Estimated loss, $600. Insurance carried, $2,000.

Windsor, N.S.—March 25—The town suffered a conflagration, the worst since the fire of fifteen or more years ago, when the town was devastated and almost completely wiped out. The damage is estimated at $90,000, and the insurance at $[illegible]0,000. The fire broke out in the basement of the Murphy & Demont Building, a brick structure, and spread through the party wall to the adjoining building, owned by [illegible] Smith, and to the A. P. Shand building. Full particulars are not yet available.

ADDITIONAL INFORMATION CONCERNING FIRES

Chatham, N.B.—March 13—The St. Thomas' College was damaged. Insurance as follows: Liverpool and London and Globe, $9,000; Queen, $6,000; Royal, $4,000; Scottish Union, $2,000; other companies unknown, $8,000; total, $29,000.

Quebec, Que.—February 23—The premises of the Mechanics Supply Co., 80-90 St Paul Street, were damaged. Insurance as follows: Ætna, $15,500; North British Mercantile, $15,500; Fidelity, $11,000; Commercial Union, $4,000; Phœnix of Hartford, $4,000. Total, $50,000. Loss about $7,500. On stock: Quebec, $20,000; Phœnix of London, $17,000; Queen, $15,000; Royal, $14,000; Globe and Rutgers, $10,000; Alliance of London, $10,000; Liverpool-Manitoba, $10,000; Western, $8,000; British America, $5,000; Great American, $5,000; Hartford, $5,000; Scottish Union, $5,000; Continental, $5,000; Guardian, $10,000; Union, $10,000. Total, $149,000. Loss estimated, $75,000.

Quebec, Que.—March 16—Wholesale storerooms of J. M. Arkin and Co. were damaged. Caused by overheated furnace. Insurance on building, $60,000; loss about $12,000; insurance on stock, $12,000; loss about $7,000. Other losses: Insurance on Debenhams, Ltd., $22,000; loss, total. Muser Brothers, insured for $3,000; loss about $1,000. Vyse and Sons, insured for $6,000; loss about $3,000. The wholesale liquor store of the Compagnie d'Agences Europeennes, Notre Dame St., was damaged. Estimated loss, $46,000; insurance carried, $43,000.

Timiskaming, Que.—March 19—The premises of Kepawa Fibre Co., Ltd., Block 2, Range 1, Gendereau County, were damaged. Insurance as follows: North America, $4,855; Providence-Washington, $2,427; Firemen's Fund, $1,213; London Mutual, $1,505; total, $10,000. Estimated loss, $10,000.

Winnipeg, Man.—March 18—The fire at St. Mary's Pro-Cathedral, which caused damage to the extent of $30,000, is believed to have been caused by an overheated pipe, according to the report of Deputy Fire Commissioner Alexander Inch. Commissioner Inch charges the caretaker in charge of the furnace at the cathedral with inefficiency in looking after such a mechanical device. He points out that the caretaker left the building shortly after putting coal on the fire and leaving all the drafts open.

MANITOBA FEBRUARY FIRE LOSSES

The Manitoba Insurance Department has commenced gathering statistics of fires. The first statement prepared was for the month of January, 1919. This was given in *The Monetary Times* of March 7th. The following is the February report: Number of fires reported, 98; estimated value, $4,434,152; amount of insurance, $3,801,750; estimated loss, $74,184; loss ratio per capita, 0.1462; fatalities reported, 1. The following is the report for the year to February 28, 1919: Number of fires reported, 192; estimated value, $8,160,381; amount of insurance, $6,855,480; estimated loss, $154,377; loss ratio per capita, 0.3040; fatalities reported, 5.

CALGARY'S FIRE LOSSES IN 1918

Calgary's total loss through fire last year amounted to $59,710, or a per capita loss on an estimated population of 70,000 people of a fraction over 85 cents. There were 429 alarms turned in last year and the property damaged represented a risk of $4,562,673, with insurance of $3,021,815, while the actual loss on property was in the neighborhood of $17,000 more than in 1917. Citizens do not insure the contents of the buildings to the same extent as the buildings themselves, as is evidenced by the fact that losses on contents almost equalled that on buildings, although the value of the buildings exceeded that of the contents by approximately $1,500,000. The rate of loss is very low and in the opinion of the fire chief a credit to the city, which he thinks a comparison among the other cities of Canada would show to be among the lowest in the scale.

British Columbia Tax Commission

Report Just Submitted to Legislature Recommends Drastic Revision in Revenue System—Income Tax Should Be More Graduated—Poll Tax and Amusement Tax Unsound—Scale of Expenditure Too High For Revenue—Permanent Board Proposed

THE report of the British Columbia Taxation Commission, which was appointed in November, 1917, has just been presented to the British Columbia legislature. Mr. J. B. McKilligan, who had been appointed chairman, died during the term of its work, and the members reporting are Professor Haig, of Columbia University, Alderman Cameron and Mr. Kidd. The report is in triple form, giving the views of Professor Haig on the present system of taxation, the findings of the other two members, and a draft taxation act. Accompanying it are tables and charts illustrative of subjects dealt with, suggestions for the classification of revenues, and comparisons of the federal and provincial income taxes

The board in its first report reviews provincial conditions since the publication of the report of the commission on taxation in 1911, and especially since the collapse of the boom, and makes some general reflections in regard to the broad questions of the distribution of wealth, inequalities of taxation and "the ability to pay" as a basis of fair and equitable taxation. The board then goes on to consider the sources of revenue of the province as derived from persons having land under their control and from persons employing capital for the purpose of making profit by its employment within the community.

Taking up first the poll tax the board recommends that it be continued, and that its application be extended to all males between twenty and sixty without other exemption than military service. The board is of opinion that present conditions justify the tax, but recommends that it be discontinued whenever conditions become so changed as to permit of its abolition.

In regard to farm lands the board states that no class needs the encouragement that comes from fair treatment more than the farmers, and that as compared with farmers on the prairies their taxes are excessive. The average value of farm lands under normal conditions, the board says, is determined by their comparative natural productiveness, and that as their rental value is the measure of the income of the owner, so it should be the measure of the taxes he should pay as compared with others taxed on their incomes.

The board, therefore, recommends amendments to the Taxation Act, which it considers will result in taxing all farm holdings at the current rate on whatever value each may be assessed for up to a value of $25 per acre, and that when they get above that value whatever assessed value is placed upon them above that figure should be based on rental value. The rate at which the board would capitalize rental value for assessing purposes is ten per cent.

In respect to the assessment of small holdings of less than twenty acres the board is of opinion that this should be at their cash value as now provided in the Taxation Act. The board's view, however, is that a sub-division of land into small areas should be discouraged. Land held for building purposes the board thinks should be assessed on the same basis as city lots, at sale value. No change in the present taxation of wild land is recommended, but the board thinks it is one of the branches of land taxation that requires full investigation and consideration.

The board adds its recommendations to those of the royal commissions of 1905 and 1911 that the personal property tax be abolished except in those cases where the use of certain kinds of personal property has to be regulated, and where registration and license fees are levied for that purpose.

The board agrees that the imposition of a tax on income is the most equitable of all methods of taxation, as taking from the individual or economic unit a proportional part of the amount he draws from the fund of wealth created by the community without impairing the capital employed in the production of that wealth. The board recommends a more finely graduated scale than at present, substituting sixteen classes for the present seven, but with no changes in the rate up to $10,000.

On incomes above that sum the rates would be slightly higher, culminating in 12 per cent. on incomes over $30,000 instead of the 10 per cent. now levied. The exemptions they would grant are $1,200 on the joint income of husband and wife living together without children under 16, with $200 additional for each child under 16; $800 for single persons under 70, including widows, widowers or divorced persons without children, and $1,000 for single persons over 70.

In connection with the taxation of mines, the board reports against allowing any deduction for exhaustion of mines, finding that in England court decisions are clearly against it, and that in no country where mine taxation is levied on net income is it allowed. It remarks that it is safe to assume that before capitalists invest in the mine they will know with a great degree of certainty that there is enough ore to pay interest and create a sinking fund to replace the investment before the mine is exhausted. The board recommends the continuance of a mineral tax and refutes the argument that to levy this tax and tax the profits of the mine is dual taxation. It also reports against allowing interest on borrowed capital as a deduction of profits. It is recommended that canneries and similar fishing industries be brought under the income tax provisions of the act.

Respecting the collection of taxes the board is of opinion that the system of allowing a discount for payment before a certain date is wrong in principle, both in regard to provincial and municipal taxation. It proposes that taxes shall become due and payable on January 2nd, and that if not paid by March 31st, interest will be charged at the rate of one per cent. per month until December 31st, when they become delinquent and bear interest at the rate of eight per cent. per annum until paid or recovered.

The board finds that complaints in regard to inequality of assessments are well founded, and that the complaints about the real property tax are against inequality of assessments rather than the rate. It considers this due either to assessment districts being too large or the staffs too small. Reassessment of the province is recommended and its revision into smaller assessment districts. In this connection it may be mentioned that the reassessment was undertaken last year and that the minister of finance has worked out a plan for the separation of the duties of assessors and collectors, leaving to the assessors assessment work solely. This will permit them to get about their districts. The board supports Professor Haig's recommendation in favor of a permanent board of taxation.

In the matter of school taxes the board recommends that the whole of the taxable lands outside of municipalities, in proportion to their assessed value, should bear that portion of the cost of education which is now being levied on the several rural school districts. In closing its report the board expresses the belief that any diminution in revenue that may follow the abolition of the personal property tax and suggested changes in respect to farm lands would be more than compensated by close collection of income and other taxes, as well as by the expansion of present sources and the creation of new sources of revenue.

In an individual report submitted by Alderman Cameron he recommends that the present annual license fee and personal property tax on motor vehicles be abolished, and that the annual license fee be made two per cent. on the fair market value. He considers the amusement tax should remain as it is. If the board's suggestion regarding assessment and taxation of farm lands is not adopted, he favors the exemption of improvements, and recommends that improvements be clearly defined in much the same way as in the Municipal Act and that land and improvements be assessed separately.

Mr. Kidd submits an individual report, in which he recommends that motor vehicles pay one per cent. on the purchase price in this province when new, added to a $10 fee per annum, with motorcycles on the same basis and a $5 annual fee, with the registration fee as it now is; these to be in substitution of personal property tax and the present fees. Mr. Kidd would increase the amusement tax to a scale that he admits may seem excessive, and states that he does so on the grounds "that a tax of this kind may discourage the spending of money to excess on amusements that should not be indulged in over much when everyone should be saving capital for more needful purposes." He recommends that the revenue from this source should go to support public hospitals. Mr. Kidd's rates run from 100 per cent. on lower price admissions up to 25 per cent. on the higher priced tickets, or five cents on a five cent admission, ten cents on five to 15-cent tickets, and so on up to 50 cents where the admission is more than $2. He is of opinion that some change in the taxation of banks will have to be brought about and inclines to a taxation of their net income. Mr. Kidd concludes his individual report by expressing the opinion that the powers and duties of a board of taxation should be extended to include the supervision of municipal borrowing and spending of borrowed money, much the same as the local government boards in the United Kingdom. To this Alderman Cameron would not subscribe for the reason that in his opinion it was dealing with matters beyond the scope of the board.

Draft Taxation Act

In their second report the board deals with the draft Taxation Act which accompanies it. They state that in this draft they aim to make taxation more equitable than in the past and to correspond more nearly with changing economic conditions in order that the burden of taxation may be more equitably distributed. They provide that rental values shall be taken as a basis for the valuation of all classes of land, and place the responsibility for fixing the value on the owner, providing that in case of sale a certain percentage be paid to the province as an unearned increment tax. This they consider will have a tendency to keep values to a proper level. They would determine this tax by taking one-half the assessed value of improvements made between the last assessment and the time of sale, but the tax not to exceed 50 per cent. of the excess over his equity received by the vendor.

Following its previous report the board makes no provision for personal property tax. The taxation of coal mines is changed to bring them under the income tax provisions. This change, is one which the minister of finance has already made provision for. The board places the value of coal lands for assessment at the price at which they can be bought from the government—$15 an acre—pointing out that there is no practicable way by which an assessor can determine the relative values of coal lands from the point of production.

The taxation of mines other than coal mines follows the lines of the first report in placing a tax on the net income from the mine, an initial tax on the net value of ore in substitution of all other taxes, tax on the value of the surface, a tax on the estimated value of the ore in the mine, and a tax on all the buildings, machinery and plant used in or about the mine. The board submits that the alternative of mineral tax or income tax, whichever is greater, is wrong in principle, and that it places an unequal burden on the richer mines as against the smaller ones, and so the draft act does not contain this alternative. The board argues this point at length.

Corporation Taxation

Some changes in respect to the taxation of certain corporations are made which the board believe to be in the direction of making this more equitable between different classes of corporations and in relation to other tax payers. They consider that taxing the gross revenue of insurance companies and public service corporations is not reconcilable on any common principle, the former having practically no chance of loss, while the latter have their revenue affected by varying cost of materials and labor. The board also considers the present system of taxing banks works out unfairly as between one institution and another, and proposes to bring them under the income tax. It assumes that bank net profits amount to $2.30 per head of the population of Canada, and that this would give British Columbia about $1,000,000 as its share for taxation. No change is made in regard to the taxation of railways.

After devoting considerable attention to income tax, the board states that it has tried to provide in the draft act that all taxes on property values and income shall become due and payable on May 1st; that no discount shall be allowed, and that interest shall be charged after July 1st. In the matter of tax sales, they say they have endeavored to simplify the procedure and to make tax sale deeds absolute and free from attack for any cause, ample time for redemption being given. The board decided not to formulate any constitution for a permanent board of taxation on the ground that its knowledge at present was too limited, but it expresses the opinion that such a body should be advisory in respect to the minister of finance and supervisory in respect to the work of assessors and collectors.

Professor Haig's Report

Prof. Haig's report on the revenue situation in British Columbia is a very carefully prepared survey of the whole situation both as regards sources of revenue and the requirements of the province resulting from the financial operations of the last half dozen years. The early part of his report goes at some length into the revenue and expenditure of the province during late years, the increase in expenditure and falling off in receipts and the resulting need for a larger revenue than could have been obtained on the rates existing in 1916. Prof. Haig states that it is evident from a cursory survey that the scale of expenditure of the province has been entirely out of proportion to the size and dependability of the revenue.

Prof. Haig goes critically into the existing sources of taxation, and by graphs and tables affords some interesting comparisons as to the comparative contribution of various sources to make up the total revenue.

Under the heading of income tax Prof. Haig states that as it is in force in British Columbia it is open to serious criticism from several directions. He finds that, as taxable income is defined, it bears only a remote resemblance to true net income; that the tax is inequitable in its application, and that all the available evidence shows it to have been ineffectively administered even under the low rates in force in the past. With the Dominion drawing revenue from the same source and the province increasing its income tax rates, he considers a situation is created which is full of sinister possibilities for the future of this tax. Inequalities which can be ignored when rates are low become important when these are raised. He considers an administrative reorganization imperative, a redefinition of taxable income very desirable, and a reduction in rates may be found necessary if the tax is to be made workable and successful.

In regard to allowances for reductions, Professor Haig would permit an allowance for depreciation, but never beyond the amount charged for that purpose in the accounts of the enterprise. He also favors an allowance for depletion of mines, but says the total deduction should never exceed the actual cost in cash of the ores and deposits. Allowance of interest on borrowed money is a question concerning which much can be said on both sides, and in his opinion is not so urgent as such changes as deductions for depreciation. Professor Haig's readjustment of rates retain practically the same rates as at present, except that he would apply a rate of eight per cent. on incomes from $15,000 to $25,000, instead of the present seven and one-half per cent. on incomes from $10,000 to $20,000, and he would apply the maximum tax of ten per cent. on incomes over $25,000, instead of an income over $20,000, as at present. In explaining these modifications Professor Haig expresses the opinion that they would result in a more regular and even progression in the rates than now obtains. He states that the question as to whether there should be a differentiation in the rates as between corporate and other incomes is one of the hotly controverted points in public finance, and he refers to the Vancouver board of trade's suggestion that the highest rates should apply only to personal and not to corporate incomes. The effect of which, he says, would be to make the maximum rate on corporate incomes two and one-half per cent., instead of 12½ per cent. in 1917 or ten per cent. thereafter. Professor Haig is of the opinion that in the present impoverished condition of the provincial treasury it would scarcely be possible to reduce the rates on corporate income to the level advocated by the Vancouver board of trade. At the same time he thinks that in this province a sound policy lies in the direction of a greater degree of uniformity in the rates applying to corporate incomes, and that these may well be considered in a separate category from the rates on individual incomes.

Professor Haig expresses the opinion that the rate of one per cent. on the assessed value of improved real estate is not inordinately high as compared with rates elsewhere where similar services are rendered. He adds "indeed when the practical immunity of the owner of improved land from personal taxes is taken into account the lot of the British Columbia farmer cannot truly be said to be a hard one from the point of view of taxation. It is probably significant that some of the testimony clearly showed that it was not the absolute weight of the present burden which the farmer objected to so much as the inferred disposition on the part of the government to consider improved real estate a likely subject for still heavier taxation. The suggestions that farm lands be taxed on a basis which recognizes net yield as the controlling factor, and which discriminates even more than at present in favor of the operated farm equipped with reasonable improvements, are interesting and important. Any step in this direction should be preceded, however, by careful investigation which would attempt to reveal what could be rationally expected from the changes in the directions both of encouragement to agriculture and of effect upon the finances of the province. The present arrangement in regard to the taxation of real estate appeals to the investigator as not being so seriously unjust and oppressive as to demand hasty alterations at once without an opportunity for preliminary study and analysis."

The personal property tax he finds has practically assumed the role of a minimum income tax and he recommends that the income tax be entirely substituted for the personal property tax, provided the administration of the income tax is improved and the condition of the provincial treasury is such as to enable it to assume the risk of the somewhat decreased revenue which would probably result. The poll tax he considers one of the least desirable of present taxes and he thinks it should be definitely slated for repeal as soon as finances will permit. He thinks the elimination of some of the exemptions, notably that regarding the payment of $5.00 in any other provincial or municipal tax would simplify administration, increase the yield, and improve the equity of the tax. In taxing railways he believes that a more equitable method than the present one should be applied to apportion the burden among the various companies. The merging of all taxes on motor vehicles into one annual licence fee is recommended.

Province and Municipalities

The distribution of the present tax burden is surveyed as among the various economic interests, as between the province and the municipalities and as between the province and the school districts. In this connection he says: "The financial situation in some of the cities of the province is the occasion of considerable concern. Indeed unless real estate values should show a remarkable improvement, the province may soon be face to face with the problem of extending substantial relief to certain municipalities. The movement toward the single tax, however valuable the social effects may have been in encouraging building or checking speculation, has resulted in the imposition of a strain upon speculative land values which has seriously affected their productivity as a source of municipal revenue. If the present real estate depression continues it is certain that Victoria, Vancouver and perhaps some other municipalities will be compelled to reorganize their revenue systems. At the present time real estate in some municipalities is assessed at levels which are indefensibly high. Moreover the province apparently sanctions and encourages this practice. . . . in sending out assessment notices one assessor naively asserts that 'the fact that there is little or no market value for real estate does not affect the assessment.' When it is necessary to bolster the assessment by such methods it is time to arrange for additional sources of municipal revenue.

"The situation being as it is, the request of the Vancouver authorities that the right to levy a business tax be safeguarded the city should be readily granted. Indeed it is a serious question as to whether it is not now incumbent upon the province to exercise its authority to compel the municipalities to levy other taxes in addition to the taxes on land values which are proving themselves so difficult of collection. In view of the great assistance extended to municipalities from the provincial treasury the application for the remission of a portion of the motor vehicle fees and the receipts from the amusement tax is probably not worthy of favorable consideration in the present exigency. It is the current practice in all of the provinces with which the investigator is familiar to consider the motor licenses peculiarly a provincial source of revenue. In the United States the city of New York has recently secured the remission of a portion of these taxes, but it is decidedly an unusual practice. Alberta rebates none of the amusement tax to municipalities. Quebec, it is true, gives a certain amount of it to Montreal, but this is because Montreal already imposed an amusement tax, which was incorporated into the provincial system."

In regards to the administration of the tax system Professor Haig advocates very greatly strengthening the office of the surveyor of taxes and the reorganization of the assessment force. He suggests that if possible federal income tax machinery be utilized in the administration of the provincial income tax. Professor Haig considers it imperative that an administrative organization be built up capable of solving the difficult assessment problem of British Columbia, and that there should stand at the head a permanent tax board of dignity, power and responsibility. He suggests a board of three members appointed by the lieutenant-governor in council for a term of at least four years, at a salary sufficient to attract men of good calibre.

PERSONAL NOTES

Mr. E. C. Durham, assistant manager of the London Assurance, is in Canada on a business trip.

Mr. Robert Stirling, general manager of the Law, Union and Rock Insurance Company, Ltd., is coming to Canada shortly.

Mr. Herbert Lewis, general manager of the Union Assurance Society Ltd., who was recently in Canada, has returned to England.

Mr. R. Y. Sketch, recently appointed general manager of the Norwich Union Fire Insurance Society, Ltd., arrived in Canada a few days ago.

Mr. Carson Flood has resigned from the position of manager in Montreal for the Eastern Trust Co. and has joined the bond house of Nesbitt, Thompson and Co. as a member of the firm.

E. M. Saunders,
President for 1919-20, Dominion Mortgage and Investments Association

Mr. H. G. Waring, formerly with the Ocean Accident and Guarantee Company, has been appointed general superintendent of the automobile department of the Union of Canton and the British Traders Assurance, for the province of Quebec.

Mr. G. W. Pacaud, formerly general agent of the National Fire Insurance Company, in the province of Quebec, has been appointed general agent of the Fidelity-Phenix Fire Insurance Company, of New York, for Montreal and the province of Quebec.

Mr. Louis S. Colwell, Montreal partner of the New York firm of Jenks, Gwynne and Company, has returned to Montreal, after a trip to California and Louisiana, during the course of which he spent some days in New Orleans, studying the cotton situation.

Mr. Cecil S. Wainwright has been appointed secretary of the Western Assurance Company, in succession to Mr. C. C. Foster, who has retired. Mr. Foster has been secretary of the company for twenty-nine years and Mr. Wainwright, assistant secretary for twelve years.

OBITUARY

Mr. Neville B. Colcock, formerly Agent-General for Ontario, died in London, England, last week.

A. H. C. Carson,
Who, with F. D. Williams, has purchased the London Mutual Fire Insurance Co.

NEW MONTREAL BOND HOUSE

The Montreal brokerage firm of Thornton, Davidson and Co. announce the formation of a new branch of its business to be known as Thornton, Davidson and Co., Ltd., to deal in government, municipal and other investment issues. Hugh G. Davidson is the president of the new enterprise, Major Arthur F. Nation vice-president and Maus S. Wheelright, C. O. Cameron and L. A. Wyse directors. Major Nation was formerly connected with the firm of R. V. Winch and Co., at Victoria, B.C., insurance and bond house. Mr. Wheelright, who is to be the managing director of Thornton, Davidson and Co., Ltd., has had ten years' experience in the bond business in the United States prior to coming to Canada.

F. D. Williams,
Who, with A. H. C. Carson, has purchased the London Mutual Fire Insurance Co.

CONSTRUCTION AND RECONSTRUCTION

THE fundamental reason for the Great War has become fairly clear to those who have made a serious attempt to get beneath the surface of things. About three hundred years ago a great disaster laid London in ashes. To the people of that day it seemed an irremediable disaster, and one so great that it, for the moment, overwhelmed them. But only for a moment; for out of the wreck and ruin rose the great modern London incomparably superior to the former city. It was not merely a question of reconstruction to the people of that time, but one of construction—of constructing something entirely bigger, better and more beautiful. The war has swept aside and consumed utterly many things that were ugly, vicious and intolerable in the life of the nations. In Russia, where one autocracy has for the time being merely displaced another, great gains will be ultimately made. The jungles have been levelled and the ground made ready for vital construction and the enlargement of liberties of mankind.

In many respects the Great War is radically different from those that have gone before. In all the great struggles of the past few centuries there has appeared a time of expansion, followed quickly by lethargy and industrial depression. In past wars, moreover, the peoples concerned had no really great financial and economic problems to solve comparable to those that now confront the world. The population of the various countries derived their living mainly from tilling the soil. There was no delicate or widely distributed machinery to put out of gear. The Napoleonic Wars laid a heavy, and almost crushing, burden upon Europe, but at least a living was assured to the people from the resources of the soil. There were no highly developed industrial plants, railroads or markets linked together by credit and international investments of capital on the grand scale. The American Civil War was not dangerous to the permanent stability of the economic life of the nation because of the outlet afforded to labor in the free lands of the West. Even the Franco-Prussian War of 1870-1871 was a more or less localized struggle. The Boer war, costly as it was in comparison with its magnitude, levied insignificant toll upon the wealth of the United Kingdom. The Russo-Japanese War, as is now known, came abruptly to an end because of the financial exhaustion of Japan, and in that respect was the true prototype of the struggle that has just terminated. Nevertheless, both Russia and Japan recovered with astonishing rapidity from the economic depression into which they had fallen; and, taking advantage of the strategic position it has enjoyed during the past four years, Japan finds itself financially stronger than during any former period in its history.

The work of economic reconstruction is at once more difficult and more hopeful than at any time following past wars. More difficult, because the world's credit mechanism is more delicately balanced and adjusted; more hopeful, because our command over natural resources of the soil, the mine, the forest and the machinery of production is more decisive and complete. Important as agriculture may be even in the highly industrialized nations, such as the United Kingdom and Germany, yet it cannot be relied upon to furnish work and sustenance for the millions of factory workers, miners, railway employees, and those engaged in trade and commerce. On the other hand, raw materials being guaranteed, the capital is available—notwithstanding the tremendous expenditures upon the war—to finance all legitimate enterprises. Capital for such a purpose is not so important as credit; and the course of the war has demonstrated that the credit systems of the British Empire and the United States, at least, are sound. A close study of credit will reveal that, at bottom, it is neither more nor less than a refined state of barter. Stocks of goods are low; factories, machinery and the tools of production have been destroyed in a great part of Europe; and the world needs goods of every description, from factory to food products. A bold and optimistic programme should find productive and profitable work for all.

Canada achieved marvels during the days of war, and there is no reason whatever to assume that its manufacturers, farmers, workmen and other producers are not equal to the problems of peace. Above all, industry must not be permitted to slow down; for it is only from the products of profitable enterprise that the costs of war can be met and a high standard of living for the people maintained.

THE FUTURE OF SOVIET RULE

THE announcement that the British government was the first to suggest to M. Pichon, the French minister of foreign affairs, that the Allies should attempt to get the leaders of all the Russian factions to meet them in conference at Princes Island caused something more than surprise, even consternation, in France and the United States. Yet, notwithstanding the general indictment of British statesmanship that it has been uniformly imperialistic and self-seeking, quite the contrary is true. The liberal and generous treatment of the Boers after the South African War, by the Campbell Bannerman government, has been emulated in recent diplomacy by the carrying of the South African Nationalist envoys on a British cruiser to the Paris peace conference. The irreconcilables among the Sinn Feiners have been given latitude that certainly, as events during the war have proved, would never have been vouchsafed even in the United States. The Lord Mayor of Dublin has been permitted to proceed to Paris, and the Sinn Fein leaders to communicate freely with President Wilson—with the result that they proclaim him a 'humbug." The truth is that both the British people and British diplomacy have been fundamentally democratic; and this is sufficient explanation of the attitude of the United Kingdom to Russia and especially to the Russian Soviets.

Nevertheless, there are other and more immediately practical and pressing reasons. It would be superfluous to recapitulate present economic and social conditions in that vast country of illiterate and ignorant peasants and vain visionaries. These conditions, in a general way at least, are known to all. The Russian exchequer is bankrupt; the border provinces laid waste by war; the workmen unemployed; the peasants without the tools and machinery of production; the whole nation on the brink of starvation; and the leaders, even Lenine and Trotzky, fully aware that these conditions, if perpetuated, mean the end of the Bolshevist regime. It would be useless, of course, to deny that the Bolsheviki have the largest measure of control in the country, a control gained by ruthless terrorism and class war. There are powerful elements within the Russian nation, however, waiting only for the favorable moment to free themselves from tyranny. Even the peasants and the working class in the cities will not continue to tolerate a rule that has landed them in economic depression, misery and universal want.

A few weeks since Lenine announced that the Soviets would pay in full all of Russia's obligations to the Allies, ultimately, if given immediate financial aid now. The Council of Soviets has asked for capitalistic aid from abroad, particularly from the United Kingdom and the United States. If that aid be not granted by the Allies it will finally be found in Germany. Russia is in dire need of supplies of all kinds—of foodstuffs, horses, cattle, textiles, boots and shoes, and agricultural machinery. The nation has, at present, neither the gold nor the credit wherewith to procure them. Russian exports have been cut off entirely; and the people cannot pay for foreign commodities by the exportation of the products of their own industry. Hence, Russia must be financed and equipped with the machinery of production. Before the war Germany was in practical control of the Russian market, and is but waiting the opportunity to regain its former strategic position there. British finance and industry may have a wonderful market in a rehabilitated Russia, one that is bound to become more valuable as the years go by. It is absurd to assert that the Anglo-Saxon nations wish to foist their political ideals upon what remains of the empire of the Czar: or took military action in Russia merely because the Bolsheviki had betrayed the cause of the Allies and were openly assisting the Central Powers.

Whether the Soviets endure or not, therefore, is a question that solely concerns the Russians themselves. It would appear, however, that the Bolsheviki have witnessed the beginning of the end of their rule. Without the aid of external capital, Russia's economic life is doomed. Such capital can be secured only by granting guarantees—by giving oil, timber, mineral, railway and other concessions. The extreme Bolshevists in the Soviets have declared that they will have nothing to do with capitalistic enterprise; but unless Russian industry and agriculture receive capital from abroad the country will sink into stagnation and decay. Internal dissensions will break up the Bolsheviki group, whatever may ultimately befall the Soviet form of government. It may be added that, under the right conditions, the Russian market should prove a very valuable one to Canadian manufacturers of agricultural machinery, of textiles, boots and shoes, and the like; and to the Canadian live stock industry. New methods of finance may have to be followed, however, and it remains for our business men and financiers to be on the alert to take advantage of the prospective markets in Great Russia and the Ukraine.

INVESTMENTS IN REFORESTATION

WHILE large sums have been sunk in railway and other enterprises in Canada our timber resources have been allowed to be depleted. The term "development of resources" has frequently been applied in Canada to what is really the depletion of resources. As a nation we are shortsighted, and this is no better illustrated than in the lateness with which the conservation movement was adopted here.

Canada includes thousands of square miles of lands which are useful principally for forestry; that is they can be more profitably utilized in this than in any other way. As part of a programme of reconstruction, therefore, reforestation should be carefully considered. A delegation recently waited upon the Canadian government to emphasize this view; it included Brig.-Gen. J. B. White, A. J. Bothwell. president of the Canadian Pulp and Paper Association: Gerald Power, president of the Canadian Lumbermen's Association; Sir William Price, of Price Brothers and Company. Limited, Quebec; F. J. Campbell, of the Canada Paper Company, Limited; the Hon. Smeaton White, Senator, of Montreal, and a number of others. These delegates represented the Canadian Pulp and Paper Association and the Canadian Lumbermen's Association.

Reforestation, it has been frequently urged, should be undertaken by the government as the time during which the investor must wait for a return on his capital is too long. This tendency, however, is undesirable, and it would be preferable to have work of this kind financed by private companies on such terms as would insure them an equitable return upon their investment; they could be at the same time subject to the supervision of the government.

The possession of the bank book is the test of the right to draw on a joint bank account, according to a decision given in Toronto on March 26th.

The application for the incorporation of a Ukrainian Bank of Canada is deserving of careful consideration. Such an organization might be the means of bringing large quantities of European capital to Canada.

The number of institutions, including bond houses, who are ready to bid for original issues of bonds is rapidly increasing in Canada. Provinces and municipalities, who do not make it a rule to sell by public tender, frequently lose money by stimulating competition among buyers.

The British Columbia Government is to be congratulated upon the excellent form in which its estimates are presented. The comptroller, Mr. A. N. Mouat, who has had special charge of this work, commenced last year a new method of arranging the items. This is continued this year, and he is now able to give in parallel columns comparative figures showing the estimates for the two years. This comparison is carried into detailed items so that changes are easily apparent.

NEW BRUNSWICK ESTIMATES LOWER

Many War Expenses Have Now Ceased—Some Provision for Public Works

IN the provincial legislature at Fredericton, N.B., on March 25th, the estimates for the coming year were submitted by the Hon. Robert Murray, provincial secretary-treasurer. The estimated receipts are $2,064,830 and the estimated expenditure $2,054,188, leaving an estimated surplus of $10,642. The revenue estimates, compared with last year, are as follows:—

	Estimates, 1919.	Estimates, 1918.
Dominion subsidies	$ 637,976	$ 637,976
Territorial revenue, stumpage, royalty, etc.	809,500	690,000
Fees, provincial secretary's office	22,500	21,000
Taxes, incorporated companies	76,000	69,500
Amusement admission tax	50,000	5,000
Railway taxes	57,800	58,000
Motor vehicles	110,000	90,000
Agriculture	32,100	136,000
Provincial prohibition	40,000	25,000
Patriotic and war assessment	19,916	99,080
Probate court fund	20,000	23,000
Supreme court fund	2,800	2,500
School books	20,000	20,000
Provincial Hospital	51,000	42,000
Jordan Memorial Sanatorium	8,000	12,000
St. John and Quebec Railway	....	100,000
Railway earnings — Southampton Railway	1,500	....
Interest	10,000	3,000
Factory inspection	200	200
Succession duties	75,000	75,000
Private and local bills	2,000	2,000
King's printer	2,200	2,000
Miscellaneous receipts	6,700	8,100
Public health fees	5,500	....
Rent, Reversible Falls bridge	3,000	8,500
Wharves, half cost (Dominion government)	1,138	5,924
	$2,064,830	$2,135,780

The principal items given in the expenditure estimates are the following:—

	1919.	1918.
Administration of justice	$ 24,750	$ 24,558
Agriculture—General	58,108	57,916
Contingencies	29,350	26,100
Exhibitions	13,000	2,000
Executive government	57,850	56,277
Education	298,785	298,025
Forest service	84,000	54,000
Interest, ordinary	509,600	442,000
St. John-Quebec Railway, interest	......	187,299
Immigration	10,000	10,000
Jordan Memorial Sanatorium	18,000	52,000
Legislative Assembly	29,066	34,770
Motor vehicle fund	70,560	36,400
Public health	20,000	14,932
Public hospitals	10,600	10,600
Probate fee fund	13,500	13,500
Printing	20,000	20,000
Provincial hospital maintenance	127,000	130,000
Provincial prohibition	27,000	21,000
Public works	441,600	365,500
School books	24,700	15,500
Sinking funds	31,335	31,585
To provide for purchase of land for soldiers with physical disabilities	15,000	....

Mr. Murray said that demands upon the important services of the province had been so great that after providing for the payment of $174,000 in bond interest in that portion of the Valley railway under operation there had been incurred a deficit of $134,656. If they eliminated the Valley railway transaction from the statement the deficit would be only $207. The cost of the Valley road to March 1st was $3,945,021. The current liabilities of the province on October 31st, 1918, amounted to $783,902, and current assets were shown as $309,302. The difference between these two amounts is $474,370, being the deficit on current account up to the date of October 31st. Any surplus which might accrue in future would apply to the reduction of this amount.

In connection with future capital expenditures, permanent road and permanent bridge construction would be followed as in the past. By funding the motor vehicle fees the government was able to issue bonds for $700,000 for a period of twenty years. If the estimated receipts of $110,000 from this source were received, an additional issue of $450,000 in bonds could be made. Revenue from Dominion subsidies would be the same. A strong claim had been made by the premier and others during their visit to Ottawa in November last and at other times by correspondence for increase in subsidies for compensation for land given to western provinces. Favorable results were expected from those representations.

PACIFIC COAST FIRE INSURANCE COMPANY

The annual statement for the year ended December 31st, 1918, shows a premium income, after reinsuring, of $173,155. There was also interest earned to the amount of $19,695 and other items bringing the total income for the year to $193,606. Net fire losses were $92,754, or 53.5 per cent. of premium income. Expenses were $62,652; reinsurance reserve required an additional $5,923 and a balance of $31,032 remained as profit for the year. There was a balance of $159,306 from 1917, less a special reserve of $10,000 for foreign business, $28,577 of an addition to investment reserve, and $25,553 written off debentures, which, when deducted, leave $95,175. This, added to the profit for 1918, makes a total surplus of $126,207.

Total assets are $1,042,490, compared with $1,018,952 at the end of last year. Government and municipal bonds constitute $172,970; mortgage loans, $241,153; real estate, $188,522; stocks and debentures, $306,212. The reserve of unearned premiums is $83,267 and the investment reserve fund $160,315. The paid-up capital is $589,645 in addition to which there is a surplus of $126,207.

The managing director of this company, the principal office of which is in Vancouver, B.C., is Mr. T. W. Greer. At the annual meeting held on March 13th, the president, Mr. D. H. Wilson, stated that the company was in a better position to-day than ever before due to a conservative investment policy and the fact that the 1918 dividend was added to the reserve fund. The company expects, however, to resume dividend payments at an early date. Mr. W. H. Malkin, vice-president, referred to the heavy fire losses in Western Canada. The other vice-president, Mr. J. B. Mathers, commended the safe policy which had been pursued. Mr. J. W. Horne, who has been a director for 29 years, resigned, and Mr. W. H. Kerr was elected in his place.

Mr. T. W. Greer is also manager in Canada for the Century Insurance Co., Ltd., which wrote $138,000 premiums in 1918, with a net loss ratio of 49 per cent., and for the Vulcan Fire Insurance Co., of Oakland, Cal., which commenced writing business under a Dominion license about July 1st, 1918. Its premium income was about $30,000, with a loss ratio of slightly under 50 per cent.

A subscriber is anxious to secure issues of *The Monetary Times* of February 8th, 1918, and March 15th, 1918. Subscribers sending these copies to this office will have their subscription extended one month.

MARCH FIRE LOSSES

Increase Over $1,000,000 for the Month—Eight Business Blocks Burnt

The Monetary Times' estimate of Canada's fire losses during March, 1919, is $2,154,095, compared with $1,682,286 in March, 1918, and $1,091,834 in February, 1919. The following is the estimate of the March losses:—

Fires exceeding $10,000	$1,771,000
Small fires reported	87,300
Estimate for unreported fire	295,795
Total	$2,154,095

The Monetary Times' record of the past three years and this year to date shows the following monthly losses:—

Month.	1916.	1917.	1918.	1919.
January	$ 1,649,217	$ 1,918,660	$ 2,688,556	$ 3,915,290
February	3,275,600	2,009,953	2,243,762	1,091,834
March	1,406,501	2,050,650	1,682,286	2,154,095
April	1,460,437	1,317,714	3,240,187	....
May	1,850,205	1,163,110	3,570,014	....
June	494,557	1,184,627	3,080,982	....
July	3,039,634	1,101,734	3,369,684	....
August	1,057,109	1,230,183	3,110,445	....
September	981,703	1,301,700	917,286	....
October	1,077,815	704,605	5,119,145	....
November	923,235	959,049	1,059,580	....
December	3,271,496	5,144,100	1,733,917	....
Totals	$20,487,509	$20,086,085	$31,815,844	$ 7,161,219

As can be seen from the foregoing figures, the losses for March exceed those of the previous month by nearly $1,000,000. Last month there were 25 fires with a loss of over $10,000, while in February there were only 18. The large increase in the total is accounted for by the four large fires which occurred towards the end of the month, swelling the total by nearly $800,000.

The following is a list of fires in March at which the loss amounted to $10,000 and over:—

Alberton, P.E.I., March 2, business section of the town, $55,000.

Anyox, B.C., March 2, plant of the Granby Consolidated Ore Co., $50,000.

Calgary, Alta., March 3, the Western Block, $25,000.

Delisle, Sask., March 11, large part of town damaged, $70,000.

Lakeville, N.B., March 6, five potato houses, $25,000.

Midland, Ont., March 5, the Midland Opera House, $40,000.

Montreal, Que., March 5, bottle factory of the Dominion Glass Co., $75,000.

Ottawa, Ont., March 5, general store of J. A. Deguire, $15,000.

Fort William, Ont., March 13, the Peltier Block, $40,000.

Quebec, Que., March 11, the Marathonic Cafe, $25,000.

Quebec, Que., March 15, liquor stores of Compagnie de Agences Europeanes, $70,000.

Quebec, Que., March 15, store rooms of J. M. Orkin Co., $45,000.

St. Catharines, Ont., March 14, garage of Bell Brothers, $20,000.

Toronto, Ont., March 13, Y.M.C.A. quarters at Exhibition Camp, $27,000.

Welland, Ont., March 14, the Rogers Block, $10,000.

MERCHANTS BANK TO INCREASE CAPITAL

The paid-up capital of the Merchants Bank is to be increased from $7,000,000 to $8,400,000. The authorized capital is $10,000,000. Shareholders have already been notified to this effect. The 14,000 shares of new stock will be allotted on the basis of one share for each five shares already held at a price of $150, available to shareholders of record on the company's books as at April 30th, 1919. Fractional allotments are not permitted in the Bank Act, and shareholders who have uneven amounts of stock will have until April 30th to secure holdings in multiples of five shares. Odd amounts of the stock have changed hands during the past few days at around 192½.

COMMISSION TO SURVEY INDUSTRIAL SITUATION

The announcement was made to the Senate this week by Hon. Gideon Robertson, minister of labor, of the appointment of a commission, composed of five or seven men commanding the complete confidence of the nation, including labor and capital, to proceed to all centres of industry in the Dominion, survey the situation in all its aspects, ascertain all the facts and report to the government before May 15 upon the possibility of the joint control and operation of certain industries by capital and labor. It is understood that the names of those composing the commission will be announced shortly.

OHIO MAY RESTRICT BOND SALES

A bill has been passed by the Ohio House of Representatives and will be discussed by the Senate next week, restricting the investments of banks operating under charter of that state. There is no limitation in the bill regarding investments in Ohio municipal securities, but it provides that in the case of American municipal securities outside the state of Ohio, the banks can purchase only those of municipalities having a population of one thousand or more and a net debt not more than 10 per cent. of the assessed valuation.

The bill as originally drafted contained a clause especially referring to Canadian securities. It provided that the banks could purchase obligations only of the Dominion or provincial governments and of municipalities having a population of at least one hundred thousand and a net debt of not more than 5 per cent. of assessed value. The Investment Bankers' Association, however, which includes several Canadian members, protested against this clause and it was amended to enable banks to purchase obligations of municipalities having a population of ten thousand or more and a net debt of not more than 7 per cent. of assessed valuation. Sinking funds, waterworks bonds and other "self-sustaining" securities were, of course, not to be included in the net debt. Securities guaranteed by the Dominion, a province, or a municipality rank the same as a direct obligation. School districts were entirely excluded from the list of municipalities, whose obligations might be purchased by banks.

MONTHLY BANK CLEARINGS

The following are the bank clearings for the month ended March 31st, compared with the corresponding month last year:—

	March, 1919.	March, 1918.		Changes.
Montreal	$433,296,193	$305,158,929	+	$128,137,264

BANKRUPTCY BILL DISCUSSED

A second reading of the Dominion Bankruptcy Bill was given in the House of Commons on March 28th. Hon. Hugh Guthrie, who moved it, referred to the fact that Canada has had no act of this kind since 1880. There was one in Canada from 1875 to 1880, but it was repealed in the latter year because it did not work well. Since 1880 some of the provinces have enacted legislation along bankruptcy lines. The effect, he said, would be to abrogate and annul provincial laws. In the new legislation an article had been made to unify the various provincial laws as far as possible, to abolish all priorities and preferences between creditors, to grant expeditious action in regard to insolvents, to make insolvency action less expensive and discharge from former obligations. He said the phraseology of the English legislation was followed as closely as possible. Corporations would be subject to the terms of the bill, which would apply to all except banks, railways, trust companies and insurance companies.

GRAND TRUNK RAILWAY DEFAULTS INTEREST

Reports received at Ottawa this week state that the Grand Trunk Pacific Railway has not met the principal or interest of the $10,000,000 loan due on April 1st. On April 3rd, Sir Thomas White made the following statement in the House of Commons as to the present position of the government:—

"I cannot, of course, forecast what the course of these negotiations will be, but my view is that the Grand Trunk Railway Co. of Canada will come into the possession of the Dominion government. I am not in the position to say that definitely, because we have not reached an agreement in the negotiations. My hon. friend (Mr. Cahill, of Pontiac) probably has in mind: 'Supposing that our negotiations with the Grand Trunk Railway Co. of Canada continue in their present unsatisfactory condition, what will the government do?' I stated the other day that the Dominion had many remedies which it could pursue. For example, when legally action could be taken, an application might be made to the Exchequer Court for foreclosure under the first mortgage securing bonds of the Grand Trunk Railway Co., guaranteed by the Dominion government. There are other mortgages under which the Dominion government, in the event of default, can proceed, and there has been default to foreclose an offer for sale. Then the Dominion government is in a position to sue on obligations which have matured."

ONTARIO BLUE SKY LEGISLATION POSTPONED

The Ontario government has decided that its legislation to regulate the sale of securities will not be as strict as was originally intended. In fact, no legislation at all may be enacted during the present session, as it has become apparent that an act of this kind must be framed only after a careful investigation of the subject.

One change which was decided upon as a result of a conference with a representative of the Bankers' Association was the addition to Section 4 of the draft as given in *The Monetary Times* last week of a clause to the effect that the act should not apply to commercial paper or mortgages on real estate in Canada, nor to a sale or attempt to sell by a pledge of shares pledged in good faith and not for the purpose of evading the act, nor to a sale by a company of its shares to its existing shareholders for actual cash.

The province of Manitoba has also amended its Sale of Shares Act this session. The amendment provides that the commissioner may, if he sees fit, select two residents of the province to constitute with himself a board to sit on any application. In such cases the applicant must deposit with the commissioner the sum of $20. Such a board may also be constituted at the instance of the applicant. The decision of the majority of such a board is to be final. This amendment, which was assented to on March 14th, was urged by the Winnipeg Board of Trade.

Dominion Mortgage and Investments Association

Financial Conditions Reviewed by President—Municipal Finance Recommendations—Essential Part Which Capital Plays in Economic Development.

LOANING institutions in Canada were well represented at the annual convention of the Dominion Mortgage and Investments Association, which was held in Toronto, on March 28th. Routine business was transacted in the morning. This was followed by several addresses, and in the evening by a banquet at the King Edward Hotel.

The following officers were elected for the year 1919-20: Hon. president, A. D. Langmuir; president, E. M. Saunders; first vice-president, A. E. Holt; second vice-president, W. E. Long; executive committee—life insurance section, J. K. Macdonald, J. F. Weston, J. B. McKechnie, Charles Ruby; trust company section, J. C. Breckenridge, S. C. Macdonald, A. D. Langmuir, J. K. Pickett; loan company section, Joseph Campbell, Hume Cronyn, A. B. Fisher, Alfred Whitman; provincial associations' representatives—John Paton, Mortgage Loans Association of Manitoba; W. E. Mason, Land Mortgage Companies' Association of Saskatchewan; W. T. Creighton, Mortgage Loans' Association of Alberta; G. L. Smellie, Mortgage and Trust Companies' Association of British Columbia.

President's Address

Mr. Hume Cronyn, the president, referred in his address to the support given by financial institutions to the war loans. He said: "In our attempt to ascertain as definitely as possible the actual contributions made through the agency of loan, trust and insurance companies, returns were secured from 76 organizations showing total subscriptions to war loans of $134,680,653. This figure does not represent the total subscribed by all companies of a class similar to those forming the membership of this association. There are three or four hundred such companies throughout the Dominion, while we have had returns from only 76, but through these, as I have indicated, subscriptions were obtained aggregating an amount of which we may well be proud."

The details are set out in the following summary:—

Class of Company	No. Reporting	Subscribed Prior to 1917	In 1917	In 1918	Total
Loan and Savings	24	$ 3,714,300	$10,686,456	$11,318,630	$ 25,719,386
Insurance	37	22,636,217	32,192,950	39,291,250	94,120,417
Trust	15	3,095,500	5,588,500	6,156,850	14,840,850
	76	$29,446,017	$48,467,906	$56,766,730	$134,680,653

He also dealt at some length with seed grain loans, and while he admitted that there was some justification for this lavish distribution of funds, he questioned the fairness of a measure which, under the guise of benevolent paternalism, deprived a large body of investors of their undoubted rights. Recent changes, however, indicated a better recognition of constitutional rights. He also expressed the hope that the moratoria in force in many of the provinces would be allowed to lapse. With reference to the farm loans associations in the province of Manitoba and Saskatchewan, he hoped that the changed conditions of the financial markets would enable these provinces to reduce the annual deficit which hitherto had faced them on this account. There was good reason to believe that the flow of money from the United Kingdom would, to some extent, be resumed.

Mr. Cronyn also said that he felt sure that as long as the association retained the services of Mr. John Appleton, the secretary-treasurer, it would grow in service and strength.

The report of the executive committee was read by Mr. Appleton. It reviewed the activities of the association during the year, mentioning especially the Dominion conference held in December regarding fire prevention and the changes in the criminal code suggested there. An advisory council [illegible] been formed to co-operate with the insurance department, the association being represented on it by Mr. Holt. The report also went at length into the subjects of seed grain loans and taxation of corporations. The association now has a membership of 37, compared with 32 a year ago, and represents assets under administration of $750,993,140, compared with $687,468,344 a year ago.

Mr. E. A. Saunders read the report of the committee on municipal finance, which expressed the opinion that municipal financing is not yet on a sufficiently sound basis. It recommended that financial institutions exercise more control over municipal borrowings. Provincial governments should supervise municipal finance and are already taking steps in this direction. Mr. Saunders, however, expressed an optimistic opinion regarding the future.

Addresses were given by F. C. L. Jones on "Instalment Mortgages"; by George H. Muirhead on "Land Transfers"; and by S. W. Woods, K.C., on "City Mortgages in Alberta."

In the evening, Dr. Adam Shortt spoke on the subject of capital and showed how society had progressed through the use of capital and how dependent it was upon it at the present time. He was followed by Mr. Kenneth J. Dunstan, president of the Toronto Board of Trade, Mr. Kingman Nott Robins, secretary of the Associated Mortgage Investors of the United States, and by Mr. J. H. Gundy, of the Bond Dealers' Association of Canada, who were present representing their respective organizations, and pledged their support in maintaining the financial prosperity of Canada.

The Functions of Capital

"Although the great war may be practically over," said Dr. Shortt, "yet we shall not escape from its far-reaching influences for a good many years. It has dislocated many popular conceptions of life in more spheres than one. In no sphere, perhaps, so radically as in the economic region, so fundamental to all others. Ideas that have been taken for granted for decades must now be closely inquired into. Some conceptions presenting an apparently solid front, backed by much substance, are found to have nearly lost their content, while others, little regarded hitherto, are found to have become pivotal factors. This has produced a tendency to question all standard conceptions and especially those which seem to bar the way to more favorable economic conditions for numerous elements in the state. Many new theories are advanced, the object of which is not so much to clarify existing conditions as to prove to those not very critical of arguments, provided they harmonize with their desires, that what is desirable is what ought to be, and what ought to be is what can be, and what can be should be immediately realized. For instance, it is desirable that the general body of the people may have more income, therefore, the people ought to have more income. Resolved, accordingly, that the people demand more income from the various sources whence it now comes. Carried unanimously and steps considered to enforce this conclusion. So far as income means money, there is no insuperable difficulty here. So long as the suspension of specie payment continues, all that is necessary is to still further increase the inflation of credit and the necessary money may be forthcoming. In reality, however, it is not more money that is wanted but more of the things which money can buy. The real question, therefore, is: What is necessary to increase the quantity of goods in proportion to the amount demanded by unanimous popular resolution? Incidentally to this is the further question: Where is the capital to come from to provide the factories, machinery, raw materials, etc., and who will furnish the extra labor required for the increased production? These are problems which are not very cogently grappled with among the new theories which are current, and which constitute important factors in popular propaganda.

"It was pointed out that the problem of increasing the incomes of the general body of the citizens, however desirable

and however possible in time, if properly worked out, involves more careful and far more extended investigation than it has received. In order to discuss this situation adequately, two methods might be followed: either the investigation of the various theories put forward for the reconstruction of economic society; or a direct analysis of what is involved in the existing economic structure, with a consideration of what improvements may be possible. The first method is inevitably tedious and not certain to be very profitable, since it involves an attempt to discuss a perfect babel of voices, from that of the Bolshevist, who cheerfully distributes blank forms undertaking to deliver the millennium according to the details to be filled in by each applicant who will sign up under his leadership, to that of the "good old time" pessimist who detects the seeds of ruin in every change, but hopes that he may not live to witness the inevitable crash. It is useless to attempt to demonstrate the defects and inadequacies of many of these theories, especially as few of the most inadequate and unreasonable of them will consent to die even when their brains are out. The method of an analysis of the essential features of actual economic conditions is likely to be much more effective and more within the bounds of time and space.

Human Progress Through Capital

"A survey of the origin and growth of capital, shows that, like ordinary wealth, it is a product of labor and nature. But physical labor itself is blind and therefore futile. To be efficient in producing needful supplies labor must be directed by intelligence. But the intelligence and the labor need not be entirely or always combined in one individual. Physical labor, however, requires the presence of the laborer at the place of industry, while the intelligence of direction and management does not require its constant presence at the place of industry. This important difference makes possible the direction of many laborers by the skill and knowledge of one person.

"The field of capital is also much wider than the field of goods for the supply of daily wants. The most highly organized steel plant in the world contains nothing which is suited to the direct supply of a single human want, except, perhaps, rudimentary shelter, such as a cave might furnish. Yet such a plant, under our present social organization, is indispensable as an indirect means to the satisfaction of practically all our civilized wants; whether the elementary animal needs of food, clothing and shelter, or the special human wants based on the higher senses and our intellectual and moral nature. Thus it follows that while labor and nature alone can provide a somewhat precarious daily supply of wants, it is capital which liberates man from a hand-to-mouth existence and permits of an indefinite expansion in both the quantity and quality of the means of life.

Exchange and Credit

"Again, capital is the product of saving, or deferred consumption, involving the diversion of wealth from immediate consumption on the part of the owner to a preparation for still greater production, rendering possible a more extensive supply of wants in future. In order to realize, however, the great possibilities of capital in increasing the efficiency of labor in production many secondary factors are introduced and come to be indispensable. Among these are transportation, exchange, industrial organization on a large scale, and the co-operation of many individuals of different capacities and qualities in the production of single articles or the rendering of frequent services. Some of these important factors, such as transportation and exchange, may serve many industries at the same time and thus come to be of themselves highly important combinations of capital, labor and specialized intelligence.

"Probably the most subtle of these factors, or at least that which appears most mysterious to the ordinary citizen and which, in consequence, he most mistrusts and attacks, is that of financial credit and exchange. This is 'the money interest' with which he has come to most specifically identify [illegible] to the misfortune of the latter in its attempts to [illegible] standing with labor. It was pointed out that [illegible] pivotal element in all this mechanism of exchange is simply a postponed or deferred right-to-receive goods or services in exchange for other goods or services. One individual sells goods or services to another, but instead of immediately taking other goods in exchange he accepts a statement that he is entitled to receive any goods or services which are on the market up to the exchange value of the goods with which he parts. Once the break is made the compliment of this process is also possible—namely, the paying for goods before they are received or even before they are produced. This becomes quite general in the advancs of credit to aid production. Of course, it required a long time to work up this system from the earliest articles used as money to our present elaborate systems of banking and exchange with insurance, trust and loan companies, stock exchanges, etc., whose development has been made possible through this device. In that process of development many special usages have taken shape and many laws have been passed defining, limiting and safeguarding the powers and obligations involved. Yet the system in its practical operation depends chiefly on the high standards of business honor and integrity of various individuals and institutions.

"Once it is possible to break the connection *in time* between selling and buying, it is possible to introduce in that interval many intermediate links. It is possible to part with, or accumulate, or make combinations of these rights-to-receive. Therefore it is possible to make great combinations of them before they have been converted into goods and to utilize this combination for the construction of large and fully equipped factories, to purchase raw materials and to hire numerous laborers to operate these instruments and work up the raw material into finished goods. It is also possible to expand the business by borrowing additional rights-to-receive, either in the way of large permanent loans for a considerable period secured by the issue of mortgages, or bonds, or for short periods in the shape of bank advances to be repaid within thirty or ninety days on the sale of the goods. These transactions explain how it is that the capital factors in production have come to be so closely identified with the exchange and credit systems. At the same time there is no essential difference between these highly complex uses of wealth for capital purposes and the construction and use of the first bow and arrow, fishing net, or canoe. In all these cases, not the immediate satisfaction of wants was aimed at, but the production of something which, while incapable of supplying any want directly, would yet enable the owners and employers of it to greatly increase the supply of those goods which do directly supply wants."

CANADIAN LIFE INSURANCE LAWS INCLUDED

The 1918 volume of "Life Insurance Laws" has just been distributed to its members by the Association of Life Insurance Presidents. In the preface of the book, Manager George T. Wight says:—

"The number of laws printed in this volume is 59, of which 11 are Canadian statutes, included this year for the first time. This is the largest total printed in any even-numbered year. The number of statutes in the States is second only to 1912, when 49 laws were printed. Of the 59 printed this year, eight in the States and two in Canada relate to the civil rights of soldiers and sailors. A new code of laws was adopted in Virginia, of which the sections affecting life insurance are reproduced. A list of 'blue sky' laws has been added to the appendix this year.

"There were 30 regular and special sessions of state and provincial legislatures in 1918, in addition to sessions of Congress and the Dominion parliament. In Connecticut, Delaware, Mississippi, South Carolina, Texas, Wisconsin, New Brunswick, Newfoundland, Ontario, Quebec and Saskatchewan no laws affecting foreign life insurance companies were enacted. Of the others, Massachusetts led with 11 new laws, followed by Congress with 9, New York with 8, and Virginia with 5; three provinces enacted 3 laws each; 3 States enacted 2 each; and 9 States, 1 province and the Canadian parliament enacted 1 each."

Routine of Investments

In assuming the responsibility of managing the details of your own investments you encumber yourself with unnecessary routine and often with worries. You are constantly wondering if you have forgotten, made a mistake, or overlooked something. This Corporation is trained in all the details incident to investments. It can handle yours without error, without trouble to you, and to your entire satisfaction. The cost of our financial management service is trifling. Write for further information.

ADVANTAGES OF THE PART-TIMER

An Address Before the Life Underwriters' Association of Winnipeg

By F. O. Maber,
Secretary, Northwestern Life Assurance Co.

I AM championing the cause of the "part-timer" for two main reasons. First, because he is a distinct advantage to the business, and second, because he is already a part of the life insurance institution and his removal would be unfair and disastrous to the ethics of the profession. Further, this removal could not take place except by sand-bag methods which are iniquitous.

The first point I wish to bring home to you is that the "part-timer" is an advantage because he is the great amateur of the life assurance business.

Now what is an amateur? An amateur is one who follows any science, art or occupation not from pecuniary motives alone, but from love for it. I see some of you laugh, indeed I rather expected you to laugh when I gave that definition, because some professionals seem to think that the "part-timer" is in the business for pecuniary motives alone, and that the ethics of the business mean nothing to him. This is not true.

The great mistake which many of us make is that the life assurance business is a sordid business. It is not a sordid business. It is not one which primarily appeals to the money-making instincts of the individual. It is a high calling, and it draws from a man the very best that is in him. In no business, in no profession, ministerial, medical, legal, or otherwise, is the question of remuneration less considered than among the noble-minded men who compose the rank and file of the life assurance fraternity.

And what is true of the professional assurance man is true of the "part-timer," of the amateur. Many and many a time does the latter induce a man to assure because that man needs assurance, because a wife and family might be left destitute if the assurance were not placed; and the question of remuneration is secondary and sometimes almost unimportant.

I claim that the "part-timer" is the amateur of the life assurance business and as such he is invaluable.

What would you have done without your amateur in photography, in music, in science, in art, in wireless telegraphy? Witness the tremendous agitation in the United States to-day over the status of the wireless operator, who, in a moment of his nation's need came to its rescue and filled a gap which it would otherwise have been impossible to fill. Were the amateur abolished the loss to the world would be incalculable.

Part-Time Service a Training Ground

2. The services of the "part-time" assurance salesman are practically indispensable at country points. Perhaps if one company could secure the monopoly of all the business obtainable in a given locality the agent representing that company might make a living, but since this is not possible under present competitive methods, it follows that in a small town the representative of a life company must also follow another calling or take on other agencies in order to supplement his earnings from life underwriting. To ask such an agent to devote all his time to life assurance is iniquitous, for it forces him either to give up life insurance altogether or to live upon a reduced income.

"Part-time" service affords many a man a training which fits him ultimately for continuous service in selling assurance. I am acquainted with some of the very best men in the business who began for short or long periods as "part-timers." The "part-timer" earns from his other business, while he learns the assurance business. He is like the man with a great hobby, who learns some high calling in his spare time, while he continues the drudgery of his daily work to make a living.

3. The third point I wish to make is that the usefulness of the "part-timer" to the great public is beyond question. We all agree that life assurance is one of the greatest blessings which has ever been conferred upon humanity, and as a necessary consequence it follows that everyone who assures is thereby benefited, not only from his individual standpoint but also from the standpoint of his value to the community and to the nation. He is a better man and a stronger man because he carries life assurance.

The "part-timer" reaches some people who could otherwise not be reached at all. I have instanced this in the case of the country agent. It is, however, equally true, but to a more limited extent in the case of the "part-timer" who operates in the city. Some prospective assurers will not deal with a stranger no matter how accredited he may be. The local agent or some special friend of the assured is the only one who can get that particular business, and while this is true, the services of the "part-timer" should be retained. I also question whether a travelling salesman could make it constantly pay to write country business direct.

Brings a New Point of View.

4. The fourth point which I wish you to consider is that the "part-timer" infuses new thought and greater vision into the business. Those who are familiar with the very rapid increase in our knowledge of science will be aware of the tremendous part which has been played by the non-professional. His investigations and his theories have led to many improvements which have blessed humanity.

So it is with the "part-timer," with the amateur in life assurance. His eyes are not fixed so close to the ground that he cannot occasionally see the starry vault of heaven. Professionals are more or less bound to a system which they cannot help but follow, for they almost invariably think their system is already perfect. That is one of the dangers of professionalism. It is considered that they already have a perfect system. The amateur views the situation from a different angle and can make and does make suggestions for improvement which the professional at first simply cannot visualize. Our own company was conceived while I was a "part-timer," and my confrere, Mr. McCabe, was not professionally engaged in the business at that time. Many of the most valuable suggestions I have ever had made to me have come from "part-timers," and one of the very best all-round life assurance men I have ever known is now a "part-timer."

Prevents Class Consciousness

5. The "part-timer" acts as a deterrent to the formation of an unworthy class consciousness. I do not intend to elaborate this argument to-day as I went fully into it in my recent article in *The Monetary Times*, and most of you are therefore familiar with it. Were there time I should like to deal fully with this important point, as the menace of professionalism is one of the gravest dangers of this age and generation. It must be clear to you, however, that the impelling motive of class consciousness is that the order might be preserved and strengthened at all costs and that this is prejudicial to idealism and ethical integrity. It is this class conscience which makes it possible for you to conceive of expelling the "part-timer" from your midst and it has its roots in selfishness to an infinite degree.

6. The sixth point which I wish you to consider is that the "part-timer" is an advantageous advertising agent, because he helps to stimulate the desire for assurance.

The "part-timer" is frequently, indeed very often, attached to some institution which gives him personal and immediate contact with men who are often neglected by professional assurance salesmen. In this way he stimulates the desire for assurance in unusual quarters and spreads the gospel of life assurance among men who might not otherwise think of the subject at all till it was too late. This has an advertising value which is inestimable in its consequences upon our social life.

7. The "part-timer" spurs on the professional assurance salesman to greater heights and opens up to him greater possibilities. I imagine that some of you wonder how this is possible. It is, however, very simple. It arises very naturally from what I have already told you about the assurance man in his professional capacity having his eyes glued to the ground. Along comes an amateur, gives him a jolt, and he

YOUR MONEY—
HOW TO MAKE IT EARN

To invest his savings where they will be absolutely safe, accessible, and earn their right rate of interest, is the desire of every investor.

Time saved is money earned. Nothing shows this so clearly as the fact that—

$100 invested at 5½% doubles itself in less than 13 years
$100 saved at 3% takes 23½ years to do the same thing.

Standard Reliance 5½% Mortgage Corporation Debentures

are issued in sums of $100 and upwards for a fixed period to suit your convenience. Interest at 5½% is payable on the day it is due

No trouble, no worry, no inconvenience. Your security never fluctuates.

Not a dollar has ever been lost by an investor in these debentures.

An interesting booklet about "PROFITS FROM SAVINGS" will be sent free on request.

look up. Then he sees the expanse of heaven above him, sees the greater possibilities which are opened up to him, and because he is a wise man, he tries to remember to gaze upward once in a while.

8. The "part-timer" adds to the number of agents in the field and thereby increases the service to the public over what would be the case were professionals only employed.

Life assurance is not usually asked for. So much is this an axiom that when anyone does ask for it you immediately become suspicious and wonder what is the matter. Only this week a man applied to our office for assurance and the medical examination showed an excessive quantity of sugar in the urine. I expected something like that. The cases where life assurance is applied for by a man in sound physical condition you can each of you probably number on your fingers, and that during the whole of your professional careers. The spread of the gospel of life assurance is therefore only practically possible by agents and the more of these the merrier. The more there are the better the business, for it increases the ultimate service to the public, seeing that a larger number of people are thereby enabled to share in its blessings.

Reaches New Business

9. The "part-timer" secures some business which no professional could obtain. This you will be able to appreciate from what I have already said. Some prospective insurers positively will not deal with a stranger, no matter how accredited he may be. Many will, of course, under certain conditions, but all will not, and if the great public is to be adequately served all men and women must have an opportunity to secure the advantage of life assurance protection. The "part-timer" has his part to play in this and in many cases he is doing it nobly and well.

10. The "part-timer" constitutes a natural field from which professional life assurance salesmen are recruited. He is a greater professional because he has been an enthusiastic amateur. He has learned the business slowly in all probability, and so he has learned it better. This it seems to me needs no elaboration,—it is self-evident. Here you already have a body of men who know the business partly: what more natural, more desirable than that they should graduate into the ranks and devote all their time to our great business.

There are some men who think themselves always to have been full-timers, but who, as a matter of fact, started in the business as office men or cashiers, writing an occasional case, and in that way they obtained exactly the same training as the "part-timer" engaged in other business.

Force Not to be Used

11. Now you will easily realize why I object to the elimination of the "part-timer." He is a distinct advantage to the business. I object most strenuously, because he could only be eliminated by force, either by pressure on the life companies or by pressure on the government. Methods of force rarely lead anywhere. This is too great a subject for me to dwell on here since a couple of hours could easily be spent on that one subject alone, but let me remind you of two outstanding efforts to accomplish things by force which ended in final disaster. I refer first of all to the efforts of the commonwealth of England to abolish all forms of amusement and the natural reaction which resulted in a reign of licentiousness and immorality not known before or since in the life of England, and the effort of the Germans to impose their will on the human race. I can say no more on this subject now.

12. Finally, I object to the elimination of the "part-timer," because the application of that force is not for the benefit of the public, and because it is immoral since its only purpose can be, as I believe, that the labors of the "part-timer" may be confiscated. Some of you see "part-timers" obtain business which you think you ought to have. Don't you know that the "part-timer" who is not writing his little bit of business for ethical reasons and for the good of humanity, is doing so for economic reasons. He wants to increase his income a little because he cannot make enough in the ordinary way to live as he feels he ought to live. This is part and parcel of the great social injustice of the present social system, that all men have not an equal chance, that adverse environment surrounds some unfortunates so closely that they can scarcely escape from the steel fetters.

You have no more right to object to the "part-timer" on this ground than to the bookkeeper who gets a few sets of books to work upon during an evening, or the dressmaker who makes a dress for her friend after a day's work in the factory. These people are unfortunate and deserve our sympathy rather than our abuse.

You professional assurance men have less cause to complain than perhaps any class on earth. The field for life assurance is unlimited. Less than 15 per cent. of the insurable lives in Canada are to-day insured after all your operations, after all the operations of the "part-timers," and so you have your work cut out good and strong if you would spread the gospel of life assurance to a reasonable number of people during the lifetime of every individual here present. You of all people have no cause to complain.

HAMILTON BANK HAS GOOD REPORT

The annual statement of the Bank of Hamilton for the year ended February 28th, 1919, which was referred to in *The Monetary Times* of March 21st, shows a profit of $571,226. The preceding statement was for a fifteen-months' period, ended February 28th, 1918, and showed profits of $598,522. There is also an item in this year's profit and loss account of $100,000 recovered from other appropriations. With the balance brought forward a total of $903,648 is secured. The sum of $200,000 was transferred to the reserve fund and $173,096 to bank premises account. Dividends at 12 per cent. required $360,000, and, after deducting taxes, contributions to the pension fund, etc., a balance of $85,115 is carried forward. The reduction is, of course, due to the large appropriation made for reserve.

The proportion of quick assets to public liabilities has increased to the gratifying figure of 50 per cent., having risen from $29,616,152 to $35,996,481. Gold and Dominion notes are $8,431,589, as against $6,926,208. The growth in deposits of both kinds has kept pace with the other branches of the bank's expansion, being now $64,377,058, as against $53,359,981, a gain of more than 20 per cent. Some of the principal items in the accounts are as follows, with comparisons:—

	1919.	1916-1918.*
Total assets	$77,404,120	$66,541,680
Quick assets	35,996,481	29,616,152
Cash assets	14,459,766	13,216,799
Dominion-Provincial government sec.	2,263,946	3,295,775
Call and short loans in Canada	4,421,377	3,487,456
Call and short loans elsewhere	....	1,400,000

---

*Fifteen-months period.

ADVANCES TO PACIFIC GREAT EASTERN

In reply to a recent question in the British Columbia house, the provincial minister of railways stated that the government had advanced $1,000,000 to the Pacific Great Eastern Railway since it was taken over by the province; $500,000 of this was advanced on November 23, 1918, and $500,000 on February 5th, 1919. These loans are repayable on May 23rd, 1919 and August 3rd, 1919, respectively. Interest at 5 per cent. is being charged.

AUDITORS' REPORT

In accordance with the provisions of Sub-sections 19 and 20 of Section 56 of the Bank Act, we report to the Shareholders as follows:

We have examined the above Balance Sheet with the books and vouchers at Head Office and with the certified returns from the Branches, and we have obtained all the information and explanations we have required, and in our opinion the transactions which have come under our notice have been within the powers of the bank.

We have checked the cash and verified the securities of the Bank at the Chief Office and at several of the principal Branches during the twelve months covered by this statement as well as on February 28th, 1919, and have found that they agreed with the entries in the books of the Bank with regard thereto.

In our opinion, the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs according to the best of our information and the explanations given us, and as shown by the books of the Bank.

Hamilton, 15th March, 1919.

Nova Scotia Steel & Coal Company, Limited

AND SUBSIDIARY COMPANIES

ANNUAL MEETING

Annual Statement For Fiscal Year to December 31st, 1918.

[illegible] Nova Scotia Steel & Coal Company, Limited, [illegible] the Company at New Glasgow, N.S.

[illegible] Chairman of the Board of Directors, presided, [illegible] attendance of shareholders. In moving the [illegible] Annual Statement for the year 1918, Col. Cantley referred [illegible] to the changes in the directorate and management during the [illegible] highly of the new President, Mr D. H. Mc[illegible] of Nova Scotia, an engineer of repute, who was [illegible] throughout Canada as a man of energy, ability and executive [illegible] order. He congratulated the Company on securing Mr. [illegible], particularly in view of the present unsettled con[illegible] and asked the shareholders to give him the same [illegible] and ungrudging support which during many past [illegible] given to himself.

[illegible] the sudden death of Mr. MacKelvie in August [illegible] personal appreciation of the services he had [illegible] the Company while he was associated with the Board.

[illegible] the adoption of the report, Mr. McDougall stated it was [illegible] to forecast the course of business during 1919, but that it was [illegible] a satisfactory peace treaty had been concluded con[illegible] and the steel markets, along with other business, [illegible] and that the Scotia Company would expect and endeavor [illegible] share of the business which would, no doubt, offer.

[illegible] Mr McDougall said, "As to the collieries, the greater [illegible] of the production [illegible] consumed at the Steel Works, under [illegible] of normal operations, and while at present the demand for [illegible] limited to the domestic supply and the transportation and manu[illegible] requirements of the Province we fully expect that when the St[illegible] operation, its requirements, together with the local de[illegible] the greater quantity of coal required for transportation uses, [illegible] conditions, will keep our mines fully occupied.

"I also believe that the present demand for coal is not representative and that consumers are depending largely on coal which had been stored in expectation of conditions similar to those which prevailed in the winter of 1917-1918. The mild weather, and the conclusion of hostilities have lessened the anxiety of large consumers as to coal supply and they have made free use of their stocks of coal.

"At the ore mines, very good progress has been made since the new haulage slopes have gone into operation and about 1,000 tons of ore are now being raised daily. As, owing to the shipping situation, it is improbable that any considerable tonnage of ore can be sold for delivery in 1919, either to Europe or the United States, it is proposed, in order to continue the development of the mine, that we can store a considerable quantity of ore at Wabana during the year.

"Since the commencement of the war the Company has lost by war or marine disasters four of its long-term chartered steamers, and has at the present time one steamer under time charter of 8,000 tons deadweight. The steamer "Watuka," the last boat built by the Company, has been retained to the Company's service. We purpose, as soon as conditions warrant, to enter the market and charter or purchase ship tonnage we require for our coal and ore trade. The high cost of shipbuilding makes it inadvisable to do this at the present time and we must wait a reduction in the cost of shipbuilding before we can hope to replace the number of ships we have lost.

"It is unnecessary for me, I think, to assure you that your officers are following the changing conditions of business from day to day, not only in Canada, but in Europe and the United States, and advantage will be taken of every opportunity to strengthen the Company's position and forward the interests of the shareholders."

The Board of Directors were unanimously re-elected, as follows:—

J. W. [illegible]
[illegible]
R. M. McGregor
G. S. Campbell
W. Hinckel
T. S. Rogers
L. Stone.
Thos. Cantley
D. C. Jackling
F. W. Ross
Lorne C. Webster.
R. E. Chambers
D. H. McDougall
W. D. Ross
W. H. Chase
J. C. McGregor
Frank Stanfield

At a meeting of the Directors, held at the close of the Annual Meeting, D. H. McDougall was elected President, and W. D. Ross, Vice-Presi-

PRICE, WATERHOUSE & COMPANY. Montreal, March 6, 1919.

We have audited the books and accounts of the Nova Scotia Steel & Coal Company, Limited, and Subsidiary Companies, for the fiscal year ended December 31, 1918, and we certify that, in our opinion, the attached Balance Sheet is properly drawn up and shows the true financial position of the combined companies at December 31, 1918, and that the relative Profit and Loss Account is a fair and correct statement of the results of the operations for the year.

PRICE, WATERHOUSE & COMPANY,
Auditors.

MANITOBA RURAL CREDITS IN 1918

The first annual report of the Manitoba Rural Credit Society was submitted before the provincial legislature recently, by Hon. Edward Brown, provincial treasurer. The St. Andrew's Rural Credit Society was the first organized. It started operations in June, 1917. During 1918 ten societies were in operation at Arden, Lawrence, Glenella, Lansdowne, Minitonas, Roblin, Swan River, St. Andrews, Tenby and Westbourne. Each has an authorized capital of $20,000, with amounts subscribed ranging from $10,700 at Glenella, the smallest, to $16,500, the largest, at Roblin. Some of the societies, the report states, did not begin loaning until the spring season had passed, so that their respective credits do not represent the total which it is anticipated a normal season would show. There is every indication that some of these societies granting limited lines of credit will require much greater ones the coming year.

The total number of loans approved was 368, aggregating $215,581. The following table indicates the needs for which the money loaned was supplied:—

Purchase of livestock	$39,126
Purchase of machinery	17,840
For handling crop	59,981
To finance new breaking	53,465
For seed grain purposes	18,165
For general improvements	5,935
For retiring general liabilities	21,068

Under the heading of "actual accomplishments," the management reports that a conservative estimate indicates that 10,000 acres of new land were broken during 1918, in the rural credits districts. At least five carloads of livestock were purchased by means of loans and much land was cropped which would, under other circumstances, have been idle. "Rural credit societies," the report continues, "have been most effective in new districts." As an example Lawrence district is quoted. This is a country without railways and no banks exist. There were 58 loans made averaging $205 each. The resultant development is evident as one drives through the country.

A bill introduced in the Ontario legislature provides that wherever a tenancy from year to year is created by implication of law, it may be terminated at any time by either party giving the other three months' notice.

BANK AMALGAMATION DISCUSSED IN HOUSE

A statement by Hon. Rodolphe Lemieux in the House of Commons on April 2nd to the effect that he feared that control of money in Canada was becoming too concentrated brought forth from Sir Thomas White a defence of the bank amalgamations which have been permitted since 1911. He maintained that depositors and customers were in a better position than before, and that through larger organization the Canadian banks were in a better position to assist in export trade. He also referred to the many amalgamations that have taken place in the United Kingdom.

Hon. W. S. Fielding stated that there was a fear in Canada that a money trust was being gradually created, and suggested that in future an amalgamation should require the assent of parliament, not merely of the minister of finance and of the governor-in-council.

Mr. Frank N. McCrea, of Sherbrooke, was not sure that the mergers were a good thing. He is a director of one of the largest banks, and made the statement that the banks are getting more out of the people of Canada than the people can afford to pay. He pointed out that not one bank in Canada is paying less than an 8 per cent. dividend. He feared there had been evidence that the banks "have their hands on this government." He said there had been one or two transactions concerning banks which did not appear to him to have been altogether in the public interest.

MONEY MARKETS

ALBERTA MUNICIPAL HAIL INSURANCE SCHEME

Arrangements Now Complete—Sixty-Seven Municipalities Included in Organization

THE reorganization of the hail insurance scheme among the farmers of Alberta, provides for the representation of sixty-seven municipalities in the new Municipal Hail Insurance district, as compared with twenty-six in the old arrangement. This was decided at the convention of the Hail Insurance Board of Alberta at Calgary in March. The old hail insurance district had nothing whatever to do with the new board, and the surplus on hand, as recorded by the old board, amounting to something like $35,000, would be turned back to the various municipalities, by whom it had been subscribed.

Mr. E. H. Malcolm, chairman of the old hail insurance board, in addressing the convention, said that the most cordial relations had always existed between the old hail insurance board and the department of municipal affairs during the past five years, and he looked for the same cooperation of effort between the department and the new insurance district. "During the five years that the old board was in office there was no undue pressure brought to bear by the government on the board in connection with any claims or claimants," said Mr. Malcolm, "and everything worked out to the satisfaction of the people." He said that the new scheme would be a very large hail insurance undertaking and felt that the experience of the past five years would be a great help to the delegates in working out the details of the new plan.

Mr. E. H. Hingley, secretary and manager of the hail insurance scheme in Saskatchewan gave a succinct account of the working of the hail insurance organization among the farmers in the province to the east. He said that the flat rate of four cents an acre, as provided by the act in Saskatchewan, had been found to be too small to meet the losses as recorded each year, and, at a recent convention of the farmers, a resolution was passed which placed the farmers on record as being agreeable to pay as high as 25 cents an acre so that the losses might be met up to date. Mr. Hingley advised the meeting that a rate, sufficiently high to meet the losses, should be levied by the board in the municipalities, so as to guarantee the payments. He spoke against the employment of cheap men as inspectors, pointing out that the most experienced men would not only give better service to every one concerned, but they would also be instrumental in saving the board considerable money each year.

A resolution was passed at the meeting for the new board to accept the responsibility of paying $3.500 expended by the old hail insurance board for the introduction of the new act to the ratepayers.

Annual Report

The two outstanding features of the annual report for the year 1918 were the statements in connection with the decreased acreage in crop as compared with 1917, and the extremely light loss by hail sustained during the year. The total acreage in crop throughout the district in 1918 was 1,022,422 acres, while in 1917 the total acreage amounted to 1,368,528 acres. The total losses for the year were $1,559,725.10, and the only year at all comparable was 1914.

Comparing the difference in acreage between the two years, it is quite obvious that 1918 was a record year. When the books of the hail insurance board were closed on January 31st, 1918, the crop reports for 18 municipal districts for the year 1917, were incomplete. They were completed since that time and the sum of $18,776.40 was added to the assessment for that year. In accord with a resolution passed at the last annual meeting, the board took into consideration the rebating to the various municipal districts of hail taxes found to be uncollectable for the years 1914 to 1917, inclusive. The board allowed rebates for these years amounting to $16,206.90.

The statement of assets and liabilities shows a surplus at January 31st, of $43,968.44.

PUBLICATIONS RECEIVED

Reciprocity and Commercial Treaties.—Published by the United States Tariff Commission. This booklet is a summary of a report by the tariff commission on reciprocity and commercial treaties, and contains the conclusions and recommendations made to Congress.

Round Table for March, 1919.—Canadian articles included in the March issue of Round Table are entitled, "The Position of the Union Government," "Measures of Reconstruction" and "The Situation in Quebec."

Dominions Royal Commission.—The final report of this commission has now been reprinted in a form readily accessible to the general public, and may be obtained at 1s. 6d. from booksellers or directly from H.M. Stationery Office, Imperial House, Kingsway, London, W.C. 2.

Public Accounts of Quebec Province for the Year Ended June 30th, 1918.—These accounts show total receipts for the year of $16,239,611, including money raised by loan to the amount of over $500,000. There was a balance of $999,485. The funded debt outstanding as at June 30th, 1918, totalled $39,827,770; sinking funds amounted to $1,812,115, leaving a net balance of $38,015,654.

Budget Speech of Hon. W. G. Mitchell, Provincial Treasurer of Quebec. This speech was given in the Quebec Legislative Assembly on January 30th, 1919, and was reported in *The Monetary Times.*

Canada's Part in the Great War.—Issued by the Department of Public Information, Ottawa. The information given in this booklet is largely a revision of that given in the booklet issued last year entitled, "Canada's War Effort." It includes statements regarding casualties, military forces, industry and finance.

BANK BRANCH NOTES

The following is a list of bank branches opened recently:—

Fort Rouge, Man.	Merchants Bank.
Kildonan West, Man.	Merchants Bank.
Morell, P.E.I.	Canadian Bank of Commerce.
Bolton, Ont.	Home Bank of Canada.
West Hill, Ont.	Standard Bank of Canada.
Vladivostok, Siberia	Royal Bank of Canada.
Pointe a Pitre, Guadeloupe, F.W.I.	Royal Bank of Canada.

Mr. C. M. C. Brunton, for the past three and a half years manager of the Sudbury branch of the Bank of Ottawa, has been transferred to Arnprior, Ont., to take over the management of the combined branches of the Bank of Ottawa and Bank of Nova Scotia there.

The Canadian Bank of Commerce has purchased property on the corner of Broadway and 12th Street, Nutana, Sask.

The Canadian Bank of Commerce has purchased the property which it has occupied in New York since 1882. This is located at Exchange Place, Beaver and Hanover Streets, known as the Post Building. The price is reported to be $650,000.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended March 27th, compared with the corresponding week last year:—

	Week ended Mar. 27, '19.	Week ended Mar. 24, '18.		Changes.
Montreal	$100,572,938	$ 67,328,775	+	$33,244,163
Toronto	68,497,648	61,881,479	+	6,616,169
Winnipeg	28,685,000	42,286,284	—	13,601,284
Vancouver	10,634,746	9,123,383	+	1,511,363
Ottawa	6,227,892	4,835,864	+	1,392,028
Calgary	5,342,012	6,039,307	—	697,295
Hamilton	4,948,833	4,917,030	+	31,803
Quebec	4,077,274	3,593,808	+	483,466
Edmonton	3,203,035	3,101,872	+	101,163
Halifax	3,490,685	2,997,637	+	493,048
London	2,250,948	2,035,770	+	215,178
Regina	2,709,838	2,962,825	—	252,987
St. John	2,239,584	2,030,678	+	208,906
Victoria	1,946,321	1,697,118	+	249,203
Saskatoon	1,573,069	1,688,994	—	115,925
Moose Jaw	1,237,064	1,100,706	+	136,358
Brandon	588,680	562,302	+	26,378
Brantford	816,501	1,020,542	—	204,041
Fort William	504,165	519,321	—	15,156
Lethbridge	471,322	977,532	—	506,210
Medicine Hat	367,561	493,025	—	125,464
New Westminster	446,145	378,959	+	67,186
Peterboro'	672,791	572,787	+	100,004
Sherbrooke	943,710	842,762	+	100,948
Kitchener	672,565	527,085	+	145,480
Windsor	1,003,460	......		......
Prince Albert	1,336,999	336,077	+	922
Totals	$253,457,326	$223,851,922	+	$29,605,404

The annual meeting of the Cobourg board of trade was held last week. The following officers were elected: W. M. Fox, president; John Henderson, vice-president; J. W. Spragge, secretary.

Exchange of post-office money orders with Belgium, which was suspended in August, 1914, has been resumed, and post-office money orders may now be obtained for payment in that country as formerly.

NEW INCORPORATIONS

McQuarrie. Zimmerman Reliance, Ltd., $2,000,000; F. J. Dunbar, A. G. G. Keith, F. Strong. Canadian Art Production Co., Ltd., $40,000; C. B. Wagner, C. W. Judge, R. Scott. Midland Woodworkers, Ltd., $500,000; W. S. Morlock, S. E. Wedd, R. B. Whitehead. Oliver-Berkley, Ltd., $50,000; H. C. Mendoza, S. E. Marshall, T. O'Loughlin. Western Ontario Coal Co., Ltd., $50,000; A. J. Reid, T. G. Watson, G. N. Limpricht. The Stamped Metal Products Co., Ltd., $6,000,000; W. A. J. Case, G. E. Atwood, J. B. Taylor.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt for the week ended March 28, 1919:—

O'Brien Mine, 64,040; Hudson Bay, 64,708; Kerr Lake, 60,000; Right-of-Way, 65,406; McKinley-Darragh, 150,633; total, 404,787.

The total since January 1st is 5,083,211 pounds, or 2,541.6 tons.

It was declared by Winnipeg business men last week that construction work on the big Hudson's Bay building on Portage Avenue will commence this year. No definite statement can be obtained from the officers of the company there.

The Moratorium Act of Manitoba will not be changed at this session of the legislature. It has been announced that the law amendments committee refused to report a measure reducing the period of protection for land contract arrears from one year, as now obtains, to three months.

February Bank Statement

Savings Deposits Again Over Billion—Dominion Deposits Show Large Decrease—Circulation Also Falls Off—Current Loans Show Growth in Year

	February, 1918.	January, 1919.	February, 1919.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$569,266,642	$ 623,919,410	$ 566,775,434	— .52	—10.1
Deposits after notice	908,822,988	990,000,085	1,018,184,512	+13.2	+ 2.8
Current loans in Canada	859,363,147	1,080,340,861	1,095,301,791	+27.5	+ 1.4
Current loans elsewhere	109,678,140	126,513,338	130,590,063	+19.2	+ 3.2
Loans to municipalities	43,535,628	32,640,198	36,830,183	—16.3	+12.5
Call loans in Canada	76,722,163	87,598,427	79,154,121	+ 3.9	— 9.2
Call loans elsewhere	160,239,494	140,819,656	155,983,681	— 3.1	+10.8
Circulation	181,695,542	226,385,506	210,894,809	+16.1	— 7.1

The above are the principal figures shown by the statement of chartered banks in Canada to the Dominion government as at February 28th. One of the most important changes of the month is the drop in current deposits as compared with the end of January. As compared with the previous year, however, there is little change in the total of these accounts. Savings deposits, on the other hand, show a substantial increase for February and an increase of over 13 per cent., compared with one year ago. Covering a period of six years the record is as follows:—

Feb.	On demand.	After notice.	Total.
1914	$337,516,595	$ 640,927,130	$ 978,443,725
1915	331,415,179	671,088,613	1,002,503,792
1916	389,825,667	827,242,609	1,118,068,276
1917	430,331,801	880,456,637	1,310,788,438
1918	569,266,642	908,822,988	1,478,089,630
1919	566,775,434	1,018,184,512	1,584,959,946

The following table gives record of deposits for the past thirteen months:—

	Deposits payable on demand.	Deposits payable after notice.
1918—February	$565,266,642	$ 908,822,988
March	561,042,236	921,080,803
April	558,509,221	933,644,668
May	535,655,731	947,757,337
June	549,327,078	965,934,556
July	549,068,651	992,015,137
August	554,906,517	1,014,711,865
September	588,940,119	1,037,498,920
October	644,220,998	1,076,514,627
November	666,366,359	939,329,271
December	711,034,060	958,473,557
1919—January	623,919,410	990,000,085
February	566,775,434	1,018,184,512

The trend of the Canadian loans account for the past thirteen months is shown in the following table:—

Loans.	Current in Canada.	Call in Canada.
1918—February	$ 859,363,147	$76,722,163
March	886,995,222	74,257,877
April	884,089,402	77,497,360
May	894,817,113	78,466,582
June	897,226,012	76,970,920
July	905,677,233	74,382,762
August	920,775,269	73,509,571
September	942,802,018	74,137,860
October	1,003,593,603	73,685,136
November	1,082,709,655	85,675,063
December	1,075,640,003	89,120,423
1919—January	1,080,340,861	87,598,427
February	1,095,301,791	79,154,121

The following table shows the principal loan accounts during recent years:—

Feb.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1914	$ 811,711,219	$ 56,052,837	$71,374,602	$141,143,442
1915	771,635,208	43,661,379	67,591,769	89,890,982
1916	760,873,181	56,099,719	81,949,125	139,138,651
1917	813,302,717	86,944,450	78,786,535	162,344,556
1918	859,363,147	109,678,140	76,722,163	160,239,494
1919	1,095,301,791	130,590,063	79,154,121	155,983,681

The following table shows the call loans abroad in February as compared with previous returns:—

	1916. $	1917. $	1918. $	1919. $
January	134,248,552	155,747,476	132,687,066	140,819,656
February	139,138,651	162,344,556	160,239,494	155,983,681
March	141,889,989	161,616,735	167,296,701	....
April	147,146,443	159,156,054	179,818,531	....
May	163,400,659	168,692,675	172,259,879	....
June	182,757,015	159,309,133	170,034,476	....
July	177,121,733	151,875,676	167,112,836	....
August	171,380,353	176,610,625	160,544,990	....
September	173,877,586	166,480,004	159,680,810	....
October	189,346,216	151,018,747	157,040,858	....
November	183,250,389	139,832,552	171,035,732	....
December	173,878,134	134,483,482	150,248,322	....

The statement is given in full on the following pages.

TRUSTEES, EXECUTORS AND AGENCY COMPANY

At the end of 1918 the Trustees, Executors and Agency Co., Ltd., of Melbourne, Australia, had a total of £12,861,050 at the credit of estates, trusts and clients. The paid-up capital is £90,000, and there is a reserve fund of £55,000. The profit for the year 1918, including interest on securities, was £6,046, of which £4,500 was paid out in dividends and £663 added to the balance.

MINISTER MAY PROHIBIT GOLD EXPORT

A notice of a resolution has been given in the House of Commons by Sir Thomas White, providing that the governor-in-council may from time to time declare by proclamation that the export of gold coin, gold bullion and fine gold bars from the Dominion is prohibited, except in such cases as may be deemed desirable by the minister of finance under licenses issued by him. The bill to be based upon this resolution, when passed by parliament, will give the minister of finance more complete control of the export of gold. It is provided that this change in the existing law will be in operation for two years after the termination of the war.

INLAND REVENUE RECEIPTS INCREASE

Inland revenue receipts for the month of February totalled $3,557,699, an increase of more than one million dollars as compared with the same month last year, when they totalled $2,410,435. The two largest items are the excise tax on tobacco, which yielded $1,472,128, and excise war taxes, which brought in $1,226,191.

The Essex Terminal Railway Co. will apply to parliament at the present session for an act authorizing an increase in its capital stock from $400,000 to $1,500,000.

BRITISH COLUMBIA FIRE INSURANCE CHANGE

The British Columbia legislature has passed an act stipulating that fire insurance contracts shall not exceed the term of three years and the insurance of mercantile and manufacturing risks shall, if on the cash plan, be for a term not exceeding one year, but a policy may be renewed by the delivery of a renewal receipt or a new premium note.

Canada's estimated population to-day is 8,825,000, according to an answer given to Mr. Talbot in the House last week. The population last census was 7,671,558.

Of the deposit in Central Gold Reserves $10,500,000 is in gold coin: the balance is in Dominion Notes.

T. C. BOVILLE *Deputy Minister of Finance*

HAMILTON LIFE UNDERWRITERS' ASSOCIATION

Life insurance agents in Hamilton are planning for greater activity through their local organization. Some of the best-known insurance men in the city will address them at early meetings. Mr. C. R. McCullough addressed them at their meeting on March 26th, his subject being "The Life Insurance Man as an Educator."

The new Produce Dealers Act, which will go into effect in Manitoba sixty days after it has received assent, requires that any person desiring to carry on such business in the province shall obtain a license from the minister of agriculture and shall enter into a bond of $5,000 if the application be approved. Licenses will be issued annually, and shall expire March 31st each year.

NEWS OF MUNICIPAL FINANCE

London, Ont.—The tax rate for 1919 will, it is expected, be [illegible] mills. The original estimates would have required 40 mills.

Taber Irrigation District.—The erection of the district by order of the minister of public works of Alberta on August 23rd, 1917, has been validated by an act of the provincial legislature.

Saskatoon, Sask.—The school tax for public school supporters this year will, it is estimated, be 35 mills and for the separate school supporters, 43.40 mills. Last year the rates were [illegible]0.25 and 34.15, respectively. An effort will, however, be made to keep the rate down to 35 mills.

Calgary, Alta.—The finance committee of the school board have passed estimates of $740,000 for 1919. These, however, have to be considered by the board and it is expected that they will be reduced to $714,000. They include provision for the sum of $200,000 of debentures with interest.

Winnipeg, Man.—The city is still desirous of having a civic income tax, and new legislation will be drafted for submission to the next session of the legislature. The city solicitor, Mr. T. A. Hunt, K.C., also suggests that a city taxation commission should be appointed to investigate income tax.

North Vancouver, B.C.—The assessment of the city will be reduced about a quarter of a million dollars. The total assessment for the city now stands at about $9,600,000. It is expected that the rate this year will be five or six mills higher than it was last year on account of the reduced assessment.

Vernon, B.C.—The city tax rate for the year has been struck at 36 mills. This is the heaviest levy ever adopted in Vernon, and is made necessary by large additions to the school estimates this year and the fact that heavy expense must be incurred in connection with the repair and upkeep of streets and roads this season.

Montreal, Que.—The administration commission has approved of the principle of a local improvement tax and arranged to discuss the subject with the city council. It is estimated that $1,000,000 will be required for pavements and $1,000,000 for street repairs this year. The imposition of a local improvement tax is being opposed by Mayor Martin, who maintains that the city's financial condition does not as yet necessitate such a measure.

Fort William, Ont.—The city council has struck a rate of 28.5 mills for 1918. The net requirements for the year will be $683,939, including the following estimates: Committee or controllable expenditure, $174,793; interest and sinking fund, $228,030; schools debenture levy, $40,692; library board, $12,207; parks board, $12,207; hospital board, $24,415; patriotic fund, $20,001; street railway deficit, $31,767; board of education, $139,822.

Alberta.—Legislation is being brought down in the provincial house providing that in future municipalities will collect all taxes in one account with the exception of school taxes. Assessments after 1919 will be made by municipal councils on a basis of valuation instead of by a flat rate as at present. Tax enforcement proceedings, beginning with 1920, will cease, and instead there will be compulsory yearly tax sales of all property upon which taxes are in arrears in the province.

Waterloo, Ont.—Unless a readjustment of the assessment for county purposes is made, there is a possibility of the town of Waterloo withdrawing from the county. The town has a grievance and intends to press its claim to the fullest extent. In comparing the 1918 assessment with that of 1917, it is found that the county's assessment has been increased by $1,600,000, of which amount Waterloo has to bear an increase of about $859,000, or more than 50 per cent. of the total increase. It is further claimed that the town's assessment for county purposes is higher in proportion than that of some of the other municipalities in the county. Should the town not secure an adjustment of the matter, steps towards separation from the county will, it is expected, be undertaken. Amalgamation with Kitchener may again become a live issue.

Calgary, Alta.—The treasurer sees no reason why the city should not anticipate a revenue of at least 25 per cent. of the total through the arrears' sale. The property put up for sale has accumulated arrears of $2,300,000. This will be reduced by elimination of property exempted through moratoriums, that redeemed under the one-fifth clause legislation and other lands held out by the public utilities board for adjustments, to possibly one and a half million dollars the day of the sale. Through the revenue paid in at the sale and that which will come in through the one-fifth payments due to the impending sale the treasurer calculates the quarter receipts.

Regina, Sask.—Provided the city council approves the necessary expenditure, City Assessor R. J. Westgate is laying plans to equalize the assessment on the improvements in the city during the coming summer, in order that from next year the valuation of buildings may be placed upon and maintained on a scientific basis. Mr. Westgate expressed the opinion that the time had now arrived when the assessment of improvements should be made in such a way that there would be no doubt as to the equitability of the valuation. Once the whole city has been assessed on a proper basis, it will be an easy and inexpensive matter, in the assessor's opinion, to maintain the assessment of buildings at an equitable standard. The city assessor has secured a mass of information relative to the standards adopted in a number of the urban centres in the Western States, where conditions are, or have been, somewhat similar to those of Regina, and he is now busily compiling the information and data acquired, with the object of working out standards which could readily be adapted to this city.

The Saskatchewan government is prepared to accede to the requests of the Regina Cyclone Association, and will contribute $150,000 towards the relief of the cyclone sufferers on condition that the Federal government and the city of Regina are each prepared to contribute a like sum. The proposal advanced by the members of the association was that the Federal government, the provincial government and the city of Regina should each contribute one-fourth of the amount of the total debt incurred under the cyclone relief fund, in which event the victims of the cyclone declared they were quite willing to shoulder the balance of the burden, the total of which is estimated to be in the neighborhood of $600,000.

A statement prepared by the Regina city assessor, shows the gross assessment to equal $55,117,260, of which $13,979,630 is exempt for various reasons, leaving a balance of $41,137,630 to carry the tax rate. The total amount of property assessable or the full rate is $35,931,690, the remaining $5,205,940 representing the assessed value of property subject to the annex rate. A special column has to be provided for the assessment of the Grand Trunk Pacific hotel which is assessable only for full general and sinking fund rate at a valuation of $4,040.

An agreement renewing the appointment of the Bank of Montreal as the city's fiscal agents in London, England, for a period of two years, dating from March 3, 1918, was ratified by the city council, March 21st, in the form of a by-law which was given three readings and passed. The by-law was not allowed to go through without some opposition, which developed from the mayor, who objected to giving the bank the exclusive agency so far as the sale of the city's debentures was concerned.

The dispute between the Canadian Express Co. and its employees has been settled by a Board of Conciliation and Investigation acting for the Department of Labor at Ottawa. The board granted an eight-hour day, payment at the rate of time and one-half for overtime and a general increase in the wage scale.

GOVERNMENT AND MUNICIPAL BONDS

The Monetary Times' Weekly Register of Municipal Activities and Financing

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
McGillivray	$ 12,1[illegible]5.00	6	10 inst.	Apr. 7
Kingsley, Sask.	3,500.00	8	10 yrs.	Apr. 5
Saskatchewan	3,000,000.00	5	20 yrs.	Apr. 9
Walkerville, Ont.	45,000.00	6	10 inst.	....

Gananoque, Ont.—The town is contemplating an issue of of $7,[illegible] debentures.

Charlottenburg Township, Ont.—The township will probably issue $150,000 5½ per cent. road debentures.

Moncton, N.B.—$86,000 is needed for street improvement purposes and $200,000 for Moncton School District.

Portage la Prairie, Man.—Messrs. Wood, Gundy and Co. have purchased an issue of $60,000 6 per cent. 20-instalment bonds.

Vermilion, Alta.—Messrs. C. H. Burgess and Co. have purchased an issue of $5,000 6 per cent. 20-year local improvement debentures.

Saskatoon, Sask.—The city council has sold $400,000 of United Kingdom bonds, accepting an offer of $401,875 from Wood, Gundy and Co., of Toronto, the amount to be reinvested in British Columbia 5½ per cent. bonds, provided the Local Government Board grants permission to reinvest the full amount.

Walkerville, Ont.—At the meeting of the council on March [illegible]1st, the tenders for $45,000 of bonds were opened. It was decided not to accept any of the bids, but to again invite tenders. All the bonds, however, will now bear 6 per cent. interest, whereas the previous tenders were for $30,000 6½ per cent. bonds and $15,000 6 per cent. bonds. Fourteen bids were received.

Dewdney Dyking District, B.C.—A bill has been introduced by the provincial government providing for the exchange of $150,000 of debentures of the Dewdney Dyking district. The commissioners of the district have agreed with the bondholders to make the exchange as follows:—

Old bonds.			New bonds.		
$50,000	6 %	20 years	$50,000	5 %	30 years
$80,000	6 %	20 years	$80,000	4 %	40 years
$20,000	6½%	20 years	$20,000	3½%	40 years

The district was further indebted to the Canadian Pacific Railway for construction work to the amount of $25,000, for which the company has agreed to accept bonds (fourth in rank) to the amount of $17,500, due in 40 years, with interest at 3½ per cent. The new act also provides for a sinking fund and tax sales.

British Columbia.—On March 24th a bill was brought down in the British Columbia legislature to authorize the borrowing of $3,500,000. The money will be allotted as follows: $1,500,000 for the construction, extension, diversion or material improvement of important trunk roads in the province or in the construction or material alteration and repair of highway bridges, or in clearing and improving lands for the purpose of the Better Housing Act; $1,000,000 to be paid to the Land Settlement Board; $500,000 to meet the cost of works authorized under the Soldiers' Land Act, 1918; $500,000 to be a conservation fund created for the purpose of carrying out the provisions of the Water Act, 1914, whereby the government is authorized to inaugurate irrigation projects, this latter amount to be utilized chiefly in connection with the South Okanagan land area recently acquired by the government for settlement purposes. Bonds issued under authority of the bill will carry interest at 5½ per cent., repayable not later than June 30, 1945.

Fitzroy Township, Ont.—Messrs. R. C. Matthews and Co. have purchased $7,000 6 per cent. 20-instalment bonds at 103.26, which is on a basis of about 5.61. The following is a list of tenders:—

R. C. Matthews and Co.	$7,228.00
Turner, Spragge and Co.	7,220.50
A. Jarvis and Co.	7,215.60
A. E. Ames and Co.	7,212.80
W. A. Dyment and Co.	7,212.20
J. F. Stewart and Co.	7,206.43
C. H. Burgess and Co.	7,206.00
Brent, Noxon and Co.	7,201.25
Wood, Gundy and Co.	7,201.00
W. L. McKinnon and Co.	7,195.30
Midland Loan and Savings Co.	7,162.00
G. A. Stimson and Co.	7,150.15
Bongard and Ryerson	7,125.00
Canada Bond Corporation	7,124.60
Macneill and Young	7,072.10
Mackay and Mackay	7,015.00
Thos. Moran, Arnprior, Ont.	6,790.00

Burnaby Municipality, B.C.—Provincial authorization will be given for the issue of $400,000 of debentures to repay loans totalling $333,663 from the Royal Bank. These loans were necessitated by arrears of taxes amounting to $496,024. The municipality has acquired at tax sales in 1916 and 1917 lands within the municipality representing tax arrears exceeding $400,000. The debenture issue will be secured upon these arrears of taxes and upon the proceeds of the sale of the lands acquired by the corporation at the tax sales in 1916 and 1917. The debentures are to bear interest at six per cent. per annum payable half-yearly on June 30th and December 31st, and will mature December 31st, 1924. The balance of the proceeds, after repaying the loans to the Royal Bank, will be used for municipal purposes; $24,000 per annum is to be raised by taxation to meet the interest on the issue; the proceeds of the sale of the lands acquired by the municipality or of arrears of taxes are to be deposited to the credit of sinking fund for the re-

Secure More Bids

By inserting debenture advertisements in The Monetary Times of Canada municipal officials get at once into direct touch with all investment dealers who handle municipal bonds—those responsible for the purchase of bonds for insurance, trust and loan companies, as well as most of the discriminating investors.

It means more bids, ensures real competition and the maximum price.

payment of the debentures. Each year, during the term of the bonds, must contribute its proper proportion to the sinking fund, and if the proceeds of sales and tax arrears are not sufficient, taxes are to be levied.

Victoria, B.C.—A bill to enable $500,000 to be borrowed by the governors of British Columbia University for building purposes, was introduced in the British Columbia provincial legislature on March 27th, by Hon. Dr. McLean.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from March 15th to 22nd, 1919:—

School Districts.—*Amphion, $3,500 10-years not ex. 8 per cent. instalment. Clemenceau, $3,500 10-years not ex. 8 per cent. instalment. *Flora, $3,500 10-years not ex. 8 per cent. instalment. Olicana, $2,500 10-years not ex. 8 per cent. annuity. *Scarpe, $2,450 10-years not ex. 8 per cent. annuity. St. Hilaire, $3,700 10-years not ex. 8 per cent. annuity. *Cote, $4,000 10-years not ex. 8 per cent. annuity. Wheat Belt, $2,500 10-years 7 per cent. annuity. *Lipton, $1,000 10-years not ex. 8 per cent. annuity.

Rural Telephone Company.—Mawer, $3,000 15-years not ex. 8 per cent. annuity.

The following is a list of debentures reported sold from March 15th to 22nd, 1919:—

School District.—Lupescu, $500; R. A. Pengally, Cupar.

Rural Telephone Company.—Ethelton, $700; Harris, Read and Co., Regina.

Towns.—Ogema, $1,500; W. L. McKinnon and Co., Regina. Leader, $10,000; Harris, Read and Co.

*Being included in next sale held by the Local Government Board.

Weston, Ont.—The town has sold an issue of $60,000 6 per cent. 20-instalment school debentures, to Messrs. Brent, Noxon and Co. The two highest bidders were R. C. Matthews and Co., of $62,676, and Brent, Noxon and Co., of $62,609.92. The latter firm was awarded the issue, because, when the bid was submitted, they offered to print the debentures, which the municipality did not consider could be done for $70. The following is a list of tenders:—

R. C. Matthews and Co.	$62,676.00
Brent, Noxon and Co.	62,606.92
Wood, Gundy and Co.	62,556.00

BOND COMPANY MOVES OFFICE

The Canadian office of the Drake-Ballard Co., Ltd., has been moved from Moose Jaw to Regina, Sask. The head office of this company, which has a capital and surplus of about $1,000,000, is in Minneapolis. The Canadian branch has a separate charter under the laws of Saskatchewan, and transacts business in bonds, mortgages and commercial paper. Mr. George C. Jones, secretary-treasurer of the company, visited Regina in connection with the transfer. The Moose Jaw office was opened in 1916. The manager in Saskatchewan is Mr. E. A. Warner, assisted by G. H. Thacker.

FRASER COMPANIES BOND ISSUE

Royal Securities, Corporation, Ltd., announces that it has purchased from Fraser Companies, Ltd., the New Brunswick lumber operators, $2,000,000 6 per cent. first mortgage bonds maturing serially from April 1, 1919, to April 1, 1929. It is understood that participation in the underwriting has been given a number of bond dealers, including Eastern Securities Co., Ltd., and J. M. Robinson and Sons.

Though perhaps not so well known to market followers generally as some other large Canadian lumber concerns and pulp producers, solely due to the fact that the company has always been a close corporation, Fraser Companies, Ltd., ranks among the largest Canadian manufacturers of spruce lumber and cedar shingles. The new financing is to reimburse the company for expenditures upon a new 35,000-ton bleached sulphite pulp mill at Edmundston, N.B., which went into operation last December. The new mill is situated in close proximity to pulpwood supplies exceeding 4,650,000 cords, and is strategically located in relation to both the American and British markets. The bonds are secured by a first mortgage on all timber limits, water powers, timber leases and plant, and by a floating charge on all other assets of the company. Assets securing the issue exceed $10,000,000 in value. Average earnings for the past five years, making no allowance whatever for earnings from the new mill, have been sufficient to pay bond interest more than four times. Detailed terms of the offering have not yet been made public. It is understood, however, that Royal Securities Corporation, Ltd., will offer the bonds privately over the course of the next ten days, after which the unsold balance will be offered for subscription by the public.

The Rosebank Telephone Co., Ltd., Rosebank, Sask., is asking for tenders for construction of extension. The acceptance of a tender is subject to authorization and sale of debenture issue.

Investment Opportunities

We own and offer, subject to prior sale, the following attractive Government and Municipal Bonds:—

Victory Loan	5½%	1922-1927-1937

MARCH BOND SALES

Total for Month Shows Decrease—Many Municipal Issues Placed

During March municipal bond sales totalled $1,899,514, compared with $5,946,569 in February and $9,191,643 in March, 1918. The following is the summary of Canadian municipal bond sales, by provinces, last month:—

Ontario	$ 748,063
Quebec	500,000
Manitoba	464,373
Saskatchewan	85,878
British Columbia	55,000
Alberta	33,700
Nova Scotia	12,500
Total	$1,899,514

There were only two provincial issues, totalling $4,580,000, and two corporation issues, totalling $1,505,000. The following is a summary of all Canadian bond sales in March:—

Provincial	$4,580,000
Municipal	1,899,514
Corporation	1,505,000
Total	$7,984,514

The February figure was $17,696,569, and $23,960,587 in January.

LOEW'S TO MAKE BOND ISSUE

Loew's Uptown Theatre has received a provincial charter and will shortly commence erection of a modern playhouse near the corner of Bloor and Yonge Streets. The new company is capitalized at $750,000, and an authorized bond issue of $500,000 6 per cent. 25-year first mortgage sinking fund bonds.

NEW BOND PARTNERSHIP FORMED

A new bond house partnership opened in the Bank of Hamilton Building, Toronto, this week, under the name of Macneill, Graham and Co. Mr. W. C. Macneill was formerly of Macneill and Young, and Mr. J. L. Graham was formerly of Mulholland, Bird and Graham.

Mr. Ralph M. Bird, formerly of Mulholland, Bird and Graham, has opened an office at 159 Bay St., Toronto, under the firm name of Ralph M. Bird and Co.

A bill just introduced into the Quebec legislature provides that every holder of a license to cut timber on Crown lands in the province must have his timber limit patrolled by competent fire rangers, paid and selected by him, but appointed by the minister of lands and forests. In case he fails to do so the minister may select them at the expense of the license holder.

INTERNATIONAL LOAN COMPANY

The sixth annual report of the International Loan Co., Ltd., of Winnipeg, for the year ended January 31st, 1919, shows that $1,021,000 of the $2,000,000 authorized capital has been subscribed, and that $255,267 has been paid up. There is also a surplus of $13,950 over liabilities, which bring the total up to $288,079. Practically all of this is invested in mortgages and agreements, which, with accrued interest, amount to $264,710; cash on hand totals $2,800,000, and organization expense is valued at $21,537, less $2,150 written off, leaving an asset of $19,387 on this account. The report is given in detail elsewhere in this issue.

At the anual meeting, held on March 14th, there were 6,812 shares represented. In his address the president, Mr. George W. Argue, stated that the shares sold during the year amounted to $413,400, and the premium when collected will amount to $41,340. This will be sufficient to pay organization expenses, and also provide a surplus. He anticipates that the demand for loans will be greater very shortly. The company's indebtedness consists merely of a few accounts payable and the balance to be paid out on loans. Its mortgages and agreements are in good condition, as is evidenced by the fact that accrued interest on over a quarter of a million amounted to less than $9,000. Since organization in 1913 the subscribed capital has increased from over $120,000 in 1914 to over $500,000 at the end of 1918.

The object of this company is to have a large number of rural shareholders. Later on it will commence the issue of debentures. Practically all funds are invested in first mortgages on Manitoba farm lands.

WEYBURN SECURITY BANK

Profits of the Weyburn Security Bank for the year ended December 31st, 1918, were about the same as for 1917. The comparative results are as follows:—

	1917.	1918.
Balance brought forward	$ 9,442	$ 4,222
Net profits for the year	74,274	74,343
Dividends	19,266	25,280
Written off bonds	20,712	......
Written off fixtures	3,336	3,842
War tax on circulation	3,597	3,985
Business profits tax	7,582	......
Transferred to reserve fund	25,000	40,000
Balance at credit	4,222	5,457

The dividend rate has been increased from 5 to 7 per cent. per annum, commencing with the dividend payable February 21st, 1919. Two items, namely, the amount written off bonds and the business profits tax, have been eliminated from the profit and loss account this year, making possible the increased dividend rate to be paid, a larger appropriation to reserve and an increase in the amount carried forward.

The balance sheet now shows assets totalling $4,517,119, compared with $4,009,104 last year. Paid-up capital has increased from $385,320 to $421,330 and reserve is now $215,000. Circulation amounts to $400,890, an increase of $63,000. Deposits also show substantial gains.

AGENTS WANTED IN TORONTO

We have vacancies in Toronto for good producers, who want to make more money this year than last. Liberal contracts. Write, stating experience, with reference as to record and character, to

F. C. ALWARD, City Agency Manager

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Canadian Consolidated Rubber Co.—It is announced that the annual general meeting of the Canadian Consolidated Rubber Co., which was to have been held on April 1st, has been adjourned until April 22nd at noon. The annual meeting of the Canadian Consolidated Felt Co. has also been postponed, and will be held on April 22nd at 3 p.m.

Canadian Salt Co., Ltd.—The report for the year ended December 31st, 1918, shows operating profits for the year of $223,342. From this was deducted $24,000 for bond interest, $52,441 for depreciation of buildings and machinery, $13,517 for interest on overdrafts and other items, leaving a net profit of $136,565. This, added to the balance brought forward from 1917, made a total of $587,572. After paying dividends amounting to $64,000, a balance of $523,572 is carried forward. The balance sheet shows assets totalling $2,154,849; $380,000 of bonds are outstanding, and the paid-up capital is $800,000.

Nova Scotia Tramways and Power Co.—At the annual meeting of the shareholders of the company on April 1st, E. A. Robert, of Montreal, and all the old board, except H. R. Mallison, went off the board of directors. A new board, representing largely the Boston interests in the company, was elected. The new board is as follows: W. H. Covert, K.C., Halifax; H. R. Mallison, Halifax; F. B. Adams, New York; F. P. Boyce, Boston; M. L. Sperry, Boston; L. B. Buchanan, Boston; W. C. Crawford, Boston; M. M. Phinney, Boston; Royce Ernst, Boston. The directors will meet later on to elect a president.

Zimmerman-Reliance, Ltd.—The Reliance Knitting Co., of Toronto, and the Zimmerman Manufacturing Co., of Hamilton, have amalgamated, the merger to go into effect immediately, and to be followed by the sale of more stock, probably privately, and by other extensions. The new concern will be called Zimmerman-Reliance, Ltd., with a capital of $2,000,000. The president of the new company will be Mr. F. R. Sweeney, who has occupied that position in regard to the Reliance, and Mr. A. F. Zimmerman will be vice-president and general manager. The combined companies will employ upwards of 600 people.

Kaministiquia Power Co.—Earnings of the company continue to show increases from the levels of the previous year, the February net of the enterprise being nearly $2,000 in excess of that for the same month a year ago. Despite an increase of 4.6 per cent. in operating expenses, the month's net rose from $20,203 in February, 1918, to $22,172 last month, bringing the increase for the four months of the company's fiscal year to $5,395. Profit and loss account, with the balance of $424,197 at the end of the company's year on October 31st last showed a credit at the end of February of $519,256, which, with $43,988 deducted for dividends, left $475,268 to be carried into the March account.

West India Electric Co., Ltd.—The statement for the year ended December 31st, 1918, was submitted to the shareholders at the annual meeting on March 12th. The gross earnings amounted to $298,724, an increase of $7,513. Total operating expenses were $155,237, a decrease of $3,952, the net earnings being $139,487. After deducting $30,000 for bond interest, $7,884 paid to the government, being 4 per cent. tax on railway receipts, and $12,000 rental to the Jamaica Light and Power Co., Ltd., there is left a net income of $89,602, being 11.20 per cent. on capital stock. This has been transferred to the credit of surplus account, to which account has also been added $11,337, being interest on investments. There have been distributed to shareholders during the year four quarterly dividends, amounting to $40,000, which has been charged up to surplus account, leaving a balance at credit of that account of $567,008.

Eastern Car Co.—The annual meeting of the Eastern Car Co. and the Nova Scotia Steel and Coal Co. was held at New Glasgow on March 26th. At the meeting of the former company the directors recommended for payment a dividend of 6 per cent. on the preferred shares. Two years' dividends were due on this stock, and the dividend now declared, and which is payable April 15th, is for the year 1917. It was decided not at this time to pay a dividend for 1918. The company has orders from the government that will keep the shops going for three months. D. H. McDougall was re-elected president, and W. D. Ross, of Toronto, was elected vice-president.

At the Steel company meeting only the ordinary routine business was transacted, and the reports of President McDougall and the directors were adopted. The former directors were re-elected without change. Colonel Thomas Cantley, chairman of the board of directors, presided. The work of overhauling the plant is still going on.

Dominion Foundries and Steel Co., Ltd.—After allowances for depreciation and war taxes totalling $683,886, the Dominion Foundries and Steel Co., Ltd., showed net earnings of $1,228,614. The annual meeting was held at the head office of the company in Hamilton on March 27th, the president, Mr. C. W. Sherman, presiding. The president pointed out that considerable additional profits had been made which would accrue to the company. This was taken to mean war work, on which final settlement had not yet been made. The company is in a strong financial position, having over $1,000,000 in cash and Victory bonds and other quick assets of $1,853,000.

Liabilities for accounts payable and accrued wages total $792,000 and estimated taxes payable are $345,000. In the course of his remarks, Mr. Sherman also stated that the company's output of steel in 1918 was 110,200 tons and its shipments had a value of $13,500,000. There was paid out in wages $3,090,000 and in dividends $595,000.

Fairbanks-Morse Co., Ltd.—The annual statement for 1918 shows that the company experienced a record year. After providing for depreciation, war taxes and allowing a full year's dividends on the preference shares of the company, the balance earned for the common shareholders was $710,097, as compared with $691,973 in 1917, $546,629 in 1916, and $619,048 in 1915. The earnings shown in 1918 represented 44.38 per cent. on the $1,600,000 common stock, against 43.2 per cent. in 1917 and 34.2 per cent. in 1916. Dividends of 18 per cent. were paid on the junior issue of the company in 1918, as compared with 26⅛ per cent. in 1917 and 10 per cent. in 1916. After all dividend requirements were met there remained a balance of $422,097 to add to the amount brought forward from 1917, bringing the total surplus up to $1,762,537. This represents the equivalent of nearly 57 per cent. on the combined issues of $1,500,000 preference shares and $1,600,000 common. A survey of the balance sheet indicates a comfortable financial position and shows several changes from last year. The company ended the year 1918 with $519,861 cash on hand, with no bank loans, and with an excess of current assets over liabilities of more than $4,300,000.

The balance sheet shows an increase of over $630,000 in inventories and nearly $1,000,000 in accounts receivable. Another feature is the disappearance in the 1918 exhibit of any allowance for deferred charges, as against an item of $472,982 carried in the 1917 statement.

YOU MAY BE A RICH MAN, SOME DAY—

Opportunities for making money are many but it takes *time* for capital to accumulate even under the most favorable conditions. Every man of ability expects in the course of years to have sufficient to ensure to his family during their life time the comforts to which they have been accustomed. Unless an unexpected reverse of fortune occurs there is little doubt but that *you* will make money. But "many things may happen" while the money is being made. This is where Life Insurance comes in and makes available the means that would have been yours if health and life had been spared. You will be rich "some day," if you live, but *the Insurance policy will anticipate for your family the accumulations of future years* and render sufficient means available even should you not survive to realize your ambition.

Is your prospective income insured?

The Mutual Life Assurance Co. of Canada
Waterloo Ontario
E. P. CLEMENT, President. CHAS. RUBY, General Manager.

A Question Often Raised

by persons reminded of the benefits of Life Insurance is this "Suppose after paying premiums for several years I find myself unable to continue, do I lose all I have paid?"

The answer is altogether assuring. In the Great-West Life Assurance Company the most ample provision is made for this and every other contingency. After paying three premiums the Policyholder may, if need arises, either

Accept a loan on his Policy of sufficient to pay the next premium
Accept a paid-up Policy for an amount stated in the contract
Extend the Insurance for a given period without the payment of further premiums.

There is no possibility of loss under a Great-West Policy. Rates are low, and the profits to Policyholders remarkably high.

Information on Request.

The Toronto bank clearings for the current week amounted to $74,095,671, compared with $50,990,000 for the same week last year, and $53,548,356 for two years ago.

Casualty Insurance

The Northern Assurance Company, Limited, of England, proposes undertaking this class of business in Canada, and is prepared to consider opportunities for securing a favourable opening

To take charge of this department of its business the Company will require the services of a reliable underwriter with experience in all branches of Casualty Insurance

Applications in accordance with the foregoing will be received and treated confidentially by

G. E. MOBERLY,
Manager for Canada,

Northern Assurance Company, Ltd., P.O. Box 2310, Montreal.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Montreal, Que.—March 5—The premises of the Dominion Glass Co., Charlevoix Street, were damaged. The following companies are interested: Guardian, $8,000; North America, $5,000; Employers, $2,500; Scottish Union, $2,500; Niagara, $7,500; Springfield, $3,500; Ætna, $2,500; Globe and Rutgers, $10,000. Total, $41,500. Loss about $20,000.

Petitcodiac, N.B.—March 14—Details of the fire were given in *The Monetary Times* of March 21st. Estimated loss, $120,000. Insurance as follows: National, $10,000; Home Underwriters, $6,500; Imperial Underwriters, $5,500; Sun, $4,500; Royal, $4,400; Acadia, $4,937; Phœnix of Paris, $3,800; Atlantic Underwriters, $3,730; Norwich Union, $3,740; Nova Scotia, $2,900; Western, $2,000; British Crown, $1,800; Atlas, $1,700; Hudson Bay, $1,080; Hartford, $1,500; British and Canadian Underwriters, $1,400; London Assurance, $1,300; Protector Underwriters, $1,213; British-America, $1,200; Rochester Underwriters, $1,160; Globe Underwriters, $1,000; New York Underwriters, $1,000; Queen, $1,000; London and Lancashire, $1,000; Great American, $580; Quebec, $500; North America, $500; Commercial Union, $500; North British and Mercantile, $500; total, $70,940.

St. Catharines, Ont.—March 14—The garage of Hall Brothers and Co., and contents, were damaged. Total loss amounted to $9,936, with $7,550 insurance. Total salvage amounted to $7,075. On the $902 lost on fixtures, no insurance was carried.

Windsor, N.S.—March 25—The Murphy and Demont Building and the A. P. Shand Building were damaged. The damage is estimated at $75,000, $40,000 for the stocks destroyed and $35,000 for the building. It is only partially covered by insurance. An estimate in the loss of stocks is: Murphy and Demont, $5,000; G. D. Geldert, $15,000; F. E. Harriott, $10,000; C. J. Shand, $3,000; Shand Brothers, $3,000; Singer Co., $2,000; other tenants, $5,000. The insurance included the following amounts: Murphy and Demont, $8,200, of which $1,200 is in the Nova Scotia, $4,000 in Norwich Union and $3,000 in the Guardian; Geldert's Men's Furnishing Co., $2,000 British Empire, $2,000 Norwich Union, $2,000 Halifax and $2,000 Canada National; Y.M.C.A. lunch rooms, $200 in Acadia; Harriott's jewelry store, $4,500.

METROPOLITAN PURCHASE DELAYED

The purchase of the Metropolitan Railway by the city of Toronto has not yet been concluded, and the draft agreement has been criticized by Sir Adam Beck. He objects chiefly to the clause which provides that the grant to the company of a perpetual freight franchise over the city's streets and binds the city to supply rolling stock to transport freight from the north city limits to terminals in the centre of the city. The price involved is $590,000. The line to be purchased is that included in the city limits.

CUSTOMS RECEIPTS SHOW A DECREASE

Dominion customs receipts for the fiscal year ending March 31st show a decrease of $3,209,343. The monthly statement issued by the customs department shows that the total receipts for the 1917-1918 fiscal year amounted to $159,681,046. For the 1918-1919 year they are $156,471,703. For the month of March alone the decrease is $651,361, the total receipts this month being $12,907,498, as compared with $13,558,859 in March last year.

The Canadian newsprint investigation, which was to be resumed on March 31st, will not be commenced until April 9th.

Increase in Fire Insurance Business

Reports of Insurance Department For 1918 Indicate Increase of Ten Per Cent. in Net Amount at Risk — Net Premium Income For 1918 Over $35,000,000 —Net Payments For Losses Over Fifty Per Cent. of Net Premium Income

A PRELIMINARY abstract of fire insurance business in Canada for the year 1918, has just been made public by the Department of Insurance. The figures are given on the following pages of this issue, the totals for 1917 being also included for purposes of comparison.

That Canadian, British and foreign companies have as groups all increased their business will be evident from the figures given below. The progress made during the year by the Canadian companies, however, has not been as great either absolutely or relatively as that made by the other groups.

Net Income Received for Premiums.

	1917.	1918.	Change %.
Canadian companies	$ 4,895,843	$ 5,493,274	+12.2
British companies	16,291,021	18,559,696	+13.9
Foreign companies	10,082,813	11,680,413	+15.8
	$ 31,269,677	$ 35,733,383	+14.1

Net Amount at Risk.

	1917.	1918.	Change %.
Canadian companies	$ 698,047,897	$ 761,834,200	+ 9.1
British companies	2,156,796,666	2,474,168,406	+14.2
Foreign companies	1,140,114,108	1,349,921,301	+18.4
	$3,994,958,671	$4,585,923,907	+14.8

Net Losses Incurred.

	1917.	1918.	Change %.
Canadian companies	$ 2,499,145	$ 2,556,274	+ 2.3
British companies	8,879,196	9,356,676	+ 5.4
Foreign companies	6,068,826	6,334,333	+ 4.4
	$ 17,447,167	$ 18,247,283	+ 4.6

Net premiums written, and losses paid, classified by provinces, were as follows:—

Canadian Companies.

	Net premiums.	Net losses.
Alberta	$ 579,830	$ 230,254
British Columbia	621,740	187,732
Manitoba	669,378	342,880
New Brunswick	290,754	171,926
Nova Scotia	277,500	97,327
Ontario	2,775,821	1,539,871
Prince Edward Island	30,876	5,472
Quebec	1,446,383	728,050
Saskatchewan	786,850	377,294
Yukon	486	958
Totals	$ 7,479,618	$ 3,681,764

British Companies.

	Net premiums.	Net losses.

AMENDMENTS TO COMPENSATION ACT

At this session of the Ontario legislature several amendments are to be made to the Workmen's Compensation Act. One of the important changes is that increasing the allowance to widows and children. The new scale will increase the monthly payment from $20 to $30, and the children's allowance from $5 to $7.50, and the maximum to all dependents from $40 to $60, provided that the 55 per cent. of the average earnings will permit such payments. However, the widow's allowance is never to go below $20, nor the children's below $5, where there is a widow, or below $10 where there is none, except that the total payment to all dependents is not to exceed $40, unless the 55 per cent. of the average earnings admits of it.

Another clause provides for abolishing the exclusion of persons engaged in clerical work from sharing in the benefits of the act. The act, as it stands, not only deprives persons in clerical work of the benefits of the act, but also causes great difficulty in dealing with both claims and assessments. This change, however, will not come into effect until the beginning of the year.

In future no compensation is to be paid to residents of enemy countries. Unless these dependents have foresworn their allegiance to their native land and become citizens of Canada they would not be entitled to the pension ordinarily paid. This provision also applies to countries voluntarily forsaking alliance or failing to establish peaceful relations with the Empire.

It is also stipulated in the amending act that the principal contractor is responsible for notifying the board of all sub-contracts made, and of seeing that assessments under the sub-contracts are paid. Allowance is also to be made for the providing of artificial limbs for injured men. Provision is made, too, for appeals in certain cases. All restrictions will be removed on the payment of medical expense, and in future the government will meet the entire cost of medical attention.

PERSONAL NOTES

Mr. Richard B. Holden has opened a brokerage office in the King Edward Hotel, under the firm name of Messrs R. B. Holden and Company.

Mr. W. L. Smith, of Saskatoon, has been appointed on the inspection staff of the Saskatchewan Farm Loans Board, with headquarters in Saskatoon.

Mr. G. W. Allen, of Winnipeg, has been elected to the directorate of the Canada Cement Company, to fill the vacancy caused by the death of the late Geo. E. Drummond.

Mr Henry Detchon, general manager of the Canadian Credit Men's Association, has been in Vancouver in connection with the business of the Association in British Columbia.

Right Hon. Sir Auckland Geddes, K.C.B., M.D., has been appointed vice-chancellor and principal of McGill University, Montreal, in place of Sir Wm. Peterson, who resigned.

Mr. W. W. King, recently appointed manager for the Mutual Life of New York for the three prairie provinces, has arrived at Winnipeg from the east, and assumed his new duties.

Mr. S. P. Porter, executive agent of the Grand Trunk Pacific Railway, has been appointed assistant to the general manager, with headquarters in the Department of Railways and Canals, Ottawa.

Mr. Russell D. Bell, a member of the firm of Greenshields and Company, Montreal, has recently returned after serving in the United States army. Mr. Bell has been a frequent contributor to the columns of *The Monetary Times*.

Mr. L. R. Kennedy, from the head office of the British Crown Assurance Co., London, Eng., is now in Toronto, and will be leaving shortly for Vancouver to assume the managership of the Eagle, Star and British Dominions Insurance Co., Ltd.

Mr. Gerald H. Bruce has been admitted to partnership in the firm of Oswald Brothers, members of the Montreal Stock Exchange. Mr. Bruce has been office manager of the firm for some time past, and has been on the staff for the past nine years.

Mr. C. C. Paull has been appointed Toronto inspector for the General Accident Assurance Co. of Canada. He was originally in the Toronto office of the London Guarantee and Accident Co., and for the past seven years has been inspector in Alberta for the Guardian Assurance Co.

Mr. F. G. Haynes, who has been with the General Accident Assurance Co. of Canada for the past eleven years, recently as manager of the automobile and monthly accident departments, has entered the service of the Canadian Surety Co. as branch manager for Ontario, with offices at 26 Wellington Street East, Toronto.

Mr. George W. Pacaud, Montreal, has been appointed general agent for the Fidelity-Phenix Fire Insurance Co. for the Island of Montreal, with the added privilege of underwriting throughout Quebec province. He retains his present connection with the National Fire Insurance Co., however, for which he is general agent in the province. The item in *The Monetary Times* last week read as if he had severed his connection with the National.

Mr. C. O. Stillman was unanimously elected as president of the Imperial Oil Company at a meeting of the directors held on April 7th. Mr. Stillman became director and superintendent in 1899, was made general superintendent in 1901, assistant general manager in 1910, and vice-president in 1911. The vacancy on the board caused by the death of the late Hon. W. J. Hanna, was filled by the election of Mr. A. M. McQueen, who will occupy the position of vice-president.

OBITUARIES

Mr. Guy F. Warwick, who for many years was identified with the firm of Warwick Bros. and Rutter, which was founded by his father, died suddenly on April 4th, at his residence, 24 Bloor Street East, Toronto.

Mr. George Ross, one of the best known lawyers in the north country, and for more than ten years town solicitor of Cobalt, died on April 3rd, in the Haileybury Hospital, twenty-four hours after his arrival there in a serious condition.

Mr. John R. Hegeman, president of the Metropolitan Life Insurance Company, died at his home at Oriental Point, N.Y., on April 6th, after an illness of two years. He was 74 years old. Mr. Hegeman had extensive interests in many other financial institutions.

Cecil S. Wainwright,
Secretary, Western Assurance Company

Gideon Grant,
Recently elected a Director of the Standard Reliance Mortgage

C. O. Stillman,
President, Imperial Oil Company

A REACTION FROM PUBLIC OWNERSHIP

IN spite of the practical increase of public ownership, there has recently developed a powerful undercurrent of belief in the superiority of private ownership. Such a belief can be stimulated not by theoretical argument, but by actual examination of comparative results. The arguments in favor of public ownership are incontestable, and, theoretically, public ownership and management is the logical method of operating an enterprise which is not distinctly competitive. This includes transportation, public utilities and some lines of manufacture. The defects of public ownership become apparent by actual demonstration, and Canadians have had sufficient experience in public enterprise to perceive that we have had our full share of failures of this kind. All parts of Canada have had to contribute to the recurring deficits of our government railways; some provinces have had to meet similar annual bills; and a large majority of our municipalities have encountered failure in the attempt to successfully operate enterprises. These results cannot be continually hidden, but, sooner or later, impress upon the taxpayer the foolhardiness of a burden unnecessarily self-imposed.

The practical expression of this opinion may not be far distant. Already much of the opposition of the government acquisition of the Grand Trunk arises from a distinct recognition that the national system cannot pay for many years, and that any addition to it will probably increase the annual drain upon the public treasury. In Toronto the purchase of the street railway system upon the expiration of the franchise in 1921 is no longer an accepted fact, but is still an open question. Even in the west, which has taken a lead in public enterprise, the superiority of private management is acknowledged, and recognition is given to the desirability of reaching an equitable arrangement with private enterprise. Such an arrangement is not impossible; its practicability has been demonstrated in the case of the Montreal street railway system. The disciples of "service at cost" have received much criticism at the hands of the public ownership press, but they are at least championing a fair method of harmonizing the legitimate interests of the investor with the requirements of the public. That we have too many instances of profit-making on paper investments is unquestionably the case, but this is no argument for eliminating interest return on legitimate investments. The public control of many classes of enterprise has become essential as a result of a solidarity of modern economic organization. State ownership practically precludes the possibility of such control and opens up a vast field of incompetence and patronage unknown to private management. Taxpayers constitute the majority of the voting power in Canada, and their new viewpoint, based on actual experience, is already becoming apparent.

ECONOMIC EFFICIENCY AND THRIFT

THERE is one aspect of the thrift movement which is too often, in general, overlooked. In the first place, thrift is not a virtue to be practised for a brief period, and for its own sake merely, but a sustained effort made by all the people for the rehabilitation and safeguarding of the economic life of the country. It is hardly necessary to point out that thrift and hoarding are poles apart; that thrift does not involve parsimony and a mean attitude to life, but the mobilizing of our financial forces for the attainment of certain definite objects. The capital saved must be put to productive uses, to the payment of war debts and of pensions, and the like. In this way it will return to industry and commerce and lead to the strengthening of the Dominion's economic life.

Advices from Ottawa foreshadow a big spending year for the fiscal period 1919-1920. No one will object to that even if expenditures reach the sum of $800,000,000, as is forecast by some press correspondents at the Capital. A bold and vigorous policy must be pursued by the government in constructive expenditures: what must be sternly guarded against is the tendency to spend merely for its own sake. Mr. R. H. Coats estimated recently that the savings of the Canadian people during the year 1918, amounted to $800,000,000, and that their total income for the same period was not less than $2,400,000,000. Falling prices will reduce that income in terms of dollars, but not necessarily in terms of purchasing power. The significant fact in this connection is that our net national debt by the close of the fiscal year ending March 3st, 1919, will amount to approximately $[illegible],000; and that, as prices continue to decline, it will become increasingly difficult with a stationary or falling income to meet principal and interest payments. The need for thrift, then, is imperative.

But thrift involves much more than the saving of money by cutting down expenditures, if it means that in any great degree whatever. It involves far more, namely, increased efficiency in production, in the sales organization of every business, and in management. Scientific management has come in for much criticism, of late, at the hands of labor leaders and others; but Canadian business and agriculture can stand a much more intense application of the principles of scientific management before the danger point is reached.

The Dominion has achieved remarkable results during the war by speeding up industry and more fully employing the available labor force. This continent is destined to become, perhaps, the most powerful productive unit in the world, not mainly or chiefly because of its vast natural resources but because of its trained and educated labor force ably led. Because of Canada's intimate economic relationship with the United States what has been achieved there is of surpassing interest to our own people. A recent writer—Mr. Norman Bruce in Forbes Magazine—points out that although the Republic has but six per cent. of the world's population and only seven per cent. of the world's land area it produces the following percentages of the total output of essential or primary products: Copper, 70; oil, 66; corn, 75; cotton, 60; silver, 33; gold, 20; coal, 52; iron and steel, 40; and 85 per cent. of the world's output of automobiles and motor trucks. The United States owns and operates 40 per cent. of the railroad mileage of the world; and perhaps no other factor has had so important a bearing upon the position of supremacy to which, in certain lines, it has raised itself.

In the discussion that is now proceeding everywhere, then, concerning the necessity for thrift let it never be forgotten that efficient production and distribution is the most important aspect of the entire problem. For efficient production means not only the economizing of capital and the more effective employment of labor, but lowered costs of production, a larger output and, hence, the ability on the part of employers to keep wages and the standard of living high. Thrift, in a word, means not merely saving, but also, making money by the effective and loyal co-operation of all.

FINANCING DEVELOPMENT OF MINES

"No law that does not recognize the hazard capital takes in development of mineral properties can be satisfactory. When a company develops one property successfully, there is too often a demand that the operators should not be allowed to make large profits. The public seems unwilling to admit that those who spend money in developing mineral deposits should be greatly rewarded if successful. Our contention is that the only justification for the large expenditures which are made for exploration and development is that those who are successful are well repaid for their enterprise."

This paragraph, from the "Canadian Mining Journal" of March, gives a concise statement of the relation of capital to the mining industry. It is used therein in connection with the subject of royalties, but the peculiarities of this industry are equally worthy of consideration, when restrictions on the sale of securities are being discussed. It is almost impossible to say whether an issue of mining securities offers a fair return to the investor, because mining development, especially in the case of a new property is essentially a speculative enterprise, and the results cannot be ascertained until a substantial investment has been made. Only a fraction of mining promotions are successful and returns in these cases must repay, not only the expense of developing them, but also of developing unprofitable enterprises, otherwise investors would not touch shares of this class.

CHARTERED ACCOUNTANTS CONVENTION

The 1919 convention of the Dominion Association of Chartered Accountants will be held in Winnipeg in September. The 1910 convention of the association was also held in Winnipeg.

Mr. John Parton, of Winnipeg, is president this year. At a recent meeting of the Manitoba Institute the plans for the convention were discussed. Mr. S. G. Brown, chairman of the local publicity committee, reported that a beginning had been made. Committees of various kinds have been appointed and a programme prepared.

ONTARIO MORATORIUM EXTENDED

The moratorium in Ontario will remain in force for another year. A bill was introduced into the house by Mr. Z. Mageau, and given its first reading on March 28th, providing for the repeal of the act on July 1st, 1919. The bill was dropped on April 4th, however, when it came up for a second reading, after unfavorable expressions of opinion had been delivered from both sides of the house. Mr. Mageau contended that borrowers in the province were in just as good, if not a better position to pay than ever before, and that the moratorium had merely resulted in many people avoiding their debts when they were in a position to pay pay them. Hon. I. B. Lucas, attorney-general, referred to the fact that an extension of the moratorium had been indicated in the lieutenant-governor's speech from the throne and he considered it advisable that it should remain in force at least until the complete demobilization of the Canadian forces. A new bill will probably be introduced this session by the government, however, providing for a graduated repayment of overdue obligations.

CANADIAN RAILWAY STATISTICS

Statistics of Canadian railways are compiled at Ottawa by the Comptroller of Railway Statistics. This work is separate from that of the Dominion Bureau of Statistics which is under the Department of Trade and Commerce.

When the Consolidated Railways Act was before a special committee of the House of Commons on April 7th, the minister of railways, Hon. J. D. Reid, explained that this separation is necessary because the compilation of statistics is a part of the railway business. Hon. Charles Murphy said that Hon. A. K. Maclean had stated in the House that it was proposed that all statistics should be controlled in future by the Department of Trade and Commerce. He suggested, therefore, that this clause should stand over until the two ministers had an opportunity to discuss the subject and the minister of railways agreed to the proposal.

WESTERN TRUST COMPANY

The annual meeting of the Western Trust Company of Winnipeg was held on April 2nd. The profit and loss statement shows a reduction compared with last year, the profits being $71,008, while in 1917 they were $82,500. A balance brought forward increased the total available to $127,344. $50,250 was paid out in dividends at the rate of five per cent. per annum, the same as last year; $20,000 was transferred to reserve against investment in subsidiary companies, and $8,617 set aside to pay the business profits war tax for the year 1915, and the income tax for the years 1917 and 1918. This left a balance carried forward of $48,476.

Assets total $2,368,338, of which $1,151,184 are on capital account, about sixty per cent. being invested in real estate mortgages and accrued interest. The amount of estates and agencies under administration at the original or estimated valuation is $6,430,046.

LARGE TERMINAL SCHEME AT THE COAST

A proposed rail and water terminal scheme was explained to the Vancouver city council last week, but the city has no jurisdiction over such questions, the railway commission being the deciding body. The proposal is to spend $25,000,000 on a terminal scheme on the site of the Hastings mill. A part of the plan is to have an electric railway system connecting Vancouver and Portland via Seattle. Alderman McRae, Alderman Owen and Alderman Kirk were appointed a committee to go into the scheme.

PROVINCIAL LOAN ASSOCIATION MEETINGS

Following the annual convention of the Dominion Mortgage and Investments Association on March 28th, similar meetings of the provincial associations in the west are to be held shortly. That of British Columbia will be held in Vancouver on April 15th; the Alberta Association will meet in Edmonton on the 25th; the Saskatchewan Association in Regina on the 29th; and the Manitoba Association in Winnipeg about May 6th. Mr. John Appleton, the secretary-treasurer of the Dominion Association, has just left for Vancouver to attend the meeting there.

REDUCTION IN HYDRO RATES

It was announced by Sir Adam Beck this week, that the power charges made by the Hydro-Electric Commission would be reduced. This will benefit fifty-one municipalities in Ontario. The decision to cut rates was made after a consideration of the surpluses credited to the various local commissions upon the business of the past year, surpluses that indicated that the commission can cut approximately $75,000 from its power charges for the ensuing year and still collect enough to meet the cost of power and make all allowances for interest on capital invested, operations, sinking funds, etc. The reductions will range from 50 cents per horse-power to $7.74, the maximum reduction going to the village of Lucan. The greater part of the municipalities get a reduction of from $1 to $2 per horse-power. These reductions, coupled with successful operations by the municipal systems, will make it possible for the provincial commission to recommend a fairly general reduction in rates to consumers.

INSURANCE COMPANY COMING TO CANADA

Mr. J. S. Charteris Black, foreign superintendent for the Insurance Office of Australia, Ltd., is in Canada looking over the field with a view to securing agents here for fire and marine business. He is at present at the King Edward Hotel, Toronto. He has already visited Ottawa and Montreal, previous to which he was in New York. The Insurance Office of Australia, Ltd., was established in 1910 and has its head office in Sydney, N.S.W. It writes fire, marine, accident, and, in fact, practically all business excepting life. Its organization already thoroughly covers Australia and it is the intention to make a considerable extension into the foreign field. For the year 1918 the company had a gross premium income of £[illegible] and a net premium income of £229,500. Its loss ratio was 48 per cent., and its expense ratio 27 per cent. It was able to appropriate £32,000 to a special reserve and £[illegible]1,000 to a general reserve. The company has an authorized capital of £250,000, of which £96,291 is already paid up. It is the intention, however, to increase the paid-up capital to £1[illegible]0,000. The Insurance Office of Australia, Ltd., is a tariff company, and a member of the Fire Officers' Committee, London, England.

The Federal Insurance Co. will shortly commence to write hail insurance business in Canada, with Carson and Williams Brothers, of Toronto, as agents. The company's head offices are in New York and Jersey City. Its capital is $1,000,000 and surplus $1,321,964.

PRESSED METALS COMPANY'S ISSUE

Announcement has been made to the shareholders of the Pressed Metals Co. of Canada of the issue of 1,031 shares of 8 per cent. preferred stock to be offered to shareholders at $125 per share, with a bonus of 100 per cent. in common stock. This will be in a ratio of one share for every fifteen shares of old stock held, and will be open to shareholders of record April 15th.

NEW TRUST COMPANY IN CANADA

A trust company will shortly be organized by the Merchants Bank to do business under the name of the Bankers Trust Co. It will occupy temporary quarters in the Merchants Bank Building, Montreal, and it is expected that it will be open for business on May 1st. Branches will later be established at various centres in Canada. The manager of the company will be Mr. James Elmsly, formerly with the Bank of British North America.

COMMISSION ON INDUSTRIAL RELATIONS

The Dominion commission to investigate industrial relations will consist of two representatives each of employers, of the employed and of the public. The members of the commission are: Chief Justice Mathers, chairman; Senator White and Charles Harrison, M.P., representing the public; Carl Riordon, president of the Riordon Pulp and Paper Co., Montreal, and T. Pauze, lumberman, Montreal, representing the employers; Tom Moore, president of the Trades and Labor Congress of Canada, and J. W. Bruce, member of the Labor Appeal Board, Toronto, representing the employees. Thos. Bengough, Toronto, will be secretary of the commission.

The commission's enquiry will begin immediately after Easter, and the time within which it will render its report has been extended to June 1st, instead of May 15th, as originally contemplated. The hearings will probably begin in British Columbia.

BUDGET SPEECH FIRST WEEK IN MAY

The budget speech of the Canadian minister of finance will be late this year, and it is expected that it will be delivered during the first week of May. On the 8th inst., a financial statement was issued for the fiscal year ended March 31st. The revenue for this period was $305,230,808, and the expenditure $196,073,805, leaving a surplus of nearly $110,000,000, which will be devoted to the capital war expenditures. The revenue last fiscal year was $252,372,508 and the expenditure $141,989,541. The war cost us last year $347,842,274, or slightly under a million a day. In 1917-18 the war cost Canada within a few dollars of three hundred millions.

The chief increase in revenue during the year was due to income and business war taxation, the revenue from these sources totalling between sixty and seventy million dollars, as compared with under thirty-five millions last year. Customs revenue for the year showed an increase of three million dollars. The problem of raising our revenue if the tariff is abolished is emphasized by the financial statement. The customs brought in $147,740,215 or nearly 50 per cent. of the total Dominion revenue.

The national debt keeps piling up. On March 31 the total net debt was $1,438,377,293, an increase of some three hundred millions for the year. On March 31, 1918, the total net debt was $1,101,394,023. The prediction has been made that by the time demobilization is completed the debt will reach two billions and the prediction seems likely of fulfilment.

A subscriber is anxious to secure issues of *The Monetary Times* of February 8th, 1918, March 15th, 1918, and July 26th, 1918. Subscribers sending these copies to this office will have their subscription extended one month.

DOLLAR EXCHANGE HAS EXPANDED

Has Made Great Progress as a Medium of International Settlement—Pound to Some Extent Supplanted

SPEAKING before the annual convention of the Association of Reserve City Bankers at New Orleans on [illegible] 1st, Mr. D. H. G. Penny, vice-president of the National Bank of Commerce, New York, dealt with the progress made by the dollar exchange. He said:—

"The United States has displaced England and all other pre-war creditor countries in supplying long time money for the financing of industry and transportation. 'Dollar Exchange' is a war time development. International exchange is concerned with making payments between different countries each having a different currency. Before the war, if a Brazilian merchant sold to an American importer the settlement was made neither in Brazilian currency nor in American dollars, but in pounds sterling, bills or drafts drawn on London. The great instrumentality of international payments was bills of exchange or acceptances drawn on London banks or acceptance houses. Dollar exchange was not quoted officially in Buenos Aires or the other principal markets in South America. The volume of dealing in various kinds of foreign exchanges in Buenos Aires prior to 1914, would rank in the following order:—Pounds sterling, Reichsmarks, Paris francs, Belgian francs, United States dollars; sterling represented more than 50 per cent. of the total.

"During the war dollar exchange has made remarkable progress in dealings in South America and the Far East. It is more readily negotiated in Japan and China than any other exchange. Closely allied to dollar exchange and leading directly to an extension of dollar exchange is what is known as 'direct exchange.' For example, we are doing business with Argentina, Greece, Japan and other foreign countries in their own moneys now. Reversely, they quote dollars in their markets and make payments to us in dollars. This makes it easier for them, moreover, to make payments to some third country in dollar exchange and so furthers the use of dollar exchange. The following exchanges are among those now quoted in New York which were not quoted there before the war: Brazil, Argentina, Greece and India. At the present time every foreign bank of consequence has one or more accounts in the United States, whereas before the war many foreign countries had no correspondents at all here.

Use of Acceptances

"Prior to 1914, bank acceptances in the United States were unimportant, and we consequently lacked the instrumentality for making dollar exchange an important factor in international operations. Since the inauguration of the Federal Reserve System, however, the growth in the volume of bank acceptances has been rapid. Bankers' acceptances purchased by the Federal Reserve Banks amounted to only $93.000 in February of 1915. By February, 1918, the figure had reached $294,000.000. On August 31st, 1918, the total acceptance liabilities of member banks of the Federal Reserve System were $522,000,000. The total for all banks in the country may well have been $750,000,000, or three-fourths of a billion. Of our bank acceptances something over half are employed in foreign trade. In the New York discount market for dollar acceptances the margin of profit is now about 1/64 of one per cent., which is about the same as the pre-war margin on sterling. After the war we must take many a leaf from London's book. Our commodity markets must be made more liquid. Our stock market must be prepared to take foreign securities and must deal in a larger list of securities. We are far behind London in the range and scope of both commodity and stock dealings, although the volume is large. We need not feel called upon, however, to extend dollar exchange at the expense of our friends across the water. The recent break in sterling exchange gives America a great opportunity both to aid London and to extend dollar exchange throughout the world. London's embarrassment is temporary. Great Britain is still doubtless a creditor nation. She had about $20,000,000,000 of foreign investments before the war. She has loaned $9,000,000,000 more during the war to allies. On the other hand, she has sold perhaps $5,000,000,000 or $6,000,000,000 of her foreign investments and has borrowed $5,000,000,000 or $6,000,000,000 more during the war, leaving her with a net creditor position of, say, $17,000,000,000. She has large floating liabilities, however, unfunded and on short time, which are temporarily embarrassing.

"Although long time interest rates on investments will remain high after the war, short time money rates on prime acceptances and on call money may be expected to go low for a period of a year or more as a consequence of our excessive gold holdings. During this time New York may well be the cheapest market for financing international trade, and dollar exchange may be widely extended, breaking down old trade habits and inertia which have favored sterling. After that England and the United States will compete in this matter fairly on their merits. It is legitimate and proper that we should compete with England by fair methods in any field that we choose to enter, but let us not forget that brave old England has borne the heat and burden of the day. Let us remember, too, on the financial side, the dark days of 1893, when the gold standard was imperilled and when that courageous statesman, Grover Cleveland, with only $20,000,000 in the treasury continued to pay out gold on demand, relying upon relief which the London market afforded in checking the international drains upon our gold. England has been generous to us in the past, and England deserves well of us to-day.

"Whether or not we displace England in the short term money market in financing the actual shipment of goods from country to country, we have displaced her and all the pre-war creditor countries in supplying real capital, or long time money, for the financing of industry and transportation. To accumulate long time capital we must produce more in a year than we consume in a year. In saving capital our people will not merely be making individual profit, but they will also be performing services both to their country and to humanity of a vital sort. Civilization has been saved from Germany, but it must now be saved from poverty and economic shipwreck. The whole world looks to America, and America will not be found wanting."

NEW BROKERAGE FIRM AT WINNIPEG

N. T. McMillan, R. R. Pattinson and J. J. McMillan have formed a stock and bond business, and will trade under the title of McMillan, Pattinson and Co. The members of the firm are members of the Winnipeg Stock Exchange, and will deal in stocks, bonds and company flotations. The offices are in the McArthur building.

GUELPH CHAMBER OF COMMERCE

The board of directors of the Guelph Chamber of Commerce held their first meeting on April 7th The following officers were unanimously elected: President, J. M. Taylor; first vice-president, E. A. Macdonald; second vice-president, F. E. Partridge; treasurer, H. Westoby. The position of honorary president was created, and has been tendered to Mr. J. W. Lyon.

CANADIAN PACIFIC STOCK IN ENEMY HANDS

About $22,000,000 of stock in the Canadian Pacific Railway Co. is registered in the names of enemy shareholders. The Dominion government has asked in the courts to have the Minister of Finance or the Receiver-General of Canada appointed custodian for this stock. This action was taken by the Secretary of State under the order restricting trade with the enemy which was passed in 1916. The number of shares involved is 143,676, most of it being held by German banks.

New Fraternal Insurance Restrictions

Dominion Bill Aims to Place Organizations on Sounder Actuarial Basis—Societies Must Have Full Reserves by 1925

A BILL which was read in the Canadian Senate a first time on March 24th, imposes new restrictions on the insurance operations of a fraternal society. This act, if passed, is to come into force on January 1st, 1920. It is in the form of an amendment to the Insurance Act, 1917. A "fraternal benefit society" is defined as a corporation having representative form of government and incorporated for fraternal, benevolent or religious purposes, among which is the insuring of the members or their dependent children against sickness, disability or death.

Sections 105 and 116 inclusive of the Insurance Act, 1917, are repealed and new sections are substituted. The new clauses do not apply to any such society incorporated under provincial law and not licensed under the act for the Dominion of Canada. Fraternal benefit societies which are already licensed or registered under the Insurance Act, 1917, at the time when the amendment comes into force, shall be considered as being subject to the amendment.

Before a license is issued to a society it must file with the superintendent, in addition to the documents already required by the act, a report of an actuary appointed by the society, stating the results of an actuarial valuation as required by the superintendent. An actuary is defined as a Fellow of the Institute of Actuaries of Great Britain, the Faculty of Actuaries of Scotland or the Actuarial Society of America. The report is to include a declaration by the actuary that in his opinion the assets of the society applicable to its various funds and the premiums, etc., in accordance with the scale in force, are sufficient to provide for the payment of all obligations at maturity. Each society is also to deposit in securities $10,000 before the issue of a license. Foreign societies which have heretofore transacted insurance business in Canada and are unable to furnish such actuarial declaration may receive a license if their premium rates are adequate in the opinion of the Superintendent of Insurance. Provincial societies may receive a license if they deposit securities at least equal to the reserve on such policies as are issued from time to time thereafter; the reserves are to be calculated as the superintendent deems proper and at a rate of interest not exceeding four per cent. On and after March 31st, 1925, however, a full actuarial statement must be submitted. In the case of a society with head office outside of Canada, its liabilities are to be considered as those incurred by policies in Canada, and reserves are to be calculated accordingly.

If it appears to the superintendent that the reserves of any society are insufficient, he is to make a special valuation of the policies of the society and if he is confirmed in his opinion he is to report accordingly to the minister. The latter, if he agrees with the superintendent, is to request the society to make such changes as will be necessary to make good the deficiency. Changes may be made by the society in accordance with such a request, notwithstanding anything to the contrary in its special act. If it does not comply with the request, its license will be withdrawn. A statement of the society's affairs, based on the figures submitted to the department, is to be mailed to each policyholder, by the society, not later than June 1st each year.

Life Insurance Policies

No policy of life insurance is to be issued by a society until a copy has been mailed by prepaid registered letter to the superintendent. Every such policy is to contain in substance the following terms or provisions:—

(a) It shall specify the amount of the benefit or benefits provided thereby, and shall have printed in type not smaller than ten-point a provision that the policy, the charter or articles of incorporation or association, the constitution and laws of the society and all amendments to each thereof, together with the application and medical examination paper signed by the applicant, shall constitute the agreement between the society and the member, and copies of the same certified by the secretary or corresponding officer of the society shall be received in evidence of the terms and conditions thereof, and any changes, additions or amendments to said charter or articles of incorporation or association, incorporated under the laws of Canada, duly made or enacted subsequent to the issuance of the policy or certificate, shall bind the member and his beneficiaries and shall govern and control the agreement in all respects the same as though such changes, additions or amendments had been made prior to, and were in force at the time of, the application for membership, unless otherwise provided in such change, addition or amendment.

(b) It shall have printed as aforesaid a provision that the right is expressly reserved by the society to change by amendment if its by-laws constitutionally enacted the rates of premium payable by the members or the benefits payable by the society for the purpose of complying with the provisions of any statute law applicable to the society.

(c) If the policy is issued by a society incorporated, and having its head office, outside of Canada, it shall provide that an action to enforce the obligations of such policy may be validly taken in any court of competent jurisdiction in the province wherein the policyholder resides or last resided before his decease.

ALBERTA HAIL INSURANCE BOARD MOVING

The offices of the Alberta Hail Insurance Board in Edmonton have been closed and moved to Calgary. Under the terms of the new act the headquarters of the hail insurance district created by the recent municipal elections are to be in Calgary, which was regarded as more in the centre of the hail country.

WINNIPEG INDUSTRIAL RESEARCH BUREAU

An Industrial Research Bureau has been organized by the Manitoba legislature. One of its first duties will be to investigate the desirability of the ownership of natural resources by the province. When a resolution was introduced recently in the provincial legislature asking that it declare itself in favor of public ownership an amendment was passed referring the whole subject to the new bureau.

VANCOUVER FIRE RISKS

Speaking before the Retail Bureau of the Vancouver Board of Trade recently, Fire Chief Carlisle stated that if $1,000,000 of the $2,000,000 which was paid out in insurance premiums each year could be transferred to the upkeep of the fire department, the city could be at least assured that no conflagration would take place. The average fire loss in Vancouver during the last ten years has been $588,795.

The National City Co., Ltd., is offering for sale $2,000,000 of 20-year 5½ per cent. gold bonds, at a price to yield 5⅜ per cent. This is the issue that was made in 1917, the bonds being due February 1, 1937.

George W. Goodall, western manager of *The Monetary Times*, will leave Winnipeg, Monday, April 14th, on his usual western spring trip, calling at all important towns and cities between Winnipeg and the coast. Mr. Goodall will, as usual, send in his interesting weekly letter covering financial and commercial matters in the various points called at.

BRITISH COLUMBIA PREMIER DEFENDS FINANCES

Outlines Reports of Province to the Canadian Northern and to the Pacific Great Eastern

In response to repeated attacks upon the provincial government, particularly as regards its financial methods, the premier, Hon. John Oliver, gave a lengthy defence in the British Columbia legislature a short time ago.

"In connection with the Canadian Northern Pacific Railway," he said, "it will be within the knowledge of this house that the legislature took authority to guarantee the principal and interest on some $47,975,000 of the bonds and debentures of this company. You can understand what a tremendous obligation this guarantee was upon the province. When it became evident that the Federal government would have to take possession and assume responsibility of this road, I endeavoured to obtain from the Federal government a letter or statement to the effect that British Columbia would be relieved of her responsibility in respect of this guarantee. I am sorry I did not succeed in obtaining such a statement, but I submit I was fully justified in making the attempt. As I understand it, the present position of the province is that the province cannot be called upon unless and until the Dominion government fails to meet the responsibilities of the railway company, which I think is a very remote contingency."

The premier next dealt with the Pacific Great Eastern Railway which was taken over some months ago by the government, and gave a statement of the expenditure as compiled by Price, Waterhouse and Co., as follows: Engineering and construction account, $1,427,848; interest on bonds, $1,021,647; erection expenses, $3,000; interest charges refunded by company, $139,207; sundry items, $9,616; total $2,601,304; expenditures by P. Welch, as per report of Marwick, Mitchell and Peat, $15,972,553; to this is added the $2,601,304; add to this payment made to Foley, Welch and Stewart, $750,000, and you have a total cash accounted for, $19,323,857.

"Now it must be remembered, that these audits were made in January and February of 1917, and that the contractors maintained and operated the road for fully a year after these audits were made at a heavy loss to themselves. The total proceeds of the bonds paid over to the Pacific Great Eastern Railway Co. were $18,246,979; the railway company was paid under the terms of the Loan Act of 1916, $989,361, making a grand total of $19,236,340. It thus will be seen that without allowing one dollar for profit, for use of contractors' plant, or for ordinary incidental expenses, that Foley, Welch and Stewart have accounted for $87,516 more than the total amount received from the proceeds of the bonds and from the proceeds of the Loan Act. In the face of these figures, how can it be argued that the half a million dollars, which Mr. Tate received for the purpose of taking care of campaign funds and other matters, came out of the public moneys of this province?"

Provincial Borrowing

With reference to criticisms of loans made, the premier said: "The leader of the opposition says his government borrowed money in 1916 at 5.62 per cent., but makes no mention of a sale of $5,150,000 4½ per cent. 10-year bonds money proceeds of which cost 6.39, infers that because of the advent of the Liberal government the credit of the province suffered, until in 1917, 7½ per cent. for money was demanded. I think there is another reason other than the advent of the Liberal government. During the election campaign the financial condition of the province was discussed very thoroughly, and it was found that during the five years 1912-1916 there had been a succession of deficits aggregating $17,285,938, and that for the then current year there was an estimated deficit of $5,300,000, a total actual and estimated deficit for six years of $22,5[illegible],000. These startling disclosures seriously affected the credit of the province. I would point out that after the Liberal government came into power they cut expenditure and rustled after revenue and the deficit of 1917 was $2,524,956 instead of $5,300,000 estimated."

Mr. Oliver recalled the facts which had resulted in the rehabilitation of the provincial credit and the flotation of a $3,000,000 loan with which to repay the Dominion at a price of approximately 5.56, and not 5.62, as suggested by the leader of the opposition. "All the moneys received on capital account during six years of the late government from the sale of land, timber licenses, timber royalties, sale of government property and royalties on coal produced, were used up in the payment of the ordinary running expenses of the government.

"The capital revenue thus received in 1912-1913 amounted to $5,108,844, and the deficit for that year was $3,116,000. This is the sort of administration which not only destroys credit, but makes heavy taxation necessary, and ultimately leads to bankruptcy and repudiation. This government succeeded in reducing the gross deficit for 1917-1918 to less than one-half million dollars. For the current year I do not know whether there will be a surplus or not, but it will be very welcome if it materializes.

"As this government had a deficit of less than half a million in 1917-1918, and none for 1918, all the borrowings were on capital account or to meet obligations incurred by our predecessors. In this connection I may point out that this government, previous to March 31, 1917, had to provide $658,374 to meet the deficit incurred by the previous government, and a further provision of $785,755 had to be made before June 30, 1917, so that in the first seven months we had to provide for approximately $1,400,000 of a bad legacy left us by the outgoing government."

AMENDMENTS TO TAXATION ACT

Brought Down in British Columbia Legislature—Changes Found Advisable

SEVERAL amendments to the Taxation Act were contained in a bill brought down in the British Columbia legislature last week by the provincial minister of finance. They were chiefly changes found advisable in the course of the administration of the act.

Dominion war loan bonds are to be exempt from taxation by the province. The personal property tax is abolished so far as motor cars are concerned. The provision giving a soldier five years' exemption from taxation on a pre-emption recorded after June 26, 1918, is to be incorporated in the Taxation Act.

To the list of exemptions from assessment are added losses and bad debts arising out of the business from which income is derived actually written off during the year; premiums of life insurance paid not to exceed one-sixth of the gross annual income of the taxpayer; income derived from partnerships and companies where the latter are assessed direct on personal property and income; income derived by non-residents from interest on loans, salaries or directors' fees where these have been otherwise assessed within the province. Other income of non-residents earned within the province is now to be specifically made assessable and assessments hitherto made in this regard are validated.

The sections dealing with deductions which shall not be allowed from gross income in arriving at the amount of taxable income are being redrafted so as to meet the necessities of the case in view of the extension of the income tax to large corporations. Added to the deductions which mining companies are not permitted to make will be one regarding allowance for depletion or exhaustion of a mine. The redrafted section will apply to the 1918 assessments.

Extend Metalliferous Tax

The alternative tax imposed on metalliferous mines is to be extended to coal mines and coke ovens. No change is made in the output tax of ten cents a ton on coal and coke, but it is provided that owners shall pay either this tax or the tax on income, whichever is greater. The output tax will continue to be collected monthly, and where the income tax proves to be the greater, the amount so paid will be considered as part payment of the sum due on income.

In view of the cost of advertising tax sales, the amount added to each parcel to cover expenses is raised from $2 to

$3, and from $1 to $2 on town lots. The time allowed for redemption of lands sold at a tax sale is cut down from two years to one year. This brings the period into line with the redemption period allowed where the land has not been sold and reverts to the Crown.

With regard to arrears of taxes which have accumulated on the lands of men who have been on active service, it is proposed that these shall be subject to the usual discount of 10 per cent. that would have been given for prompt payment, and that no interest shall be charged for the time they are overdue, if payment is made before March 31, 1920, where since the war began any taxes have been paid by a soldier's representative in full without discount, or on which interest has had to be paid, the minister of finance is authorized to refund without interest 10 per cent. of the taxes so paid and any interest paid upon written application being made.

To place beyond any doubt the liability of those who come under the canneries sections of the act, it is declared that all income derived by any person from that source during 1915 and 1916 shall be assessed and collected as if it had then been liable and had been assessed on the rolls for 1917 and 1918, respectively. A proportionate allowance will be made for any taxes which the companies paid in those years.

According to a decision of the committee of the Ontario Legislature, the London and Port Stanley Railway will have to pay taxes on its business undertakings, but not on its railway property, etc.

At the New Westminster board of trade annual meeting Mr G. H. Stevens, local manager of the Royal Bank of Canada, was elected president, W. W. Mascall was elected vice-president, and A. W. Gray was re-elected secretary-treasurer.

WHEN WILL PRICES BECOME NORMAL?

Factors Which Determine the Price Level—Inflation Must be Removed

By C. Kenneth Johnston

WHEN will prices again become normal? The word causing the greatest difficulties in the above question is, What is meant by normal? Can we take the standard of prices in 1913 or the beginning of 1914 as normal, or must we go further back, and, following the department of labor, base our price comparisons on those of the decade between 1890 and 1899? Or do we even know what normal is, and can we determine it exactly? Economists and many university professors, who write deeply and comprehensively on the subject of prices, usually consider the prices in or about 1897 to have been normal, and spend much energy and thought in discussing and finding reasons for the rise in the cost of living from that year to 1914. On the other hand, there has been during the war a great, and, to a certain extent, sudden, rise in prices which really may be considered as a separate phase of rising cost of living which has causes quite distinct from those operating during the fifty-one months of the war. Prices, as shown by the index numbers published by the department of labor, have increased from [illegible] in 1914 to 28[illegible] in 1918 (1917, 247.3; 1916, 200.5; 1915, [illegible]). How and why, we may ask, has this steady increase come about? Is it possible that prices may some time in the future return to their 1914 level? Before answering the second question, let us first examine some of the causes which operated during the war to increase prices.

The causes or facts which influenced the rise in prices in Canada during the war are three in number—that is, the direct causes, for there are numberless subsidiary or indirect influences which have had an almost indeterminable effect upon this question. These three direct causes are: (1) Increased demand and lessened supply. (2) Increased gold supply. (3) Inflated money, or an undue addition to the mediums of exchange. Let us analyze these three causes and determine to the best of our ability the effect which each had on the rise in prices.

Increased Demand and Lessened Supply

It is a well-known fact in economics and in business generally that if you increase the demand for a product or commodity, the supply remaining stationary, that prices will be forced upward. In the same way, a rise in prices is caused if you curtail the supply of an article when demand remains constant. During the war period in Canada and other belligerent nations the government demand for supplies for its fighting forces increased the demand for practically all commodities, and this in correlation with the supply of these products being lessened, their producers going into a destructive instead of a productive life, made the situation much more intense than it otherwise would have been, for, with an increased demand for a lessened aggregate quantity, prices naturally rose, *and will keep on rising until not only demand decreases but also supply increases to a point where there is a surplus over and above that required for immediate needs.*

Increased Gold Supply

The second and the third are, to a large extent, the same in their effect on prices, but are treated separately, because, in the third, gold is not considered except in so far as it forms a reserve or backing for the medium of exchange there treated. In this connection it is instructive to understand what economists call the "equation of exchange," which, very simply is this: $MV = \Sigma PQ$, where M represents the amount of money in circulation, V represents the velocity of circulation of that money (the number of times it changes hands each year), P represents prices, Q represents the quantity of goods exchanged each year, and Σ the sum of all these transactions. According to the equation of exchange, then, if the quantity of money (in this section taken as gold and coins) is increased, either prices or quantity on the other side must be increased proportionately in order to keep the equation true. But, according to our conclusions under the first cause, supply, that is, quantity, has been decreased, or at least has remained almost stationary in relation to the increased demand. Thus, then, prices had to rise if M was increased. But has M, or rather gold, increased in quantity as regards the amount in circulation or in bank reserves? During the four years of the war, 1914 to 1917 (inclusive), $1,728,191,290 of new gold was produced in the world, while from 1910 to 1913 (inclusive), $1,850,593,775 was produced, leaving a deficit during the four-year war period as compared with the four-year pre-war period of $122,402,485. On the face of it, these figures might be taken as a proof that the quantity of gold in the monetary systems of the world has not been unduly increased, but the point to remember is that all belligerent countries have stored up as much gold as possible as reserves for their paper money, asking, and in some cases ordering, that no gold be exported or used as a direct medium of exchange. Lord Inchcape's committee on gold production in the British Empire recently reported that in the two periods compared above the production of gold in the Empire during the war period exceeded that in the four-year pre-war period. What has really happened is that the patriotism of all peoples has led them to deposit all their gold in exchange for paper money, thus allowing the government or the banks, on this new gold basis, to put out more representative paper than was possible before. It has been estimated that government and bank reserves have been increased during the war by about one and a half billions of new gold. This sum, including another billion from the melting and coining of gold ornaments, etc., has considerably increased our stock of gold for monetary purposes. Thus, although the price of gold itself has not changed, 23.27 grains of fine gold still being priced at one dollar, it must be remembered that the value-in-exchange of gold has decreased; that is, the quantity of goods which you can buy for one dollar, or 23.22 grains of gold, is now considerably less than in 1914. Thus at present you get much less in exchange for your gold symbol than you did before the war. M, or the quantity of gold in the monetary system, has increased, and as Q, or yearly supply in relation to demand, did not increase, therefore P, or prices, had to rise. This explanation of the equation of exchange may make it clearer: If the total quantity of money, i.e., gold, in Canada were $100,000, and if the only article produced by Canadians were wheat, of which 150,000 bushels were grown each year, then the price of wheat would be $\frac{100,000}{150,000}$, or 66 2-3 cents per bushel. Now, if the quantity produced is the same and our stock of gold increases to, say, $200,000, then the price will have to rise to $1.33 1-3 per bushel, for all the money is presumably in circulation among the people and not held in any government or bank vaults. From this arithmetical illustration, then, one of the causes operating on the increase of prices during the war may be readily understood, for the quantity of gold produced during the war that has gone into circulation or bank reserves has been valued at two and one-half billions. This great increase in the reserve stock of gold did not have a direct influence on Canadian monetary conditions, for much of it flowed into the British treasury, enabling it to increase the amount of money in circulation in England, and thus, because our sales of produce to England have been paid in gold and credits, not in other material goods, our currency, or M, in Canada has been increased, and P, or prices, consequently have risen. In the United States prices have likewise been affected by large payments of gold (the international medium of exchange) to it by belligerents to pay for products bought in that country during the first two years of the war (Great Britain alone sending over $1,000,000,000 in gold). Prices then rose in the States, and because of its contiguity and because of

our large imports from that country, Canadian prices have been affected by this more or less indirect factor.

Inflated Money

In this connection the equation of exchange is again necessary, though the form of the equation and its explanation are slightly more complicated. In ordinary business transactions at the present day gold is not used at all as the medium of exchange—that is, actually, for it must form a great part of the reserves of the banks and the government. (In this connection see order-in-council at the beginning of the war, making bank notes legal tender and ordering all gold coins to be held as reserves, etc.). The media of exchange to-day are Dominion notes, bank notes, cheques, or shortly, bank and circulating credit. The equation used above takes account only of gold, so our equation will have to be modified thus, $MV + M'V' = \Sigma PQ$, M' representing the quantity of bank and government credit in circulation, V' its velocity of circulation, ΣPQ, M and V being the same as in the former. Now, students of banking understand that gold is mostly used as reserves or as a security for the credit afforded by the banks to their clients. One gold dollar in general is used to uphold from eight to fifteen dollars of circulating or bank credits, with the result that there is a huge superstructure of credit based on a relatively small gold foundation, and during the war this superstructure has been built up to a very much greater height than was considered safe before the war; that is, circulating credit has increased out of proportion to the amount of gold held in reserve. Now, as shown above, if we increase M, or the gold supply, then circulating credit may be increased. The quantity of gold in circulation has been increased very greatly (two and one-half billions), with the natural result of there being a larger store of gold in bank and government vaults, resulting in M', or circulating credit (bank deposits and notes), increasing in amount. Thus now, if M' or V' have increased, we must have a corresponding increase on the other side of the equation, and as Q, or supply in relation to demand, has not increased during the war, therefore prices, or P, would be the variable factor. But the practical question arises as to whether bank and government credits have been unduly increased, thus leading to inflation. The old-time method of inflation was by the issue of inconvertible paper money, a policy which has been followed in Russia with very undesirable effects, and which was only slightly pursued by Canada in the first few months of the war, about $31,000,000 of Dominion notes being issued, a quantity which has been generally considered not only moderate, but necessary. A second and more subtle method is by an undue expansion of bank credits, a result which may be obtained in two ways: (1) Direct bank purchases of government securities. (2) By bank loans to individuals for the purpose of buying government securities. Under the first the banks have loaned largely to the Canadian government by buying treasury bills, the loans thus given being used largely to pay for various materials bought here by the British government. These sales of treasury bills amounted to about $200,000,000. Under the second, the banks in many cases have created deposits through sales of securities to them by individuals in order to enable those individuals to invest in war loans. The individual had securities which he wished to discount, the proceeds to be invested in war loans, so the banks bought these securities, created a credit deposit in favor of the seller and enabled him to invest that credit in war bonds. The result, of course, is easily seen. The banks increased their credit abnormally—in the end really exchanging their credit for that of the government, which finally may be said, in large part, to have borrowed from the banks, and thus paid much of its running expenses by means of bank credit.

Bank credit, then, we may justifiably conclude, has increased considerably, and, according to our equation, $MV + M'V' = \Sigma PQ$, P being the variable factor in this period, when M' or V' increases, therefore, to keep the equation true, P, or prices, must increase proportionately.

Prices, then, have risen during the war for the three reasons outlined above. Which of them had the greatest influence it is difficult to determine, although we would say, perhaps, that the demand and bank credit factors were most important and had the greatest effect on the rise of prices in Canada during the war period.

Cessation of Demand

The demand of individuals for consumable goods will, of course, go on after the war, but the demand of the governments for our armies will be stopped as soon as those armies are demobilized. Also, in considering the decrease in demand, it is necessary to remember that after demobilization soldiers will go back into productive life, producing sufficient not only for their own needs, but also a surplus, which can be applied wherever needed. Thus, if the demand and supply factors, including demobilization, were the only causes to be considered, we might reasonably expect some decrease in prices *about the autumn of 1919*, but, unfortunately, our inflated money problem will still be with us, and will in all likelihood have to be settled before any great and lasting decrease in prices can come about.

Prices in Canada are greatly inflated through our having too much money, or the symbols of money, in the country. It is a generally accepted fact that all the European belligerents, and even the neutrals, have inflated money—on this side of the Atlantic also, but not to such an extent as is seen in Europe. For four long years we have been selling our products to the Allies at their inflated prices, getting back not, as in normal times, other material goods, but money and credits, and our favorable balance of trade thus produced has helped considerably in unduly expanding our finances. The heavy government borrowings in all countries have done their share in increasing the media of exchange. In Canada the banks have been making loans in large quantities to the government on British securities to enable the British government to buy here and pay cash to the individual without having to ship gold. As noted above, the amount of these loans have totalled over $200,000,000, an exceedingly large sum. The United States, in which the Allies were buying war materials, received large quantities of gold into its monetary system, resulting in inflation there and higher prices, which had an effect in Canada through our importations from that country.

No Early Decline in Prices

The question of whether our money is inflated or not is, I think, clearly answered in the above paragraph—it is. But since our money is inflated, since there is too much money in the country distributed among the people, and since inflation causes high prices, is it a correct conclusion that we may not expect a decline in prices until our monetary system gets back to a sound basis? If we were to consider even the demand and supply factors (see above), we might justifiably say that there would be a huge decrease in the latter part of 1919. No doubt, some of the slack as regards inflated money will be taken up through the effects of increased production—more goods to be exchanged require, of course, more media of exchange in order to keep prices level, but, as the media of exchange in our suppository case will remain constant, therefore prices will decrease. But, on the other hand, it will be quite impossible for production to overtake our increased supply of money in so short a time. In fact, unless the supply of money or media of exchange is definitely decreased to a pre-war amount, prices can never come down to a pre-war level. How, then, can we get a decrease in the amount of money now in circulation in Canada? Not all our money is supplied by the finance department of the government—the greater part is bank credit in the form of bank notes and bank deposits, subject to cheque. As explained above, the banks have given their credit to the government in exchange for its treasury bills, this bank credit being put in circulation by the government when it buys materials for its armies. In the same way, individuals, through various means, get created deposits at the banks with which they buy Victory bonds, this bank credit being turned over to the government and perhaps put out

by it in the form of bank notes in purchasing supplies. How, then, can this extra bank credit be annulled? How can it be paid for and the bank finances put back on a sound footing? Only through the saving, the thrift and the economy of the mass of the Canadian people, for our inflated prices will only come back to normal when the bank credits and other credits in the country have been paid and all circulating credit is once more on a solid and adequately safe gold basis. The government will have to pay its debts by means of taxes wrung from the people. Our war debt is enormous, so, as taxes in the end will have to be paid out of material goods, we cannot justifiably look for pre-war prices until such time as not only are our government loans paid, but until such time as, through saving and economy, material goods have paid for the war. When that time will come no one but an expert public financier can say—and even he has to put in a very large factor of safety in his guess.

Our conclusion, then, that prices will be at their pre-war level in 1919 is not borne out by the facts, although I think we would not be too optimistic if we expect a fairly large decline before the beginning of 1920. When prices will reach a pre-war level, and whether it would be advisable for them to decrease so much, are very debatable points which it is not within my power adequately to discuss.

LAND GRANTS TO QUEBEC RAILWAYS

A bill was passed and sanctioned in the Quebec legislature last week, granting tracts of land to a number of railways. The land granted covers an area of about 1,650,000 square miles in various sections of the province.

The Quebec Central Railway, running from Quebec-Levis to Sherbrooke, through Beauce and the mining districts of Megantic, will get 2,000,000 acres of land to help in the construction of a branch from Scotts to connect with the Transcontinental at St. Jean Chrysostome, Levis county.

A number of railroads in the province get various grants in lands, and among these is the mention of an unnamed railway company which gets, in the Abitibi region, a grant of 2,000 square miles per mile of railway track laid. This grant is given to help the construction of a railway from a point near Kiask Falls, on the Bell River, and hence in a southwestern direction through a number of settling regions to Lake Kawagama, which railway will then have a length of some 100 miles.

These lands will be ceded by the railways to prospective settlers or sold by the railway companies to settlers later on.

ELECTRIC GENERATION AND DISTRIBUTION

Though only a comparatively short time has elapsed since electric lighting and electric power were introduced, the development in Canada has been phenomenal. This growth is strongly emphasized in a report just issued by the Commission of Conservation entitled, "Electric Development and Distribution in Canada," which covers all plants that sell electric energy. The principal object of the report is to give complete and accurate information respecting power developed at any point, amount that is used and amount that is unused, prices charged for electric energy and similar pertinent data. Thus, with this information before him, an individual or company desiring to erect a plant, manufacturing or other, can decide which locality presents the maximum of advantage respecting one of the most important items of cost.

Respecting ownership, there are one and one-half times as many privately-owned plants as there are publicly-owned plants, and the total capacity of the privately-owned plants is almost four times as great as that of the publicly-owned. Typical examples of the two kinds of ownership are furnished by two of our largest systems: the Niagara system of the Ontario Hydro-Electric Power Commission and the Shawinigan Water and Power Co. in the province of Quebec, each developing over 200,000 horse-power.

CRIMINAL LAW TO AID FIRE PREVENTION

New Bill Will Make Carelessness, Which Results in Loss of Life or Property, Indictable Offence

A BILL has been introduced into the Senate of Canada, at the instance of the Dominion Fire Commissioner's Office and as the result of consultations with interested parties, to amend the criminal code to the effect that every one who by negligence causes any fire which occasions loss of life or loss of property will be guilty of an indictable offence and liable to two years' imprisonment. The amendment then proceeds as follows:—

"The person owning, occupying or controlling the premises in which such a fire occurs, or in which such fire originates, shall be deemed to have caused the fire through negligence if such person has failed to obey the requirements of any law intended to prevent fires or which requires apparatus for the extinguishment of fires or to facilitate the escape of persons in the event of fire, if the jury finds that such fire, or the loss of life, or the whole or any substantial portion of the loss of property, would not have occurred if such law had been complied with."

A further amendment provides for the enforcement of fire-prevention measures suggested by a fire insurance company and approved by a public fire officer. The amendment reads:—

"In any case where any fire insurance company which carries any policy of fire insurance on the property, or any Dominion, provincial or municipal fire officer or authority recommends that the owner, lessee or other person controlling or operating any building, structure, factory, shipyard, vessel, dock, wharf, pier, sawmill, or yard in which logs or lumber are stored or held, should make any change or alteration in such building, structure, factory, shipyard, vessel, dock, wharf, sawmill, pier or yard, remove any material therefrom, or supply any apparatus therefor, with a view to reducing the risk of fire or for the extinguishing of fire, and such recommendation is approved by any officer in the service of his Majesty, thereto authorized by the governor-in-council, and notice of such recommendation and of such approval thereof has been served personally upon or forwarded by registered mail to such owner, lessee or other person, and such owner, lessee or other person refuses or neglects to forthwith carry out such recommendation, such owner, lessee or other person shall be liable upon summary conviction to a fine not exceeding one thousand dollars, or to imprisonment for any term not exceeding six months, or to both fine and imprisonment."

QUEBEC SOLDIER SETTLEMENT PROVISION

The province of Quebec has enacted legislation providing for the granting of Crown lands to war veterans, including soldiers of other than Canadian nationalities who resided in Canada previous to the war. Land so conveyed may not be seized nor sold by execution for any debt except (a) school or municipal taxes or taxes for the construction or repair of church, presbytery or cemetery; (b) for the price of such land; (c) for the repayment of a loan made to a settler by the federal board which became a first charge upon the lot.

FRATERNAL INSURANCE RATES UP

The Modern Woodmen of America, one of the largest fraternal insurance organizations in the world, increased their rates by about 50 per cent. on March 26th at a convention held in Chicago. Over one million members are affected. The increase is the result of the influenza epidemic, which decreased the beneficiary fund of the order from $12,000,000 to $700,000.

THE GREAT-WEST LIFE

is noted for the Dividends paid to Policy-holders. The following is typical of Dividends being paid this year.

TWENTY-PAYMENT LIFE POLICY FOR $1,000.00
Issued 1899. Matures 1919
Age 30. Premium $30.06

Cash Value at Maturity	$ 801.00
Total Premiums paid	601.20
Excess Return	$ 199.80

The Policyholder was protected by $1,000 Insurance during 20 years and at the end of that period the cash value constituted not only a return of all premiums but in addition a splendid surplus.

Such remarkable results are worthy of attention.

Ask for Rates at your own age, and examples of other Maturities.

ADDRESS

J. R. DAVISON, City Industrial Com'r
402 Pender St. W., Vancouver, B.C.

VISIT VANCOUVER THIS SUMMER—SEE FOR YOURSELF

PROTECTION is to-day the key-note of international trade preparations.

GREAT BRITAIN is restricting imports and PROTECTING home industries.

Acting Premier Watt of AUSTRALIA announces the introduction of a measure for higher PROTECTIVE duties.

FRANCE is exercising Government control of imports to build up home manufactures and home markets.

ITALY'S after-war programme calls for a higher PROTECTIVE tariff.

A higher tariff for the UNITED STATES is forecast by Chairman Fordney of the Ways and Means Committee of the next United States Congress, who will be the author of the new tariff bill. Congressman Gillett, of Massachusetts, who will be the Speaker of the House of Representatives in the new Congress, says, "at the earliest opportunity there should be passed by the Republicans of the House a protective tariff measure which will provide more abundant revenue and prevent an inundation of foreign goods produced by cheaper labor."

GERMANY depends on PROTECTION to recover its commercial position.

Under PROTECTION, CANADA has successfully borne the burden of four and a half years of war. Wages have been high and agriculture and industry have prospered. The present is no time for economic experiments.

DEBENTURES FOR SALE

$3,000,000 PROVINCE OF ONTARIO 3-YEAR 5½ PER CENT. GOLD BONDS

Sealed tenders endorsed, "Tenders for Province of Ontario Bonds," addressed to the undersigned, will be received for the purchase of $3,000,000 (Three Million Dollars) three-year Gold Bonds of the above Province, dated 15th April, 1919, due 15th April, 1922, bearing interest at the rate of five and one-half per centum per annum, payable half-yearly on 15th April and 15th October. Principal and interest payable in gold at the office of the Treasurer of Ontario, Toronto, or at the Bank of Montreal, Montreal, Canada, or at the Agency of the Bank of Montreal in the City of New York, U.S.A., at the option of the holder.

Bonds to be in the denominations of $100, $500 and $1,000 respectively, as follows:—2,500 of $100 each; 1,000 of $500 each; and 2,250 of $1,000 each; with coupons attached, and may be registered as to principal only.

Payment for bonds with accrued interest to date of payment to be made at the office of the Treasurer of Ontario, at the Parliament Buildings, Toronto, on or before April 21st, 1919. Interim certificates will be supplied on payment of the money, to be exchanged for the definitive bonds on completion by the engravers.

Tenders to be addressed to the Hon. T. W. McGarry, Treasurer of Ontario, Parliament Buildings, Toronto, and delivered not later than 12 o'clock noon on Saturday, the 12th day of April, 1919.

Tenders must be for the whole amount offered and must be accompanied by marked cheque for $100,000, to be applied in the case of the successful tenderer in payment for bonds.

The highest or any bid not necessarily accepted.

T. W. McGARRY,
Treasurer of Ontario.

Toronto, April 5th, 1919.

TOWN OF NORTH BAY

DEBENTURES FOR SALE

Sealed tenders will be received by the undersigned up to and including the 3rd day of May, 1919, for the purchase of the following issues of Debentures of the Town of North Bay:—

(1) $22,000.00 Local Improvement Debentures for sanitary sewers, bearing interest at the rate of six per cent. per annum, repayable in twenty equal annual instalments of principal and interest.

(2) $4,400.00 Local Improvement Debentures for permanent sidewalks, bearing interest at the rate of six per cent. per annum, repayable in ten equal annual instalments of principal and interest.

Delivery to be made at the Royal Bank of Canada, North Bay, Ont.

M. W. FLANNERY,
Treasurer.

The British Columbia legislature will authorize the sale to the Canadian Northern Pacific Railway of 26.42 acres of the Songhees Indian Reserve in the city of Victoria, at a price of $38,500 per acre. The land is to be used for railway purposes only.

PROVINCIAL DEPARTMENT OF INDUSTRY

British Columbia Government Plans to Spend Two Million Dollars on New Department for Promotion of Industry

On March 28th the British Columbia legislature approved a bill providing for the creation of a department of industry for the administration of which the government intends to set aside $2,000,000 to be raised by a domestic loan. This action is to some extent the result of representations made by returned soldiers to the effect that sufficient employment was not being provided and that the government should adopt stronger measures. The bill proposes to appoint a deputy minister to be known as an "Industrial Commissioner," with necessary staff. The department will for the time being, be operated under the nominal authority of the minister of mines. The necessary alteration to the Constitution Act to permit of the additional department and departmental head was also made. Provision is made for a minister of industries, but it is not intended as yet to create such a portfolio.

The work of the department of industries will be a wide one, providing as it does for industrial research, to carry out an economic survey of natural resources and furnish advice as to the best methods of utilizing the same, to co-ordinate various industries, bringing together producer, manufacturer and purchaser, to publish technical, scientific and statistical information and encourage technical and industrial study, report upon the establishment of industries in British Columbia where it appears such can be profitably carried on, aid by loan, guarantee or guarantee of securities on approved plans any enterprise calculated to encourage the economic and commercial manufacture of the natural resources or products of the province and to deal with representative bodies of returned soldiers concerning employment through the establishment of new industries.

An advisory council will be named, consisting of not more than seven members, representative of the financial, commercial, industrial, manufacturing and labor interests. The members will hold office for one year and will advise and cooperate with the minister of industries and industrial commissioner, the last named to be chairman of the council. No salaries will be paid to the board. A member of the legislature may serve on the board.

Before approving of any loan to an industrial project, the minister and advisory council must ascertain that it is justified upon the following grounds: The value of the security offered estimated upon the basis of productiveness, desirability of the proposed loan, ability of the applicant to make a fair profit, the solvency and capacity and moral hazard of the applicant and his earning power, and that the granting of the loan will be of economic benefit to the province. Power is given to the lieutenant-governor-in-council to make necessary regulations, etc.

AMERICAN FIRE INSURANCE CORPORATION

The first meeting of the board of directors of this company was held last week at 111 William Street, New York. The board organized itself and elected Mr. Carl P. Sturhahn president. Two of the directors named in the certificate of incorporation resigned, and their places were filled by the election of William B. Ellison and Thomas B. Boss. The capital is $200,000, divided into two thousand shares of $100 each, which is being offered to subscribers at $250 per share to provide for a surplus. All of the stock will be subscribed for at once, and an application made for a license without delay.

Sir Mortimer B. Davis has been granted leave to appeal to the Quebec Court of Appeal for an injunction against the Jacobs Asbestos Mining Co., of Thetford, to restrain the payment of a 10 per cent. dividend.

Ask the Subscription Department
about our Special Book Offer

A bill has been introduced into the Quebec legislature providing that anyone who has been appointed provisional administrator of the property of an insane person must make known his appointment by registered letter addressed to the medical superintendent of the asylum in which the person is confined.

Meredith Rountree, Montreal, recently obtained a judgment of $13,875 as commission for financing the erection of the Royal Bank Building at King and Yonge Streets, Toronto. He sued J. and L. M. Wood, of Toronto, claiming that he was entitled to remuneration for underwriting $250,000 of the stock of the Guardian Realty Co., the owners of the building.

URBAN MORTGAGES IN ALBERTA

Report of an Address by S. B. Woods, K.C., of Edmonton, to the Dominion Mortgage and Investment Association

ALBERTA, like every other province, has passed what are commonly, though not quite properly, known as Moratorium Acts. The first one was passed in April of 1916, and it is noteworthy that Alberta did not legislate upon this subject at all until the war had been in progress for nearly two years. However, in 1916 it became apparent that something would have to be done along this line because of the large number of men who had left this province for the front. This first act protected mortgagors in respect of mortgages made prior to the outbreak of war who were really soldiers. By a decision of our Supreme Court in the case of Canada Life vs. Dickson the language of the act was held to be sufficiently wide to cover persons who had enlisted in a local reserve battalion which was not formed for the purpose of service at the front, and there is no doubt that advantage was taken of this circumstance by not a few persons to get protection from their creditors by enlisting in these reserve battalions. So far as mortgagees were concerned, the hardship upon them of their mortgagor being immune from action in the courts by the simple process of enlisting in the reserve militia early became quite apparent, and an attempt was made successfully, as it turned out, to alleviate this hardship by invoking the provisions of section 8 of the act, so as to give the mortgagee the right to collect and receive the rents or rentable value of the mortgage land, notwithstanding that the mortgagor might otherwise be under the protection of the statute. The case of Mutual Life vs Blackett and Credit Foncier vs. MacCashom were test actions brought to try out this question, and in the result it was decided that a mortgagee was entitled to commence action for rentable value, and, in default of payment of the rentable value, ordered that the mortgagor could be put out of possession, and this notwithstanding the fact that he was otherwise under the protection of the Volunteer and Reservists Relief Act. This effected a considerable inroad upon the protection of the members of the "moratorium guard" which they had up to that time enjoyed.

In April of 1918 the act above mentioned was amended, and it is now called the Soldiers Relief Act. The act as amended protects only real soldiers enlisted for service at the front, and protects these until two years after the declaration of peace by Great Britain. The protection afforded extends to liabilities incurred or mortgages made before the date upon which he became a soldier. If he is discharged, he is protected for two years after his discharge. The protection also extends to his wife or any depnedent member of his family, or to his estate after his death. By another provision of the amending act the protection enjoyed by members of the home guards ceased on the 13th of October, 1918. Another statute, called the War Relief Act, was passed at the same session, namely, in 1918, and came into force on the 13th of April last. It is not confined in its terms to soldiers. It does not extend to farm property at all, but only to city property. This act provides that no proceedings can be taken for sale or foreclosure for the recovery of principal money on any mortgage on land or agreement for sale made prior to the 4th of August, 1914. If, however, default is made in the payment of interest, rent, taxes, insurance or other disbursements by the mortgagor (or purchaser), then his mortgagee (or vendor) has the same rights as if the act had never been passed, except that before commencing action leave must be obtained from a judge of the Supreme Court. Upon application for leave to commence such action the judge may grant leave without any qualification or condition, or if he is of the opinion that inability to pay is due, directly or indirectly, to the present war, he may refuse the leave to begin the action, subject to such conditions as he thinks fit. The mortgagee (or vendor) is in any event, however, declared to be entitled to payment of the net income from the property, or the amount which, in the opinion of the judge, the property should earn if carefully managed, and power is given to the judge to make such order as to the possession or collection of rents as he thinks proper.

These two acts, therefore, namely, the Soldiers Relief Act and the War Relief Act are the only two acts now in force in Alberta changing the law as to mortgages on urban property from the law as it stood before the war.

Administration Varies

As will be observed, the War Relief Act above mentioned leaves a very considerable discretion in its administration to the judges of the Supreme Court, and, so far as our experience in Edmonton goes, we have found that this discretion has been exercised in a uniformly fair and equitable manner. The judges of our court are only human, and where property is in the possession of a soldier's wife and family, and they are paying a rent which is, perhaps, not as high as could be obtained, but the result of an order to pay more would clearly be that this family would be turned out of their home without the prospect of being able to get another one, it is not surprising that judges, in the administration of the law and in the exercise of their discretion, are inclined to stave off the time, especially during the winter, when it will be necessary, if the strict letter of the law is to be enforced and the mortgagee is to obtain what he is legally entitled to, that an order be made that will have this result. On the other hand, there is no doubt that not infrequently enlargements of time are given to persons who are not paying as much as they should pay towards keeping down interest and taxes without due consideration for the rights of the mortgagee and a proper appreciation of the fact that a delay in the giving of justice often means the denial of justice. The judges, of course, vary in their outlook a good deal, and, while some grant leave to proceed as a matter of course, others give the mortgagor further time, especially if the mortgage is not badly in arrear and the revenue being derived from the property is sufficient to carry the same. Attention should be drawn in this regard to the provisions of the Soldiers Home Tax Exemption Act, passed at the last session of the Alberta legislature. This act exempts the soldier's home property, that is to say, land occupied by a soldier or his wife or any of his dependants, so long as they were dependants at the time that he became a soldier within the meaning of the act, from taxes from the 31st December, 1917, and before the expiry of one year after the declaration of peace by Great Britain. Provision is made that such land may be listed with the municipality on the home property register, in which case it will not be assessed for taxes by the municipality, and if this has been omitted to be done and the soldier becomes liable to taxation in respect thereof, it is provided that such taxes shall be remitted or paid back by the municipality. Mortgage companies should, therefore, see that the home property belonging to a soldier on which they hold a mortgage is listed on the municipality register in the proper way so as to obtain freedom from taxes. This would keep the carrying charges down a good deal in cases such as I have been referring to on property occupied by soldiers. It is in these cases that it is often difficult to get judges to increase rentals or monthly payments beyond what the soldiers' dependants can pay.

City Conditions Improving

Speaking generally, the position of the mortgagee in regard to urban property is improving; rents are increasing, and well-informed persons look for a further increase of from 25 to 50 per cent. this coming spring. Urban property is now selling fairly freely. The market for houses, both for sale and for rental, is certainly improving. At the present session of the Alberta legislature a bill is being introduced by the minister of municipalities to enable persons owning property in the city to take care of their tax arrears by spreading the same over a period of ten years, and this will undoubtedly help very considerably to enable mortgagors to take care of their properties. There is unquestionably more confidence displayed now in the ability of people to hold their properties than there has been for some years past, and, speaking generally, also people are able and willing to pay more money

on account of mortgages on their properties than they formerly were. If times continue to improve, it is reasonable to expect that within the next few years all restrictions on foreclosures will be taken off.

There is no doubt that the conditions brought about by the world war led to the enactment of legislation, especially in connection with mortgages, that was a complete innovation upon anything we had previously known, and the passing of this legislation engendered a feeling of insecurity among lenders. It should be, however, kept in mind that all countries had to adopt legislative innovations during war-time, and a comparison will show that, as between the province of Alberta and other provinces of Canada or countries engaged in the war, the legislation interfering with the rights of creditors, whether mortgage creditors or otherwise, has not been as drastic as in many other jurisdictions, while the administration of the law by the courts has, on the whole, pursued a fair and equitable line, judges striving to meet strange conditions without undue hardship to creditors and taking any opportunity that presented itself to prevent an unjust and improper use of the acts passed for the protection of soldiers and their dependants. No more outstanding example of this can be found than in the inroad I have mentioned that was made upon the Volunteer and Reservists Relief Act when it was held by our courts that a mortgagee was entitled to be paid rentable value and dispossess his mortgagor unless a fair rentable value was received, notwithstanding that such mortgagor was protected under the provisions of that act; and I may say here that it seems to me that when a matter so important as this comes up for decision before the courts, a matter which interests all mortgage companies, and by which they all benefit if the decision is in favor of the mortgagee, then the company taking the matter up before the court should not have to bear the whole burden of the expenses of doing so. Some arrangement should be made through your association whereby general questions of this kind, even if taken up, as they must in the majority of cases be taken up in a concrete case where one certain mortgage company is plaintiff, should nevertheless be financed by the association as a body.

WINNIPEG GRAIN EXCHANGE TO RESUME

The Winnipeg Grain Exchange is actively completing arrangements for the resumption of dealings in wheat in the near future. There can be no option market, of course, until the new crop arrives, or at least the future dealing will have to concern the 1919 crop, as the government's fixed price applies to all the old wheat in the country. There are in farmers' hands at present some 15,000,000 bushels on the prairies to be disposed of, so there can be no board of trade deals in these stocks of wheat in terminal points and in interior elevators because of the fixed government price. There can be no fluctuations either. The Grain Exchange will concern itself for the present only in option operations in oats, barley, flax, and no future operations on the 1919 grain crop can be undertaken until the present parliament has definitely decided the question of preserving the government fixed price.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt for the week ended April 4th, 1919:—

Buffalo Mine, 89,000; La Rose Mine, 101,313. Total 190.313.

The total since January 1st is 5,273,524 pounds, or 2,636.2 tons.

The National War Savings Committee announces that War Savings and Thrift Stamps, printed in French, are now being distributed to sales agents throughout the province of Quebec, and consequently will at once be available for all who desire to purchase the same.

NEW INCORPORATIONS

The following is a list of companies incorporated during last week, with the authorized capital and names of provisional directors:—

Winkler, Man.—Union Traders, Ltd., $90,000; P. Bueckert, S. Kuhl, H. H. Neufeld.

Belmont, Ont.—Elgin-Middlesex Farmers, Ltd., $50,000; J. Dawes, R. McGregor, E. Finch.

Lakefield, Ont.—Kawatha Lumber Co., Ltd., $40,000; G. J. Elmsley, E. R. Tate, J. F. Lilicrap.

Emo, Ont.—Langstaff, Schurg and Co., Ltd., $100,000; R. C. Langstaff, C. T. Schurg, F. Doman.

Brantford, Ont.—Electro Tin Products, Ltd., $300,000; B. G. Cobb, W. J. Aikins, J. B. Detwiler.

Windsor, Ont.—Erie Sand and Gravel Co., Ltd., $50,000; J. J. Urquhart, B. C. Hughes, D. Urquhart.

Fort Erie, Ont.—Garrison Heights Realty, Ltd., $40,000; L. B. Spencer, C. F. Ramey, J. E. Cohoe.

BANK BRANCH NOTES

The following is a list of branches of Canadian banks recently opened:—

Moncton, N.B. (St. George St.)	Canadian Bank of Commerce.
Hodgeville, Sask.	Canadian Bank of Commerce.
Iroquois, Ont.	Canadian Bank of Commerce.
Winnipeg, Man. (Selkirk and McGregor)	Canadian Bank of Commerce.
Keeler, Sask.	Bank of Hamilton.
Minden, Ont.	Sterling Bank of Canada.
Winnipeg, Man. (Lansdowne and Main)	Union Bank of Canada.
Craven, Sask.	Dominion Bank.
Estlin, Sask.	Dominion Bank.

Mr. F. A. Murray, manager of the Merchants Bank, New Westminster, B.C., has been transferred to the Hastings Street branch, Vancouver, in the position of manager.

Mr. G. A. Bagshaw, manager of the Union Bank of Canada at Haileybury, will become associated with the mining firm, Messrs. F. C. Sutherland and Co., the first of May.

Mr. H. H. Morris, superintendent of the Pacific Coast branches of the Canadian Bank of Commerce, was in San Francisco last month on a visit of inspection to the local branch.

The Dominion Bank has started work on the additional space which it has secured in the Casa Loma Building at the corner of Portage and Sherbrooke, Winnipeg, Man.

Mr. W. H. Kerr has been appointed manager at the Fenelon Falls, Ont., branch of the Sterling Bank, to succeed Mr. N. L. McNaught, who has resigned.

Mr. T. E. Fletcher, of the Sterling Bank, who came east from Regina, has now assumed the management of Toronto branch, with Mr. John Adair, late manager at Sudbury branch, as assistant manager.

Since the beginning of the year the Canadian Bank of Commerce has opened twenty-four new branches in western Canada.

The property on the south-west corner of Stafford and Grosvenor, Winnipeg, Man., has been bought by the Canadian Bank of Commerce for a sum in the neighborhood of $14,000. As soon as weather permits building operations will be commenced.

On the north-west corner of Corydon and Lilac, Winnipeg, the Union Bank is erecting a building, and has already opened a temporary office, while on the south-west corner the Merchants Bank is building.

The Canadian Bank of Commerce has purchased the Post Building on Exchange Place, Beaver and Hanover Streets, New York, for a price in the neighborhood of $650,000. The bank's agency, which is now managed by Frederick B. Francis and J. A. C. Kemp, was established at 50 Wall Street in 1872.

NEWS OF MUNICIPAL FINANCE

Galt, Ont.—The tax rate for 1919 will be 30 mills, a reduction of three mills over last year.

Quebec.—Montreal North wants to borrow $100,000; St. Michel wants to borrow $50,000 and $125,000.

Manitoba.—An act has been passed by the legislature making clear the right of municipalities to tax railway companies for local improvement purposes.

Port Arthur, Ont.—The tax rate for 1919 will be twenty-nine mills, according to a resolution passed by the city council, after the estimates had been struck.

Stratford, Ont.—The tax rate has been approved at 39 7-10 mills for public school and 37 3-10 mills for separate school supporters. These rates include 4 5-10 mills for patriotic debentures and 1.2 mills for garbage collection.

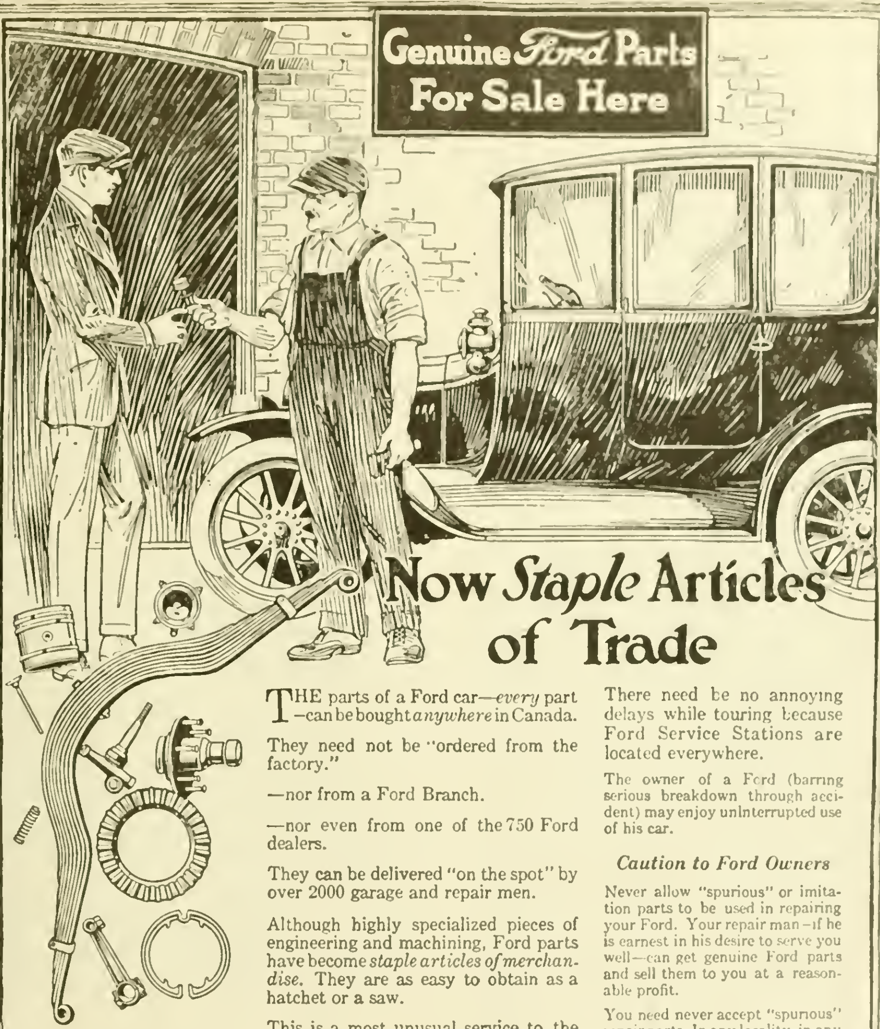
Calgary, Alta.—The finance committee of the public school board has passed estimates of $740,000 for 1919. With the new grants and an anticipated increase for this term of $15,000, it is thought the figure will be cut to $715,000. The estimates include provision for the sum of $200,000 for debentures and interest.

Cobalt, Ont.—It is certain that there will be a large increase in the town revenue for 1919, according to the statement of Councillor W. R. Sullivan. The possible loss of $50,000 revenue has been hinted at, and Mr. Sullivan has suggested that an approximate tax rate might be struck, and the estimates prepared in proportion.

Burnaby, B.C.—For the year 1919 the tax rate in Burnaby will be 25 mills on improved land and 50 mills on unimproved land, the council have decided. Last year the rate was 20 and 40 mills, so that this year there is a very decided increase in the rate. The assessment was reduced 15 per cent. and a rebate of 10 per cent. is allowed if the taxes are paid on or before June 30. This will have an effect of reducing the total amount of the taxes.

Moose Jaw, Sask.—The total revenue for the year was $1,081,954, and total expenditures $1,011,674, leaving a surplus of $70,279. The assets of the city are shown to be $8,359,272 and liabilities $5,847,654, showing a surplus of $2,511,626. The current assets are mainly made up of taxes receivable $680,731, which are spread over seven years and of which $263,442 is arrears on 1918 taxes. The total levy for the year was $771,656, of which $508,122 was collected, being 65.86 per cent. The total bonded indebtedness of the city is $5,754,990. The investment with the sinking fund trustees is $697,843.

New Brunswick.—A new municipal organization was formed last week, when town clerks, treasurers and other



Now *Staple* Articles of Trade

THE parts of a Ford car—*every* part—can be bought *anywhere* in Canada.

They need not be "ordered from the factory."

—nor from a Ford Branch.

—nor even from one of the 750 Ford dealers.

They can be delivered "on the spot" by over 2000 garage and repair men.

Although highly specialized pieces of engineering and machining, Ford parts have become *staple articles of merchandise.* They are as easy to obtain as a hatchet or a saw.

This is a most unusual service to the owner of a car.

Its value is incalculable.

The Ford car need never be "tied up" while repair parts are being "brought on from the factory."

There need be no annoying delays while touring because Ford Service Stations are located everywhere.

The owner of a Ford (barring serious breakdown through accident) may enjoy uninterrupted use of his car.

Caution to Ford Owners

Never allow "spurious" or imitation parts to be used in repairing your Ford. Your repair man—if he is earnest in his desire to serve you well—can get genuine Ford parts and sell them to you at a reasonable profit.

You need never accept "spurious" repair parts. In any locality, in any emergency, there is sure to be close at hand, a Ford Service Station.

Demand genuine Ford parts. Be firm.

Keep your Ford running at full Ford efficiency

FORD MOTOR COMPANY OF CANADA, LIMITED, FORD, ONT.

DEMAND
Genuine Ford Parts

civic and municipal officials, met and united under the name of the New Brunswick Municipal Officers' Association for the purpose of advancing their mutual interests and those of the communities which they serve. The officers elected were: President, G. O. D. Oty, Hampton; vice-president, John Fowlie, Chatham; secretary-treasurer, Mrs. Glenn, York County, with J. S. Magee, Moncton and J. E. Vroom, St. Stephen, as additional members of the executive.

St. John, N.B.—The outstanding features in the annual statement are: That the city closed the year with a surplus of $[illegible]; that there is now a sinking fund for every bond afloat; that the debenture debt is now $5,015,726, an increase of $[illegible] in the last year; that all expenditures under capital account were made within their estimates; that the city sinking fund amounted to $411,188,232, and that the city's assets are considerably in excess of $7,000,000. The city's bonded debt is less than it was ten years ago or six years ago, but a little higher than it was during the past five years. Ten years ago it was down to $4,721,226, and is now $5,015,726.

Ottawa, Ont.—The city has been empowered by the private bills committee of the Ontario legislature, to institute a new assessment system which will abolish taxation on houses and other buildings. The bill provides for an exemption of 25 per cent. on all buildings and all incomes, the first year after coming into effect; 50 per cent. exemption the second year; 75 per cent. the third year; and total exemption the fourth year. This system would result in higher assessment on business land, but would be a great benefit to the poorer residential districts. The act provides that the system shall be approved by the ratepayers before going into effect. The committee approved this also.

Montreal, Que.—The city will this year increase its returns on interest by $30,000, due to the inauguration of the system of preparing the assessment rolls by typists instead of by hand, according to a report prepared by Assistant City Treasurer Collins. The amount represents the interest charge for one month, which the city has lost it seems for the last 18 years, because accounts could not be got out early enough. Interest was therefore charged from November of each year, but this year interest will be charged from October. While the interest on tax arrears has varied in the past, which would, of course, affect the total due each month, the present estimate made by the assistant treasurer is a loss of $30,000 for the month of October, which will be obviated this year by reason of the more expeditious preparation of the rolls.

Saskatoon, Sask.—The financial statement for the year ended December 31st, 1918, shows a total revenue of $698,783, of which $511,884 came from the tax levy, $35,628 from business licenses, and $50,678 from tax penalties; there was also $41,120 in the form of surplus earnings of sinking fund investments. The largest single item of expenditure was the debenture interest amounting to $151,698. A deficit of $555 was brought over from 1917, but in spite of this slight handicap the year 1918 resulted in a surplus of $30,705.

The capital balance sheet now shows total assets of $9,[illegible]. The debenture debt is $4,150,363, and the amount of registered stock outstanding $4,392,780, a total of $8,543,14[illegible]. There are also a few minor liabilities, but the capital surplus amounts to $1,140,666. The revenue balance sheet shows a small surplus.

Vancouver, B.C.—The tax rate this year will be about 30 mills, or improvements will be taxed on a basis of 50 per cent. of their value, instead of 25 per cent. of their value, owing to the defeat of the city's business tax scheme in the legislature. The rate last year was 26.66 mills or 24 mills net. The experts at the city hall say it must necessarily now go up to [illegible] mills or more, gross, this year, for the money must be raised by the city. It was hoped that with the residential and business tax scheme that an additional $500,000 revenue could be raised this year by the city without increasing the mill rate to any great extent.

Half of the $500,000 extra money needed by the city this year will go to the school board, the expenses of which department of the civic system the city council does not control. Some $60,000 more than was asked for last year is needed this year by the police department, another department over which the city council as a body, has no control. The remainder of the $500,000 will be required to meet the increased expenses of the city, such as the advanced wages paid in the various departments, including the fire department and the board of works department.

Oak Bay, B.C.—The financial statement for the year ended December 31, 1918, gives a thorough account of the financial condition of the municipality. Oak Bay is a residential suburb of the city of Victoria. In 1918 the tax rate was 14.5 mills net, the same as for 1917, in spite of the fact that the assessment was reduced by nearly $650,000. A tax sale was held at which all properties delinquent in taxes at the end of 1916 were sold excepting those which were entitled to the benefits of the War Relief Act. The municipality is pleased with the annual tax sale policy which has made possible a reduction in bank loans from $117,078 at the end of 1917 to $79,129 at the end of 1918. There are still large arrears, however, owing to the War Relief Act. These, including the year 1918, amount to approximately $47,000. The municipality's assets total $1,118,249, including the local improvement works, sewer systems and waterworks. The debenture debt less sinking fund is $955,803 and bank loans $79,129. There is a surplus of $125,662 and also a sinking fund reserve of $21,860, which is the amount by which the sinking fund exceeds requirements. Practically the entire fund is invested in Victory Loan yielding 5½ per cent., while the sinking fund calculations are based on an estimated rate of 4 per cent.

Toronto, Ont.—The city's tax rate is to be 28½ mills. This decrease of two mills under last year's rate has been accomplished in the face of an increase in uncontrollable expenditure over 1918 of over $163,300, and in controllable expenditure of $1,170,983. Toronto's tax rate this year will be lower than that of any other city in Ontario, with the exception of Windsor, Ottawa and Kingston, the rate of the latter city standing at the same figure.

One of the features which has made it possible is the existence of a net surplus brought forward from 1918 of $987,582, representing practically one and one-half mills in the tax rate. In commenting upon it in his budget for 1919, Finance Commissioner Thomas Bradshaw states: "Apart from the substantial amount of the surplus, perhaps the most satisfactory consideration to be noted is that expenditures amounting to no less than $622,271, chief among which is $387,000 for additional life insurance benefits, which were not contemplated, and which were ordered by council to be provided in the closing month of 1918, have also been met. If it had not been necessary to provide for these extraordinary expenditures—in other words, if the expenditures of the year had been limited strictly to the estimates which were passed in April, 1918—the surplus available for reduction of taxation would have been $1,609,854, or over two and a half mills on the assessment." Of this surplus $831,160 represents net savings in the appropriations for 1918.

NEWFOUNDLAND LOAN ON MARKET SOON

According to advice just received from Hon. M. P. Cashin, minister of finance and customs for Newfoundland, the legislature is contemplating passing a bill asking for a loan within the next two months. The government is in fact now watching the market to decide upon the best time to make the issue.

The amount is not yet fixed, but considering the fact that there are $5,000,000 of Newfoundland notes maturing on July 1st, it is probable that the loan will be for at least this amount. These notes were issued on 1st July, 1916, with five per cent. interest and were sold on the New York market. Last year the government borrowed $10,000,000 on ten-year 6½ per cent. bonds; $6,000,000 of this was raised by popular subscription, the first domestic loan floated in Newfoundland; the other $4,000,000 was marketed through Canadian bond houses.

LEGAL NOTICE

CANADIAN BISCUIT & CONFECTIONERY EXPORT COMPANY, LIMITED

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," and Amending Acts, letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 3rd day of March, 1919, incorporating William Robertson, Herbert Norton Cowan, Herbert Arthur Telfer, John Wetherill Palmer and Charles Joseph Hodley, manufacturers, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To import, export, manufacture, buy, sell and deal in goods, wares and merchandise, and without limiting the generality of the foregoing, the same shall be deemed to include confectionery, biscuits, candy, and all goods of which sugar or flour forms a part; and to act as agents for the purchase or sale of any such goods, wares and merchandise; (b) To carry on any other business, whether manufacturing or otherwise which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To purchase or otherwise acquire or undertake all or any part of the business, property, assets or liabilities of any person, partnership or company carrying on business with objects similar in whole or in part to those of the company, or possessed of property suitable for the purposes of the company; (d) To procure the company to be registered and recognized in any foreign country and to designate persons therein according to the laws of any such foreign country to represent this company and to accept service for and on behalf of the company of any process or suit; (e) To make application and negotiate for, lease, purchase or otherwise acquire or exercise, develop, hold, grant, and dispose of or turn to account any patent, trade mark, secret information, copyright, grant, license, lease, process, design, concession and the like which may seem capable of being used for any of the purposes of the company, and the acquisition of which may seem calculated to benefit the company; (f) To acquire by purchase, lease or otherwise and to hold and dispose of such movable and immovable property, rights, easements and privileges as may be deemed necessary or convenient for the purposes of the company; (g) To issue fully paid-up shares, bonds or debentures for the payment either in whole or in part of any property, real or personal, patents, rights, claims, privileges, concessions, contracts or other advantages which the company may lawfully acquire; (h) To purchase, acquire, hold and dispose of shares of the capital stock, bonds or other securities of any other company, corporation or individual carrying on or engaged in, in whole or in part, any business which the company is empowered to engage in or carry on, and to acquire, hold, sell or otherwise dispose of such shares, bonds or securities, notwithstanding the provisions of section 44 of The Companies Act; (i) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (j) To sell and dispose of the assets of the undertaking of the company or any part thereof, for such consideration as the company may think fit and in particular either for cash or for shares, bonds, debentures or securities of any other companies, or partly for cash and partly for such shares, bonds, debentures or securities, notwithstanding the provisions of section 44 of the said Act; (k) to distribute in specie or otherwise, as may be resolved by the company, any assets of the company among its members and particularly the bonds, shares or debentures of any other company formed to take over the whole or any part of the assets of this company; (l) To enter into any agreement with any government or authority, supreme, municipal, local or otherwise, that may be conducive to the company's objects, or any of them, and to obtain from any such government or authority any rights, privileges or concessions which it may be deemed desirable to obtain, and to carry out, exercise and comply with or sell and dispose of any such arrangements, rights, privileges and concessions; (m) To invest and deal with the moneys of the company not immediately required on such securities and in such manner as may from time to time be determined; (n) To promote any company or companies for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (o) To construct, improve, maintain, work, manage, carry out or control any roads, ways, branches or sidings, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (p) To lend money to customers and others having dealings with the company and guarantee the performance of contracts by any such persons; (q) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (r) To do all or any of the things hereby authorized either alone or in conjunction with or as factors or agents of any other company or persons, or by or through factors, trustees or agents; (s) To do all such things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Canadian Biscuit & Confectionery Export Company, Limited," with a capital stock of forty thousand dollars, divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 24th day of March, 1919.

THOMAS MULVEY,
Under-Secretary of State.

39-1c

Legislation will be introduced at this session of parliament that will enable the government to retire on pension a large number of civil servants.

GOVERNMENT AND MUNICIPAL BONDS

The Monetary Times' Weekly Register of Municipal Activities and Financing

THE large issues of provincial and municipal bonds which were made during the first three months of this year have now been absorbed and the market is comparatively bare of such securities. This is illustrated by the high bids made for the Saskatchewan issue and it is anticipated that the $3,000,000 Ontario issue, tenders for which close on April 12th, will be sold at a high figure. In the industrial field a recent issue has been met with distinct success. The houses offering the Montreal Tramways bonds have this week raised the selling price from par to 101; the $2,000,000 issue of Fraser Companies, a private offering of which was made a week ago by the Royal Securities, has been practically all placed.

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Ontario	$3,000,000	5½	3 yrs.	April 12
North Bay, Ont. . .	22,000	6	20 instal.	May 3
North Bay, Ont. . .	4,400	6	10 instal.	May 3

Picton, Ont.—The Bank of Nova Scotia has bought privately a small block of $5,000 6 per cent. bonds, payable in 15 years.

North Sydney, N.S.—A bill is to be introduced in the legislature authorizing the town to borrow $80,000 with which to build a town hall and a school structure.

Burnaby, B.C.—The British American Trust Co. has been awarded an issue of $400,000 6 per cent. 5-year bonds at 99.09. The bonds were issued for tax arrear purposes.

St. John, N.B.—A bill to ratify and confirm an issue of $[illegible]00,000 of 6 per cent. debentures authorized by an order-in-council in July last was introduced in the New Brunswick legislature last week.

Moose Jaw, Sask.—A by-law of the city for the purpose of raising $210,000 for extensions to the electric light and power systems by way of debenture issue will be submitted to the burgesses of the city on April 16th, 1919.

Ontario.—The province is asking for tenders for the purchase of an issue of $3,000,000 3-year 5½ per cent. gold bonds, up till Saturday, April 12th. Further particulars appear in the advertisement on another page of this issue.

North Bay, Ont.—Sealed tenders will be received up till May 3rd, 1919, for the purchase of $22,000 6 per cent. 20-instalment local improvement debentures and $4,400 6 per cent. 10-instalment local improvement debentures.

Rockwood, Man.—The ratepayers of the municipality have given their approval to the decision of their council to borrow $224,000 to construct 270 miles of road, together with several bridges, under the provisions of the Good Roads Act.

Edmonton, Alta.—The utilities committee of the city council have voted that the commissioners approach the board of public utilities to obtain permission for the city to float a bond issue of $900,000 for the proposed new telephone installation.

Newmarket, Ont.—At a special meeting of the town council on April 7th, the standing committee on finance reported on the proposed sewerage scheme for the town, recommending the issue of $110,000 25-year 5½ per cent. debentures to cover the cost of installing the system. The report was adopted. P. J. Anderson, town clerk.

Fredericton, N.B.—A bill to authorize the city to issue debentures for the purpose of constructing permanent streets and sidewalks was agreed to in the New Brunswick legislature last week, with an amendment striking out the section which made the debentures a charge upon the real and personal property, income and revenues of the city of Fredericton.

Ottawa, Ont.—The private bills committee of the Ontario legislature passed a bill asking for the power to borrow $1,500,000 by means of debentures for the erection of a civic hospital. By-laws asking for the power to borrow $525,625 for construction and other purposes, without the consent of ratepayers, were also passed by the committee. Provision is also made for providing $80,000 by debentures for creating a fire insurance reserve fund for civic buildings.

British Columbia.—Payment was made at Ottawa recently by the province through its agents, of the $3,000,000 borrowed from the Dominion over a year ago, and to repay which the recent loan for a like amount was negotiated. The Dominion loan carried an interest rate of 6 per cent., while the loan made by the province to repay it was at a rate of 5½ per cent. Shortly, the provincial government will be in the market again for $3,500,000 authorized by bills passed at the present session and with which the development policies set forth during the session will be carried into effect.

York Township, Ont.—At a meeting of the York Township Council this week, Secretary Mulholland, of School Section No. 14, applied for an issue of $20,000 20-year debentures to cover the cost of a new school for the section. The matter was left over for two weeks to allow the township solicitor and the school trustees time to make further arrangements.

A by-law authorizing the issue of $200,000 worth of 6 per cent. debentures to cover the cost of purchasing the lines owned by the Toronto and Ontario Hydro Commissions, and to provide money for future expansion has been approved by the residents of York Township.

Saskatchewan.—The following is a list of authorizations granted by the local government board from March 22nd to March 29th, 1919:—

School Districts.—Henrietta, $1,200 10-years not ex. 8 per cent. instalment. Amethyst, $2,000 10-years not ex. 8 per cent. instalment. Spring Hill, $9,000 20-years not ex. 8 per cent. annuity.

City.—Moose Jaw, $200,000 20-years annuity, for extension to electric light and power plant.

The following is a list of debentures sold from March 22nd to March 29th, 1919:—

Telephone Companies.—Mawer, $2,700, Mawer, $3,000; T. P. Taylor, Regina. Blackley, $1,000; Saskatchewan Mutual Fire Insurance Co.

London, Ont.—The private bills committee of the Ontario legislature has passed a clause providing for debentures for $50,000 at 6 per cent. to pay for construction of storm sewers, but a clause authorizing an outlay of $200,000 on a new city hall, has met with opposition. The city representatives explained that it was intended to go on with the work without a vote of the ratepayers in order to save the expense of a ballot at this time and to provide work for the unemployed without delay. The clause was opposed by the advocates of the Federal Square scheme, for whom Col. Coles was chief spokesman. He declared that the people opposed the proposal and that if the citizens wanted a city hall on the proposed site they should be given a chance to say so. The committee finally decided to approve of the debenture issue subject to a vote of the ratepayers.

Toronto, Ont.—A bill to enable the city to issue debentures, without a vote of the people, for permanent works to the extent of over $1,500,000, was passed in the Ontario legislature on April 8th.

A city bill for authority to borrow through the issuance of debentures of $244,063 to meet the indebtedness incurred through the work which had been undertaken by the city for the extension of Teraulay Street to a width of 86 feet between College Street and Davenport Road, and to extend Applegrove Avenue, between Ashdale Avenue and Coxwell Avenue as local improvements, was also passed. This work has been abandoned, but it is necessary to raise the money to discharge a debt of $217,835 in connection with the former extension and $26,228 in connection with the latter.

MONTREAL FINANCIAL HOUSES CHANGE OFFICES

Some Montreal financial houses have decided to change the location of their offices. About May 1, Hanson Brothers, bond brokers, and Hansons and Ferguson, members of the Montreal Stock Exchange, will vacate the premises which they now occupy at 164 St. James Street and will move to the suite of offices in the Guardian Building, formerly occupied by the Montreal Agency of the Sun Life Assurance Co. The Royal Securities Corporation, Ltd., will take over the offices vacated by the two above-mentioned firms, providing more space, which is needed owing to the increase in business during the past few months.

Another change that will be made about that time will be the removal of the offices of the stock broking firm of F. Nash and Co., from their present location in the Bell Telephone Building on Hospital Street to premises on St. Francois Xavier Street.

QUEBEC BOND SALE APPROVED

At a meeting of the Quebec city council on April 4th the issue of $400,000 Catholic school debentures was discussed. Tenders for this issue closed recently, and it was awarded to Wood, Gundy and Co. at 101.21 and interest for 35-year bonds with interest at 5½ per cent. The city council approved of this transaction. Mayor Lavigueur stated, however, that he favored short-term bonds, and that while in Ottawa recently he had obtained an opinion, coming from Sir Frederick Williams-Taylor, general manager of the Bank of Montreal, to the effect that the issue of long-term bonds on such a high rate of interest as around 5½ per cent. would not at the present time be good financing.

ONTARIO LOANS UP TO $10,000,000

A resolution by Hon. T. W. McGarry, authorizing the Ontario government to raise up to $10,000,000 upon the credit of the province, was adopted in the provincial legislature this week. The government is authorized to make provincial loans free of provincial taxation and succession duties, and to pay 7 per cent. interest.

The treasurer pointed out that the reference to exemption from taxes simply followed the wording of the general act. The authority was there, but it had not been acted upon for several years, but to drop it might cause questioning and interfere with the sale of bonds.

"There is no intention on the part of the government to exercise the right to exclude these bonds from taxation," was Mr. McGarry's assurance. The authority to pay 7 per cent. interest was in the same position. It was there to meet eventualities, but it was not intended that such a rate should be paid; in fact, he had hopes that the money could be secured for 5 per cent.

Another resolution approved the agreement with the Canadian Bankers' Association, under which the province was able to assist farmers in the purchase of seed grain during the war. Mr. McGarry stated that unpaid loans for 1917 and 1918 amounted to between $25,000 and $30,000. There would be some loss, but he expected that much of the amount unpaid would be received eventually. The government was making good these amounts to the banks, which, however, would continue their efforts to collect it from the farmers.

LIMIT BOND PURCHASES BY OHIO BANKS

Mention was made in *The Monetary Times* last week that the Ohio legislature had under consideration a bill to restrict purchases of bonds on the part of state banks. The restrictions in question are contained in the new banking bill known as the Graham bill, H. B. No. 200, which has passed the House and Senate, and no doubt will become a law within ninety days. The original draft of the bill was amended considerably.

The clauses affecting purchases of Canadian securities are clauses (b) and (f) of Section III. They are as follows:—

(b) Bonds or other interest-bearing obligations of any foreign government not at war with the United States since [illegible], and of the Dominion of Canada and Newfoundland, which has not defaulted in the payment of principal or interest on its bonds or obligations within the period of twenty years last prior thereto.

(f) Bonds or debentures of any province of the Dominion of Canada. Bonds or debentures of any city or town or district, except school district, in the Dominion of Canada having a population of not less than ten thousand inhabitants, as ascertained by official census next preceding such investment, and which has not since 1900 defaulted for more than ninety days in the payment of any part of principal or interest of any debt authorized to be contracted by it, and which has a net indebtedness, exclusive of water debt and bonds issued for other self-sustaining public utilities and the amount of sinking funds available for the payment of its bonds other than water bonds and bonds issued for public utilities, which net indebtedness does not exceed 7 per cent. of the last valuation of its taxable property for the assessment of taxes preceding such investment, and in all other respects such bonds shall conform to the requirements of clause E of this section; and in the bonds or obligations of any city, town or district therein unconditionally guaranteed as to payment of principal and interest by the Dominion of Canada or any province thereof.

BANKING AND FIRE INSURANCE

An outline of the relation between banking and fire insurance was given before the Vancouver Fire Underwriters' Association recently by Mr. Hugh Baillie, assistant inspector of the Canadian Bank of Commerce in Vancouver. The speaker reviewed the history of fire insurance and then gave a short analysis of the fundamental principles on which the commerce of the world is based. Credit, he said, is the basis of all trading. In discussing the manner in which Canadian banks extend credit to merchants and manufacturers or other classes, the speaker said that the security hypothecated for loans would be of doubtful value were it not for the protection afforded through fire insurance policies. "In this manner banks and insurance men are closely allied, both are essential to the development and progress of the country."

Mr. Baillie said that contrary to what might be expected, the risks undertaken by fire insurance companies to-day are increasing. This, he thought, is due in a measure to carelessness on the part of the public; the general use of inflammable commodities; the extensive use of machinery, both in homes and business, and the concentration of industry. The cheapening of fire insurance rates was also thought by some to have an effect of making the insured less careful, a feeling of security being created which had a tendency to make him forget that, although as an individual he might recover to the extent of his loss, there would be a loss accruing to the community.

The Windsor bank clearings for March totalled $4,861,765. Prince Albert clearings for the same month amounted to $1,398,980.

DIVIDENDS AND NOTICES

THE MERCHANTS BANK OF CANADA

QUARTERLY DIVIDEND

Notice is hereby given that a dividend of Two and three-quarters per cent. for the current quarter, being at the rate of Eleven per cent. per annum, upon the Paid-up Capital Stock of this Institution has been declared, and will be payable at its Banking House in this city and at its Branches, on and after the 1st day of May next, to Shareholders of record at the close of business on the 15th day of April.

ANNUAL MEETING

The Annual General Meeting of Shareholders, for the election of Directors and other general business of the Bank, will be held at the Banking House, in the City of Montreal, on Wednesday, the fourth day of June next. Chair will be taken at 12 o'clock, noon.

By order of the Board.
D. C. MACAROW,
General Manager.

Montreal, 31st March, 1919.

THE STEEL COMPANY OF CANADA, LIMITED

ORDINARY DIVIDEND NO. 9

Notice is hereby given that a dividend of one and one-half per cent. on the issued and fully-paid Ordinary shares of the Company has been declared for the quarter ending March 31st, 1919.

PREFERENCE DIVIDEND NO. 31

Notice is also given that a dividend of one and three-quarters per cent. on the issued and fully-paid Preference shares of the Company has been declared for the quarter ending March 31st, 1919.

The above dividends are payable May 1st, 1919, to shareholders of record at close of business April 10th, 1919.

By order of the Board.
H. H. CHAMP,
Treasurer.

Hamilton, Ontario, April 4th, 1919.

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of one and three-quarter per cent. (1¾%) on the Preferred Stock of the Dominion Textile Company, Limited, has been declared for the quarter ending 31st March, payable April 15th, to shareholders of record March 31st, 1919.

By order of the Board.
JAS. H. WEBB,
Secretary-Treasurer.

Montreal, 3rd March, 1919.

DETROIT RIVER TUNNEL COMPANY

Detroit, Mich., April 8, 1919.

NOTICE IS HEREBY GIVEN that the Annual Meeting of the stockholders of the Detroit River Tunnel Company, for the election of Directors and the transaction of such other business as may be brought before the meeting, will be held at the Head Office of the company, in the City of Detroit, Mich., on the First Thursday after the First Wednesday (being the 8th day) of May, 1919, at 10 o'clock a.m., Standard Eastern Time.

DWIGHT W. PARDEE,
Secretary.

CANADIAN PACIFIC RAILWAY COMPANY

NOTICE TO SHAREHOLDERS

The Thirty-eighth Annual General Meeting of the Shareholders of this Company, for the election of Directors to take the places of the retiring Directors and for the transaction of business generally, will be held on Wednesday, the seventh day of May next, at the principal office of the Company, at Montreal, at Twelve o'clock noon.

The Common Stock Transfer Books will be closed in Montreal, New York and London at 3 p.m. on Tuesday, the fifteenth day of April. The Preference Stock Books will be closed in London at the same time.

All books will be re-opened on Thursday, the eighth day of May.

By order of the Board.
ERNEST ALEXANDER,
Secretary.

Montreal, March 19th, 1919.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged.

I WILL PURCHASE, at fair price, small but established chartered accountancy business in Ontario, or will consider partnership proposition. Address in first instance, Chartered Accountant, c/o Box 173, *The Monetary Times*, Toronto.

FIRE INSURANCE INSPECTOR wanted by strong British Fire Office, a capable and energetic Inspector for the North West Provinces. One having experience in that field preferred, and able to extend an agency organization already partly established for some years. Applicants please state age, experience and qualifications. Correspondence treated confidentially. Address Box 177, *The Monetary Times*, Toronto.

CREDIT MEN AS ASSIGNEES

The Canadian Credit Men's Association sometimes has occasion to act as assignee for an insolvent retail merchant. A case of this kind recently took place in Toronto. Charged under Section 417 of the Criminal Code with failure to keep books of account, Henry Goldberg, a Toronto grocer, was convicted before Judge Coatsworth and fined the sum of $50. Restitution was made to the assignee for the benefit of creditors to the extent of $350.

In November, 1918, Goldberg made an assignment to A. S. Crighton, manager of the Canadian Credit Men's Association, Ltd. His statement showed assets of $1,169.83 and liabilities of $3,046.83, leaving a deficit of $1,577. There were no books of account or any records which would explain the transactions of the business. Upon examination it was found to be quite impossible to obtain a satisfactory explanation of the discrepancy from the debtor, and it developed that the creditors' accounts had invariably been paid promptly up to within three or four months of the failure. Prosecution was, therefore, instituted by the prosecution committee of the Canadian Credit Men's Association, Ltd., with the above-mentioned result.

Montreal and Toronto Stock Transactions

Stock Prices for Week ended April 9th, 1919, and Sales.

Montreal figures supplied to *The Monetary Times* by Messrs. Burnett & Co., St. Sacrament Street, Montreal.

When You are Old

Who'll provide the money to keep you? Will you then be compelled to keep on working the same as some old men you know? Or will you be able to enjoy an old age of comfort and independence?

A moderate annual saving now when you can spare the money invested in an Imperial Endowment Policy will secure you a regular income in your old age; or it will provide for your family should death call you early.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Steel Company of Canada, Ltd.—The annual meeting will be held in Hamilton, Ont., at the Royal Connaught Hotel, on April [illegible], at 2.45 p.m.

Canada Cement Co.—The annual meeting of the company was held in the board room of the Bank of Commerce, Montreal, on April 7th. The annual statement was presented to shareholders, and was accepted without comment. At the election of directors the old board was re-elected, with the substitution of G. W. Allen, of Winnipeg, to fill the vacancy caused by the death of the late G. E. Drummond.

Porto Rico Railways Co., Ltd.—A comparative statement of earnings for February, 1919, is as follows:—

	1918.	1919.		Increase.
For February—				
Gross	$ 83,185.94	$ 92,562.79	+	$ 9,376.85
Net	40,412.21	39,917.28	—	494.93
For two months—				
Gross	$165,307.40	$182,600.75	+	$17,293.35
Net	76,354.06	73,645.85	—	2,708.21

Abitibi Power and Paper Co.—Two new directors were elected to the board at the annual meeting, which was held at the head office, Montreal, on April 7th. Alexander Smith, of Chicago, was elected to replace E. M. Mills, also of Chicago, whose resignation was tendered during the year. W. A. Black, vice-president and managing director of the Ogilvie Flour Mills Co., was elected to the board to fill the vacancy created by the resignation some months ago of Hon. Geo. Gordon, of North Bay.

King Edward Hotel Co., Ltd.—A good showing is made by the new management of the King Edward Hotel, the United Hotel Co. of America, who have turned a substantial annual deficit into a surplus for the year ended March 31st of approximately $125,000. The company's net earnings for eleven months to February 28th, 1919, after providing for bond interest, taxes and depreciation on inventories, amount to $112,266, and it is estimated that for the full twelve months ended March 31st, 1919, they will exceed $125,000. The directors of the company at a recent meeting decided to declare an initial dividend on the common stock of the company of 5 per cent. out of the profits available to February 28th last, which will be paid April 21st to shareholders of record April 10th, on which date the transfer books will close.

Nova Scotia Underwear Co.—The annual meeting was held in Windsor on March 27th. The report of operations for 1918 showed net profits of $41,053, which is equivalent to about 1[illegible] per cent. on the common stock, after providing for the preferred dividend. The mill at Windsor, which had been closed for refit for a few weeks, after running practically day and night for over two years, resumed operations the first of April.

At a subsequent special general meeting of the shareholders a resolution was passed authorizing the directors to issue and sell bonds of the company sufficient to produce the necessary capital wherewith to equip the company for the new departments.

The following were added to the board of directors: S. E. Elkin, M.P., general manager, Maritime Nail Co.; H. Holdroyd, Toronto, vice-president, Preston Woolen Manufacturing Co.; C. J. Burchell, K.C., of Maclean, Paton, Burchell and Ralston, Halifax.

Goulds Manufacturing Co.—The surplus of the company on January 1st, 1918, was $1,141,337, and during the ensuing twelve months it was enlarged by $216,204. The total for distribution was thus $1,357,541. Out of this sum $97,175 was paid in dividends—$52,325 on the preferred and $44,850 on the common—making the surplus, as at December 31st, 1918, $1,260,366. The assets of the company at the end of the year totalled $3,521,342, an increase during the twelve months of $105,541. The value of the plant was increased by $71,662, and now stands at $1,516,777, while $132,631 more than formerly was reserved for depreciation, or a total of $425,420. Inventories of finished parts, work in process, materials and operating supplies, estimated at cost, reach the sum of $1,866,398, which is $311,213 more than a year ago. On the whole while the statement shows a large increase in the value of the company's assets, the total of its outstanding obligations indicates a material decrease.

Goodwins, Ltd.—Gross profits of $336,947 are shown in the annual statement of the company, an increase of over $34,000 as compared with the previous year. After providing for bond interest charges of $50,384, interest on loans and mortgages, $61,669; writing off $50,000 for depreciation of plant and equipment and allowing $10,000 for the reserve for doubtful accounts, there remained a net profit of $164,894 to carry forward to profit and loss account, as compared with $150,405 in 1917, and $125,074 in 1916. The total amount standing to the credit of profit and loss account at the end of the company's year, January 29, 1919, was $685,115, against $520,221 last year and $369,815 the previous one.

The net profits of $164,894 shown in the 1918 statement represent earnings at the rate of nearly 9.5 per cent. on the $1,750,000 outstanding preferred shares of the company, against 8.6 per cent. in the previous year. The balance sheet of the company shows a considerably improved financial position, current assets exceeding current liabilities by $947,245, against $802,771 last year, while cash on hand is shown at $122,598, compared with $46,236 in 1917.

Canadian Westinghouse Co., Ltd.—The fifteenth annual statement for the year ended December 31st, 1918, was submitted at the annual meeting, held in Hamilton on March 25th. A balance of $1,401,616 was brought forward from the previous year. Earnings from manufacturing operations during 1918 amounted to $1,622,048, less administration, selling expenses, etc., $617,168, leaving a balance of $1,004,880. The sum of $21,529 was also received as interest on war loan bonds and $14,308 from bank interest and miscellaneous earnings, making a total of $1,040,718; $170,000 was deducted from this for depreciation, leaving net earnings of $870,718. Dividends required $560,646, leaving the sum of $310,072 to be added to the balance brought forward from last year, which makes a total of $1,711,688 to be carried forward into the 1919 account.

During the year quarterly dividends at the rate of 7 per cent. per annum and an extra dividend of 2 per cent. were paid. The following directors were re-elected: H. H. Westinghouse, P. J. Myler, L. A. Osborne, Thos. Ahern, Sir J. M. Gibson, J. F. Miller, F. A. Merrick, W. Y. Soper, C. A. Terry and Gen. Guy E. Tripp.

Western Grocers, Ltd.—Net profits for the year ended December 31st last, amounted to $303,463, after deducting bank interest, bad and doubtful debts, and after writing off depreciation on plant, etc. This represents an increase of $20,387, or 7.2 per cent., over 1917 and $84,448, or equal to 38 per cent. over the 1916 figures. After writing off the sum of $5,000 from the good-will account of the Riley-Ramsay Co., Ltd., the Port Arthur subsidiary of the company, which has since been merged with the parent company, and adding $53,004 to a special reserve account, required by one of the by-laws of the concern, thus increasing that reserve to $305,185, there remained a balance of $250,459 to be transferred to the

YOU MAY BE A RICH MAN, SOME DAY—

Opportunities for making money are many, but it takes time for capital to accumulate even under the most favorable conditions. Every man of ability expects in the course of years to have sufficient to ensure to his family during their lifetime the comforts to which they have been accustomed. Unless an unexpected reverse of fortune occurs there is little doubt but that you will make money. But "many things may happen" while the money is being made. This is where Life Insurance comes in and makes available the means that would have been yours if health and life had been spared. You will be rich "some day" if you live, but *the Insurance policy will anticipate for your family the accumulations of future years* and render sufficient means available even should you not survive to realize your ambition.

Is your prospective income insured?

[illegible] bringing the latter up to [illegible].

The [illegible] of the company now outstanding [illegible] the par value of $2,385,180 owing to [illegible] $18,000 accumulation of preference [illegible] to the shareholders through the issuance [illegible]. Allowing a full year's dividends on this [illegible] approximately $163,000, the balance carried forward [illegible] and loss account at the end of 1918 [illegible] surplus of some 6.8 per cent. on the common [illegible] company outstanding, while the net profits of [illegible], after allowing for deductions and fully preferred dividends, show that the company earned approximately 3.8 per [illegible] common last year.

Riordon Pulp and Paper Co.—The annual meeting of the company was held in Montreal on April 2nd. There were only two new directors elected, Mr. J. W. Wheeler, of Parkinson and Burr, Boston, who succeeds Mr. W. G. White, of New York, and Brig.-Gen. J. B. White.

In his address to the shareholders, the president, Mr. Charles Riordan, expressed satisfaction in the year's results in view of the difficult conditions, particularly as respects wood, labor and transportation, which the company had to contend with. He reviewed the year's operations and the construction programme of the company, and touched upon the company's extensive interest in the Kipawa Co., Ltd., and the new 100-ton per day bleached sulphite mill now being erected on Gordon Creek at the foot of Lake Timiskaming. He expressed satisfaction with the conversion of 100 tons per day of the company's Hawkesbury product from unbleached pulp to bleached pulp as allowing the company a wider range of market, particularly export.

The following are the names of those included in the directorate for the coming year: Chas. Riordon, president, St. Catharines, Ont.; Carl Riordon, vice-president and managing director, Montreal; J. S. Douglas, Toronto; T. E. Warren, manager, Ticonderoga Pulp and Paper Co., Ticonderoga, N.Y.; T. J. Stevenson, sales manager, Riordon Sales Co., Montreal; C. G. Bancroft, president, International Trust Co., Boston; C. B. Thorne, manager of manufacturing, Riordon Pulp and Paper Co., Ltd., Hawkesbury, Ont.; F. B. Whittet, secretary-treasurer, Riordon Pulp and Paper Co., Ltd., Montreal; Brig.-Gen. J. B. White, manager, wood department and saw mills, Riordon Pulp and Paper Co., Ltd., Montreal; J. W. Wheeler, of Parkinson and Burr, Boston, Mass.

Phenomenal Increase in Life Business

First Three Months of 1919 Shows Increases in New Business Written of Over One Hundred Per Cent. in the Case of Many Companies—Is Principally Due to Influenza Epidemic—Life Underwriters, However, Unable to Entirely Account for Increase

LIFE insurance underwriters have always been confident that the public did not fully appreciate the advantages offered by the policies for sale at the present time. Just why, however, this increased appreciation should be expressed by such an unusual increase in the volume of new business written as has taken place during the last few months is something which they find difficult to explain. The reasons are naturally sought by a comparison of the conditions at the beginning of 1919 with those of the beginning of 1918. One new circumstance is the fact that the influenza epidemic caused an unusual number of deaths and that life insurance companies were able to meet these additional claims without serious difficulty. A second new condition is the return of large numbers of men from Europe who are being reinstated in civil life and are, therefore, excellent prospects for life insurance. Some cities paid for insurance on those who enlisted from it; claims collected in this way have had the effect of introducing the advantages of insurance into circles which may not have appreciated them before and also those who have had this protection for some years may now feel the responsibility of carrying it at their own expense.

A third cause has been the continued increase in the cost of living, a resulting decline in the producing power of money. The amount of insurance, therefore, which might be considered adequate some years ago may now be quite insufficient. Some insurance men, moreover, think that the wholesale adoption by the United States Government of insurance upon its soldiers and sailors has had the effect of advertising insurance, especially in substantial amounts. The increase is not entirely accounted for by larger policies, however; in the case of the Canada Life the number of policies issued during the first three months of this year was 4,648, compared with 2,429 last year which is just about in proportion to the increased volume of business.

The following list, showing the amount of new business written during the first three months of 1918 and of 1919 with the increase, has been collected by *The Monetary Times*. All companies doing business in Canada are not included in this list but it includes a considerable proportion of the companies and may, therefore, be regarded as representing the development in this phase of life insurance business during the present year. Many of the companies whose figures are not given here, such as the Western Empire Life, report increased business. Some of those operating extensively in the west attribute the increase partly to the more favorable conditions this year, which facilitate traveling.

Company.	1918.	1919.	Change.	%

LONDON AND LANCASHIRE LIFE AND GENERAL

The London and Lancashire Life and General Assurance Association, Limited, plans to change its name. This change will be subject to the approval of the shareholders. The new name has not yet been definitely announced. It is understood that the change is due to confusion with the London and Lancashire Fire Insurance Company. The company does a large business in Canada, its chief agents being Mr. Alex. Bissett, manager, and W. H. R. Emmerson, secretary; the Ontario manager is Mr. Walter J. Morris, Toronto.

GOOD MARKET IN UNITED STATES

Mr. C. B. Spitzer, senior member of the firm of Spitzer, Rorick and Company, of Toledo, Ohio, was a visitor recently in Vancouver for the first time. This firm has handled many Canadian bonds, especially those of British Columbia municipalities. He expressed an optimistic opinion regarding the growth of financial relations between the two countries. With regard to Vancouver, he said there should be great opportunities in foreign commerce for this port. The trade with the Orient was going to become a most important one for the Pacific coast and Vancouver, as the Canadian port of entry, had excellent prospects.

While the money market was inclined to be somewhat tight, Mr. Spitzer said business enterprises should find no difficulty in securing sufficient capital for good legitimate concerns. The war loans had taken up most of the money that was available for investment, yet by the hypothecation of this paper, money was being raised for business development purposes.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the weeks ended April 10th, compared with the corresponding week last year:—

	Week ending Apr. 10, '19.	Week ending Apr. 11, '18.	Changes.
Montreal	$102,331,556	$ 94,054,750	+$ 8,216,806
Toronto	81,272,866	67,676,368	+ 13,596,498

The Toronto and Montreal Stock Exchanges will be closed on Friday, Saturday and Monday in connection with the Easter holidays.

[illegible] WRITE HAIL BUSINESS HERE

The [illegible] Insurance Co. of New Jersey will shortly [illegible] write hail insurance in Manitoba, Saskatchewan [illegible]. The chief agent for Canada will be Mr. W. J. [illegible] Carson and Williams Brothers, Ltd., with [illegible] Winnipeg, Regina and Calgary. The company's [illegible] statement as at December 31st, 1918, shows total assets of $5,537,434, including investments of $3,833,029, uncollected premiums of $1,139,680, and cash, $374,030. Liabilities consist of reserves of $3,215,470, capital $1,000,000, and surplus, $1,321,964.

STERLING AND NEW YORK EXCHANGE

"Investment Items" will be issued monthly by the Royal Securities Corporation instead of every two months. The April number, which has just appeared, discusses the removal of the restrictions on exchange:—

"The abandonment of the artificial support given to sterling exchange in New York by the British government is a natural and proper recognition of the fact that the policy of maintaining a high exchange rate was a direct assistance to American exporters seeking possession of the British market. While the war lasted and the only commodities which Great Britain was importing were necessities of war, upon which the Americans naturally charged their own price in any event, the maintenance of a high exchange rate did no harm and facilitated the floating of British securities in the United States. But the moment that Great Britain ceased to have an imperative need for large quantities of American commodities, and began, on the other hand, to need to ship commodities to the United States in payment of interest on her indebtedness, the situation was reversed, and it now appears surprising that the high exchange policy was maintained so long. For a high rate on the British pound sterling in New York is an incentive to the American to ship commodities to England, while a low rate is a deterrent to the American seller of commodities and means an added profit to the British exporter of goods to America. *The new policy is of interest to Canada, because as regards exchange Canada is, broadly speaking, a province of New York.* Our rate on sterling is made via New York, being the American rate plus or minus the rate between New York and Canada; and the latter rate, the Canadian quotation on 'New York funds,' is produced almost entirely by the momentary condition of our commercial and financial dealings with the United States. The effect of the 'pulling out of the peg' in sterling exchange is, therefore, practically the same upon Canada's export trade and prospects as on those of the United States, except in so far as it may be counteracted by special factors of another kind, such as favoritism in import licenses, shipping space, etc. At the present writing these countervailing factors are not, and do not seem likely to be, very extensive. It is to be noted that the adverse effect of this new policy is likely to be little or none at all in the case of those commodities of which Great Britain still has imperative need, such as foodstuffs, pulp and paper, lumber and a few other articles, of which Canada is a larger producer. But there are other commodities in which the Canadian and American exporter would have to compete with British producers capable of supplying the whole or nearly the whole of their home market; and in these classes the new policy will afford a strong advantage to the home producer, or rather deprive his competitor of an artificial advantage conferred on him by the high sterling rate. On the other hand, the abnormal exchange rate which works against us as between this country and Great Britain works for us as between Canada and the United States, placing a premium on remittances of cash from New York and Montreal, and, therefore, on the sale of Canadian commodities and securities to Americans."

Saskatchewan soldiers will be asked to consider a scheme to construct a plant for the manufacture of agricultural implements, to be backed by a capital of $3,000,000.

MUNICIPAL FINANCING NOT SATISFACTORY

Loan Official Suggests More Guidance on Part of Provinces, but no Guarantees

As chairman of the committee on municipal financing, part of the executive of the Dominion Mortgage and Investments Association, it fell to the lot of Mr. E. M. Saunders to deal with this subject. At the first session of the annual meeting, held recently, he said: "There is evidence that the financing of municipalities is not yet on a sound basis. When municipalities get into difficulties and find trouble in meeting their obligations we naturally blame the governing bodies of these municipalities, and rightly so, but we must not overlook the fact that in many such cases the obtaining of credit has been made too easy for them.

"The maintaining of the credit of our municipalities generally, at home and abroad, is largely dependent on the close supervision of all their borrowings, and it would be well if provincial governments and investing institutions, such as banks, bond houses and other lending corporations, should take united action in this supervision.

"There is a duty devolving upon the provincial governments to protect the municipalities within their boundaries, both in respect to making unwise expenditures, and also to be prepared to come to their assistance when they get into difficulties. In the past the provincial governments have been somewhat lax in the supervision of municipal expenditures, as is indicated by the number that are looking for relief, but there is evidence that the provincial governments are now more alive to their responsibilities in this respect and are keeping a close check upon the borrowings of their respective municipalities through their local government and public utilities boards. The provincial governments are, however, lacking in the proper machinery which enables them to promptly come to the assistance of municipalities which find themselves in financial difficulties. This assistance does not of necessity have to be in the form of government guarantee of securities, which might establish a dangerous precedent, but might take the form of temporarily placing at the disposal of such municipalities the services of experts in municipal financing.

"Having dealt with the responsibilities devolving upon provincial governments in protecting the investors in municipal securities, we come to the responsibility of the municipality itself, which is primarily responsible for the debts it incurs. The solution of this difficulty might be found in the placing in charge of the financial administration of the affairs of a municipality a man who has been thoroughly trained for this work, and his control should be such that he shall not be hampered by the whims of a council or the ratepayers. The salary of such an officer should be the largest paid by the municipality, as he will have greater responsibilities than any other civic official. There are many municipalities whose financial standing has been improved and maintained by the employing of such an official.

"I cannot give expression to these few thoughts on this subject without sounding a note of warning to municipalities, when considering the readjustment of their affairs, against interfering in any way with the rights of the investors in their securities, and without first consulting these investors. It is, perhaps, needless to warn such municipalities that any interference with these rights would most seriously affect their own credit, and also reflect upon the credit of all municipalities located within their own province.

"As has been stated in the formal report of your committee on municipal financing, it is gratifying to know that, after the strenuous times experienced in financing during the war, there are comparatively few municipalities which find themselves in a position where it is necessary to ask relief from their creditors."

Mr. Saunders proceeded to outline the various steps taken to bring to a final settlement the difficulties which had arisen in Prince Albert, Sask. After preliminary explanations he stated: "A final conference was arranged with the Prince Albert civic officials and bondholders' representatives at Regina. When we met in Regina it was felt necessary to have an umpire or someone who would arbitrate any differences between us, and Mr. Martin, premier of the province, very kindly consented to act as chairman, and I might say, Mr. President, he and some of his Cabinet ministers who attended the conference were very helpful in bringing the matter to a final settlement. The settlement itself was on the basis of refunding the whole debenture indebtedness of approximately $3,500,000. This settlement was made on the basis of refunding the whole issue over a period of forty-five years, the payment of interest for the first five years at 1 per cent., the second five years at 2 per cent., the third five years at 3 per cent., the next ten years at 4 per cent., the next ten years at 5 per cent. and the next ten years at 6 per cent., making an average rate of about 4 per cent., with the privilege to the bondholders, or rather the right to the bondholders, of seeing the city's budget every year and approving of it, the estimates to be approved by the bondholders. If there was any dispute, the matter was to be referred to the Local Government Board. Provision was made for a revision of the terms of the agreement at the end of any five-year period, and if it is found at the time of this revision that the city is able to pay a higher rate of interest, they are to pay this up to a maximum average of 5 per cent., which they claimed their outstanding bonds bear."

GROWTH OF PULP AND PAPER INDUSTRY

The statistics of the pulp and paper industry in Canada hitherto collected and published by the Forestry Branch of the Department of the Interior are now prepared cooperatively by that branch and the Dominion Bureau of Statistics. Under this arrangement the statistics for 1917 are being issued. These show that in 1915 eighty mills produced pulp and paper valued at $40,000,000, while in 1917 eighty-three mills produced pulp and paper valued at $96,000,000, an increase of nearly 140 per cent. The pulpwood consumed increased from slightly over 1,400,000 cords in 1915 to 2,100,000 cords in 1917, an increase of nearly 50 per cent., while the total value of the wood rose from $9,426,000 to $18,817,000, an increase, as will be seen, of nearly 100 per cent. Nearly twenty-three thousand persons were employed, which was an increase in the two years of 50 per cent., while total wages increased 96 per cent. in the same period. The other facts relating to the industry will all be found set out in the bulletin which may be had free upon application to the Dominion Statistician, Ottawa.

BANK BRANCH NOTES

The following is a list of branches of Canadian banks opened recently:—

Collingwood East, B.C. . . .	Canadian Bank of Commerce.
Glace Bay, N.S.	Canadian Bank of Commerce.
Belleoram, Nfld.	Canadian Bank of Commerce.
*Tracadie, N.S.	Canadian Bank of Commerce.
Sedalia, Alta.	Union Bank of Canada.

---

*Sub-agency.

The Union Bank of Canada has now completed its plans for the construction of a new main office in Vancouver. This will cost $250,000, and will replace the old building now occupied at the corner of Hastings and Seymour Streets.

A branch of the Canadian Bank of Commerce will be opened at the corner of Ottawa Street and Campbell Avenue, Hamilton, Ont., as soon as necessary alterations are completed.

Mr. H. F. Boehmer has resigned the postmastership at Kitchener to become manager of the Royal Bank of Canada there.

Final arrangements have been completed to establish a branch of the Molsons Bank at Bridgeburg, Ont. Officials have purchased the Hart Block, a three-story brick building on Jarvis Street, the principal business thoroughfare.

The Sterling Bank is contemplating building at Kelwood, Man.

LACOMBE AND BLINDMAN VALLEY RAILWAY

Has Been in Default Practically Since Commencement—Now Taken Over by Province

THE Alberta government is at present enacting legislation to take over the Lacombe and Blindman Valley Railway. Discussing the bill recently in the provincial house, Premier Stewart said:—

"I think the government will be well advised to dispose of the railway as soon as possible to one of the transportation companies. I do not mean that government ownership is not a good thing but I think that under the existing conditions, one of the transportation companies which have the men and the organization would be the best to operate the line."

Mr. Stewart also gave a detailed financial statement of the company's obligations which include the following:—

Advances by province to date	$255,000
Interest paid on defaulted bonds	41,000
Accrued interest due on advances	9,000
Miscellaneous outstanding liabilities.....	35,000
Original bond issue	273,700
Total	$613,700

The premier said that to complete the line to Larson would cost $122,000, and to carry it to Rimbey would take another $197,785, or a total of $319,785. This amount, added to the foregoing total, gives a grand total of $933,485, which will represent the provincial investment when the line is complete from Lacombe to Rimbey. Mr. Stewart said that it is practically necessary to complete the line in order to dispose of it on reasonable terms to some transportation organization, and, moreover, that the projected line runs through excellent territory. Also, the section of the line in operation, under most unfavorable financial conditions, last winter earned within $600 of its operating expenses, exclusive of the bond interest charges.

In reciting the history of this line, Mr. Stewart pointed out that the bonds were guaranteed at the second session of the legislature of 1913 to the extent of $7,000 per mile for [illegible].1 miles, the total issue being $273,700 of five per cent. thirty-year bonds under the light railways assistance act. Some construction was proceeded with but the company found itself in financial difficulties and halted construction; also, it was unable to provide the third instalment of bond interest falling due in April, 1915, which was made good by the province. The company is still in default and the province has protected the bond interest continuously. The government finally secured control of the stock of the railway, now holding 4,105 shares of the par value of $100 each, representing slightly more than eighty per cent. of a total issue of $[illegible]0,000. For this stock, the total amount paid by the province was $1,841.35 or at the rate of 45 cents a share. Prior to this, however, the legislature had passed a further act increasing the guarantee sum to $14,000 a mile on the understanding that the company was to raise sufficient money to proceed with the work. This was not accomplished and the second guarantee was never executed.

The company has twenty miles of track laid and in operation and a road bed graded to within a mile and a half of Rimbey with sufficient construction material on hand to lay three or four miles of track. The premier expressed the opinion that the government is getting full value for every dollar expended. The equipment of the company includes two steam locomotives, one gasoline car, and one passenger car.

The bill provides as follows:—The head office is changed from Lacombe to Edmonton. The directorate is reduced from [illegible] members. Section 1 enables the company to [illegible] its property to $25,000 a mile. The government [illegible] to raise the additional $500,000 on its own credit and [illegible] the company to complete the work. Time of [illegible] of the railway is extended to December 31st, 1921. The word "[illegible]" is struck out of the name of the company. The government receives authority to acquire and register ownership of further shares. The second guarantee of $14,000 a mile is repealed. The prospect of selling the line to either the Canadian Northern Railway government lines or to the Canadian Pacific Railway is another reason why the government does not wish to have the company issue more bonds of its own.

BANK LINKS UP WITH GREAT BRITAIN

Royal Bank Makes Important Banking Connection—Important Deal Completed for Connection With Banking Institution in Great Britain

THE Royal Bank of Canada has just entered into a close reciprocal working arrangement with the London County, Westminster and Parrs Bank, Limited, which must have far-reaching results. The London County, Westminster and Parrs Bank, Limited, is one of the oldest, strongest and most important of the English banks. It has over seven hundred branches in England, also branches in Spain and Belgium, and controls an affiliated bank in France, namely, the London County and Westminster Bank, Paris, Limited, with numerous branches, and also the Ulster Bank, Ireland, all of whose shares it owns.

With a view of cementing the relationship between the two banks, the London County, Westminster and Parrs Bank, Limited, have offered to buy for investment ten thousand shares of the Royal Bank of Canada stock at two hundred dollars per share, and the shareholders of the Royal Bank of Canada are by circular unanimously and strongly recommended by the directors to facilitate the sale of the shares by renouncing their rights thereto, as it is obvious that this close working arrangement will extend and strengthen the connection of the Royal Bank of Canada and place them in a most favorable position with regard to European business.

It is anticipated that all shareholders will readily agree to waive their rights to the proposed new issue. In this connection it is interesting to note that the London County, Westminster and Parrs Bank are paying two hundred dollars per share for the shares they are purchasing, whereas the issue of shares authorized at the last annual meeting of stockholders of the Royal Bank of Canada was allotted to shareholders at the favorable price of one hundred and fifty dollars per share.

As a result of this arrangement the paid up capital of the Royal Bank will be increased from $14,830,690 (as at February 28th, 1919) to $15,830,690, placing it second in the list of Canadian banks in respect of paid-up capital; that of the Bank of Montreal is $19,075,000, which will, however, shortly be $20,000,000; the paid-up capital of the Bank of Commerce is $15,000,000. The Royal Bank already ranked second in the amount of its assets, and in reserve.

OBITUARIES

MR. W. J. TURPIN, one of the older members of the Montreal Stock Exchange, died in Montreal last week.

MR. STEVEN JOHNSON PARKER, who, for forty-five years, was treasurer of Grey County, died at his home in Owen Sound on April 12th.

MR. JOHN PALMERSTON ROBERTSON, Provincial Librarian of Manitoba, and one of the best known men in Western Canada, died on April 11th, in Los Angeles, Cal.

EDMUND B. LASCHINGER, of Toronto, died on April 16th. He was a member of the firm of Cawthra Mulock and Co., stock brokers, an executor of the Cawthra Mulock estate, vice-president of the National Iron Works, of the Canada Bread Co., and of the Royal Alexandra Theatre, Toronto. He was born in New Hamburg, Ont., and for many years was secretary to Sir Wm. Mulock, and assistant deputy postmaster when the latter was Postmaster General of Canada.

PARTIAL EXEMPTION FROM ASSESSMENT

THE Ontario government is enacting legislation to partially exempt dwelling houses from assessment for taxation purposes. The proportion of value to be exempt decreases as the value of the property increases. The exemption does not apply to the land upon which a house is situated. The application of the act in any municipality is to be subject to the approval of the electors. In rural districts it is to apply to all buildings. The scale of assessment is to be as follows:—

	Assessment.
House valued up to $2,000	50%
" " " $2,500	60%
" " " $3,000	70%
" " " $3,500	80%
" " " $4,000	90%
" " over $4,000	100%

The effect of the application of this act in any municipality will obviously be to decrease the assessment and to increase the rate of taxation. It will encourage the building of small houses, and the building of dwelling houses in preference to apartments. The legislation, therefore, is distinctly social rather than financial and is an attempt to further apply the principle of progressive taxation. It takes no consideration, however, of the fact that the principle of progression is distinctly personal and specially adapted to taxation of personal income, not of property values or of articles of consumption.

The act will, so far as it is put into force by municipalities, discriminate substantially against the owners of expensive property while it relieves the burden on owners of cheaper houses. This classification of owners is not by any means identical with a classification on the basis of wealth or income, which is the only means of estimating ability to pay taxes. A large investment may be distributed over a number of small properties and in such a case the investor might be relieved of fifty per cent. of his tax bill with a corresponding appreciation in the value of his property. The effect of the act will go still farther because it will, by changing the equity of the owner, indirectly affect the position of a mortgagee.

The advisability of legislation which aims to direct living conditions in this manner is questionable. It is an entirely different thing to lay down certain minimum building restrictions on grounds of sanitation, fire prevention, etc. The natural trend of housing accommodation in all large cities and towns is in the direction of large blocks and apartment houses. There is no reasonable argument against this trend, its ill-repute having originated as a result of slack building regulations. The effect of the proposed legislation will impose an additional burden on the occupants of such dwellings, and it has not been shown that real social benefits will result.

COMMISSION ON INDUSTRIAL RELATIONS

THE Royal Commission appointed to investigate industrial conditions in Canada will assemble first in Victoria, and then move eastward. The sessions are scheduled as follows:—

British Columbia—Victoria, April 28th and 29th; Vancouver, April 30th, May 1st, 2nd and 3rd.

Alberta—Calgary, May 5th and 6th; Edmonton, May 7th.

Saskatchewan—Saskatoon, May 8th; Regina, May 9th and 10th.

Manitoba—Winnipeg, May 12th, 13th and 14th.

Ontario—Fort William and Port Arthur, May 15th and 16th; Cobalt, May 19th; Sudbury, May 20th; London, May 21st; Hamilton, May 22nd and 23rd; Toronto, May 24th, 26th, 27th and 28th.

Quebec—Montreal, May 29th, 30th and 31st.

New Brunswick—St. John, June 2nd.

Nova Scotia—Halifax, June 4th; New Glasgow, June 5th; Sydney, June 6th.

Quebec—Quebec City, June 9th.

THE WAGE EARNER AND HIS VALUE

SENATOR Gideon Robertson, Canadian Minister of Labor, has earned a good reputation in the handling of industrial difficulties; he has the labor situation well in hand. Some of his opinions expressed before the Association of Montreal Building and Construction Industries on April 11th deserve the serious consideration of employers.

The minister showed how relations between employers and employed had changed during the past twenty-five years. The growth of industrial plants had led to the number of workmen being so great that the employer had no individual contact with them, since he did not even know them, and on the other hand very often the employers did not know who the proprietors or employers were. To-day the workingman felt that he ought to receive more recognition and that he ought to be reasonably and adequately paid so that he might live with at least the same degree of comfort as he enjoyed in pre-war days. Not only that; he had conceived the idea that he was worth more than he thought himself worth in the pre-war days. There had come to the workingman a self-confidence that they did not possess five years ago, which was due to the great things accomplished during the stress of war, both in the provision of war munitions and in the loyalty and the sacrifice that the workingmen of North America and of Europe had shown. Although the armies of the world were composed mostly of workingmen, yet they represented but a small part of the property and wealth which they had fought to save. As a result many of them were taking the view to-day that the process followed in the past had been too gradual and too slow, and that it was now incumbent upon them to be more militant than formerly, and in some countries that feeling had so grown that it had become a menace to society. Happily this was not the case in Canada and he did not think it could ever be so, for here it was a democratic country and the great majority of the people were financially interested in the country. "But I think it behoves all business men and employers of labor to give heed to the changing times and to realize that this spirit is growing and will continue to grow among workingmen unless they are convinced that they will be fairly treated," said Senator Robertson.

The minister of labor referred to recent labor events in England, where he said it was only by the adoption of very unusual methods that serious disaster had been averted. Canadian employers and employees both stood to benefit by these changes, as under the new conditions Canada could better compete with England. But if Canada was to prosper and develop industrially there must be a maximum of efficiency displayed not only by employers in management, but by workmen in their work. It was unfortunately true that too many men had sought rather to see how little they could do for their day's pay than endeavor to give honest service for reasonable compensation. Senator Robertson urged that a spirit of co-operation in all industries should be fostered, and he argued that if Canada prided itself on being a democratic country, it was also desirable that where a large capital was invested in a particular industry which was helpless to produce profit without the assistance and co-operation of the necessary labor, the advisability of that labor being consulted in the operation and management of the industry so far as the interests of employer and employee were mutually concerned, should also be considered. He did not mean to suggest that the workmen ought to have any control or voice in the capital expenditure or control of money invested, but so far as their own services were concerned they had some claim to be heard.

"The thought that is prevalent in the minds of hundreds of large employers to-day," continued the minister of labor, "and also in the minds of many workmen, is why should this situation grow any more acute? Why should we not emulate the example of the great nations of the world and now try to adopt a spirit of co-operation and arbitration to settle our differences rather than dispute the claims of the other fellow? Among big concerns which had tried this industrial closer co-operation plan were the International Harvester Co., the Imperial Oil Co., the Canadian Shoe Manufacturing Association. The shipbuilders in Eastern Canada had met and discussed the matter, and he regarded that as one of the most important conferences, because if the shipbuilding industry was to become a permanent one it must be handled very carefully owing to the acute competition that would have to be met." The minister concluded by suggesting that the workingmen must realize that there was a limit to the ability of employers to meet their increasing demands, and he also said the building trades industry seemed to be one which must benefit by more co-operative action on the lines indicated.

THE FINANCIAL OUTLOOK

HESITANCY, due largely to the indefinite political situation, is still the dominating characteristic of the financial situation. The settlement arrived at in Europe cannot fail to exercise a vast influence on Canadian trade, industry, and the tariff. It is at least very probable that no further foreign credits will be granted for the advancing of Canadian trade, as the finance minister intimated recently in the House of Commons; orders will in future have to be financed with the assistance of the existing banking system. General opinion in Canada is adverse to such credits as it is felt that they advance the interests only of particular industries, and impose a considerable risk, due to the doubtful financial position of some of the purchasers, on the general body of taxpayers.

The tariff position in Canada is still uncertain; it must be considered in relation to inter-imperial and inter-allied plans. The domestic situation is, however, slightly less acute, and it is possible that the threatened revision will not take place at all this year. Certainly no upward revision will take place, and the choice is between the present general level and a reduction.

A domestic war loan this year is practically a certainty; the amount, the terms, and the time of issue will depend upon future developments. This fact is exercising a restraining influence upon security prices, as is also the imminence of heavy provincial municipal borrowings to which we are committed. Many large issues, long overdue, were placed during the early weeks of the year, but there have not been many recently, so that the market is very nearly bare of high grade issues. At the same time it must be remembered that the American market cannot be counted on for large purchases during the next few weeks. The Victory loan in the United States will be a success, it is confidently anticipated, and as the amount is to be less than was expected, sales of Canadian bonds should not be difficult upon the close of the campaign.

NEWFOUNDLAND RAISES IMPORT RESTRICTIONS

A telegram from Sir Patrick T. McGrath, chairman of the Food Control Board of Newfoundland, to the Canadian Trade Commissioner, states that all restrictions have been removed from the import of sugar and other foodstuffs, except [illegible] which is still under license. Export permits, therefore, will be granted freely to Canadian shippers.

NEW STEAMSHIP LINE

Announcement has been made at Montreal by Messrs. McLean, Kennedy, Limited, of the inauguration of a new steamship line from Montreal to Buenos Aires and Montevideo. This line will be known as the "Houston Lines," Canada-South America Service, and will be a convenience to Canadian exporters.

CHANGE IN ALBERTA TELEPHONE FINANCES

Allowance to be Made for Depreciation in Alberta System —Government Investment of $10,000,000

On April [illegible] the Alberta legislature discussed the estimates for the government telephone system for the year. Premier Stewart referred to the physical valuation which is now being made by Engineer Wray. An enumeration of physical assets is first being made, which work is not as yet complete. When finished he was then going back over these units with an accountant to fix the values, working on a basis of normal valuation. He would then make a personal examination of a number of sample rural lines to determine the value from his own viewpoint. This work could not be completed before July 1st next.

Proceeding, the premier said that the telephone system represented an investment of some $10,000,000, with accrued surpluses of some $750,000. He pointed out that no amount for depreciation and renewal service had been set aside since the inception of the system. Later on in the argument, Mr Stewart made the statement that if he had been in control of the lines in the last three or four years he would have established such a fund. He warned the House that, as the plant had been in existence for some ten years, that a "fairly heavy" depreciation could be expected. He also said that Engineer Wray does not agree with his argument that the lines have had a fair amount of maintenance during the period of existence. One trouble was in the nature of the telephone systems, where new inventions are constantly coming in that subscribers demand, which require replacements before the plant material is worn out. If the present standard of lines was maintained, he thought they were good for twenty-five years, but with the constant replacement demanded the Bell Telephone system replaces its lines in about fifteen years. Mr. Stewart said he was not strong for building up a big renewal and depreciation account, and in this respect he was not following exactly the advice of the telephone engineer, Mr. Wray. In replying to a question from A. F. Ewing, West Edmonton, the premier said that the plant valuation would not be based on inflated war-time material values, but on "normal" values.

In regard to the $750,000 accumulated surplus, the premier said it would have to be charged up to the capital account of the telephones to square that account with the depreciation. Whether the lines were over-capitalized or not would depend entirely on the report of the plant valuation. He gave the cost of the carrying charges for the telephone lines last year as follows: Operation, 5.43 per cent.; maintenance, 2.5 per cent.; interest, 4.15 per cent.; sinking fund, .005 per cent.; overhead expense, ½ per cent.; uncollected revenue, .005 per cent., or a total carrying charge of 14.1 per cent.

The premier then made his announcement of the increase in rural rates, all of which will be placed on a flat basis. In towns of 150 to 500 subscribers the rates will be $21 for day service as against the old rate of $15; for 24-hour service, $24 as against the old rate of $18; in towns over 500 subscribers, 24-hour service at $27 as against the old rate of $1[illegible], and in towns of up to 10,000 subscribers, 24-hour service, $[illegible]0 as against the old rate of $20. In cities of 5,000 to 10,000 subscribers the rates will be: Business, $4.50 month; house, $2.50 month. In the towns, business phones, $[illegible]; house, $2.25, an increase of approximately 25 per cent. all along the line. He made the final announcement that this year all material for the system had been bought by tender.

The premier's statements came in for severe criticism. Major Lowery especially referred to the alleged total surplus of $750,000. He asserted that to begin with this figure was wholly at variance with the surpluses shown by the telephone reports which he gave as follows: 1912, $407,592; 1913, $376,378; 1914, earned reserve $29,570; 1915, $9,733; 1916, $70,710; 1917, $145,980; 1918, $149,[illegible]. Total, $1,189,519.

"When the accounting is made," declared Major Lowery, "[illegible] will find far greater discrepancies than these all along the line. But if we have made a surplus, why, then, is it necessary to increase the rates? I am not afraid to say, as I have said before, that it is a fake surplus. This fake surplus has been secured by taking the gross earnings on capitalization instead of the net earnings. The premier has said that we have 81,000 wire miles in the province," said the speaker, referring to a return brought down in the House at this session, "but if that is so, then there are 27,000 miles or more unaccounted for."

Estimates as Passed

The estimates were finally passed, including $2,000,000 to be charged to capital account and $1,600,000 to be charged to income, divided as follows: Maintenance, $245,000; operation, $500,000; interest, $499,456; sinking fund, $51,001; contingencies, $4,543; depreciation and renewal reserve, $300,000.

While the $2,000,000 capital item is provided for, the understanding is that only $1,250,000 will be borrowed for this purpose, the other $750,000 being returnable out of the general revenue fund of the province. The premier, however, stated that his idea was that this sum would be used to help square the capital account of the telephone system with the depreciation expected to be shown by the physical valuation of plant.

CENTRAL RAILWAY OF CANADA

On April 15th, the Commons Railway Committee reported the bill to extend the time for the construction of the Central Canada Railway, which is now in the hands of the Exchequer Court, and which will be sold in the interests of the British bondholders. The expiring charter authorized the construction of a line from Montreal to Ottawa, and thence to the Georgian Bay. On the advice of Hon. J. D. Reid, minister of railways, the renewal of charter rights covers only portions of the line now in operation, and under lease to the Grand Trunk and portions on which some work has been done. The minister explained that the sections in operation would doubtless pass to the Grand Trunk, and probably later on to the government. It was only fair to the bondholders, he said, that the liquidators should be given an opportunity to sell everything to which any value could be attached. The sections of the railway in operation run from South Indian to Rockland and from Glenn Roberts to Hawkesbury, a combined distance of 35 miles. Work has been done, and the right-of-way secured from South Indian to Hawkesbury and from St. Andrews to Ste. Agathe.

WINNIPEG BOARD OF TRADE ON FIRE PREVENTION

The Winnipeg Board of Trade committee on fire prevention and insurance met on April 8th. John A. E. Wildman was elected chairman. It was decided that the Winnipeg board of trade should become a member of the National Fire Protection Association. This association, which has always held its meetings in New York city, will hold its 23rd annual meeting in Ottawa, Canada, this year, May 6th, 7th and 8th.

The insurance and fire prevention committee of the board will investigate as to the responsibility of the various commissions and departments on fire prevention in Winnipeg, such as the provincial fire commission, Winnipeg fire commission, fire and light committee of the city, electrical department, fire department, and so on, having as its object suggestions for the reduction in excess fire losses in this city, which at the present time is more than five dollars per capita.

Members of the committee are as follows:—John A. E. Wildman, chairman; G. W. Northwood, C. F. Pentland, Hon. G. A. Grierson, F. O. Fowler, J. C. Davis, D. W. Dingwall, C. S. Riley, R. H. S. Stead, Thomas Bruce, C. A. Richardson, A. L. Carson, W. M. Kirkpatrick, A. E. Rowland, J. G. McIntosh, D. M. Finnie.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Brazilian Traction, Light and Power Co., Ltd.—The total gross earnings of the company amounted to 7,972,000 milreis in February compared with 7,315,000 milreis in February, 1918. The operating expenses amounted to 4,108,000 milreis, an increase of 358,000 milreis over the previous year, leaving the net earnings at 3,864,000 milreis, compared with 3,565,000 milreis in February, 1918.

Maritime Nail Co.—Under the provision of the trust deed, the company has exercised its option of redeeming all outstanding first mortgage 10-year gold bonds of the company on November 1 next. Holders of the bonds have been instructed to deposit their holdings with the Prudential Trust Co., Montreal, trustees for the bondholders, for redemption at 105, and interest to that date.

Canadian Consolidated Rubber Co.—T. H. Rieder, president and general manager of the company, has submitted his resignation and will shortly become identified with Ames-Holden-McCready, Ltd. It is stated that Mr. Rieder's advent to the boot and shoe concern will be followed shortly by a branching out by Ames-Holden-McCready into a new industry, the prospects of which are regarded as particularly bright in a trade way.

C. W. Lindsay, Ltd.—In view of the fine showing of the company for the year ended March 31st, the directors have voted a 10 per cent. cash bonus to the staff at all branches, payable May 1st next, to all employees who have been in the continuous service of the company since March 1st, 1918, and are still in its employ on May 1st, 1919. The usual dividends were declared—viz., 7 per cent. on the preferred shares and 8 per cent. on the common shares, and a large amount carried to reserve account.

Associated Goldfields Mining Co., Ltd.—The annual meeting of the company was held on April 11th, in the King Edward Hotel, Toronto. The auditors' financial statement shows shares unissued and in the treasury of over $2,500,000; cash on hand, $100,000; liabilities, none. The plans of the company comprise the expenditure of one million dollars. Two hundred and fifty thousand to be expended in mine development, six hundred thousand in mill construction, and two hundred thousand as operating capital.

Winnipeg Paint and Glass Works.—The annual statement of the company shows total assets of $1,847,927. The liabilities include $471,319 due to the bank, and $267,576 reserved to provide for depreciation, etc., a total of $738,895. The balance, $1,109,032, represents the equity of the shareholders. The common stock is $500,000, and the preferred $500,000. The current assets of the company, consisting of cash on hand, accounts receivable and inventories, amount to $770,549, and the current liabilities, $450,312, leaving the working capital $311,237. The profit for the year 1918, after making provision for depreciation, etc., amounted to $86,888. Interest charges, etc., amounted to $60,991, leaving a net balance of $25,896, which was added to the profit and loss account, making the total in the account $134,928.

Davidson Gold Mines.—At the annual meeting of the company on April 2nd, Mr. H. H. Sutherland, managing director, announced that it was necessary to increase the milling capacity by 150 tons a day, owing to the successful development of the mines.

The new mill addition will follow the pattern of the most progressive plants in the camp. The ball and cyanide process will be used. It is estimated that the mill will cost $75,000, the financing of which has already been arranged. Electric power entered the property during the year and the equipment was materially increased. In view of the important developments now taking place, the directors believe it would be misleading at the present time to make an estimate of physical resources. The financial statement of the company shows assets amounting to $1,810,446. The sum of $85,781 was expended in development work, but gold recovered last year amounted to $15,584, leaving expenditures at $70,197. This latter amount, together with the amount of expenditures brought forward on December 31, 1917, totalling $86,139, brings the total amount of expenditures to $156,336.

Grand Trunk Railway.—The annual report for the year ended December 31st last shows a heavy decrease in net receipts. The following are principal comparisons taken from the financial statement:—

	1918.	1917.	Inc.
Gross receipts	$12,655,200	$9,957,100	$2,698,100
Working expenses	10,980,000	8,065,100	2,914,900
Net receipts	$ 1,675,200	$1,992,000	$ 216,800
Balance of inc.	181,900	88,700	93,200
Total net revenue	$ 1,857,100	$1,980,700	*$ 123,600
Net revenue charges, less credits	1,518,500	1,411,500	107,000
Balance	$ 338,600	$ 569,200	*$ 230,600
Estimated deficit on account of lines under U.S. government control	336,800	542,900	206,100
Surplus	$ 1,800	$ 36,300	*$ 24,500

*Decrease.

Nipissing Mining Co.—The production of ore of the company for the year ended December 31 last amounted to 3,701,416.38 ounces of silver, as compared with 4,212,247.89 ounces in 1917, a decrease of 510,831.51 ounces. Notwithstanding this fact, however, the operations for the year were successful. The gross value of production in 1918 was $4,040,446.10, the total cost of production $1,444,350.45, and the profits on operations $2,596,095.65. These figures compare with $3,756,889.77 gross value of production, $1,057,987.49 total cost of production and $2,698,902.78 profit on operations a year ago. The principal items in the report for the two years compare as follows:—

	1918.	1917.
Gross settlements from ore and bullion	$5,563,703	$5,229,649
Gross value of ore and bullion at mine and in transit	1,496,784	1,320,839
	$7,060,487	$6,550,489
Less	3,020,041	2,793,599
Gross value of ore	$4,040,446	$3,756,889
Operating expenses	1,475,832	1,129,408
Net receipts from production	$2,596,095	$2,698,902
Net profit	$2,525,103	$2,686,471
Surplus	2,731,598	1,980,126
Dividends	$1,815,000	1,935,000
Net surplus	3,441,702	2,731,598

Beaver Consolidated Mines, Ltd.—The Beaver Company's profit and loss account shows net profits for the year of $168,642, which, added to the previous balance carried forward of $744,276, brought the total surplus to $912,919. From this depreciation charges of $11,274 were taken, leaving a balance carried forward into the current year of $901,644. This com-

AN ALLIANCE FOR LIFE

Many of the large Corporations and Business Houses who bank exclusively with this institution, have done so since their beginning.

Their banking connection is for life—yet the only bonds that bind them to this bank are the ties of service, progressiveness, promptness and sound advice.

307 Branches in Canada, extending from the Atlantic to the Pacific

New York Agency: 63 and 65 Wall Street

Bankers in Great Britain: The London Joint City & Midland Bank, Limited; The Royal Bank of Scotland

37

[illegible] with $[illegible] a year ago. Profits in 1917 amounted to $[illegible]. Gross earnings in 1918 were $393,385, of which $[illegible] came from ore. Operating charges were $207,331, and administrative charges $17,411, leaving the profit of $[illegible] as given above. Cash on hand on February 28th, 1919, was $29,19[illegible], and accounts receivable $4,116, making $[illegible], as against $18,207 a year ago.

On the assets side Kirkland Lake stock is valued at $[illegible]. This is cost price, some Kirkland Lake stock having been purchased at 8 cents and some at 16 2-3 cents per share. Were the stock which the Beaver Co. holds valued at the present market price it would stand on the books at $[illegible], or thereabouts. Current assets, including shares in other companies, total $888,642, as against current liabilities of $[illegible], of which $11,000 is provision for Dominion tax. This leaves working assets of no less than $859,000, which is equal to 42.[illegible] per cent. on the stock. Add to this the surplus carried forward and other physical assets and the value behind the Beaver stock is not far below 80 cents per share. The Beaver produced 885,042 ounces of silver in 1918, carried developments of 1,441 feet and 3,850 cubic yards of stoping.

Monarch Knitting Co.—Greatly increased profits, amounting to no less than 75 per cent. over the preceding year, are shown in the annual statement for 1918. Net profits, after providing for depreciation and war taxes, were $351,654, compared with $202,413 in 1917 and $145,534 in 1916. The company's strong financial position resulted a few weeks ago in the declaration of a dividend of 4 per cent. on common stock. "The directors look forward with confidence to the business of the coming year," says the report, "but they do not yet feel justified in placing the common stock on a regular dividend basis until conditions become more normal and until there is some assurance of continued stability in tariff legislation." The company has invaded the United States market by establishing a factory at Buffalo, which made profits of $4[illegible],416 last year, after provision for income, excess and war profits taxes. This profit has been retained in the Buffalo business as working capital. The following table will show some of the principal items in the Monarch annual report, with comparisons:—

	1918.	1917.
Net profits	$ 351,654	$ 202,413
Preferred dividend	52,500	52,500
Common dividend	51,000	......
Balance forwarded	248,154	149,913
Balance profit and loss	671,905	442,212
Current assets	1,165,528	1,805,951
Current liabilities	619,032	1,279,614
Total assets	$3,371,313	$3,751,202

British Columbia Electric Railway Co.—The net revenue of the company for the year ended June 30th last, amounted to $1,018,035, as against $804,220 the previous year, an increase of $213,815. Prior to reaching the sum first mentioned provision was made for depreciation, sinking fund and renewals and for addition to the capital amortization fund, these two items consuming $854,355. To the net profits of $1,018,035 was added $35,160 brought forward from the previous year, giving $1,053,195 for distribution. The interest on debentures and debenture stock for the year consumed $[illegible],775, and dividends on the 5 per cent. cumulative perpetual preferred stock took an additional $360,000, a total of $1,[illegible]2,775, leaving $30,425 to be carried forward for next account.

The practice in the past has been to pay the dividend on the 5 per cent. cumulative preference stock half-yearly, on January 15th and July 15th, but, as announced at the last annual meeting, the directors felt that, owing to the prevailing uncertainties and the consequent difficulty of determining whether at the end of the year the dividend would be found to have been earned, it was prudent to postpone the payment of dividend until the net revenue for the year had been ascertained to be sufficient. However, this precaution was found to have been unnecessary, as out of the net revenue it was possible to pay the full 5 per cent. dividend mentioned without recourse to the reserve fund. For the year ended June 30th, 1917, it will be remembered, it was necessary to take $220,000 from the reserve fund to make the payments, and in the year ended June 30, 1916, the sum of $350,000 in similar fashion.

Steel Company of Canada.—Gross profits of the company for the year 1918 were $5,367,120, as compared with $6,040,318 in 1917, and $5,021,391 in 1916. After deduction for fire insurance, reserve, pension fund, etc., there remains available for dividends on $11,500,000 of common stock outstanding the sum of $1,815,017, or equal to 15.7 per cent., as compared with 19.5 per cent. in 1917 and 18.4 per cent. in 1916. The balance brought forward to profit and loss account at the end of the year was $1,125,017, making the credit of that account now $7,322,872, or over 40 per cent., of the combined preferred and common stock outstanding. The company's assets now stand at $45,652,831. Current assets amount to $15,928,368 and current liabilities to $3,706,154. Reserves now stand at $7,696,258. The financial statement shows the following interesting comparisons:—

	1918.	1917.
Gross profits	$ 5,367,120	$ 6,040,318
Depreciation	802,687	1,206,000
Interest on bonds	515,172	515,203
Dividend on preferred	454,741	454,741
Dividend on ordinary	690,000	690,000
Betterment and replacement reserve	......	1,406,486
Excess cost of construction of coke ovens	1,434,451	......
Employees' pension reserve	100,000	......
Carried forward	1,125,017	1,550,351
Total assets	45,652,831	42,708,289
Current assets	15,928,358	16,480,979
Reserves	7,696,258	6,260,908
Balance, principal and interest	7,322,872	6,197,854

Dominion Linens, Ltd.—The profits of the company amounted to $71,142 for the year ended December 31st, 1918, an increase of $20,564 over the previous year. The costs of management were provided for, interest on bank loans was met and all bad debts were written off before the profits were set at the sum mentioned. Out of the profits, in addition to placing $22,740 at the credit of reserve for depreciation, the directors created a reserve of $1,000 for doubtful accounts and appropriated the sum of $10,000 as a reserve from possible depreciation of inventories owing to war conditions. The company's sales during 1918 increased 58½ per cent., as compared with 1917, and its losses through bad debts were less than 1-16 of 1 per cent. on the total sales. The physical assets of the company have been thoroughly maintained, the real estate, buildings, plants, machinery and equipment being valued at $378,694, against $372,386 a year ago. Insurance to the amount of $569,000 is carried upon the plants of the company. Among the company's assets, not previously noted, is an advance of $90,052 to its subsidiary, Flax Spinning, Ltd., control in which is held by the parent company.

The following are some comparisons taken from the financial statement:—

	1918.	1917.
Net profits	$ 71,142	$ 50,578
Dividends on preferred	21,187	16,915
Depreciation, inventories	10,000	5,000
Depreciation, plant, buildings	21,740	13,153
Inventories	197,193	196,590
Real estate, etc.	378,694	372,386
Bills receivable	45,871	56,975
Accounts payable	11,315	9,537
Bank loans	41,500	53,100
Capital stock paid	550,000	525,000
Reserve	155,044	123,957
Balance profit and loss	45,055	38,505
Total assets	817,770	751,570

The board of directors is now comprised as follows: Messrs. D. M. Sanson, president; William Berry, vice-president; H. A. Hignell, secretary-treasurer; F. B. Hayes, J. W. Lyon, G. H. Muntz, G. D. Perry, G. B. Ryan and Geo. H. Townsend.

The Foreign Exchange Situation

Reasons For the Declines in European Exchanges—Effect on International Trade—How Canada is Affected by Present Conditions

BY A. B. BARKER

NEXT to the settlement of the peace terms to be imposed on Germany, the most absorbing subject of discussion is the probable course of trade and finance during the coming period of reconstruction. There are, of course, an infinite variety of opinions, the brightest optimism being contrasted with the blackest pessimism. With regard to the latter, however, there is this comfort, that the exponents of these doctrines have never yet been known to be right in anything.

Conditions in trade and finance throughout the world at the present time are in great confusion, due to the destruction by the war of the mechanism of international commerce built up during years of progress. One of the chief features of this mechanism was the system of exchange, by which the trade between the various countries was settled. The civilized nations had, by general consent, adopted gold as the standard of value, and on this medium the whole mechanism of the system was based. Theoretically, all balances between countries were settled by the shipment of gold, but, by the extension of international credits and the marketing of securities, the use of the actual metal was largely obviated. Continued peace was a necessity to permit the proper working of this delicately-adjusted machine, and when Germany plunged the world into war the effect was like the explosion of a bomb. The world is now trying to clear away the wreckage and install a new plant, and the task will be long and difficult. The old methods, tariffs, embargoes on imports and preferential duties, are all under discussion, and will undoubtedly play their parts, but there is one force, seldom mentioned, the importance of which is appreciated by few, and that is the influence of the rate of exchange. Yet the natural working of this force has all the effect of an increase or decrease of the tariff to the extent of the premium or discount at which exchange rules. This influence is at work all the time, but, as under normal conditions the fluctuations in the rates are narrow, its effects are not noticeable. Now, however, with sterling exchange in the United States at a discount of 5 per cent to 6 per cent., it can readily be seen how the price of British goods in New York is affected. The reduction of the actual cost in dollars applies both to the invoice price and the duty. For instance, let it be assumed that the price of a certain article in London is, say, £100. Before the war this would have cost, laid down at New York, exclusive of freight, $487. The duty, say, 50 per cent., would amount to $243.50, or a total of $730.50. Now, with sterling exchange at $4.65, the cost would be $465; duty, 50 per cent., calculated on the current rate, $232.50, or a total of $697.50, a difference of $33, or a reduction of 4½ per cent. on the cost of the article in New York. If exchange falls further, as some expect, this difference will increase in proportion.

The subject of foreign exchange, therefore, is worth serious study. In the past it has been looked on as rather a mystery, and, as the word "exchange" has not always had the same meaning attached, it is not surprising that it is often misunderstood. It is frequently used in the sense of a commission or charge for the transfer of funds from one place to another, but this is its most restricted meaning. In its wide economic sense, as when sterling exchange or franc exchange is spoken of, it means the right to money in London or Paris. New York funds is the term applied to American exchange. In this sense it is a commodity, like grain or hardware, and, like these commodities, is bought and sold, and is subject to the same law of supply and demand. Like other commodities, it is produced by a process of manufacture, and this process differs from the others [illegible]. Foreign exchange, the commodity, is produced by the exchange of goods and services of one kind and another, not between countries, but between individuals. Nations as such do not trade with nations, but individuals of one nation trade with the individuals of another nation, and the sum of these transactions make up what is called the import and export trade of a nation. A sale of grain by a Canadian firm to a British firm creates a debt owing by the British firm, the right to money in Britain or sterling exchange, which is available through the banking systems of Great Britain and Canada, to discharge another debt owing by a Canadian firm importing British goods, the transfer being made by means of bills of exchange. The sum of similar transactions between two countries may result in a balance due from one to the other, and this difference is termed the balance of trade. It is this balance which determines the rate of exchange. Theoretically, this difference is payable in gold, and the cost of shipping gold either way will determine the premium or discount which the debtor will pay or the creditor accept for a bill of exchange in preference to taking the trouble to ship the actual bullion.

Function of the Bank

In this process of settlement the banks of each country have the chief part. They collect the exchange from those who have it to sell and sell to those who require it to make payments abroad. The prices at which they buy and sell exchange are governed by the principles of ordinary mercantile transactions. They buy as wholesalers, the ruling price being fixed by the rates at which large blocks can be purchased, the price, of course, being lower when they negotiate small bills. When selling in large blocks the rates naturally are closer than when selling at retail over the bank counter.

While gold was the medium of international settlement the close commercial and financial relations of the world before the war enabled settlements to be made by the sale of securities and the placing of loans in various money markets instead of resorting to shipments of gold. In this method of adjustment the rate of interest played the chief part. When rates were high in one market and low in another funds would flow from one to the other until the difference was adjusted. The balances now owing between nations, due to the enormous demand of the war, are, however, so huge that settlement by payment of gold is utterly impossible and the automatic adjustment which worked in normal times is out of the question.

Extent of War's Effect

The result is seen in the difference between the quotations in New York for foreign funds to-day and five years ago as shown by the following table:—

	1914.	1919.	
Sterling	4.86	4.67	Dollars to pound.
Francs	5.18	6.05	Francs to dollars.
Lire	5.18	7.10	Lire to dollar.
Hong Kong currency	.49½	.76½	Dollars to currency.

In Canada, before the war, New York funds ruled for the greater part of the year at a slight discount, but now our money is at a discount of about 2¾ per cent., that is, for the right to draw $100 in New York we must pay $102.75. Sterling exchange in Canada is quoted at a higher rate than in New York, but that is because New York is our market for sterling, and, as a consequence, the rates quoted here must depend on the cost to us of New York funds with which our purchases of sterling in that market must be paid for.

If New York funds were at a discount here, sterling rates would be lower to the extent of that discount.

The United States at the present time is practically the only creditor nation, and it is impossible for the others to settle the balances against them in the old way, and it would probably seriously embarrass the United States if they did by the influence on the American finances which a surplus of gold would have. During the war the rates for sterling were "pegged" at around 4.75 by a series of operations which it is unnecessary to describe here, and this maintenance of the rate did much for the morale of the trading community in Britain and other countries through a most trying time. Recently the rate has been allowed to take its own course, and it will undoubtedly have an effect on the export trade from Great Britain to the United States, and to a similar extent act as a barrier to exports to Britain from that country. To the extent of the discount to which sterling exchange falls in Canada it will have a similar result here, and, should it fall, as some think, another thirty points, the effect will be that much increased.

In time, of course, arrangements for funding these balances will be made, probably by turning them into long-term obligations, and thus removing from the exchange market all but the interest obligations and restoring normal conditions once more. Before that time comes, however, it is a safe prediction that the subject of foreign exchange will be thoroughly understood and its effects appreciated by all

---

It is the intention of the municipalities served by the Sandwich, Windsor and Amherstburg Railway system, to purchase it. Recommendations to this effect have already been made to the municipalities by the Ontario Hydro-Electric Commission.

WHERE POWER IS AVAILABLE

"DURING the census of central electric stations in Canada that was taken recently by the Dominion Water Power Branch in co-operation with the Dominion Bureau of Statistics, a special effort was made to obtain accurate data regarding blocks of electrical power that are for sale in the various parts of the Dominion, and the price thereof," states J. T. Johnston, chief engineer of the Dominion Water Power Branch.

Mr. Johnston has tabulated this data as follows, the first column giving the name of the company or municipality which has power for sale (the abbreviation "Mun." standing for municipality), the second column giving the amount of power that is for sale, and the third column quoting the rates.

After the name of the company or municipality, there appears in each case (w), (f) or (h), indicating respectively whether the primary power is water, fuel or Ontario Hydro-Electric Power Commission's system. For more detailed information, manufacturers and other prospective users of power should apply directly to the company or municipality concerned.

The following table omits one column of information which has been prepared by the Dominion Water Power Branch, giving the names of the railroads that serve the various districts in which power is available, but otherwise it is complete as issued by the Dominion Water Power Branch:—

Can Such Forgetfulness Be Excused?

If a man leave no will to provide for the management and disposal of his Estate, and the legal division works an injustice to some member of his family, can the excuse of "forgetfulness" lessen that man's responsibility? Lest you forget, we are constantly reminding you, by advertising, of your duty to Make a Will. By appointing this Corporation as Executor, your Estate will have the services of an efficient and experienced company whose sole business is the administration of Estates. Our service costs no more than that of an individual Executor. Booklet mailed on request

LIABILITY FOR ACCEPTED CHEQUE

Bank Held Liable to Reimburse Drawer When Accepted Cheque Has Not Been Presented

ON April [illegible], a decision was handed down in the Superior Court of Montreal which closely affects the control of money under an accepted cheque. In the case in question the Canadian Bank of Commerce was sued for $1,000, which the plaintiff said was due him on account of a deposit made in the Eastern Townships Bank in 1907. The Eastern Townships Bank has since been amalgamated with the Canadian Bank of Commerce. In 1907 the depositor made out a cheque for $1,000 and presented it for acceptance by the bank. After this the cheque was lost before being presented for payment, and after five years the bank was, by prescription, discharged from liability to meet the cheque upon payment. The plaintiff however, now asked the court to compel the bank to pay him the $1,000 on deposit.

The defendant argued as follows:—

"Even if the bank, by the lapse of time, is discharged of its liability resulting from the circulation of the cheque, the bank is not liable to plaintiff for the amount. On or about April [illegible], 1907, plaintiff made and signed a cheque for $1,000, drawn on the Eastern Townships Bank, payable to plaintiff's brother. The cheque was presented to the bank for acceptance, and was duly marked 'accepted.' This marking was, in fact, equivalent to the acceptance by the bank of a bill of exchange, and the bank was not thereafter debtor to plaintiff, but became, and is, a debtor of the holder of the cheque, and liable thereon towards the holder and not towards the plaintiff. The cheque was made and signed by plaintiff and transferred to a third party for good and valid consideration received by plaintiff, who, being no longer a creditor of the bank, is not entitled to demand payment of the $1,000."

In giving judgment in favor of the plaintiff Mr. Justice Panneton said:—

"There are only two parties in the transaction. The third party, to whom the cheque was payable, has not appeared, and so long as he has not manifested to the bank his intention to accept its undertaking to pay him this mony, there is no *lien de droit* between them. But if the cheque has been put in circulation, the bank is entitled to keep the money it appropriated from plaintiff's account when the cheque was accepted in order to meet payment of that cheque.

"In this case the cheque was mailed to the payee, but it never reached him. The bank relies upon the Post Office Act which declares that a mailed letter becomes the property of the person receiving the letter, and, consequently, is in circulation. But this proposition cannot be accepted with regard to a cheque enclosed in the letter. The provisions of the Post Office Act apply to the letter itself, but the contents of the letter, extraneous to it, are regulated by the common law.

"It does not follow that an object of any account enclosed in a mailed envelope changes ownership, nor even comes into possession of the person to whom the letter is addressed, if that person, in fact, never receives the letter. The proved loss of the letter and the cheque in it cannot be legally construed as having put the cheque in circulation, and in any circumstances it cannot be said that the payee of the cheque ever came into possession of it.

"The divers authorities quoted by the defendant bank to the effect that the moment a cheque is accepted by a bank the money to pay it ceases to be the property of the maker of the cheque are all in cases where the acceptance by a bank was made at the request of the holder, who, by presenting the cheque to the bank for acceptance avails himself of the promise made by the bank to the maker of the cheque to pay the amount to the payee.

"The acceptance by the bank, under the circumstances, is a new contract between the bank and the payee. In accepting the cheque the bank promises to the holder to pay him the amount. When the holder, instead of drawing the money from the bank on presentation of the cheque, chooses to leave it in the bank, and is satisfied with the acceptance of the bank, then he may be looked upon as being a depositor with the bank to the amount of the cheque.

Accepted at Request of Drawer

"A clear distinction must be made between an acceptance by a bank of a cheque at the request of the holder and its acceptance by the drawer before putting it in circulation. In the latter case there is no deposit made by the drawer; he merely transfers the money to the bank for the special purpose of paying the cheque, and under ordinary circumstances he has no more control over that money, whilst the holder of an accepted cheque has full control of the money. In the present case there has been no holder making a deposit with the bank.

"The importance of a proper legal view of the transaction, whether there was a deposit made or not, can be seen by the fact that plaintiff alleges that the lost cheque is prescribed by the passing of five years since it was accepted, and the defendant pleads that under the second paragraph of Clause 92 of the Bank Act no prescription is available to anybody. That clause prevents a bank from pleading prescription against a payment for money deposited, that is all. It protects plaintiff's right against the defendant for the money he deposited in the bank. There never was a deposit made by anyone else in this case. The money was left by plaintiff with the bank to pay another person. That other person never claimed it. It is proved that he could not do so because the cheque was lost. Even if the cheque were still in existence, it could not be claimed now, as the law intervenes to declare it prescribed by five years; it is ten years old. The defendant bank cannot any longer withhold plaintiff's money.

"Plaintiff further claims interest as from May 1st, 1912—from the expiry of the five years after the date of the acceptance of the $1,000 cheque. But interest can run only after demand of payment was made by plaintinff after the expiry of the five years. That demand and *mise en demeure* was made through plaintiff's attorney on May 23rd, 1917, and received on May 25th by the bank, enclosing the statutory declaration made by the plaintiff to the effect that the cheque was lost. From May 25th, 1917, then, the bank is in default, and plaintiff is entitled to claim interest as from that date at the rate of 3 per cent. per annum, since in his factum he limits his demand to that rate of interest."

Judgment was accordingly rendered, condemning the defendant bank to pay to plaintiff the sum of $1,000, with interest at the rate of 3 per cent. per annum as from May 25th, 1917.

SHOE MANUFACTURERS' EXPORT ASSOCIATION

Canadian shoe manufacturers, at a recent conference held at Ottawa at the invitation of the Canadian Trade Commission, decided to form an export association, which every manufacturer will be asked to join, to undertake joint action in securing for Canadian factories part of the large orders now known to be pending in Europe. The matter of overseas representation will be brought up as one of urgency before the executive of the Shoe Manufacturers' Association of Canada, which meets on the 15th instant.

LEVY EXCESS SEEDED FEE

The board of directors of the Saskatchewan Municipal Hail Insurance Association have decided to levy an excess seeded acreage rate this year, provided the losses are heavy enough to require such a levy.

With this end in view a by-law was prepared and approved providing that all the municipalities operating under the Hail Insurance Act issue forms to the ratepayers. These forms are to be filled in with the amount of land under crop and returned to the secretary not later than June 1st. The secretary will then compile the returns and forward the information to the central office in Regina.

PRAISE FOR MASTEN REPORT

Government Insurance Not Desirable—Present System is Best when Regulated by Province

By Wm. B. Ellison

IN view of the fact that there is a rapidly growing sentiment in the minds of the public, favorable to governmental control or regulation of the business of insurance, the report of the Royal Commissioner, Mr. Justice Masten, of the Appellate Division of the Supreme Court in Ontario, Canada, appointed some time ago to investigate the whole subject, comes like a saving grace.

The commissioner, whom I have known for many years, is a man of broad view, and with a judicial poise that insured the subject being judicially considered without prejudice, and certainly without fear, so far as the great interests involved were concerned. His report proves the fitness of his appointment. It deals with the subject in a firm, moderate, and conspicuously efficient manner, and I have no doubt that his recommendations will meet with high favor at the hands of those who have the real interests of the great business in question at heart.

Mr Justice Masten disapproves of governmental insurance, but at the same time he goes far to prescribe conditions, the tendency of which, if put into operation, would answer the more or less harsh criticisms so frequently heard from the insuring public. He refuses to destroy the great fabric that has grown up, but he has no hesitation at the same time in directing our attention to some of the weak spots in its present management. To remedy the latter, in my mind, would to a considerable degree pacify the public and rid them of the feeling that there is an absolutism or arbitrariness on the part of insurance organizations, from which at times the insuring public and the loss-claimant suffer to no inconsiderable degree.

I do not wish to be understood as being inimical to the great organizations that now virtually dominate the insurance business, but I do say, that there is a growing public discontent with them, which, if not fairly met and obviated, will lead to drastic legislation that will go far to undo and destroy the many good things that have been accomplished through the medium of such organizations..

I am quite in sympathy with Judge Masten's recommendations to the effect that there should be vested in the various Superintendents of Insurance, a greatly enlarged power to fix rates, or, as perhaps would be better, to review rates arbitrarily fixed by the various organizations to which I have referred. I think the insuring public would be quite satisfied to submit their grievances to the superintendent; and certain it is, if I am correct in my assumption, there can be no good reason why the insurance interests should do otherwise. The powers of the department regulating insurance should be greatly enlarged, and an aggrieved person should have some forum in which he can voice his grievances and be given a fair and dispassionate hearing. Given that, he, as a rule, accepts the decision with more or less complacency, but at any rate feels that he has not been arbitrarily suppressed. Suppression is the fertilizer of discontent, and when the latter grows to be as broadcast as it now is, the result generally is disaster for all concerned.

Judge Masten also makes direct reference to the licensing of agents, brokers, and public and official adjusters, and apparently recommends that the power to so license shall rest with the Superintendent of Insurance exclusively, with a right to review in the courts. I do not know that I would insist upon the right to resort to litigation, but I certainly would afford the applicant the fullest opportunity to be heard before the authority having the power to grant the license. The granting of such licenses should not be in the hands of any non-governmental authority. What would thus apply to the granting of a license, should be made to apply equally to the cancellation or revocation of one.

The Royal Commissioner seemingly satisfied himself that the general conduct of the business has not produced an excessive or unreasonable profit, and he expresses a disinclination to interfere acutely with the matter of commissions payable to secure business. He, however, would vest the Superintendent of Insurance with such broad powers that he would be at liberty to look into and remedy any condition that affected the conduct of the business.

There is apparent throughout the report, a clear recognition of the fact that the progress and prosperity of the insuring companies should be preserved, and that nothing should be done that would prejudicially affect the substantial security of their policies; while at the same time, he recognizes that the vast accumulations of money by these companies from the public, entitles the contributor to certain considerations not heretofore given him; and, if I understand the spirit of the report, his mind is that a broader recognition of the rights and interests of the insured will tend largely to allay that spirit of discontent that is now making itself apparent in the general revolution of conditions through which the world is now passing. To me, his recommendations are fair, safe, and eminently wise.

INSPECTION THROUGH FIRE DEPARTMENT

An important forward step in the fire prevention movement has been taken by the Ottawa Fire Department, which is collecting and assembling the information required for a permanent, detailed record of every building within the city limits. Before the end of the year, Chief Graham expects to have this system fully completed, and he then will have records such as now exist in no other city of Canada. The system was devised by Mr. H. C. Argue, secretary of the fire department, and has been approved of by the superintendent of the Canadian Fire Underwriters' Association, and by G. D. Finlayson, superintendent of the government's insurance branch. It is probable that it will be adopted as a standard system for all the Dominion.

The information required for a comprehensive record is being obtained by the department as a whole, under the direction of two inspectors, whose sole duty is to superintend inspections in the interests of fire prevention. On their inspections, the firemen are required to obtain the following information respecting each building:—

Street and number; when built; remodelled; owner's name and address; occupant; how occupied; height; construction; roof; size of block; size of premises; basement; heating; auxiliary heating; entrance to basement, inside, outside; entrance to building, front, rear, side; stairways; skylight; elevator; penthouse; light wells; partition walls; fire walls; internal openings in walls; access to roof; light; power; fire appliances; standpipes; sprinkler system; alarm system; external protection; watchman system; fire escapes; gasoline tank, location; persons in building, day and night, male and female; estimated value of building; estimated value of stock.

This information is turned in to Secretary Argue, who enters it on a large stiff card, which is divided into three sections, the first of which is devoted to the form previously described. Additional "history" is obtained on subsequent inspections which are recorded in the second division of the card. This requires the following particulars: Date of inspection; condition of yard, basement and building; remarks; notice issued (if any); date and nature of disposal.

The third section of the card is devoted to recommendations and special details, together with a record of fires on the premises with which the card deals.

The cards, which are classified by streets, are of three colors, one indicating hazardous risk; a second, semi-hazardous risk; and the third, residential property. Tabs will be attached to those on which the department wishes, for any of several reasons, to "keep an eye on." By means of this system, the Ottawa Fire Department and insurance men shortly will have a permanent, easily accessible record of all buildings in the capital.

The Montreal stock brokerage firm of Craig and Luther has notified the Montreal Stock Exchange that Captain Austin D. Irvine, M.C., has been admitted to partnership and that the business will be continued under the name of Craig, Luther and Irvine.

AMENDMENTS TO MANITOBA COMPENSATION ACT

Amendments to the Manitoba Workmen's Compensation Act are given in an official statement issued recently. The statement reads in part:—

"The Workmen's Compensation Act is divided into two parts, part one being administered by the workmen's compensation board and part two being administered by the courts.

"The workingmen's compensation board has jurisdiction in connection with industries which are specified in the schedule of industries appended to part one of the act. This schedule, in short, covers lumbering, mining, quarrying, fishing, manufacturing, building, construction, engineering, transportation, operation of electric power lines, waterworks and other public utilities; navigation, operation of boats, ships, tugs and dredges; operation of grain elevators and warehouses; teaming, scavenging and street cleaning; painting, decorating and renovating, dyeing and cleaning, or an occupation incidental thereto or immediately connected therewith.

"Part two of the act applies to all workmen in industries not enumerated in the schedule appended to part one.

"As part one of the act stands at present, there are numerous employers who are engaged in several lines of industry, some within part one of the act and some within part two, which sometimes lead to a confusing situation when a workman is injured, in determining whether he is entitled to compensation as per the definite scale set under part one of the act, or whether the workman has a right of action through the courts.

"To ameliorate conditions in this respect the act has been amended to provide that an employer of labor in an industry under part two of the act may elect to be brought within the purview of part one of the act."

CANADIAN TRADE WITH UNITED STATES

Canada Offers a Better Field than does South America—Trade Will be Enlarged in Future

CONTRIBUTING to "Business Progress," the monthly magazine of the Alexander Hamilton Institute, Mr. W. W. Swanson, professor of Economics in the University of Saskatchewan, says:—

"The problem of future trade relations between Canada and the United States is one of surpassing importance to both the nations concerned. Already that trade is extensive and valuable and it is bound to become more so as the years go by. Nature has made of the Republic and the Dominion an economic unit which hostile tariffs cannot destroy. It may be asserted with confidence that the entrance of the United States into the war swept aside, once and forever, many of the old misunderstandings that kept the two countries apart. Canada is a land of matchless economic opportunities to American industry and finance, while the United States affords the Canadian produce of raw materials, livestock and foodstuffs a great and expanding market. It strikes one that, were the reciprocity issue of 1911 placed again before the Canadian people, the greater part of the former hostility to that measure would be found to have disappeared. It is impossible to weigh imponderables but their value may be estimated. The unselfish and loyal support of the Republic to the great cause of humanity made a profound impression in Canada. Aside from the British, no other manufacturers or financiers will find such a welcome in Canada as the American.

"This is of prime importance taken in connection with the growing movement in Western Canada toward freer trade, if not free trade. The Canadian Council of Agriculture, representing the organized farmers of the prairie provinces and the United Farmers of Ontario, unequivocally demands free trade with the United Kingdom within a definite limit of time and a lowering of the tariff in general to a revenue basis alone. This involves, also, the establishment of reciprocal relations of free trade in all natural products, including agriculture, as between Canada and the United States. In lieu of the revenue lost by the abolition of protective tariff duties the agricultural interests would place reliance upon income taxes, taxes upon the unearned increment, inheritance taxes and other forms of direct taxation. The farming community insists that, with falling prices for farm products, cheaper instruments of production, including field and domestic supplies, with wider markets must be secured and assured.

"For the fiscal year ending March 31st, 1918, Canada imported from the United States a total of free and dutiable commodities combined amounting to $791,905,125 and exported to the Republic $441,390,920. For the same period Canadian exports to the United Kingdom amounted to $861,073,394, while imports from the Motherland reached the comparatively insignificant sum of $81,324,283. It is evident that the United States has made enormous gains in the Canadian market during the course of the war. Even in normal times the Dominion buys much more from the Republic than from the United Kingdom, although the precise contrary is true for exports. It may be remarked in passing that if American business and finance had given the same attention to the Canadian as it has to the South American market even more favorable figures would have appeared. It is well to reach out for foreign trade in Australasia and South America, but the richest and most stable markets for the manufacturers of the United States are to be found in Europe and Canada.

"Needless to say, Canadian manufacturers are nervous over the insistent demands of the organized farmers for a lowering of the tariff bans. The Canadian Reconstruction Association, with head offices at Toronto and branches at Montreal and Winnipeg, makes much of the possibilities of preventing unemployment by manufacturing a greater proportion of Canadian raw materials and turning them into the finished product within the Dominion itself. In its literature and advertisements the association recently has made much of the alleged profits, wages and increase of wealth that would come to Canada by pursuing this policy. This would give, if only one-third of the $900,000,000 of raw materials exported in 1918 had been manufactured in Canada and then exported, employment to 150,000 more work-people, provide an additional $110,000,000 for salaries and wages, and increase the value of Canadian factory products by $225,000,000. The Canadian Manufacturers' Association lays emphasis upon the enormous war debt of the Dominion—the net national debt by March 31st, 1919, being estimated at $1,600,000,000—and the imperative necessity of maintaining the tariff to raise the necessary revenue. The main estimated expenditures of Canada for the ensuing fiscal year aggregate $735,000,000. This is a huge spending programme for a nation of less than 8,000,000 people; but part of it, as will be seen from a study of the figures, is on capital account and will increase the assets of the country. The farmers and their free trade friends admit that the financial burden is a formidable one, but assert that it cannot be made lighter by the imposition of tariff dues which are carried largely by the agricultural community. In a recent statement given to *The Monetary Times*, Toronto, Mr. R. McKenzie, acting secretary of the Canadian Council of Agriculture, says:—

"'Thoughtful Canadians are of the opinion that the most essential thing to do in our dilemma is to devote our energies toward converting into liquid assets the enormous latent wealth we own in our agricultural lands and other natural resources to be used in liquidating our liabilities. No other thing has contributed so much toward retarding the development of those natural resources, and preventing realization on the wealth they contain for the use of the people, as the excessive overhead charges created by customs duties.'

"It is scarcely necessary to go into the familiar arguments advanced by the farmers in behalf of freer trade relationships between the United Kingdom and the United States, on the one hand, and the Dominion on the other. The agricultural community flatly rejects the proposal of the manufacturers to postpone the final rearrangement of the tariff until the period of reconstruction shall have been passed. The present Union Government may offer the farmers free agricultural implements but that will not suffice. When the political parties shall have once more been reconstituted one may expect a bitter contest in Canada upon the issue of a lowering of tariff dues. At present, the trend is decidedly in the direction of freer trade with the Republic and Great Britain. In any event, Canada has made a wonderful financial and trade record during the four years of war, and faces the future with confidence."

CALGARY PREPARES FOR LIFE CONVENTION

Insurance men of Calgary are making elaborate preparations for the Life Underwriters' convention to be held in Calgary, August 22, and a meeting of the local association was held a few days ago to discuss preliminary plans for the big annual gathering. It was pointed out by H. S. Ellis that the conference to be held here is the first ever conducted west of Winnipeg. P. A. Wintemute and Secretary Clow were named as a committee some time ago to select the various committees to handle the organization work for the convention. The committees have just been announced as follows:—

Finance, C. P. McQueen (chairman), R. A. Darker, A. McTeer, R. B. Hood and P. G. Leaney.

Entertainment, Wm. Ardern, Thos. Marsden, A. C. Harris, Wm. Armstrong and F. B. Murray.

Publicity, Geo. A. Robinson (chairman), J. E. Runions, Wilfred Chambers, H. D. Ferguson and Miss A. L. Jackson.

Reception, H. S. Ellis (chairman), F. B. Brason, P. H. Walsh, R. A. Pike and R. M. Sangster.

Registration, George W. Clarke, F. H. Whitney, H. K. Hunt, J. F. L. de Rouville and H. Lumsden.

Transportation, F. B. Summers (chairman), A. L. Hibbard, R. H. Scott, J. A. Johnston and Thos. Munn.

SEED GRAIN LOAN ARRANGEMENT

Banks Are to Lend at Seven Per Cent. and Receive One Per Cent. From Government—Five Per Cent. From Government Where Loan Cannot be Collected

IN the Dominion House of Commons on April 1st, the new arrangement reached between the Dominion government and the Canadian banks for the financing of seed grain purchases was discussed. Hon. Arthur Meighen, minister of the interior, introduced his bill respecting advances for the purchase of seed grain for a second reading. He stated that the agreement had been made with the Bankers' Association on behalf of all of the banks and that in his opinion it would not have been justifiable to make separate agreements with the banks as this might result in discrimination among them. The bank is to loan at a rate not exceeding 7 per cent. and the loans are guaranteed by the Dominion government. If any loan proves uncollectable a bank will receive the principal with 5 per cent. interest from the government. The government also pays 1 per cent. to the banks for collection so that they will in reality receive 8 per cent. for the money they loan and collect, and 5 per cent. for the money that they loan and have to collect from the Dominion government.

The amount of money loaned for this purpose has varied greatly in recent years. In the case of unpatented homesteaders it was in 1915 several millions; in 1916, nil; in 1917, $72,757; and in 1918, $270,000. The Hon. Mr. Meighen was not agreeable to having any maximum amount fixed in the bill.

The decision as to whether a loan is to be granted rests with the agent of the government. If his permission is secured then the farmer is entitled to receive the loan from the bank. Members of the Commons criticized this provision as giving too much responsibility to the agent. The minister pointed out that equal responsibility was given the agents in many other ways. "Furthermore," he said, "there is this restraint. The bank is not going to be over anxious to lend money unless the man needs it and is likely to have a crop which can represent security. The bank will make nothing out of it. If it does not collect it, it will lose money on it. There is that further protection to the government. As a matter of fact, in all the years that have gone by, the very same system has been adopted of getting the grain to the farmer. It was our officers every time that decided it. That has been the case for 20 years—yes, for 50 years. There is no change in that respect. This is simply another method of financing it."

With reference to the loans made in the year 1915, the minister said: "The total amount actually loaned by way of relief in seed grain was $12,309,607, of which $7,560,760 was for seed grain and $4,748,846 was for relief. The committee will remember that that was both in respect of unpatented and patented lands, because that year, owing to the tremendous and widespread hardships, we were compelled to extend our operations and we went into patented lands and we loaned all the money that year that we had to loan to take care of the [illegible] situation. Of the $12,309,000, there has been collected to date, including interest, $9,095,753. That is up to February 28th last, a month ago. Exclusive of interest, we have collected $8,415,226. The balance to be collected is $3,894,[illegible]0, and of that balance $2,007,998 is for relief and not for seed grain at all. Of the whole $7,500,000 that was advanced for seed grain all has been repaid except $1,386,382. We expect the great body of that to be paid this fall."

MANUFACTURERS TO MEET IN JUNE

The dates of the annual general meeting of the Canadian Manufacturers' Association in Toronto, have been settled upon by the executive as June 11th and 12th. W. J. Bulman, of Winnipeg, is the president of the association this year. Questions to be discussed include the tariff, the increase of export trade and the relations of capital and labor.

REVISE RATES FOR AGES UNDER TWENTY

The Canada Life Assurance Co. has issued new premium rates for applicants under the age of twenty. This change is in line with similar alterations made in the rates of many other companies.

Some of the new rates as set by the Canada Life are as follows:—

Premiums per $1,000 with profits.

	Age 16.	Age 17.	Age 18.	Age 19.
Whole life (annual premiums)	$17.45	$17.80	$18.15	$18.55
Life, 20 payments (annual premiums)	26.30	26.70	27.15	27.60
Endowment, 20 years (annual premiums)	48.10	48.15	48.20	48.30

Premiums per $1,000 with profits (with new 1918 total disability benefit).

	Age 16.	Age 17.	Age 18.	Age 19.
Whole life (annual premiums)	$18.55	$18.90	$19.25	$19.65
Life, 20 payments (annual premiums)	27.80	28.20	28.65	29.10
Endowment, 20 years (annual premiums)	48.60	48.65	48.70	48.80

Premiums per $1,000 without profits.

	Age 16.	Age 17.	Age 18.	Age 19.
Whole life (annual premiums)	$13.65	$13.95	$14.20	$14.50
Life, 20 payments (annual premiums)	21.10	21.40	21.75	22.10
Endowment, 20 years (annual premiums)	41.30	41.35	41.40	41.45

Premiums per $1,000 without profits (with new 1918 total disability benefit).

	Age 16.	Age 17.	Age 18.	Age 19.
Whole life (annual premiums)	$14.75	$15.05	$15.30	$15.60
Life, 20 payments (annual premiums)	22.60	22.90	23.25	23.60
Endowment, 20 years (annual premiums)	41.80	41.85	41.90	41.95

The surrender values for the years will, of course, also be somewhat lower than those pertaining to age twenty. The dividends on these policies will also be for the lower age.

The Canada Life is also sending out a supplementary form to be completed and forwarded to head office with each application for life insurance. This form includes questions regarding influenza.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt for the week ended April 11th, 1919:—

McKinley Darragh, 94,044; Dominion Reduction, 79,000; O'Brien Mine, 64,000; Penn Canadian, 60,724; Coniagas Mines, 132,000; total, 429,768.

The total since January 1st is 5,703,292 pounds, or 2,851.6 tons.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first week in April, 1919:—

Canadian Pacific Railway.

	1919.	1918.	Inc. or dec.
April 7	$2,921,000	$2,984,000	— $ 63,000

Grand Trunk Railway.

	1919.	1918.	Inc. or dec.
April 7	$1,274,553	$1,012,494	+ $262,059

Canadian National Railway.

	1919.	1918.	Inc. or dec.
April 7	$1,450,444	$1,569,763	— $119,319

PUBLICATIONS RECEIVED

Dominion of Canada Public Accounts for year ended March 31st, 1918. These give statistics as to revenue and expenditure, assets and liabilities, railway subsidies, etc.

Five Thousand Facts About Canada.—Compiled by Frank Yeigh. The 1919 edition comprises information about Canada conveniently indexed. It includes a section entitled "War Facts."

Hydro-Electric Commission of Ontario.—The results of Mr. G. T. Clarkson's investigation of the Hydro-Electric system were announced some time ago and the printed report is now available.

Japan: Trade During the War.—This pamphlet, issued by the United States Tariff Commission, contains an exhaustive study of the trade of Japan, particularly during the years from 1913 to 1917.

Ontario Public Accounts for year ended October 31st, 1918. Complete details of Ontario's finances are given in this volume, including the statements of the Temiskaming and Northern Ontario Railway, Hydro-Electric Power Commission, etc.

Internal War Loans of Belligerent Countries.—A convenient reference book, giving particulars of the war loans of the different belligerent countries has been issued by the National City Co. Particulars of the consolidation loan of Spain and of the mobilization loans of Switzerland and Holland are included.

Costs of Production in the Sugar Industry.—A report of the United States Tariff Commission, containing a thorough examination of the factors which enter into the cost of producing the sugar. It deals with the beet sugar, as well as the cane sugar industry, and also discusses prices in various parts of the world.

The World's War Debt.—Published by the Mechanics and Metals National Bank of New York. This pamphlet gives a record and analysis of the financial obligations left by the war in their relation to the world at large. It deals with the effects of debt on taxation, discussions regarding conscription of wealth, etc.

World Almanac, 1919.—Published by the New York World. Fifty cents paper bound, ninety cents cloth bound. For many years past this annual volume has served as a convenient reference book on world questions, such as trade, industry, finance, education and politics. The current volume also gives complete data regarding the war.

Victory Loan in British Columbia.—The report of the British Columbia Executive of the 1918 Victory Loan has been prepared and issued in pamphlet form. Commenting on the results, the chairman, Mr. W. H. Malkin, refers to the fact that there were not in the province any firms engaged exclusively in the bond business, so they had to depend on canvassers whose experience was limited to selling insurance or merchandise. The total amount subscribed, $36,286,[illegible], he says, indicates the increased financial ability of the province.

Principles of Accounting.—By Paton and Stevenson. Published at $[illegible] by the Macmillan Co. of Canada, Toronto. [illegible] pages, with index.

Accounting has made rapid progress in recent years alongside of the growth of economic science. There has, however, been very little effort to connect the two in a study of business organization. This book is designed principally for students of economics who wish to acquire fundamental knowledge of accounts. It will also be valuable to practical accountants as a means of gaining a wider knowledge of their subject, and to auditors for whom a thorough knowledge of accounting systems is necessary.

Field Practice.—Published at $1.50 by the National Fire Protection Association, 87 Milk Street, Boston. This volume is an inspection manual for property owners, fire departments and insurance offices, covering common fire hazards, their safeguarding and fire protection and upkeep. It is divided into two sections, the first dealing with common fire hazards and their safeguarding, under the sub-divisions of light hazards, heating hazards, power hazards, chemicals, paints and oils, spontaneous ignition and dust explosions, care and maintenance, chimneys and flues, and dwelling house hazards. Section two is devoted to fire protection and upkeep dealing first with automatic sprinkler installations, and second with fire protection in general.

Canadian Municipal Manual and Public Utilities Law.—By J. R. Meredith, K.C., and W. B. Wilkinson, K.C. Edited by Sir W. R. Meredith, Chief Justice of Ontario. Published at $20 by the Canada Law Book Company, Limited, Toronto. Cloth, 1,040 pages.

This is not a work on the municipal law of any one province, but on Canadian Municipal Law as interpreted by Canadian and English decisions. The Ontario Municipal Act, with amendments, is, however, taken as a text and the law of each province, including Quebec, is dealt with in the order in which the subjects are dealt with in the act. After the Municipal Act it takes up the Public Utilities Act, the Local Improvement Act, Municipal Arbitrations Act, Municipal Franchises Act, Municipal Electric Contracts Act, Planning and Development Act, Bureau of Municipal Affairs Act, and Arbitrations Act.

The book is readily understandable by municipal officers without legal training, and will therefore be useful as a work of reference. In addition to giving the law actually on the statute books of the various provinces, numerous illustrations from judicial decisions are given. Certain forms which have been approved by the Ontario Railway and Municipal Board are also included for the guidance of municipalities. The book concludes with a copious index.

The Law of Mortgages in Canada.—By John D. Falconbridge, M.A., LL.B. Published at $8.50 by the Canada Law Book Company, Toronto. 797 pages, bound in half leather.

It is now twenty-one years since a book was published in Canada on the law of real estate mortgages; many changes have taken place during this interval, both by legislation and judicial interpretation, and this work will, therefore, be a very useful treatise. The author has for nine years lectured in Osgoode Hall, Toronto, on the subject of mortgages, and is specially qualified for such a task. The book has been prepared for use both by practitioners and by students. As a basis the author used Messrs. Bell and Dunn's treatise on the Law of Mortgages of Real Estate (1898), but the material has been so extensively re-arranged, re-written and added to that it is practically new. The result is a treatise which will afford a satisfactory exposition of the law of mortgage for use in all the provinces of Canada except Quebec. The statutory provisions in Ontario relating to the subject are set out in full, with reference to the English legislation, from which some of these provisions are derived, in such a way as to render the decisions readily available to readers. The leading decisions of the courts of all the common law provinces are cited, and references are given to the Dominion law reports, as well as to the provincial reports.

Special attention is given to the Real Property Act of Manitoba, and to the Land Titles Acts of Saskatchewan and Alberta. There is a long chapter devoted to a statement of the general principles of these acts, and to a discussion of the nature and priorities of the mortgages and encumbrances under those acts. There are numerous separate sections devoted to the Land Titles Acts in other parts of the book; the subject of sales and foreclosure under the Land Titles Acts are discussed in detail, and a comparison is drawn between the statutes of Manitoba, Saskatchewan and Alberta. In all, about 80 pages are devoted exclusively to the Land Titles Acts, and a considerable portion of the rest of the book is applicable in the western provinces, as well as in Ontario.

In order to assist its office employees to build or acquire homes during the present scarcity, the British Columbia Electric Railway Company has placed $50,000 at their disposal. The money is to be loaned at 6 per cent., over a term of twelve years.

LEGAL NOTICE

CANADIAN BISCUIT & CONFECTIONERY EXPORT COMPANY, LIMITED

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," and Amending Acts, letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the [illegible] day of March, 1919, incorporating William Robertson, Herbert Norton [illegible], Herbert Arthur Telfer, John Wetherall Palmer and Charles Joseph [illegible], manufacturers, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To import, export, manufacture, buy, sell and deal in goods, wares and merchandise, and without limiting the generality of the foregoing, the same shall be deemed to include confectionery, biscuits, candy, and all goods of which sugar or flour forms a part, and to act as agents for the purchase or sale of any such goods, wares and merchandise; (b) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To purchase or otherwise acquire or undertake all or any part of the business, property, assets or liabilities of any person, partnership or company carrying on business with objects similar in whole or in part to those of the company, or possessed of property suitable for the purposes of the company; (d) To procure the company to be registered and recognized in any foreign country and to designate persons therein according to the laws of any such foreign country to represent the company and to accept service for and on behalf of the company of any process or suit; (e) To make application and negotiate for, lease, purchase or otherwise acquire, exercise, develop, hold, grant, and dispose of or turn to account any patent, trade mark, secret information, copyright, grant, licence, lease, process, design, concession and the like which may seem capable of being used for any of the purposes of the company, and the acquisition of which may seem calculated to benefit the company; (f) To acquire by purchase, lease or otherwise and to hold and dispose of such movable and immovable property, rights, easements and privileges as may be deemed necessary or convenient for the purposes of the company; (g) To issue fully paid-up shares, bonds or debentures for the payment either in whole or in part of any property, real or personal, patents, rights, claims, privileges, concessions, contracts or other advantages which the company may lawfully acquire; (h) To purchase, acquire, hold and dispose of shares of the capital stock, bonds or other securities of any other company, corporation or individual carrying on or engaged in, in whole or in part, any business which the company is empowered to engage in or carry on, and to acquire, hold, sell or otherwise dispose of such shares, bonds or securities, notwithstanding the provisions of section 44 of The Companies Act; (i) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (j) To sell and dispose of the assets of the undertaking of the company or any part thereof, for such consideration as the company may think fit and in particular either for cash or for shares, bonds, debentures or securities of any other companies, or partly for cash and partly for such shares, bonds, debentures or securities, notwithstanding the provisions of section 44 of the said Act; (k) to distribute in specie or otherwise, as may be resolved by the company, any assets of the company among its members and particularly the bonds, shares or debentures of any other company formed to take over the whole or any part of the assets of this company; (l) To enter into any agreement with any government or authority, supreme, municipal, local or otherwise, that may be conducive to the company's objects, or any of them, and to obtain from any such government or authority any rights, privileges or concessions which it may be deemed desirable to obtain, and to carry out, exercise and comply with or sell and dispose of any such arrangements, rights, privileges and concessions; (m) To invest and deal with the moneys of the company not immediately required on such securities and in such manner as may from time to time be determined; (n) To promote any company or companies for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (o) To construct, improve, maintain, work, manage, carry out or control any roads, ways, branches or sidings, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (p) To lend money to customers and others having dealings with the company and guarantee the performance of contracts by any such persons; (q) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (r) To do all or any of the things hereby authorized either alone or in conjunction with or as factors or agents of any other company or persons, or by or through factors, trustees or agents; (s) To do all such things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Canadian Biscuit & Confectionery Export Company, Limited," with a capital stock of forty thousand dollars, divided into 100 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 24th day of March, 1919.

THOMAS MULVEY,
Under Secretary of State.

39-1c

The Tillsonburg drive for new members of the Board of Trade is making rapid progress, and although the objective was 200 members, over 250 has been passed.

NEWS OF MUNICIPAL FINANCE

Oshawa, Ont.—The finance committee of the town council has recommended fixing the tax rate for this year at 32 mills.

Windsor, Ont.—With no provision for grants during the year, the 1919 estimates of the various Windsor civic departments as embodied in the finance committee's report were passed unanimously by the city council, providing for a tax of 26 mills.

Lethbridge, Alta.—The municipal law committee of the Alberta legislature has voted to allow the city charter amendment, drafted along the lines of the Medicine Hat amendment, which permits the rebonding of sinking fund debentures for five years, as they come due from time to time.

West Vancouver, B.C.—The municipal transportation system in 1918 showed a profit of $303, while a statement for the first three months of the current year shows an increase of receipts and a decrease of expenses compared with the same period last year of 30 per cent. in the former and 6 per cent. in the latter items. The total receipts and expenses for 1918 were $34,124.55 and $33,820.70 respectively, and should the improvement now noted continue throughout the year, the next annual statement should show a substantial profit. The largely increased travel is attributable to the growing popularity of West Vancouver as a residential district.

Montreal, Que.—In accordance with the law adopted at the last session of the Quebec legislature the city of Montreal will soon acquire control again of the amusement tax. A report is being prepared for the information of the Administrative Commission, which expects to have everything in working order by July 1st next. While official figures are lacking, the revenue from the tax in Montreal under provincial control was about $300,000 a year. By the terms of the law the city will continue to grant a part of the revenue from the tax to the city hospitals, reserving the balance for municipal purposes. While the exact amount that will be added to the civic revenue has not yet been determined, it is expected to represent about two-thirds of the total sum.

West Vancouver, B.C.—During the closing days of the session of the British Columbia legislature at Victoria an amendment was passed to the Municipal Act prohibiting the West Vancouver council from disposing of any of the lands that the municipality acquired at the recent tax sale. The amendment prohibits the council from undertaking any new public works or making any payments of public money except for school purposes for a year without express permission of the lieutenant-governor or the inspector of municipalities. Several large owners of property in the western portion of the municipality secured the amendment to the act on account of representations that they made that they were being heavily taxed in order to cover expenditures in other portions of the municipality from which they received no benefit

Vancouver, B.C.—A full statement of the present financial position of the city and a strong plea for action by the government which would permit the city to provide additional means of revenue to meet the increased financial demands for this year were presented to the provincial Cabinet recently. The legislature had permitted an amendment to the Vancouver bill, giving the city power to adopt some means of taxation upon the sanction of the Cabinet. A full statement of Vancouver's financial position has now been laid before the Cabinet, and Premier Oliver has promised full consideration. He stated it is the intention of the government during the present summer to go fully into the whole question of the relationship, from the standpoint of taxation, of the province and the municipalities, so that some better system than that now existing may be evolved, and to permit the municipalities to enjoy more extended powers of taxation.

Victoria, B.C.—The city comptroller has presented the balance sheet for 1918 and a statement of the year's receipts and disbursements. According to his report, arrears of taxes amounting to $253,771 were paid in full under the provisions of the City Relief Act, No. 2, while $152,277, including interest, was paid on the ten-year plan. Sixty-nine per cent. of the current year's taxes were paid during 1918. This is a better showing than had been made in any year since the commencement of the war.

Treasury certificates, he reports, to the amount of $1,000,000 fell due on March 1st, 1918, and their payment was provided for by a new issue of certificates falling due on March 1st, 1928, and which were sold at a rate to net the purchaser 7.40 per cent. Ten and 50-year serial debentures to the amount of $960,174.81 were sold during the year. Through the summer the price was on a 7 per cent. basis. At the end of the year this had improved to 6 per cent., and at the end of February, 1919, a sale of $300,000 was made at price to yield the investor 5.90 per cent., being the best rate obtained for some long time past. The proceeds of these debentures were devoted to the retirement of treasury certificates and bills due on February 1st, 1919. They were sold as follows: Victoria, $135,574.81; Vancouver, $284,500; Toronto, $454,600; Portland, Ore., $60,500; Morris, Ill., $25,000. Total, $960,174.81.

Debentures amounting to $96,380.68 were retired at due date and $37,940.50 purchased in the open market at a cost of $27,281.20. Serial bonds to the amount of $85,850 matured in 1918 and were duly retired. The bonded debt now stands at $18,750,224.26, of which amount $439,327.67 falls due in 1919, and a further amount of $85,850 will be retired under the serial form plan. Three hundred thousand dollars was invested in the last Dominion loan on account of the sinking fund. The total investment in these bonds is now $840,000, of which amount $50,000 (5 per cent. notes) is repayable in August of this year.

Regina, Sask.—Civic officials have compiled a statement showing that war, disease and wind have robbed the treasury of $125,000. The inference is that had it been otherwise there would have been a surplus of about $25,000 instead of $97,000. The net deficit of the utilities is $78,000 as compared with an estimated deficit of $10,000 when the estimates were compiled early last year. The loss on the street railway is $65,000. Of this sum, however, property sales account contributes $20,000 for street railway sinking fund, leaving approximately $45,000 to come out of the taxes. The electric light and power and the waterworks departments are jointly responsible for a deficit of $33,000, making a toal net deficit from the utilities of $78,000. The remaining $19,000 represents the deficit on current account.

The financial statement of the city shows a deficit on current account amounting to $97,351. With the statements the auditors submitted a memorandum, consisting of an analysis of current cash. According to this document the actual position of revenue accounts as at that date was a cash shortage of $206,869.80, this sum being comprised principally of street railway deficits and general revenue deficits of previous years after making allowance for credits.

Regina now has in its sinking fund $614,490.05, made up of cash in the bank and on hand January 1st, 1919, payments received on account of sinking fund levy, repayments on account of investments and $75,000 held in trust for the city of Regina (capital account). This latter amount is a portion of the insurance moneys on the winter fair building and handed over to the trustees of the sinking fund for investment in Victory bonds. The accrued interest on investments, totalling $487,661.92, was $1,820.54, and the balance in the bank on January 1st, 1919, $125,007.59. The total average yielding rate of the investments is 6.1 per cent.

The city is authorized to borrow money to the extent of 20 per cent. of its total net assessment. The net assessment of the city last year amounted to $42,704,965, which would give the city the right to borrow to a total of $8,540,993. This has already been drawn on to the extent of $5,954,573 after making allowance for sundry credits which are refundable from various sources, leaving a balance of borrowing power to the city's credit at the present time of $2,586,419.

PERSONAL NOTES

Mr. William Smith, president and managing director of the Western Empire Life Assurance Company, Winnipeg, was a visitor in Toronto this week.

Mr. Kenneth Young, formerly of Macneill and Young, Toronto, has been appointed manager of the bond department of Messrs. Tomenson, Forwood and Co., 42 King St. W., Toronto.

Mr. L. R. Kennedy, from the head office of the British Crown Assurance Co., London, Eng., is now in Toronto, and will leave on April 20th for Vancouver en route for Australia, there to assume the managership of the Eagle, Star and British Dominions Insurance Co., Ltd.

Mr. Reginald H. M. Temple, general solicitor in the legal department of Canadian National Railways at Toronto, has been promoted to general solicitor in charge of the company's legal affairs in Western Canada, with headquarters at Winnipeg, succeeding W. W. Evans, who has resigned.

Lieut. Douglas S. McMaster has been admitted to partnership in the Montreal stock brokerage firm of Chas. Meredith and Company, taking effect as from April 1st. He will act as one of the floor representatives of the firm on the local Exchange. Lieut. McMaster is a son of Wm. McMaster, of Montreal, and a brother of Ross H. McMaster, assistant general manager of the Steel Company of Canada.

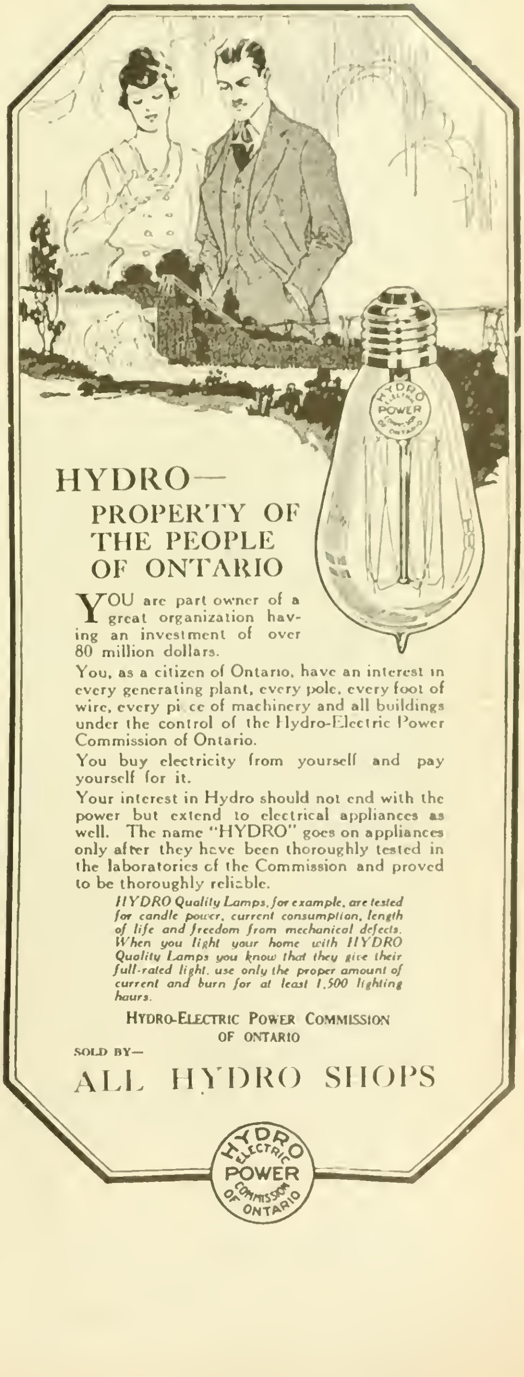
Mr. J. Frank Trotter, who for the past five years has been the cashier for the Mutual Life of New York, in Winnipeg, was honored on April 10th, by his associates in the Life Underwriters' Association. The occasion was the approaching departure of Mr. Trotter for St. Louis, where he assumes the same position in a much larger and more important office. Mr. Trotter was secretary of the Life Underwriters' Association last year.

Mr. A. M. McQueen

Recently elected Vice-President of the Imperial Oil Co.

After a short session held on April 10th, the newsprint tribunal, conducted by Commissioner Pringle, adjourned until May 5th. This action was taken in order to give the Fort Frances mill an opportunity to send a representative.

Offerings for $15,900 6 per cent. first mortgage 15-year sinking fund gold bonds are being received by the National Trust Company, Limited, 18 King St. E., Toronto, up till April 23rd, 1919.



HYDRO—
PROPERTY OF THE PEOPLE OF ONTARIO

YOU are part owner of a great organization having an investment of over 80 million dollars.

You, as a citizen of Ontario, have an interest in every generating plant, every pole, every foot of wire, every piece of machinery and all buildings under the control of the Hydro-Electric Power Commission of Ontario.

You buy electricity from yourself and pay yourself for it.

Your interest in Hydro should not end with the power but extend to electrical appliances as well. The name "HYDRO" goes on appliances only after they have been thoroughly tested in the laboratories of the Commission and proved to be thoroughly reliable.

HYDRO Quality Lamps, for example, are tested for candle power, current consumption, length of life and freedom from mechanical defects. When you light your home with HYDRO Quality Lamps you know that they give their full-rated light, use only the proper amount of current and burn for at least 1,500 lighting hours.

GOVERNMENT AND MUNICIPAL BONDS

The Monetary Times' Weekly Register of Municipal Activities and Financing

The principal feature of the bond market during the past week was the sale on Saturday of $3,000,000 province of Ontario bonds to C. R. Clapp and Co. of Toronto. Particulars of the sale and of the other tenders are given below; bond men expressed surprise at the excellent price received, the bonds being sold practically on a 5.10% basis. The fact that there was one other bid above par indicates that the purchasers are not alone in their view of market conditions. Being payable in New York, they will be suitable for the United States market; for the next few weeks, of course, the Victory loan will absorb attention on the other side.

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of The Monetary Times:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
North Bay, Ont....	$22,000.00	6	20 instal.	May 3
North Bay, Ont....	4,400.00	6	10 instal.	May 3
Sarnia, Ont.	111,992.80	6 & 6½	various	April 26
Capreol, Ont	18,775.00	6	10 instal.	April 26
Rosthern S.D., Sask.	35,000.00	6½	25 instal.	Apr. 30
Kenora, Ont.	17,000.00	6	20 instal.	Apr. 28

Woodstock, N.B.—A bill to confirm and ratify the issue of $[illegible]0,000 debentures by the town, was recommended in the New Brunswick Legislature last week.

Rosthern S.D., Sask.—Tenders will be received up till April [illegible]th for the purchase of $35,000 6½ per cent. 25-instalment bonds. Further particulars on demand. Geo. Braden, secretary-treasurer.

Capreol, Ont.—Tenders will be received up to April 26th, for the purchase of public school debentures for $18,775, bearing interest at 6 per cent., and repayable in 10 annual instalments. W. H. Matthews, Town Clerk.

Kenora, Ont.—Tenders will be received up till April 28th, for the purchase of $17,000 6 per cent. 20-instalment public improvement bonds. Interest and principal payable at the Imperial Bank, Kenora, Ont. Coupons for interest attached.

Scarboro, Ont.—The by-law to provide for an issue of debentures of $30,000, to cover the expense of a Township Hall, which was presented for the vote of the taxpayers last week, failed to carry, the vote polled being 474 against and 169 in favor of the by-law.

Regina, Sask.—It is probable that a big list of estimates for improvements will be drawn up and that the city will not go to the market for money for projected works until all of the local improvement estimates are in, so that but one bond-issue for all purposes may be floated.

Newcastle, N.B.—A bill to provide for the issue of $150,000 debentures, for the purpose of improving and extending the supply and improving the supply of water and electricity or power was recommended with a minor amendment in the New Brunswick Legislature last week.

New Brunswick.—Permanent bridges "under construction, contemplated and now under survey" in New Brunswick will cost approximately $1,000,000. To pay for these structures provision for issuing bonds is made in a bill which was introduced in the Provincial Legislature, last week, and which authorizes the government to borrow $600,000.

Mimico, Ont.—Messrs. C. H. Burgess and Co., Toronto, have purchased a small block of $5,000 6 per cent. 10-instalment debentures. The following tenders were received:—

C. H. Burgess and Co.	$5,074.00
W. L. McKinnon and Co.	5,073.10
R. C. Matthews and Co.	5,061.00
Brent, Noxon and Co.	5,042.50
G. A. Stimson and Co.	5,011.00

Sarnia, Ont.—Tenders will be received up till April 26th, for the purchase of $111,992.80 6 and 6½ per cent., instalment debentures, repayable in various terms as follows:—Incinerator plant, $21,092.80 6 per cent., payable 1919-26. Incinerator plant, $9,000 6½ per cent., payable 1919-28. Water-mains, $15,000 6½ per cent., payable 1919-33. Street pavement, $11,000 6½ per cent., payable 1919-28. Waterworks, $55,900 6 per cent., payable 1919-38.—James Wood, City Treasurer.

London, Ont.—The Board of Education on April 14th reconsidered its building programme, which had been rejected by the city council, and determined, after a brief debate, to reaffirm its demands for the issuance of $195,000 of debentures. If the city council again rejects the demands of the board of education for the debentures the trustees will avail themselves of their legal right to demand a special and immediate appeal to the people. Mayor Somerville has set down the principle that a new city hall should be London's first public building.

Calgary, Alta.—The school board has decided to postpone its attempt to sell an issue of bonds locally. The last issue of $180,000 for public school construction will therefore go to the bond houses, several of which had applied for it. The idea had been brought up by Chairman Sinnott, who thought the advantages of local purchases would appeal to citizens and would keep the money in the city, but the organization he had been seeking aid from would not undertake it at the present, and as the prices offered by the financial houses were above par he had to suggest their disposal in the usual manner.

Winnipeg, Man.—The 1919 budget of the public school board amounts to $1,521,500. The city council will be asked to levy a school tax to raise the necessary amount. This budget was adopted last week at a meeting of the school board. The figures named in the proposed budget are approximate and are an increase of $77,500 over last year's requirements. Based on the 1918 assessment it is an increase of less than one-third of a mill. The board decided to borrow $1,688,000 by over-draft from the Canadian Bank of

DIVIDENDS AND NOTICES

THE MERCHANTS BANK OF CANADA

QUARTERLY DIVIDEND

Notice is hereby given that a dividend of Two and three-quarters per cent. for the current quarter, being at the rate of Eleven per cent. per annum, upon the Paid-up Capital Stock of this Institution has been declared, and will be payable at its Banking House in this city and at its Branches, on and after the 1st day of May next, to Shareholders of record at the close of business on the 15th day of April.

ANNUAL MEETING

The Annual General Meeting of Shareholders, for the election of Directors and other general business of the Bank, will be held at the Banking House, in the City of Montreal, on Wednesday, the fourth day of June next. Chair will be taken at 12 o'clock, noon.

By order of the Board.
D. C. MACAROW,
General Manager.

Montreal, 31st March, 1919.

DETROIT RIVER TUNNEL COMPANY

Detroit, Mich., April 8, 1919.

NOTICE IS HEREBY GIVEN that the Annual Meeting of the stockholders of the Detroit River Tunnel Company, for the election of Directors and the transaction of such other business as may be brought before the meeting, will be held at the Head Office of the company, in the City of Detroit, Mich., on the First Thursday after the First Wednesday (being the 8th day) of May, 1919, at 10 o'clock a.m., Standard Eastern Time:

DWIGHT W. PARDEE,
Secretary.

CANADIAN PACIFIC RAILWAY COMPANY

NOTICE TO SHAREHOLDERS

The Thirty-eighth Annual General Meeting of the Shareholders of this Company, for the election of Directors to take the places of the retiring Directors and for the transaction of business generally, will be held on Wednesday, the seventh day of May next, at the principal office of the Company, at Montreal, at Twelve o'clock noon.

The Common Stock Transfer Books will be closed in Montreal, New York and London at 3 p.m. on Tuesday, the fifteenth day of April. The Preference Stock Books will be closed in London at the same time.

All books will be re-opened on Thursday, the eighth day of May.

By order of the Board.
ERNEST ALEXANDER,
Secretary.

Montreal, March 19th, 1919.

TELEPHONE COMPANIES MAY AMALGAMATE

The Ontario Railway and Municipal Board on April 9th, heard the application of the Bell and Welland County Telephone Companies that the two telephone lines in Bridgeburg be consolidated under the management of the latter line. A delegation from Chippawa was present to ask that the lines in that district be included in the Welland county system, instead of the Bell, as was originally planned. Owing to this objection, the Commission delayed giving its official decision on April 23rd, when the two companies will be expected to present an agreement that will solve this phase of the matter.

DEBENTURES FOR SALE

TOWN OF NORTH BAY

DEBENTURES FOR SALE

Sealed tenders will be received by the undersigned up to and including the 3rd day of May, 1919, for the purchase of the following issues of Debentures of the Town of North Bay:—

(1) $22,000.00 Local Improvement Debentures for sanitary sewers, bearing interest at the rate of six per cent. per annum, repayable in twenty equal annual instalments of principal and interest.

(2) $4,400.00 Local Improvement Debentures for permanent sidewalks, bearing interest at the rate of six per cent. per annum, repayable in ten equal annual instalments of principal and interest.

Delivery to be made at the Royal Bank of Canada, North Bay, Ont.

M. W. FLANNERY,
Treasurer.

TOWN OF CAPREOL

SALE OF DEBENTURES

Tenders will be received by the undersigned up to Saturday, the 26th of April, A.D. 1919, for the purchase of public school debentures of the Town of Capreol for $18,775.00, bearing interest at six per cent., principal and interest being repayable in annual instalments during a period of ten years.

The highest or any tender not necessarily accepted.

W. H. MATTHEWS,
Clerk.

Capreol, Ont., April 11th, 1919.

CONDENSED ADVERTISEMENTS

Positions Wanted," 2c. per word: all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance: 50 per cent extra if charged.

I WILL PURCHASE, at fair price, small but established chartered accountancy business in Ontario, or will consider partnership proposition. Address in first instance, Chartered Accountant, c/o Box 173, *The Monetary Times*, Toronto.

FIRE INSURANCE INSPECTOR wanted by strong British Fire Office, a capable and energetic Inspector for the North West Provinces. One having experience in that field preferred, and able to extend an agency organization already partly established for some years. Applicants please state age, experience and qualifications. Correspondence treated confidentially. Address Box 177, *The Monetary Times*, Toronto.

INVESTORS.—Private corporation wants additional capital, assuring large dividends with absolute security. Apply Box 179, *The Monetary Times*, Toronto.

The government of the United States has transmitted to the International Joint Commission, the application of the Canadian Cottons, Limited, for approval of the diversion of the waters of the St. Croix River, and the construction of a power house on the United States side of the river opposite Milltown, N.B.

ONTARIO ESTIMATES INCREASE OVER $2,000,000

An increase of $2,204,1[illegible]7 is shown in the main estimates tabled in the Ontario legislature this week. The estimates from November 1st, 1919, to October 31st, 1920, total $13,814,[illegible].

The estimates for the different departments, compared with those of the fiscal year, ending October 31st, 1919, are:

	1919.	1920.
Civil government	$1,163,700	$1,301,650
Legislation	328,700	328,700
Administration of justice	797,860	819,585
Education	2,590,832	3,424,547
Public institutions	2,039,360	2,367,740
Agriculture	1,029,448	1,127,128
Colonization and immigration	95,000	160,000
Hospitals and charities	631,763	716,552
Maintenance and repairs of government buildings	270,198	299,896
Public buildings	197,350	495,900
Public works	164,900	207,400
Colonization roads	90,000	90,000
Department of public highways	79,620	107,620
Game and fisheries	298,300	307,200
Attorney-General's department, miscellaneous	185,200	89,700
Treasury department, miscellaneous	116,570	147,670
Provincial secretary's department, miscellaneous	331,170	338,470
Lands, forests and mines	1,047,700	1,332,100
Refund account	104,500	104,500
Miscellaneous expenditure	47,950	47,900

UNITED STATES VICTORY LOAN $4,500,000,000

Terms of the United States Victory Liberty Loan were announced on April 12th, by the secretary of the treasury, as follows: Amount, $4,500,000,000; oversubscription to be rejected.

Interest, 4¾ per cent. for partially tax exempt notes convertible into 3¾ per cent. notes, wholly tax exempt. Maturity, four years, with the treasury reserving the privilege of redeeming the notes in three years.

The size of the loan was smaller than had been anticipated by most financial observers, who looked for an issue of about $6,000,000,000, particularly in view of the secretary's past statements that the loan would be five or six billions.

PATRIOTIC FUND TO CONTINUE

A meeting of the Executive Committee of the Canadian Patriotic Fund was held on April 9th, in Ottawa. The honorary treasurer reported that the total contributions to the 31st March, 1919, amounted to $47,115,261.47; that the balance in hand on the 1st of April was $8,662,941.46, and that further contributions of approximately $300,000 were regarded as collectable. In December the amount drawn by the branches of the fund was $940,000; owing to discharges, the monthly requirements were at present approximately $800,000. In view of the fact that it would yet be some months before all the overseas men had returned to Canada, been discharged and joined their families, it was felt that it was inadvisable for the fund to assume any new obligations until it was clear that the amount in hand would be sufficient to carry on until the last man was discharged.

Trading Floor of Toronto Stock Exchange

THE accompanying illustration shows the trading floor of the Toronto Stock Exchange in the Stock Exchange Building at 84 Bay Street. The Exchange has fifty members. Enormous quantities of Canadian war loan bonds have changed hands on this floor during the past few weeks. During the week ending March 12th the total sold was over $2,000,000. At the same time, there is a large market among the bond dealers who are not members of the Stock Exchange, but who buy and sell outright. The price realized by sellers in either case is practically the same, as in the case of a transaction through a Stock Exchange firm the commission must be deducted, while a bond dealer must have a margin of profit in handling a transaction.

YOU MAY BE A RICH MAN, SOME DAY—

Opportunities for making money are many but it takes *time* for capital to accumulate even under the most favorable conditions. Every man of ability expects in the course of years to have sufficient to ensure to his family during their life time the comforts to which they have been accustomed. Unless an unexpected reverse of fortune occurs there is little doubt but that you will make money. But "many things may happen" while the money is being made. This is where Life Insurance comes in and makes available the means that would have been yours if health and life had been spared. You will be rich "some day," if you live, but *the Insurance policy will anticipate for your family the accumulations of future years* and render sufficient means available even should you not survive to realize your ambition.

Is your prospective income insured?

E. P. CLEMENT, President. CHAS. RUBY, General Manager.

Now In Print

The Report for 1918 of the Great-West Life Assurance Company is now in print, and a copy will be mailed to any interested person on request.

To those needing Insurance, the Report will prove a remarkably interesting document showing as it does the notable prosperity and progress of the Great-West Life, and the gratifying results that are being accomplished for the Policyholders.

The whole Report gives strong confirmation to the now widely-recognized claim that for profitable Life Insurance one cannot better the Policies of

Sandwich East Township, Ont.—April 8—Home of Mr. Ellwood, Strabane Avenue, was destroyed. Estimated loss, $1,500, partially covered by insurance.

Windsor, Ont.—April 7—Brick building on corner of Wyandotte and Langlois Avenues was damaged. Cause, overheated stove. Estimated loss, $200.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Montreal, Que.—March 30—The premises of S. Robitaille and Co., wholesale importers of fireworks, toys and twine, 100 St. Paul St., were damaged. Estimated loss, $30,000. The fire spread to adjoining building. Insurance as follows: Robitaille Building, Phœnix of London, $8,000. Total loss. On Robitaille stock, Mutual of St. Hyacinthe and Equitable, $2,500. Total loss. On Auger stock, Phœnix of London, $8,000; Union of London, $7,000; Mount Royal, $5,000; total, $20,000. Total loss. Pataude and Corigan, Union of London, $25,000; North West, $10,000; British Colonial, $16,500; Great American, $10,000; Scottish Union, $10,000; Mount Royal, $[illegible]; North West National, $5,000; National Ben Franklin, $7,000; total, $90,000.

Petrolea, Ont.—April 6—The underground oil tank of the Canadian Oil Co., Ltd., was damaged. Cause, lightning. Estimated damage: On stock, $1,000; on tank, $1,000.

Windsor, Ont.—April 7—Premises of J. F. Smythe and Co., wholesale grocers, were damaged. Estimated loss, $[illegible]. Insurance carried, $69,500. The following companies are interested: Northern Continental, Liverpool and London and Globe, Royal, Queen, Western, London and Lancashire, Yorkshire, Firemen's Fund, General of Perth, Caledonian, Guardian, Northern Union, North America, North British and Mercantile and Commercial Union

NEW TORONTO INSURANCE FIRM

A new firm of insurance brokers has commenced business at the [illegible] Life Building, Toronto, under the name of [illegible] Paterson. The members of the firm are [illegible] Wood, A. [illegible] Paterson, Arthur Meen and W. [illegible]

POWERS TO CONTROL RATES ENLARGED

A new clause which enlarges the powers of the Railway Commission in respect to the control of rates when they are affected by special conditions or circumstances, has been approved of by the special committee of the Commons, when considering the Consolidated Railway Act. It was pointed out that in a number of instances applications have been made to the board which were admittedly based upon reasonable grounds, but the board could not accede to the requests made because of lack of power.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times:*—

Cable transfers ..	4.77¾	4.78¼	Nominal

Rate in New York—Sterling demand, 4.65⅜ nominal.
Bank of England rate, 5 per cent.

EDMONTON, DUNVEGAN AND BRITISH COLUMBIA RAILWAY

Premier Stewart, of Alberta, recently intimated in the provincial house that unless some means could be found to finance the necessary construction expenditures of the Edmonton, Dunvegan and British Columbia Railway, whose bonds the province has guaranteed, the railway would have to be taken over. He said that as the situation now stands the government would have to draw from the trust account created by the sale of the bonds in order to meet these construction charges and also the interest. This source, however, would not last more than a year. The provincial guarantee is to the amount of $20,000 per mile. It is understood that the Dominion government has been approached for assistance, but no definite announcement is as yet forthcoming from this source.

THE LATE J. R. HEGEMAN

A tribute to the memory of the late J. R. Hegeman has been placed upon the records of the Association of Life Insurance Presidents, of which Mr. Hegeman was a charter member. It reads in part:—

Following a devoted and unselfish service to the institution of life insurance, during more than half a century, Mr. John Rogers Hegeman has passed away. With profound regret we record the departure of a notable figure in the history of American life insurance. He was an integral part of the broad social and economic movement which had reached its point of highest development at the moment of his decease. His untiring constructive contributions have played a large part in establishing habits of thrift in the social and industrial life of the country.

Arriving at his majority, Mr. Hegeman entered upon his life's work—the upbuilding of life insurance. Shortly after the close of the Civil War, following a few years' experience in other business activities, he became accountant of the Manhattan Life Insurance Company of New York. In June of 1870, he began his association with the Metropolitan Life Insurance Company by becoming its secretary, and so demonstrated his efficiency that in October of that year he was elected to the position of vice-president. He was elected president of the company in October of 1891, and occupied this position until his death. Thus, in briefest outline, we see his service of forty-nine years to one company, and of fifty-three years to life insurance in general.

State Railway System a Menace

United States Financier Warns Canada of Dangers — Lord Shaughnessy Condemns Political Influences—Experience of Government Roads Throughout the World Proves Inefficiency and Danger—United States Experiment Gave Fair Chance to Government System

OVER a year of government operation of railways has satisfied those in the United States who looked upon such a system with favor, that America cannot achieve results in state ownership very different from results in other countries. This was emphasized by Charles E. Mitchell, president of the National City Co. at a meeting of the Canadian Club in Montreal on April 21st. Lord Shaughnessy, chairman of the board of directors of the Canadian Pacific, expressed agreement with the views of the speaker. Mr. Mitchell stated that he was unalterably opposed to government ownership and operation of railways; experience in the United States justified this opinion and he felt that results in Canada would be equally disastrous.

Mr. Mitchell said in part:—

"While the official figures of your Government-managed roads, over a long period of years, have told a sad but convincing story, they do not apparently, approach in sadness the story that has been developed by those close students and commissions who have analyzed the figures of such lines as your Intercolonial and have measured the losses sustained, when from the official operating net has been deducted interest on the investment which failed of being earned and taxes which the public would have collected had these roads been privately owned. The experience with Government-owned roads in Canada is the experience with State lines in almost every part of the globe. Most of them do not earn interest on the investment, and practically none earns the taxes which would have been forthcoming from private railways, to say nothing of the profits accruing to private capitalists under private management. A year and a third of government operation of railways in the United States has shown conclusively that we cannot expect our case to be any exception to the proven rule, for the results have been such, that while a year ago the great majority of the American people were moderately in favor of government ownership and operation, to-day the number has dwindled almost to the vanishing point. Indeed it now includes, for the most part, only the unthinking portion of that great body of railroad labor which has benefited by the free and easy dispensation of other people's money and has as yet failed to realize that, in the ultimate, labor interests will not be best served by their development as a cog in the machine of politics, and also, a few students of the situation who, worn by the struggle to see through the fog of the problem, have become so discouraged as to be willing to consign the roads to rest in peace in the arms of a paternalistic government, which stands ready to force the taxpayer to meet any deficiency resulting from government operation."

Continuing, he pointed out that upon the efficient operation and prosperity of the American railroads depended in a large measure the efficiency and prosperity of American commerce. He outlined concisely the history of railroad construction and operation in the United States. There were three of these stages, construction, government regulation and government ownership. In the first of these there had been political control exercised by the railway interests in many states which had brought about an anti-railway reaction. In the second period unceasing and conflicting government regulation had so strangled and starved the railroads that when the war broke out government management became imperative "Private ownership did not break down, but the system under which private ownership was forced to exist—the system of government super-regulation—completely collapsed," said Mr. Mitchell.

The presidents plan of organization was simple and effective. Freight rates were advanced twenty-five per cent. and passenger rates fifty per cent. "On paper," Mr. Mitchell declared, "the scheme was sound. The country was divided into seven great traffic regions, and for these regions were appointed regional directors, who were, for the most part, the presidents of leading trunk lines. The fact that these operators, however, working to a man to the height of their efficiency and power, were unable to produce satisfactory results, and service deteriorated and morale became constantly lower, is a striking commentary on the general subject of government operation. The roads were free from hampering restrictions and yet the net earnings fell off $285,000,000, compared with the previous year, the railroads earning only seventy-five per cent. of the amount which the government had guaranteed them as rental. Notwithstanding the increases in rates, which were far greater than private management had ever dreamed of asking, and which produced greater gross revenue by $865,000,000, the people of our country, after suffering inferior service, were called upon as taxpayers to advance $210,000,000, the amount by which the net earnings failed to equal the guaranteed rental. In other words; the American people paid $865,000,000, more in rates for inferior service and were taxed $210,000,000, in addition, so that the true cost to the people of one year of Federal operation amounted to $1,075,000,000. With these figures before you, I need not repeat that the popular passion for government ownership and operation has materially cooled during the past year.

"The Railroad Administration, through appreciation of necessities of war conditions or otherwise, increased the wage bill of our railroads within one year $965,000,000, which advance followed an advance made by the companies themselves in the previous year so that the total advances in the yearly wage bill arising since our entry into the war are no less than $1,260,000,000. The annual wages paid by our railroads to-day aggregate $3,000,000,000,—an amount equivalent to the gross earnings of all roads during the year 1915. Considering that the war-time increase in prices of railroad materials has added to operating costs between $500,000,000, and $600,000,000 annually, and that the yearly wage scale has been increased by $1,260,000,000, while the entire advance in rates has added only about $1,000,000,000, to annual railroad revenues, it will be clearly seen that the railroad financial situation is far worse than it has ever been before. Much as we may dislike the thought, a further increase in rates to compensate, in large measure, for this increase in operating expenses, is inevitable. While there may be some hope that the cost of coal and rails and other supplies may come down and the increased volume of traffic may compensate for such increases as remain, it is difficult, in view of the political aspect of the situation, to believe that railroad wages will lend themselves to reduction under the natural laws of economics as will the industrial wage. A rate increase equivalent in result to the wage increase should, unquestionably, be made forthwith."

As against this it was only fair to place certain claimed savings and benefits as set forth by the administration. These were estimated to amount to about $120,000,000, brought about only as "war economics" and accepted purely as such by the people. There were also some claimed economies in operation in car mileage and freight handling.

"These savings and advantages are manifestly infinitesimal as compared to what the American people know and can see concretely,—deterioration of service and an effect upon railroad finance so alarming that, were the roads to be returned to private ownership under conditions to-day existent, a majority of our companies would be faced with bankruptcy," Mr. Mitchell declared.

The speaker then turned to the manifest danger and difficulties to be met in returning the railroads to their owners. There have been many suggestions as to this. "Many of the views expressed in these plans are admirable, though for the most part, they involve the laying of the railroad structure upon the operating table and performing upon it major surgical operations that will result in making it little resemble that transportation system which has served so well our public in the past. They propose such physical and financial readjustments of the railroad situation as, in my opinion, would leave the patient weak and disfigured and unable to bear the burdens which American commerce must throw upon him without interruption." He was opposed to the idea of guaranteeing a fixed return upon any road as it stifled achievement in operation.

"Perhaps the thought that I would contribute to the discussion leading to the solution of the railroad problem may be of interest. It is based upon the conclusion that government ownership and operation is not practical; that private ownership and operation freed from government regulation, has been shown by history to have its dangers and is not feasible; and that the situation must be worked out under private ownership and operation under fair and equitable regulation, the solution to be found with as little disturbance as possible of structures already existent."

"The corner to be turned must not be a sharp one. This return must be gradual, both in method and point of time. Let private management reinstate itself, with the requirement upon each road to pay over to the government any excess over the government guaranteed rental return, and with the right to call upon the government during the guaranty period for any deficit between its net operating revenue and such guaranteed rental. But let there be provision that at any time during this two to three year period of continued government guaranty, any railroad company may, if it so elect, release the government from its guaranty and receive thereafter the full net return resulting from its operations, subject to a division of excessive earnings as heretofore suggested. I am of the belief that, under this plan, the owners of the majority of our large railroad companies would release the government from its guaranty within the first year."

Mr Mitchell concluded by pointing out that the United States would be seeking foreign investments and American bankers hoped to be of a assistance to Canada.

Voicing the appreciation of the club for Mr. Mitchell's address, Lord Shaughnessy expressed hearty approval of his conclusion. The situation in Canada was working out differently from that described by Mr. Mitchell. In his opinion a stupid public policy had led to an unnecessarily large increase of the mileage under government control. The system proposed was different from that in operation in the United States. The theory was that by the establishment of independent bodies railway operation would be kept aloof from politics. His hearers would recognize that this was impossible. With the responsibility of the directing officers to Ottawa, Ottawa control would be inevitable and the officials themselves would inevitably become politicians.

The outlook was not reassuring. In Canada, unlike the United States, cabinet ministers were members of the House and were in control of the House. Of course, he added ironically, "ministers in our Canadian atmosphere rapidly become most capable." He knew himself of ministers from law offices in the west, or country stores in the east who within three months of official experience could easily instruct professional railroad operators. He agreed to the letter with Mr. Mitchell's arguments and conclusion. He was a bitter opponent of public ownership. He considered that it tended to destroy individual initiative and effort which would not improve our national life.

TERMINOLOGY OF FIRE PROTECTION

Definitions to be Suggested at the Annual Convention of the National Fire Protection Association

THE committee on Nomenclature of the National Fire Protection Association will, as usual, propose at the annual meeting to be held in Ottawa on May 6th, 7th and 8th, certain definitions of terms commonly used in fire protection. The report this year, however, merely presents the matters which were referred back for the consideration of the committee by the 22nd annual meeting held last year. The advance report says:—

"As before, the use of words and their definition is considered with relation to the orismology of fire protection. The definitions submitted are therefore such as will suit the terminology of fire protection rather than the general or popular use of the words or terms.

"*Flat Roof.*—The committee suggests the omission of this definition as not particularly useful, and possibly liable to be confused with the idioms of roofing manufacturers. As presented in the previous report, the distinction was made between roofs having a pitch of less than twenty (20) degrees and others. Those of flatter pitch are always liable to accidental loading, such as groups of people, storage of merchandise, erection of signs, etc. Many building codes very properly increase the allowable loading for roofs of flatter pitch than twenty (20) degrees. Hence the definition as submitted.

"*Fire Exit Partition.*—The term 'Fire Exit Partition' indicates a Fire Partition erected to provide an area of refuge from fire during the exit of the occupants from a building. Its fire resistance must be such as to afford at least one (1) hour protection.

"*Fire Partition.*—The term 'Fire Partition' indicates a wall subdividing a story of a building to restrict the spread of fire. Fire partitions are graded by performance tests, the minimum being one (1) hour protection.

"*Fire Wall.*—The term 'Fire Wall' indicates a wall subdividing a building to restrict the spread of fire. It shall have such thickness as to prevent the communication of fire by heat conduction.

"It shall have such stability as to remain intact after complete combustion of the contents of the building on one side of the wall; and its structural integrity shall be such as to be unaffected by any wreckage resulting from the fire or its extinguishment.

"In fire-resistive buildings having floors and roof meeting the requirements of four (4) hour protection, a fire wall need not be continuous through all stories, nor need it extend through the roof. In all other buildings it shall start at the foundation, be continuous through all stories, and extend above the roof."

Advance reports of most of the committees of the Association have been prepared as follows:—Safety to Life; Fire Pumps; Inflammable Liquids; Standardization of Pipe and Pipe Fittings; Gases; Electrical Committee; Automatic Sprinklers; Hazardous Chemicals and Explosives; Fire-resistive Construction; Field Practice; Signaling Systems.

SEEDING COMMENCED IN MANITOBA

Outlook is Promising in Brandon District—Demand for Farm Lands—Wholesale Trade Conditions

(Staff Correspondence.)

Brandon, April 21st, 1919.

THE spring season is opening up favorably in Western Canada, and by the end of the week seeding operations will be in full swing. The Brandon district, one of the most prosperous in the west, is out for big things this year. The acreage seeded will be approximately about the same as last year, and weather conditions at the present time are ideal. In Brandon City all lines of business, with the exception of building, is good and the prospects are that quite a lot of building in the way of public works will be done this year; a hospital, building for mounted police, and new post office among them. There is a shortage of houses to rent, and good houses are at a premium.

Mr. Williard Hughes, a business man with large interests in Brandon, interviewed by *The Monetary Times*, said: "Brandon's enlistment in men and contributions to all the various war funds has been heavy, standing higher on the per capita basis than probably any other city in the Dominion. During the last two years of the war there was somewhat of a restriction in business conditions, but a few months following the armistice finds a marked improvement in conditions generally. Citizens are looking forward confidently to a resumption of the steady, substantial growth so characteristic of this conservatively managed city. One of the best evidences of Brandon's solidarity is the high credit standing she enjoys in financial circles.

"A very healthy improvement in conditions during the past few months is found in the increasing demand for housing accommodation, and any vacant properties heretofore available are being occupied rapidly. Owing to the fine weather prevailing this year building operations have proceeded all through the winter. The A. E. McKenzie Company building, a seven-story fireproof structure, the home of a large seed house, was increased in space by the addition of five stories on the rear section, and additional equipment installed of the most modern type. New store premises have been erected for the McCulloch Drug Company with doctors' offices above. The Coco Cola Company secured a site on trackage and their building is well under way and will soon be ready for occupancy. By reason of increasing business the Tungland Creamery Company have secured larger premises. The Canadian Pacific Railway Company also enlarged their freight sheds."

Brandon as a distributing centre is growing in importance. In discussing the outlook Mr. J. H. Rankin, president of the board of trade, pointed out that Brandon had 26 wholesale houses with 468 employees and 100 salesmen; the yearly payroll of these 26 houses being $605,000, and the annual turnover $13,230,000. Mr. Rankin was very well satisfied with trade conditions, and the outlook, he thinks, is very bright. Collections, he states, are good, better, in fact, than at any time in the past four years. Business in Mr. Rankin's own line, wholesale grocery, shows a 25 per cent. increase so far this year. The Brandon Board of Trade has been reorganized on a broad scale, and is out to double the population of the city in the next ten years. The Board of Trade is in communication with a number of manufacturing concerns looking to the location of plants at Brandon. One of the proposed new industries is a packing house.

New Tax Rate Probable

Mr. A. R. McDiarmid, the new mayor of Brandon, is optimistic regarding the future outlook for the city. Brandon is having its own internal troubles with labor, wage increases, etc., and a mistake that it has made in the past of shutting its eyes to mounting costs of administration and not making proper provision for them is now having to be faced; the tax levy for 1919, now being considered, will in all probability have to be advanced from 25 mills last year to somewhere in the vicinity of 28 mills. The taxes on outside properties are not being collected, which is the case in many of the western cities. The present overdraft at the bank is roughly $400,000. The percentage of 1918 taxes collected, with business tax, reached 68.7; without business tax, 67.5; the percentages of total taxes paid during the year to 1918 levy, with business tax was 95.4; without business tax, 94.8.

The Brandon Street Railway, operated by the city, showed a deficit last year of $2,000, mainly caused, said Mayor McDiarmid, by the "flu" epidemic, and he looks this year for it to show something to the good.

Demand for Farm Lands

There is an active demand for farm lands in Manitoba, said Mr. Geo. Williamson, of Brandon, to *The Monetary Times*. "Farm lands and ranches are in stronger demand than in my 15 years past experience, with prices ranging from $20 an acre for scrub land to $150 an acre for improved farms. There is a reason," said Mr. Williamson; "cereals of all kinds are worth about double what they used to be; a farmer can realize over $3,000 for a car of cattle. This makes the demand. Never in the past have cattle sales brought as much money, one sale just recently bringing over $90,000 in an afternoon, averaging a minute and a half to each sale for cash."

Mr. Williamson stated that 90 per cent. of his enquirers for land want to go north in Manitoba, and he says there is a reason here also, the rain-fall being 36 inches in last 30 years. Mr. Williamson says his last sales have been in the vicinity of Fork River, near Lake Winnipegosis; he has just sold a 15,000-acre ranch in that district, stocked complete.

One man whom Mr. Williamson mentioned sold over $7,000 worth of grain near Gilbert Plains from 160 acres, then he sold the land for $6,000, making a total revenue of $13,000 in about 12 months. Mr. Williamson says he is aspiring to do one thing, or be the first man to do it; he intends to ride in an aeroplane from Dauphin to Brandon dropping his literature on the way.

EMPLOYERS' LIABILITY ASSUR. CORP., LTD.

The 1918 statement of the Employers' Liability Assurance Corporation, Limited, which appears in detail in this issue, shows a very substantial increase in business. The total income as shown by the revenue account was $38,394,275 as compared with $26,507,118, in 1917, an increase of close to fifty per cent. The premium income in 1918 was $25,476,505, and in 1917 it was $16,983,153, an increase of over fifty per cent. Payments under policies, including medical and legal expenses, were $10,343,910, an increase of $2,600,000. The insurance fund shows corresponding increases. A balance of $3,750,085 was transferred from the revenue account to the profit and loss account. There was also over $700,000 received from interest and rents making a total in the profit and loss account of $4,472,440. After paying taxes, dividends, etc., $1,250,000 was transferred to the special reserve for excess profits taxes, and $1,433,325 to the general reserve fund. The balance sheet now shows assets of over $30,000,000 compared with $21,379,580 last year. Outside of balance due from branches and agencies, cash on hand, etc., practically all the funds are invested in government, municipal and railroad securities.

The company has been doing business in Canada for about thirty years and now writes Employers' Liability, Workmen's Compensation, Fire, Hail, Personal Accident, Sickness, Fidelity Guarantee Bonds, Burglary and Automobile Insurance, (including Liability, Property Damage, Collision, Fire and Theft). Mr. C. W. I. Woodland is the general manager for Canada and Newfoundland. Mr. John Jenkins is the Fire manager. The total premium income in Canada for the year was $1,846,354, compared with $1,423,963 for 1917.

Investments of Life Insurance Companies[*]

Requirements of Insurance Act—Some High Yielding Securities Necessary —Agents Should Not Emphasize Policy Loans

By E. M. SAUNDERS

Treasurer, Canada Life Assurance Co., President, Dominion Mortgage and Investment Association

"TO my mind the question of investments is at the very basis of the success of life insurance, and the nature of the investments of a company is of such importance as to far outweigh any other feature by which the success of a company is generally gauged. To ignore this essential element and to emphasize other elements, however important they may be, such as large profits, liberal policies, attractive premiums, is to my mind as vain as for the man who has built his house upon the shifting sands to pride himself upon the glittering superstructure which, however attractive, cannot give to the edifice permanence and stability."

This extract from a recent address of the superintendent of insurance makes an excellent text for the subject I have chosen. His statement is concise and to the point and will, I am sure, have your hearty endorsation. I presume that the most of this audience is made up of field men, and consequently I have deemed it wise to deal in a general way with the investments of life insurance companies, without going into too much detail.

Qualifications for Life Insurance Work

All those engaged in life insurance work should, in my opinion, have a general knowledge of all departments of this business, and specialize in the particular branch to which they are attached. Field men should be familiar with their rate books and endeavor to become experts in explaining in a clear and concise manner the different plans of policies the companies they represent have to offer their prospects, and at the same time, while carrying on their canvass, they should be prepared to explain in a general way how the policyholders' premiums are invested, and the nature of the securities which represent the reserves held to provide for death claims and maturing policies.

Character of Work

Before entering upon an explanation of the nature of these investments, it might not be out of place to call attention to the noble work in which you are engaged. There is no criticism to be made of the canvasser who is ambitious to increase his revenue year by year with a good renewal income, but I think you will agree with me that while thus engaged, he should not lose sight of the fact that he is also doing a great work for his fellow-beings, when persuading them to make provision for their wives and children and beneficiaries. In my own position as treasurer of the Canada Life Assurance Co., I feel that I have a sacred trust imposed upon me in securing and watching the investments for our policyholders, and if, when making purchases of securities, there arises in my mind the question as to the absolute safety of an investment, I am free to admit that the widows and orphans always get the benefit of the doubt, with the result that the dealer does not always make a sale.

Character of Men Employed

I would like to refer briefly to the requirements of the companies and the public as regards the type of men that are now responsible for the successful carrying on of this business. In years gone by it was a common saying that if a man did not make a success at any work he may have been engaged in, he sought a position in a life insurance company, or the church. While I hold no brief for the church, I certainly do for the life companies, and make the statement without fear of contradiction, that a very high standard has been struck by the life companies as to the qualifications of candidates for their work, and I think you will agree with me that this change is more pronounced in the department you represent. In the past the life insurance canvasser had to resort to all kinds of schemes to secure interviews with his prospects, while now all the introduction he requires is the simple announcement that he is a regularly appointed agent of a reputable life company. It is one of the first essentials to the success of a life company that their agents shall be well chosen and qualified for their work, for if they are not it would be impossible to build up that foundation of investments to which the superintendent of insurance refers.

Investments Classified

The insurance act, as you know, limits the class of investments we are allowed to make, and wisely so. The largest and most important assets of life companies may be classified as follows: (1) Bonds, debentures and stock; (2) loans on real estate; (3) policy loans; (4) real estate.

In my opinion the most desirable of these assets are bonds and debentures of a high class, and first mortgages on improved properties. Such investments should represent the larger proportion of the securities of a life insurance company. The figures of the Canadian life companies prove this statement, for at the close of business in 1917 they represented about 75 per cent. of their total assets.

Bonds and Debentures

When I say high-class bonds, I mean federal, provincial and municipal securities. There is little or no risk in connection with the investment in federal and provincial bonds, for if the Dominion and provincial governments failed to meet their obligations there would be no credit left in the country. The only care that should be exercised in making such purchases is to endeavor to secure them at good yield rates, and for long periods. Exceptional facilities have been offered the insurance companies during the war period to purchase these securities at yield rates varying from 5½ to 6½ per cent. Such rates as these have not been obtainable since life insurance companies first started doing busness. Full advantage was taken of this opportunity, and as a result the holdings of these securities, including municipal bonds and stocks, have increased during the past four years by approximately 50 per cent.

Municipal Bonds

Municipal bonds and debentures may be the securities of cities, towns, villages or rural districts, and the value of these securities are determined by the financial standing of the municipality issuing them. Before making such purchases a careful study should be made of the municipalities' balance sheets, in order to determine whether or not their borrowings are justified by their revenues, which should be sufficient to make provision for current expenditures and provide for the payment of maturing debentures, both as to principal and interest. It is to be said for the credit of our Canadian municipalities that there have been very few defaults covering a long period of years.

Industrial Bonds and Stocks

There are other bonds and debentures which it is legitimate for insurance companies to invest in, such as industrial and private corporation bonds. Stocks of banks, loan,

(Continued on page 12)

THE NATIONAL RAILWAY BILL

EVENTS in the Canadian House of Commons on Wednesday show that opposition to the creation of a gigantic state railway system in Canada is not confined to those who are interested in the Canadian Pacific Railway and in the Grand Trunk Railway. The criticisms offered by members who took part in the debate were not all conclusive, but they at least indicate the general trend of present-day opinion. The west is, of course, generally speaking, in favor of public ownership of railways, while the east is opposed to it. The position of Ontario has been uncertain, but the influence of a public ownership press has been making itself more and more felt during the past few years. It is very probable, however, that one or two years' experience in the operation of the Canadian Northern will offset any opinion favorable to public ownership which may have been created by the government's assurance that the system will eventually pay. Interest in the success of the national railway system is increased more than proportionately to the increase in the assets under government control, because the Intercolonial has been a government road for such a long time that the financial results from year to year have not attracted much attention. The Canadian Northern, however, has just been taken over after a vigorous public debate and to the accompaniment of many warnings. No matter how efficient the management can be, deficits for some years are accepted as being inevitable. The recent wreck of a government train, including three private coaches occupied by government officials, will have a similar effect. The circumstances, while somewhat unusual, do not necessarily indicate the surrender of the system to politics, but their effect upon the popular mind will be out of proportion to the importance of the event.

In reply to the criticisms in the House on Wednesday, Hon. J. D. Reid, Minister of Railways, gave some detailed information in regard to the Canadian Northern. The government purchased $60,000,000 of common stock, the balance outstanding, for $10,000,000, but did not thereby assume the outstanding liabilities, which remain as debts of the company. The present mileage of the Canadian Northern is 9,524, all of which is operated. The value of the rolling stock, he said, is estimated at $67,573,092. Since taking it over the government has spent $22,233,107 on equipment. The estimated defiict for the current year is $7,000,000. The estimated amount required for the equipment for the Canadian National Railway for the current year is $35,000,000. Dr. Reid added that the revenue for the calendar year 1918 was $49,201,955. Operating expenses were $45,639,651, and net earnings $3,562,303. The total indebtedness of the Canadian Northern, as of December 31st, 1918, including funded debt, equipment, securities, land securities and all liabilities outstanding, amounted to $473,174,432. The present indebtedness per mile, including equipment, land and all subsidiary companies' securities, represented $46,166.

On Thursday the method of providing for expenditure was discussed. Sir Thomas White, carrying out the view that the road should be operated as far as possible like a private railway, held that it should not be necessary to include the expenditure in the estimates each year, but that any deficits should be met out of the Consolidated Revenue Fund. Hon. Mr. Fielding, however, and other members, maintained that provision should be made in the same way as it was for the Intercolonial expenditures, so that the railway finances should regularly come up for discussion It is obviously impossible to manage the system in both ways, as they are fundamentally different; the one regards it as an ordinary department of government, subject to control by parliament through the executive minister of the department; in the other case, where the government would be regarded merely as the proprietor, the manager of the system would be directly responsible to the cabinet.

THE TARIFF AND THE FREE LIST

A GROUP of those most strongly opposed to any reduction in the tariff met in Brantford, Ont., on April 22nd; several implement manufacturing concerns are located in Brantford, which have been threatened by the agitation in the west for the removal of all duties on agricultural implements. While the tariff as a whole was the main subject under discussion, it was at least evident that the protectionists were on firm ground as regards their opposition to any blow being struck at a single industry, while no general revision was made. The import duties affect the farmer not only in his purchases of implements, but also in his purchases of almost all manufactured goods. The following resolution was passed:—

"That at this meeting, called to discuss the tariff issues of Canada,

"It is resolved that in view of the difference in interests existing in Canada to-day, whereby the Western agricultural classes urge the government to reduce present tariff schedules on many commodities, and these views are largely opposed by manufacturing interests, with which interests the working classes are very closely allied;

"And having in view the fact that it is essential to find employment for a large number of workers lately released from many industries, and also to find employment for a large proportion of Canada's returning army;

"That in order to supply employment for these workers it is necessary that every manufacturing plant, factory or industry of any nature in Canada should be kept in operation at fullest capacity during the whole period of reconstruction to avoid the danger of unemployment and in order to carry on and expand where possible, it is necessary that confidence in the stability of conditions be preserved;

"And realizing that the various interests must recognize that the interests of each are inseparably bound up and are dependent upon the prosperity of the whole, and recognizing the injustice of one class seeking to benefit at the expense of another class:

"We urge upon our representatives in parliament the great importance of careful and wise handling by the government of this tariff issue;

"And that no changes should be made in the tariff of Canada until a commission is appointed to thoroughly investigate and to revise and administer a tariff which will be equitable and just to all classes of the country."

Mr. W. F. Cockshutt, M.P., stated that as more than half of our production is now in the factories, Canada can no longer be said to be entirely an agricultural country. To have a great population we must build up all branches of industry.

Mr. Cockshutt said the rural population of the three prairie provinces was 218,563, and the average value of each farm was $9,947, with $758 representing the investment in implements. This meant a little less than $25 a year for ten years in duties collected. Tariff was therefore far from being a life and death matter with the farmers. The speaker then said that under free trade the binder twine industries of Canada dwindled from fifteen to one, and the farmers paid more for their twine. When barb wire was put on the free list every barb wire factory was put out of business. The farmers were granted free wheat. The result was the opposite to what they expected. An avalanche of wheat flowed into Canada from the United States, and not a bushel could be exported. Farm tractors were put on the free list last year. The result was that one of the largest industries in Canada had a deficit of $100,000 on the year's business.

"I have tried to be as conciliatory as possible," he said, "I do consent to taking off the war tax. The manufacturers didn't ask for it. But that is as far as we can go."

Referring to the duties on implements, Mr. John Harold, M.P., pointed to the fact that $17,000,000 of automobiles were purchased in the west last year, while purchases of implements did not approach this sum. Yet the farmers demanded the removal of the duty on implements. It would be a gross injustice, he said, to take the duty off farm implements. Fifty-six factories in Canada would be ruinously affected. "It is not fair that Canada's pioneer industry should be thus destroyed. If the tariff is taken off the Canadian manufacturer must take his plant to the United States or close down. The United States imports no implements from us. We are building up a nation, and we cannot do that by tearing down our industries."

CALENDAR REVISION

CANADIANS should support the movement which is already under way to simplify the calendar. The changes proposed would eliminate the difficulties now due to the fact that the month is not composed of an even number of weeks; this complicates any comparison of figures compiled on a weekly basis with others compiled on a monthly basis.

It is suggested that a thirteenth month should be added and the number of weeks in each month should be made exactly four. This would make 364 days, and New Years day could be regarded as separate from any month; every fourth year there could be an additional "New Years Day." Every month would then be of exactly the same length, and comparisons of such figures as railway earnings, bank clearings, pay rolls, etc., would be a simple matter. An association by the name of the American Equal Month Calendar Association has been formed in Minneapolis, Minn., for the purpose of furthering this plan. They propose that the additional month should be the third in the new calendar, and should be called "Liberty."

GREATER WINNIPEG WATER DISTRICT FINANCES

THE arrangement by which the Greater Winnipeg water District was to be financed, with the assistance of property taxes, has evidently not been satisfactory, judging by the efforts which have been made during the past few weeks to have it placed upon a self supporting basis. The system has been financed under the agreement made reached by Winnipeg and the adjoining municipalities in 1913, when the district was organized. This agreement was incorporated in the provincial legislation creating the district and can be altered only by the legislature. The suburban municipalities consider that they have been called upon to pay a disproportionate share of the cost and endeavored to secure a legislative amendment at the recent session of the House. Opposition on the part of the city of Winnipeg was so strong, however, that the government decided to refer the subject to a commission.

The only difference between the operation of this system and that of an ordinary municipal utility is that several municipalities are here involved, and the agreement was a contract among several municipal corporations; naturally some municipalities will desire that it should be strictly adhered to. It was scarcely to be expected, however, that an arrangement reached at the inception of such a large public work should be found to be strictly equitable after several years of operation. The provincial government should not hesitate to make such changes as are now found to be in accordance with justice to the users and to the ratepayers. Owing to the fact that the Winnipeg Water District was incorporated for the specific purpose of providing water, it obviously cannot make up a deficit from general revenue as can an ordinary municipality. The principle of self supporting public utilities is generally accepted in Canada. As regards the distribution of the cost within the body of users, most cities levy a uniform rate approximately in proportion to the amount used. The Winnipeg system covers such an extensive area, however, that it would be scarcely equitable to have users located near the distributing centre pay at the same rate as those farther away, for whose service long water mains are necessary.

INVESTMENTS AND LIFE INSURANCE COMPANIES

(Continued from page 8)

[illegible] and other corporations may also be bought, with limitations on some of them as to having paid dividends for a period of years previous to the date of purchase. In making investments of this character, where so much often depends on the management of the corporations or institutions issuing these securities, greater care is necessary, and it must also be borne in mind that this class of securities are liable to show a greater fluctuation in value than those previously referred to. I fear that those who are entrusted with making investments for life insurance companies are sometimes tempted into the purchasing too liberally of this class of securities on account of the attractive rates of interest they offer, which help very materially in increasing the average earning rate.

Real Estate Mortgages

Loans or mortgages on real estate constitute one of the most important and safest assets on the books of life insurance companies. They are more troublesome and expensive to handle than bonds or debentures, but in most cases the mortgages have the advantage of being a registered claim against a particular piece of property. To carry a mortgage business on successfully it is necessary to have a good organization for this purpose with managers and inspectors fully qualified for this work. Mortgages may be on city, town, village or farm properties, with the preference given to city or farm properties where there is likely to be less fluctuation in values and a more permanent demand for such securities. The Insurance Act permits life companies to lend up to 60 per cent. of the value on real estate mortgages, although most companies do not advance over 50 per cent. of the value placed on these properties by their own inspectors.

Mortgage investments should only be made upon improved farm, city or town properties, and where the revenue from such properties is sufficient to meet the annual interest payments and make provision for a reserve to apply on the principal amount of the debt. Mortgages, while requiring a little more work to handle than bonds and debentures are more profitable, as the rate of interest they bear is higher, ranging at the present time from six and a half to eight per cent. according to the class of security they represent, and the part of the country in which the investments are made.

By carrying a good proportion of mortgage investments a life company is better able to maintain a good average rate of interest than if their investments were confined to bonds, debentures and stocks, which do not yield as high returns. Then, on the other hand, when the two classes of investments are held an opportunity is afforded to change the policy of investment according to the market demand for mortgages or bonds. During the past four years, covering the war period, the life companies have had an opportunity of placing most of their surplus funds in bond and debenture investments at favorable rates, with the result, as has been stated, that these assets increased over 50 per cent., whereas during the same period the mortgage investments have shown a decrease of two per cent., due principally to the check placed upon the development of the country by the carrying on of the war. With the cessation of hostilities there is already evidence of a more active demand for mortgage funds, and the probability is that this will increase as time goes on

Average Earning Rate

Reference has already been made to the average earning rate, and as this is sometimes used by the agents in their canvass I do not think it should be overlooked when [illegible] investments, as it is on these securities that the rate depends. When building up an average earning rate I think due regard should be had to its permanence. It is [illegible] to specialize in any certain class of investments which bear a high rate of interest, for when the time comes that these particular investments show a lower yield rate the inevitable result is the lowering of the average rate. It is therefore in my opinion advisable to have a certain proportion of assets in mortgages and bonds and debentures so that there may be a choice of the class of investments to make. The average holdings in any one of these classes must depend entirely on the market. I do not think it is possible to establish any fixed percentage of holdings for any one of them. The permanency of an average earning rate is very materially helped by the investment in long term securities and for that reason these are always sought after by life insurance companies.

There is no need for life companies to go extensively into the investment of quick or liquid assets which usually bear lower rates of interest, for if a company is in a solvent position its revenue should make provision for any contingencies that may arise. Their ability to do this was well demonstrated to us recently when all companies were taxed to their utmost to meet influenza and war claims along with the average mortality claims.

Policy Loans and Real Estate

The other principal assets of life insurance companies already mentioned, policy loans and real estate require very little explanation. Using the figures at the close of business in 1917, the life companies only had about 13 per cent. of their investments in policy loans. These loans the field men are quite familiar with and no further mention of them is required than to say they are secured by reserves already held for the policies against which the loans are made. Might I be permitted to criticize the practice of some of the field men when canvassing their risks for giving too much prominence in their talk to the fact that the policy holder is entitled to borrow on his policy and sometimes leaving the impression that it is quite legitimate for him to borrow on his policy for all or any purposes, with the result that for some years the percentage of policy loans to total assets increased at an alarming rate. From 1910 to 1914, policy loans showed an increase of about 80 per cent., but from 1914 to 1917, this increase was 18 per cent. or a comparison on the average of 20 per cent. per annum in the first four year period as against six per cent. in the last three year period. This decrease was due no doubt to the efforts put forth by the companies to discourage indiscriminate borrowings on policies. It is quite in order to advise a prospective risk that he may borrow on his policy, but at the same time he should be cautioned that this privilege should not be taken advantage of except for legitimate purposes such as making provision for the payment of a premium which he is unable to meet. In the case of business insurance no exception can be taken to the policy holder for borrowing to protect his business interests.

Real Estate and Sundry Assets

Real estate purchases may be made for the purpose of providing office premises, these only represent about five per cent. of the total assets of the companies. The balance of the assets of the life companies, six per cent., are made up of cash interest and premiums outstanding, and sundry small investments.

Insurance Companies' Part in Developing Country

In conclusion I would like to call attention to the important part that has in the past, and is now being played by the life insurance companies in the development of this great country of ours, through its large investments in bonds, debentures, stocks and mortgages.

Covering the period from 1900 to the close of business in 1917 investments in bonds, debentures and stocks increased from twenty-two million to one hundred and fifty million dollars, and mortgage investments increased from eighteen million to over ninety-two million dollars, and total assets from fifty-nine million to about one and a half billion dollars. The life companies also rendered valuable assistance to the Finance Minister during the period of the war by subscribing over ninety-two millions to his various loans.

ONTARIO ASSESSMENTS IN 1917

Latest Figures Show Increase in City Population but Decrease in Rural Districts—Assessments Continue to Grow

THE Ontario Bureau of Municipal Affairs has just issued its municipal bulletin for 1918, giving the population for 1918 and assessments for 1917, compared with previous years. The figures of population are as follows:—

	Townships.	Villages and towns.	Cities.	Total.
1918	995,228	520,791	1,062,158	2,578,177
1917	1,003,664	524,005	1,032,784	2,560,453
1916	1,027,220	526,162	1,026,870	2,580,252

In the townships the decrease in population for 1918 over 1917 is 8,436, and over 1916 it is 31,992. In the villages and towns the decrease for 1918 over 1917 is 3,214 and the decrease over 1916 is 5,371. In the cities the increase for 1918 over 1917 is 29,374, and an increase over 1916 of 35,288. This will leave an increase for the province of 17,724 for 1918 over the year 1917, and a decrease of 2,075 for 1918 from the year 1916.

Assessments.

	Townships.	Villages and towns.	Cities.	Total.
1917	$698,900,181	$263,401,104	$1,065,260,575	$2,027,561,860
1916	692,560,277	252,225,366	1,059,892,904	2,004,678,547
1915	687,372,853	248,994,738	1,038,257,494	1,974,625,085

The total assessment in the townships in 1917 includes $688,174,942 real property, $5,697,466 business assessment, and $5,027,773 income. There is also included $7,579,859 in the real property and $405,555 in the business assessment that pays school rates only. The total assessment in the villages and towns is made up of $231,822,064 real property, $21,721,537 business assessment, and $9,857,503 income. In the villages and towns there is $7,904,910 and $2,604,890 included in the real property and business assessment that pays school rates only. The total assessment in the cities is made up of $930,399,050 real property, $100,497,791 business, and $34,363,734 income. In the cities there is $23,830,229 and $4,130,133 included in the real property and business assessment that pays schools only.

The total assessment of the province is made up of $1,850,396,056 real property, $127,916,794 business assessment and $49,249,010 income. The total assessment of the province will include $39,314,998 real property and $7,140,578 business assessment, making a total of $46,455,576 that pays school only for 1917.

The assessment in the townships show an increase for 1917 over 1916 of $6,339,904 and over 1915 of $11,527,328. In the villages and towns the increase for 1917 over 1916 is $11,175,738 and over 1915 is $14,406,366. The increase in the cities for 1917 over 1916 is $5,367,671 and over 1915 is $27,003,081. The total increase for the province 1917 over 1916 is $22,883,313 and over 1915 is $52,936,775.

The total area assessed in the townships for 1918 is made up of 24,339,004 acres resident and 816,455 non-resident, making a total of 25,155,459 acres. This is divided into 14,797,629 clearance, 4,891,555 woodland, 2,761,279 slash land and 2,704,996 swamp, marsh or waste land. The area in the villages and towns for 1918 is 257,177 acres. The area in the cities for 1918 is 92,420 acres. In 1891 there were 484 townships organized, 135 villages, 90 towns, 11 cities and 38 counties, making a total of 758. In 1918 there are 551 townships, 149 villages, 139 towns, 23 cities and 38 counties, making a total of 900 organized municipalities, besides 10 districts that no have organization similar to the county councils.

Municipal Taxes.

	Townships.	Villages and towns.	Cities.	Total.
1917	$9,462,175	$5,589,415	$23,082,427	$38,134,017
1916	8,275,353	5,164,817	20,854,540	34,294,710
1915	7,[illegible]41,456	4,619,186	20,517,584	324,78,226

The townships for 1917 show an increase in municipal taxes imposed of $1,186,822 over the year 1916 and an increase of $2,120,719 over the year 1915. The villages and towns show an increase for 1917 over 1916 of $424,598 and over 1915 of $970,229. The cities show an increase for 1917 over 1916 of $2,227,887 and over 1915 of $2,564,843. This will leave an increase in the total taxes imposed for the province for 1917 over 1916 of $8,839,307 and over 1915 of $5,655,791.

School Taxes.

	Townships.	Villages and towns.	Cities.	Total.
1917	$4,672,057	$2,606,282	$7,547,463	$14,825,802
1916	4,418,670	2,401,023	7,187,694	14,007,387
1915	4,237,680	2,280,001	6,601,849	13,119,530

The increase in townships for 1917 over 1916 for school taxes imposed is $253,387 and over 1915, $434,377. The increase in villages and towns for 1917 is $205,259 over the year 1916 and an increase over 1915 of $326,281. In the cities the increase for 1917 over 1916 is $359,769 and over 1915 is $945,614. This will leave an increase for the province for 1917 over 1916 of $818,415 and an increase over 1915 of $1,706,272.

Debenture Debts.

The debenture debt is as follows:—

	Townships.	Villages and towns.	Cities.	Total.
Municipal .	$6,394,365	$29,420,363	$160,623,986	$196,438,714
School	2,847,927	3,970,369	23,497,880	30,316,176
Total:				
1917	9,242,292	33,390,732	184,121,866	226,754,890
1916	8,953,926	32,042,660	184,701,426	225,698,012
1915	8,722,980	31,035,345	171,304,210	211,062,535
Sinking fund:				
1917	147,836	2,300,248	40,881,536	43,329,620
1916	159,348	2,140,073	36,885,289	39,184,710
1915	148,046	1,994,458	29,723,672	31,866,176

In the townships the debenture debt has increased for 1917 over 1916 $288,366 and $519,312 over the year 1915. In the villages and towns the increase is $1,348,072 over 1916 and $2,355,387 over 1915. There is a decrease in the cities of debenture debts outstanding for 1917 over 1916 of $579,560, and an increase over 1915 of $12,817,656. This will leave an increase for the province 1917 over 1916 of only $1,056,878 and over 1915 of $15,692,355.

County Debts.

In addition to the foregoing debts the county municipalities have the following debenture debts and sinking funds:—

	Municipal.	School.	Total.	Sinking fund.
1917	$6,110,010	$8,207	$6,118,217	$396,039
1916	5,282,821	8,953	5,291,774	305,652
1915	4,352,534	9,670	4,362,204	336,186

Taxable and Exempt Property.

	Taxable real property.		Statutory and other exemptions.	
	Land.	Buildings.	Land.	Buildings.
	$	$	$	$
Townships	498,797,733	189,377,209	4,431,598	23,007,965
Villages and towns ..	80,750,265	151,071,799	5,702,375	34,247,911
Cities	493,996,242	436,402,808	77,421,089	111,620,814
Totals, 1917	1,073,544,240	776,851,816	87,555,062	168,876,690
Totals, 1916	1,076,742,336	760,395,714	87,612,325	162,011,349

The reduction in the land taxable in the cities is caused by a lower assessment in Fort William and Port Arthur.

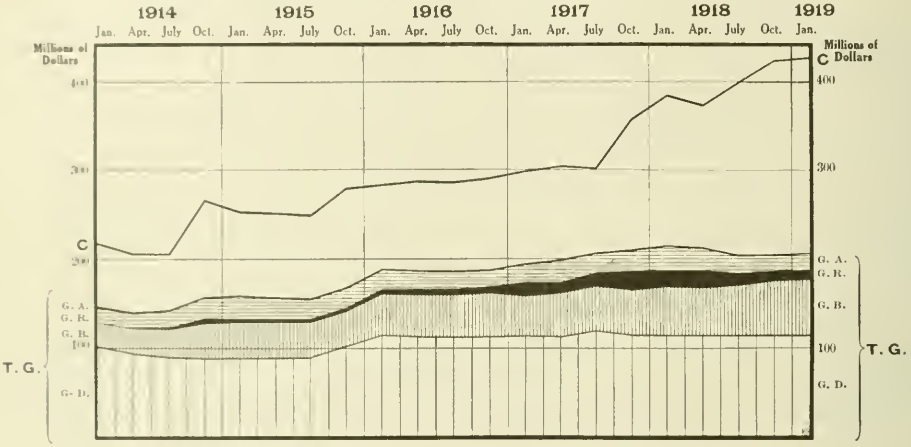
GOLD AND CIRCULATION

THE Apr. number of the Bank of Commerce commercial letter comments on the steady increase in the amount of gold held by the banks and the government against their [illegible] note issues, after deducting from the latter the Dominion notes held in the Central Gold Reserve. The increase is illustrated by a chart, which is reproduced herewith. By way of comment, the letter says:—

It will be noted that at the end of July, 1914, just at the outbreak of war, the total amount of gold held by the banks and the government was $143,754,000 or 70 per cent. of the notes outstanding, which amounted to $205,264,000, the amount of the Dominion notes held in the Central Gold Reserve being almost negligible. At the end of January last, the gold held had increased by $63,151,000, and was thus 48.5 per cent. of the notes outstanding (always excepting the Dominion notes in the Central Gold Reserve). On the other hand, taking into consideration the total of Dominion notes, including those in the Central Gold Reserve, and of bank notes issued at the end of January last, the ratio of gold to notes was 39.6 per cent. as compared with 69 per cent. in July, 1914. In Britain at the end of December last the ratio of gold to notes outstanding was 25.6 per cent., and in the United States 65.7 per cent. The Federal Treasury of Australia has issued notes amounting to £57,035,000 against which it holds 40.4 per cent. or £23,228,000 in gold. While Canada's ratio of gold to currency compares favorably with that of the average belligerent country, her circulation per capita is relatively high. In view of this and similar expansion in Britain and the United States, the minister of finance has taken power to continue restrictions as to the export of gold. "Generally speaking," the minister stated in parliament, "it has been the policy and is the policy of the government to cancel restrictions and regulations just as rapidly as in our judgment the national interests of the country will permit."

Gold and Circulation



G. D. Gold held by Dominion Govt. against Dominion Notes.
G. B. Gold held by Chartered Banks in Canada.
G. R. Gold held by Chartered Banks in Canada in Central Gold Reserves.
G. A. Gold held by Chartered Banks elsewhere.
T. G. Total Gold held by Dominion Govt. against Dominion Notes and by Chartered Banks.
C. Total Circulation issued by Chartered Banks and by Dominion Government less the amount of the Dominion Notes held in the Central Gold Reserves.

MARCH BANK STATEMENT

In March the increase in savings deposits in Canadian banks was $19,000,000; in February it was $28,000,000. Note circulation in March increased by approximately ten millions, and deposits in the central gold reserve by about five millions. Call loans, both in and outside Canada were in advance of the previous month. The following are the principal comparisons:—

	March, 1919.	Feb., 1919.
Reserve fund	$ 117,433,322	$ 116,870,214
Note circulation	214,576,870	204,779,750
Demand deposits	566,797,268	566,775,434
Notice deposits	1,037,851,766	1,018,184,512
Deposits outside Canada	210,104,607	200,560,308
Current coin	80,253,572	80,178,615
Dominion notes	172,651,993	185,932,418
Deposits central gold reserve	108,350,000	103,750,000
Call loans in Canada	87,601,337	79,154,121
Call loans outside Canada	160,116,443	155,983,681
Current loans in Canada	1,117,197,446	1,095,301,791
Current loans outside Canada	123,984,608	130,590,063
Total liabilities	2,358,158,319	2,325,014,654
Total assets	2,612,163,711	2,575,191,491

The complete statement will appear in these columns next week.

OF INTEREST TO INVESTMENT HOUSES

An old-established investment house in western Canada, with excellent connections, is desirous of entering into some arrangement with an eastern bond house wanting representation in the west. Those interested are asked to communicate with Jas. J. Salmond, president of *The Monetary Times*, who will be pleased to furnish fullest particulars.

THE STERLING BANK
OF CANADA

The Sterling Bank gives the same attention to every business matter, great or small. Its one principle is efficient service in all *Banking* business.

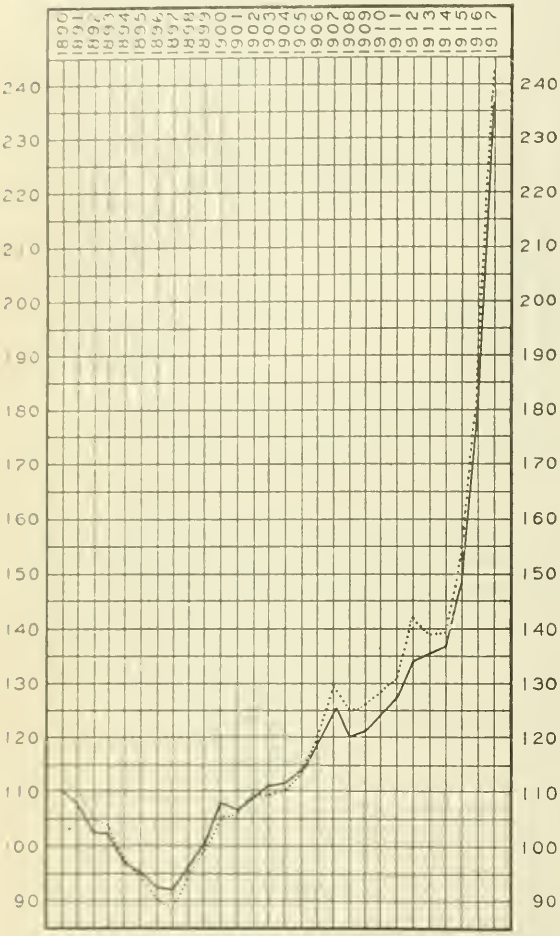
Wholesale Price Movement in Canada

Rise in Prices During Twenty Years—Special Causes at Work in 1917—Influence of Crops and of Transportation Conditions

THE remarkable increase in prices which has been a leading economic factor during the past five years has probably come to a standstill, and the next few years may see a corresponding decline. Prices at the end of 1917, as compared with the end of 1914, showed an increase of over 80 per cent., as measured by the price index of the department of labor at Ottawa. This department has just issued its report on wholesale prices for 1917, which work was under the special care of Mr. C. W. Bolton. This is the ninth report on wholesale prices made by the department. The first, issued in 1910, included the results of an investigation into the course of Canadian prices during the twenty years from 1890 to 1909 inclusive.



Course of Wholesale Prices in Canada, 1890-1917
(Average Prices 1890-1899=100)

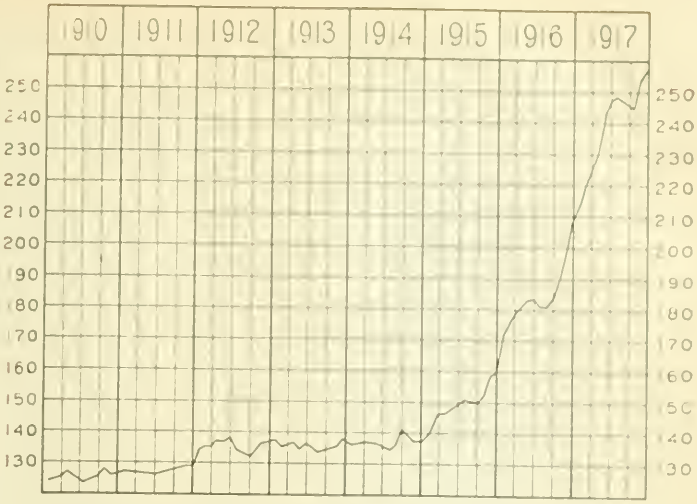
Note.—Dotted line indicates weighted index number.

The original investigation covered 230 articles selected as representative in so far as possible of the more important places of production and consumption in Canada. The list, though made as complete as possible at the time, was not regarded as final, and efforts have since been made to extend it. Seven additional commodities were included in the annual report for 1910 and twenty-seven in the report for 1911. The dropping of two commodities in 1910 and of one commodity in 1911 accordingly brought the total covered by the investigation at the beginning of 1912 to 261. This total was increased to 272 during 1912 by the addition of eleven commodities, namely, nine new articles and additional series of quotations in the case of two articles previously included. In 1913 a new basis was secured for the quotations of indigo. During 1915 one line of spelter added in 1910 was dropped, as, owing to the great advance in prices of spelter, two series in addition to zinc sheets gave these lines an undue importance in the calculation of the index number. In 1915 a new basis was secured for molasses.

With reference to the movement in 1917 the report says: The feature of the prices movement of 1917 was the world shortage of food, aggravated by the difficulty of transporting stocks from the principal sources of production, a difficulty due largely to the demand on the world's ocean tonnage for transporting war supplies, etc., increased by the losses caused by submarines. In other commodities similar conditions prevailed to a less degree. Prices moved steeply upward during the first part of the year and less steeply thereafter. In Canada, the index number of wholesale prices, based on the average prices of 272 commodities in 1890-1899, rose from 212.7 in January to 257.1 in December, having advanced continuously from January to July, when it reached 248.7. In August, September and Ocober there were slight recessions, bringing it down to 244.7 in October, but in November and December the movement was steeply upward again. The index number at the end of the year had, therefore, more than doubled since 1910, when the figure was 124.2, or in 1907, when it had reached 126.2. In Great Britain the index number of the Economist was up to 265.7 in December, double that in January, 1914; while the Sauerbeck index number, published by the Statist, was up to 185.1 as compared with 159.3 in January, 1917, 119.0 in January, 1914, and 78 in 1910. In the United States, Dun's index number reached 220.172 in December as compared with 169.562 in January, 124.528 in January, 1914, and 119.17 in January, 1910. In France, the index number of the General Statistical Office reached 288.2 in December as compared with 217.0 in the first quarter of the year and 120.3 in the third quarter of 1914.

Influence of Grain Crop

The 1916 crops throughout the world had been quite short, but there was a great surplus from the 1915 record crops. In Great Britain, France and Italy the crops were short, and the purchase and supply of imported grain was toward the end of the year placed in the hands of an Allied Buying Commission. A shortage in grain developed in the spring of 1917, and before long the wheat trade in Canada and the United States was put under government control. There was some improvement in the crops of 1917 as a result of more favorable weather and efforts to increase production, but there was still an abnormal shortage in western Europe to be made up by importation. The total production of food did not show a great decrease as compared with pre-war years, but the consumption and demand on supplies had enormously increased. Nor had the number of ships decreased appreciably, but a great part of the existing tonnage was required for purely war needs and was not available for transportation of food and other commodities. The scarcity of ships rendered to a great degree impracticable the transportation of grain from Australasia and India and increased the importance of Canadian and American grain for export. The same feature affected the trade in meats, butter, cheese, etc., although somewhat less, owing to the concentrated form of these foods. The supply of foods from Asia to both America and Europe, including rice, tapioca, sugar, tea, etc., was also affected by this condition. The losses of ships in submarine warfare prevented for some time any net increase in the tonnage available, while the demands on the transportation facilities available were increasing. Gradually almost all tonnage, afloat and building, had been brought into the service of allied and neutral governments.



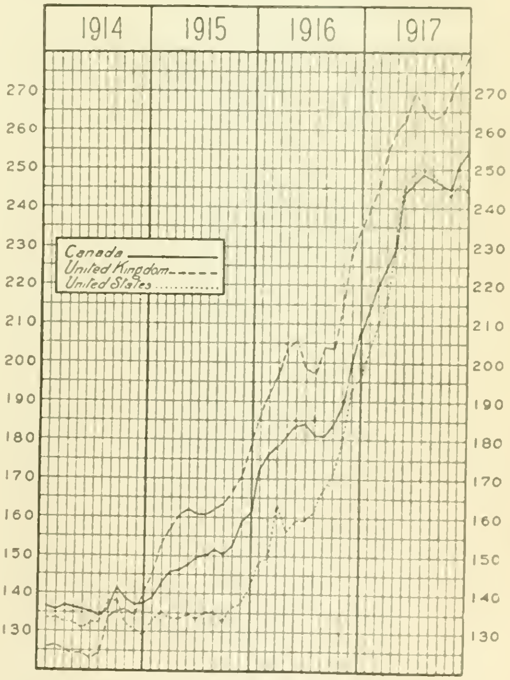
Course of Wholesale Prices in Canada by Months, 1910 to 1917
(Average Prices 1890-1899=100)

Industrial Handicaps

Less marked, but yet very important, was the shortage in fuel, raw materials and manufactured goods, and the difficulties in transportation by land. The railways in North America were strained to meet war demands, and in many cases had not kept up their equipment, owing to the scarcity and high cost of new rails, rolling stock, etc., as a result of the great demand for war material. Mineral and chemical production showed enormous increases, but in coal, textiles, leather, lumber and many other lines production could not be as readily increased nor developed sufficiently to meet the extraordinary demands. The entry of the United States into the war in the spring of 1917 increased the demand for many commodities. Prices in materials as well as in foods had risen very steeply during the latter part of 1916, and continued to increase until the middle of the year, when there was some reaction. The restrictions on the wheat trade and the pending measures for food control tended to steady all grain markets. The United States government made arrangements as to the prices, supply and distribution of coal, metals and other materials required in its war programme. The market for these commodities in Canada was considerably affected, particularly in textiles and those goods for which the raw materials had risen previously. Seasonal decreases occurred in meats, dairy products, fruits and vegetables, although there were also seasonal advances. Many of the metals and metal products, building materials and other commodities continued to advance, so that the index number in Canada showed little recession at any time, but receded slightly from June to November. Seasonal advances in many foods, increases due to scarcity in other cases and an upward movement in some materials caused a somewhat sharp advance toward the end of the year, and these conditions indicated a continuation of the movement during the early part of 1918.

Throughout the world prices were also steeply upward during the first half of the year, but not so steeply thereafter. Crop conditions were more favorable than a year before, and government regulation of prices and control of industry and commerce had become almost complete in many countries. Control of production and export in one country frequently had a great effect on the supplies and prices in other countries, while control of transportation elsewhere in many cases became an additional important factor. For instance, the United States government controlled exports to Europe, and the British government controlled much of the transport, while, as regards products of Asia, the

(*Continued on page 37*)



Course of Wholesale Prices in Canada, the United Kingdom and the United States, by Months, 1914-17

Note.—The movement of prices in Canada is shown according to the index number of the Department of Labor; prices in the United Kingdom according to the Sauerbeck index number as continued in the "Statist," London; prices in the United States according to the index number of the Bureau of Labor Statistics. The last two are brought to the basis of the Canadian index number. The United States index number was originally calculated on this basis until 1913 and contains a similar list of commodities. The Sauerbeck index number includes only 45 commodities

Land Settlement and Immigration

How Immigration in Western Canada May Be Stimulated Now That Valuable Lands Can No Longer Be Offered at Nominal Price—Price Fixing, Expropriation or Confiscatory Taxation is Unwise

By WM. PEARSON, Winnipeg, Man.

IN 1662 Raddison and Chouart reported to Prince Rupert on the great Eldorado in western British North America, and as the outcome of much negotiation Prince Rupert formed the company of "Gentlemen Adventurers," trading into Hudson's Bay. Land had not much value at that time, as all that this concern paid to the British government was an annual rental of the heads of one moose, one elk and one deer, payable whenever the king landed on the shores of Hudson's Bay. In 1869 the newly confederated government of Canada bought out the company of adventures paying them the sum of £300,000 sterling, and allowing the company to retain one-twentieth of all the land that might be surveyed for settlement for fifty years from that date.

In 1882 and 1883 there was somewhat of a wave of settlement to the homestead lands of Western Canada, and from that time on to about 1900, railway lands and even many thousands of acres of land within twenty or thirty miles of Winnipeg could be bought at prices ranging from $2.50 to $3.50 an acre, but the people of the world and of our Canadian towns did not seem to be much impressed with the opportunities.

In 1902, however, the first big step in immigration from United States to Canada was taken when the late Col. A. D. Davidson succeeded in buying from the government part of the Qu'Appelle Long Lake Railway land grant amounting to some 800,000 acres at a price in the neighborhood of $2.50 an acre, and ran his celebrated trainload of United States bankers up the Prince Albert branch of railway to Davidson, Saskatchewan.

Davidson engaged the services and co-operation of many large American land operators and developed certain Canadian land and colonization companies to whom he entrusted large areas of land on attractive terms conditional upon them doing certain colonization work. The rush of settlement that was created by this move on Col. Davidson's part and by the very large amount of money spent for propaganda in the United States by the Dominion Government resulted in extremely heavy settlement for the next ten years. Prices of wild land moved up in the meantime from $2.50 an acre to $15 and $30 an acre, according to location, development, etc.

In 1902, the Western Canada Immigration Association was formed, composed of bankers, wholesalers, railway companies, land and colonization companies, etc., with a view to co-operating on a heavy campaign of publicity in the United States, as it was recognized that it was imperative to the future success of this country that a large proportion of the better class of farmers who were accustomed to opening up the prairie lands of the northwestern states should be brought to Canada.

In 1902 settlement in Western Canada was concentrated largely in southern and central Manitoba and small settlements along the main line of the Canadian Pacific Railway as far as Moose Jaw, also small settlements in the neighborhood of Edmonton and south of Prince Albert to Rosthern.

Senator Perley of Wolseley, Saskatchewan, said in a speech in the Dominion House that wheat could not be grown successfully north of the Qu'Appelle Valley, and Col. Davidson informed me that the Board of Trade in Winnipeg seriously considered in 1902 sending a delegation to Ottawa to prevent him from bringing settlers into the Davidson area in Saskatchewan as they considered that country was totally unfit for wheat raising and it would give Canada a black eye with Americans who were just starting to come in.

Since that time practically all the homesteads in the prairie area from Winnipeg to the Rocky Mountains have been taken up, and nearly all the prairie areas in the Peace River country have been taken up now and the only homesteads that are available are the lands located in the sandy or alkali areas, or bush lands in the extreme north and east.

It was estimated that immigration into Canada in the years 1897 to 1912, amounted to 2,240,000 people. The Wall Street Journal estimated that from 1906 to 1912, inclusive, 674,000 American settlers to Canada brought wealth amounting to $775,000,000. The rapid development over this period is illustrated by the following comparative figures:—

Wheat inspected at Winnipeg, 1902, (bushels)	58,000,000
Wheat inspected at Winnipeg, 1911, (bushels)	101,000,000
Bank clearings at Winnipeg, 1902, ...$	188,000,000
Bank clearings at Winnipeg, 1912, ...	1,537,000,000
Assessments at Winnipeg, 1902, ...	24,000,000
Assessments at Winnipeg, 1912, ...	214,000,000
Sask. yield of grain, 1900, (bushels)........	18,000,000
Sask. yield of grain, 1912 (bushels)........	228,000,000
Saskatchewan population, 1900, ...	91,000
Saskatchewan population, 1912, ...	492,000

The movement of people was exhausting itself by about 1913 for certain reasons, and since the outbreak of the war immigration from United States and certainly from Europe practically stopped and the development of Western Canada was largely arrested, except insofar as the settlers already on the land increased their holdings and took up more land. Even this buying of land by settlers did not very largely increase the net amount of grain that was raised, as settlers went in for a better class of farming and set aside large portions of their holdings, to enable them to start the summer-fallow system of setting aside one-third of their holdings each year for that purpose.

Present Situation

What is to be done? In order to start the wheels of development afresh now that the reconstruction period is upon us, our leading bankers in the east, also our governments, have been doing some serious thinking and investigating the matter of how best to start the flow of immigration into Western Canada. They have asserted publicly, and have urged in many directions privately, that it is absolutely necessary to have more primary producers, particularly in Western Canada. This together with an increased foreign trade are the two big items that present themselves for the serious consideration of all Canadian business men. The Dominion government needs more revenue and people to pay the war debt, but in contra-distinction to the early days of 1902 the business men of Winnipeg do not seem to have awakened to any extent to the vital bearing immigration has on their business. They have been so busy conserving what business they had and their attention has been so concentrated on the war that they have made no move in the direction of immigration.

It does not appear to be any use spending the large sums of money that were spent in the early part of this century advertising for homesteaders, as the open prairie homesteads which were one of the great attractions of the American farmers is no longer available, and even if the American settlers could be induced to go into the bush lands in the northwestern portions of our provinces very large expenditures for railways and other capital outlay would have to be made.

AS LLOYD GEORGE SAYS:

"You Cannot Maintain an A1 Empire With a C3 Population."

No, it cannot be done, neither can you maintain an A1 Estate with a C3 Executor and Trusteeship. It takes the A1 management of a Trust Company—such as the Toronto General Trusts Corporation—to provide the security, competence and permanence which should characterize the management of every estate, be it large or small. Write for further particulars.

THE
TORONTO GENERAL TRUSTS CORPORATION

Hon. Featherston Osler, K.C., D.C.L., *President*. A. D. Langmuir, *General Manager*. W. G. Watson, *Asst. Gen. Manager.*

HEAD OFFICE - 83 BAY STREET, TORONTO

The Old Way and the New

The Old Way was to appoint a friend Executor. The New Way is to appoint a Trust Company. Its financial responsibility, permanent organization and experienced officials make it a much preferable appointment. We suggest as your choice,

Chartered Trust and Executor Company
46 KING STREET WEST, TORONTO

Hon. W. A. CHARLTON, President
JOHN J. GIBSON, Managing Director

Economical Executor Service

Safeguard the interests of your estate by appointing the Union Trust Company as executor. By so doing you are assured of the benefit of the combined experience of our staff, and may save thousands of dollars to your estate.

As I understand it the Dominion government and our railways are not in favor of any such plan at the present time, in fact the country is loaded up to the gunwales now with commitments re railways, in any event for the next two or three years.

Conditions are now different in the United States. In [illegible] there was taking place a large movement of farmers from one part of the United States to another; for instance from Illinois to Iowa, Iowa to southern Minnesota, Minnesota to North Dakota, etc.,—the farmers from the older and wealthier states, whose land is highest in price, were moving into newer states and buying improved lands at a lower figure. Thus in the course of time considerable money was realized to those farmers who wanted to establish themselves and their sons on the cheap prairie lands of Western Canada, so that in addition to the homesteader, who was mostly of the renter type, there was a large number of farmers who came to Canada with considerable money which enabled them to buy land for themselves or their sons in addition to what they could homestead.

This continued to be the case for several years, but of late, in fact before the outbreak of war, this movement had largely outrun itself in the States and the consequence is that in starting out on a new move for immigration from the south we have to deal with a financially poorer class of settler; that is, chiefly the renter type of individual, who might have his outfit, but very little money saved. This is the man who used to take the free homestead lands and was able to start up a farm on that basis, but was not in a position to purchase land.

So apparently vital is it held to be by the Dominion Government, that in addition to expansion of foreign trade there should be greater primary production, that the government has seriously proposed and has announced its policy to purchase, in co-operation with the provincial governments, in one quarter section lots, one half-section lots, etc., as they may be required for incoming settlers of the type mentioned, paying out the owner in cash at a price to be fixed by a land settlement board, and if they cannot agree on price with the owner, to expropriate same at their valuation.

I should have mentioned that the Federal Government seems to have made up its mind that in view of the lack of attraction for the American immigrant to bush lands, and the inability to provide railway facilities, even if a percentage of these men would be attracted to them, it is necessary to settle up the open prairie lands that have been alienated from the Crown and which are tributary to existing railway facilities and other facilities such as schools, churches, hospitals, good roads, etc.

Extension of Payments

To make any impression at all on this problem it will be seen that literally hundreds of millions of dollars will have to be spent to purchase lands from time to time as they seem to be required for settlers, and this money it is proposed to have repaid by the settlers over a period of twenty-five to thirty years at a low rate of interest. In this respect they are proposing to follow the example set by older and more densely populated lands, or countries short of land like Australia and New Zealand; particularly we note in Australia in thirteen years $88,000,000 was spent for three million acres, and in addition they loaned large sums of money to purchasers to make investments. For example, in the five years from 1909 to 1914, six states of Australia loaned $68,000,000 to farmers for equipment, in addition, of course, to having bought the land for them.

If we suppose that there are some twenty million acres of good arable land in the prairie areas which could be obtained at an average price of $25 an acre, this would ultimately involve an outlay of $500,000, without saying anything about any assistance that might be given to the incoming settlers, and taking at 160 acres per settler this would bring you in about 160,000 settlers, or heads of families which might mean possibly five or six hundred thousand people. You can see from these figures the tremendous proposition that the government of Canada would have to face, in fact a staggering proposition if they undertake to carry out this scheme so as to make a really vital impression on immigration in this way.

Land Settlement

The proposed land settlement policy of the Dominion Government would be all right up to a point, if the country as a whole is prepared to lend its credit to one section of the population, and that principally people who have just newly arrived into the country as immigrants; but if and when our governments introduce the feature of confiscatory taxation, price fixing or expropriation they are taking a most dangerous course and one which strikes at the very basis of British institutions, and this is the place where myself and many other colonization men fell out with the government's proposed policy. If a high price of land were holding up settlers and land were off the market there might be some necessity for this, but owners are practically all anxious to sell.

In British Columbia they actually put into force last spring legislation along these lines. They fix land settlement areas from time to time, and in the case of one concern I know of, they fixed a price of $5.00 an acre; as the land had cost the owner, a firm of Omaha, Nebraska, $11.25 per acre at this time, naturally they refused to agree to accept $5.00 an acre at some time in the future when a purchaser might happen along; but they decided to fix a price of $10.00 an acre, less than it cost them, mind you, in order not to hold up the Land Settlement scheme and in order to close out their holdings and get out from under. What happened? They are assessed with a tax of 10 per cent. per annum on their own selling price, in fact are made their own assessors. This means that their land is absolutely confiscated in ten years and without any compensation.

Legislation such as referred to causes insecurity in the tenure of property and strikes at one of the root principles of the British Constitution built on the Magna Charta. This is pointed out very clearly in an article written by J. M. Clarke, K.C., in the Canadian Bankers' Association Magazine.

Mr. Clarke refers to the provision in the American Constitution providing against the "taking of life, liberty or property except by due process of law," and points out that although the British North America Act provided for security of property by giving the Dominion Government power to veto provincial government's legislation, that in effect this seems to have become more or less of a dead letter, and we find now that in the provinces of Western Canada there is no security for property such as is provided for in the United States.

The Future

Now what about the viewpoint of those who have been in the business of colonization for many years, or who might be supposed to know something about it?

The writer has been thirty-six years in Western Canada fifteen years of which he was farming, the balance in colonization work. We have brought in many thousands of settlers, placed them on the land in Saskatchewan, in the early days from southern Manitoba, Ontario, Prince Edward Island, New Brunswick, etc., then in latter years, before the war, from United States.

We have had several hundred commission agents in the States from Nebraska clear through to New York and as far south as St. Louis, these men being controlled through salaried superintendents of agencies and their assistants. We operated during several years private car excursions of from two to four carloads of selected land seekers per fortnight and laid out for commissions and expenses of this development work in actual cash from $250,000 to $350,000 per year, other concerns spending like amounts. In our work in Saskatchewan and in United States in the last sixteen years we have found that there were three great inducements for a man to move from United States; first, the opportunity provided to him to acquire land for himself and boys by purchase or homestead; second, the opportunity of making a good living for himself and family,

and third, and extremely important one in his eyes, the building up of a fortune by increased prices for his land.

Now if a government undertakes to fix the price of wild land under their proposed immigration scheme, they must realize that to a considerable extent they are in a large area of the country also fixing the price of improved land, as it is admitted that the price of improved land is the price of raw land plus improvements, thus at a blow you would take away from the intelligent immigrant one of the greatest inducements that can be used to get him to move to Canada.

We have found in our work that several actions of our Provincial governments have militated very strongly against our work of moving settlers from United States. First of all we had the very rapid increase in taxation in the west, the imposition of the sur-tax and wild land tax; we had during the campaign for reciprocity a brochure issued by the Saskatchewan government which was intended as an argument for reciprocity with the United States and as such put out as campaign literature against the then Dominion government, this brochure, being sent out by the Department of Agriculture at Regina, stated in a detailed way the unprofitable nature of growing wheat in the Province of Saskatchewan.

Land Owners Must be Fairly Treated

If this price fixing plan or expropriation of lands is adopted we shall have the same result. Now what happens? There is in the United States very heavy propaganda being carried on to stop movements of people from United States to Canada, this propaganda is fathered by the bankers, railway companies and by the various governments of United States and every point that they can get on which to build up their propaganda is naturally used by them to the best advantage. For instance, when the brochure of the Saskatchewan government in regard to wheat growing was put out the Department of Agriculture at Washington published this broadcast, issuing hundreds of thousands of copies which were sent all over the country, and advertisements were sent all over the country saying,—"Why go to Canada? See what the Saskatchewan government says over their own signature about the unprofitable nature of wheat growing up there."

When you come to heavy taxation or price fixing on land we have found this condition of affairs. Our intending settler goes to consult his banker and to obtain some money to help finance his operations, and the banker, naturally not wanting to lose the deposit account, etc., refers to the heavy taxation in Canada, says a man is not secure of his property rights up there any more than in Mexico. He may not always be exact in telling the farmer the whole truth and pointing out that wild land tax does not effect him if he goes in for actual farming, but nevertheless he prevents this man from moving. Our agents have reported this kind of thing to us for years and the propagandists on the other side of the line were partly instrumental in arresting movement from United States to Canada. Many Americans are already comparing us to Mexico as far as insecurity of property is concerned.

The practical thing to be done,—If the government would say to every land owner that resides in Canada and United States,—"We will adopt this policy, if you will put a bona-fide settler on your land selling it to him at your current price and after three or four years you have demonstrated his ability as a successful settler and he has paid 25 per cent. of the price of the land, we will then cash out your Land Contract and write another contract with this settler, giving him twenty years in which to pay for the balance of the purchase price?" then the government would be doing very effective work in my judgment, a thing that would be an inducement to the owner of the land to get a settler on his property by offering to make it a cash sale as soon as he has shown the value of the settler; not only so, but the owner of the land or colonization concern could take the money so realized and could reinvest it to a large extent in bringing up more people to settle on the rest of their land and the government itself would have the very best possible security against loss and the interest of the original owner of the land would cause him to be careful in picking settlers that he brought up, *but no price fixing, expropriation or confiscatory taxation.*

Government Assistance

Another thing that the government might do would be to give a free pass to every agent bringing up say three prospective customers or land seekers to western Canada. This used to be the custom in the old days and was very effective indeed in getting the land agents, who used to be a big factor in this matter, to devote himself to the work. We have found in our experience that agents will give their time, but in many cases have not much money or are not willing to spend much in taking a chance on prospective purchasers. As you have to compete in the United States with Florida, Texas, Colorado, Montana and the Pacific coast you will have to offer inducements in the way of commissions, cheap railway fare, passes to agents, etc., if you are to get things pulling your way. Let the settlers bring in larger outfits duty free.

The government should bring large parties of newspaper men, bankers and others to look the country over now that the war is over and have them report back to people in the United States how Canada has stood up to the proposition. If they could bring a number of those who came up here ten or fifteen years ago and let them see the development that has taken place since their early articles were written it would be most excellent business.

A campaign should be put on with American investors and financial men calling their attention to the fact that Canada is their third largest customer and will continue to be a very large customer for American goods providing the American people buy Canadian securities, investing American money in industrials or the development of colonization. As you all know at the present time the balance of trade is very largely against Canada in dealing with United States, so much so that exchange rates have been around two per cent. and over against Canada and its dealings with that country. America cannot develop a large foreign trade under circumstances of that kind.

If the leaders of finance and of the government could be shown that the movement of people from their country is not all loss and might be in the end a matter of great gain to them then the word would be passed around and get to the small bankers throughout the country districts, (who after all is one of the largest things we have to fight) and a great obstacle would be overcome.

Federal Action

The Federal government might make a large grant to an immigration association for the purpose of enabling it to put on a heavy advertising camapign in regard to the merits of our western provinces with a view to creating a revival of interest in the United States in which those who are canvassing the same lands for settlers might be able to work to good advantage. Many other ideas might be suggested but time is too short to go into further particulars, suffice to say that in a work there are two plans before the governments *as we see them,* one is either to buy blocks of land at once to get rid of the private ownership altogether or in order to avoid the enormous outlay of money that would be involved co-operate with those who already have money in lands or in the settlement of same to the mutual advantage of the government, the business interests of the country and of the land owners. This latter plan we think is the only practical one.

If goverments wouldn't interfere in an amateurish way with business by drawing up theories re better plans, but would consult and co-operate with those who might be supposed to know something it would be a God-send. Many lines of business are paralyzed by not knowing what the governments will do next. Legislators when they get together don't seem happy unless they pass dozens of new laws every session. We have too much government for our good. I might say that as far as land settlement and immigration is concerned the governments should co-operate with the owners to settle lands to best advantage, encourage or bonus if necessary, instead of fining them by heavy taxes.

INSURANCE COMPANIES IN ONTARIO

Results of Life and Fire Companies Reporting to Provincial Government for 1918

A REPORT for the year ended December 31st, 1918, has just been issued by the Ontario superintendent of insurance. The following are the more important figures from the report, showing the principal results of the year's operations:—

Life Insurance Companies.

	Total assets.	Total liability except paid-up capital stk.	Net amount at risk.	Gross premiums.
Equity Life	$ 588,767	$553,287	$ 2,949,396	$ 89,179
Policyholders' Mutual Life	172,493	142,648	2,474,776	74,901
Totals	$ 761,261	$695,936	$ 5,424,172	$164,081

	Total income.	Total expense of management.	Claims.	Total expenditure.
Equity Life	$ 120,261	$ 26,546	$ 23,495	$ 61,838
Policyholders' Mutual Life	81,642	30,754	19,091	61,967
Totals	$ 201,904	$ 57,300	$ 42,587	$123,806

Joint Stock Fire Insurance Companies.

	Total assets.	Total liabilities except paid-up capital stk.	Net amount at risk.	Gross premiums.

ONTARIO TRUSTEE BILL AMENDED

Among the last bills to be passed by the Ontario legislature before the Easter recess was that providing for the appointment of a public trustee. The clause providing that the trustee could act as an executor or administrator was, however, dropped.

CANADA TO FRANCE STEAMSHIP SERVICE

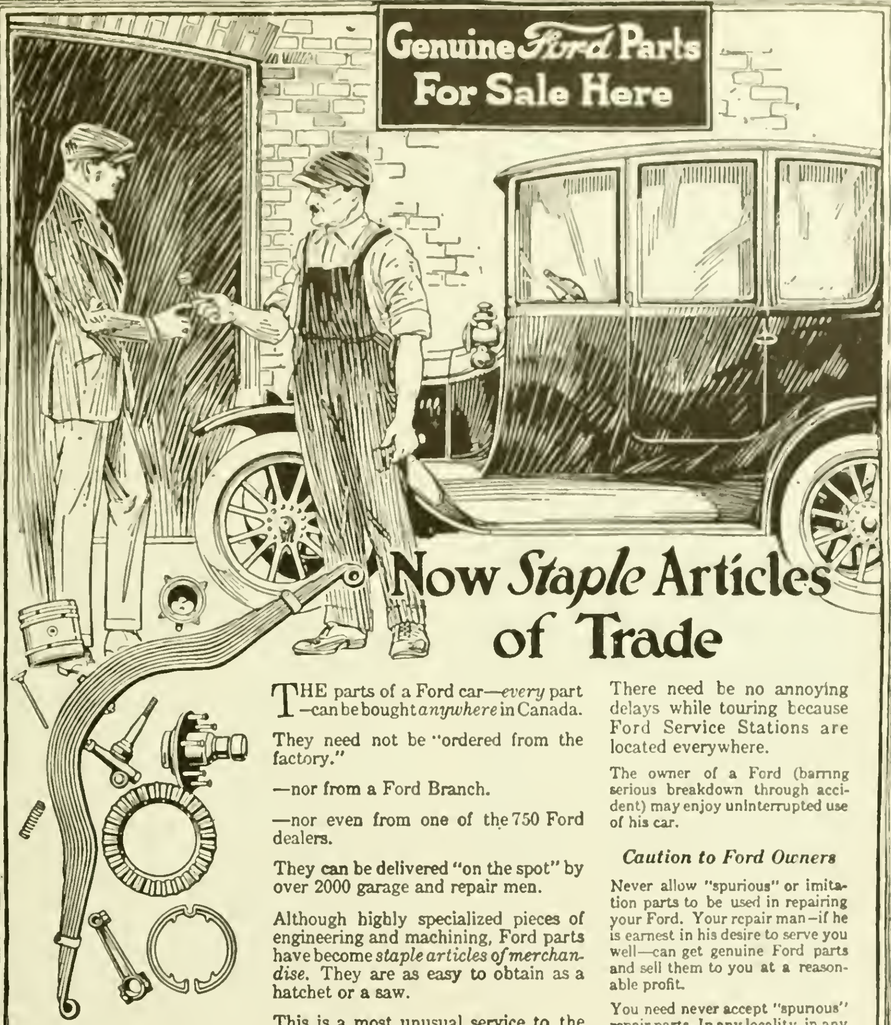
By the end of June it is expected that steamships will be going direct from Canada to France, in accordance with an arrangement reached between the Canada Steamships Lines, Ltd., and La Compagnie Generale Transatlantique. A subsidiary company to be organized by the combined companies would put on six vessels, to provide for a weekly service between Montreal and Havre, these ships being of approximately from 8,000 to 10,000 tons dead weight each. For the beginning of the trade only freight vessels will be used, but it is regarded as probable that it may develop into passenger business also.

"The new departure," it was stated by an official of the Canada Steamships, "will undoubtedly lead to a tremendous development of trade between Canada and France, because Canada will be in the position of being able to import directly many French products. At the same time, France will require vast amounts of Canada's raw and semi-finished products, especially during the reconstruction period after the war, her demands for some time to come being practically unlimited. In this way the interchange will not only be mutually advantageous, but will lead to a natural interchange of business between Canada and France, each of which needs the other's products."

Further, it was stated that it would be to the advantage of the French line to have use of the agencies and connections of the Canada steamship line in looking for Canadian trade, while, in the same way, it would be of advantage to the Canada steamship line to secure the benefit of the established connections of the French line, which has been in operation in Europe for many years.

WINNIPEG FIRM GOES INTO BOND BUSINESS

The firm of Carruthers and Torrance, Winnipeg, has changed its name to Carruthers, Martin and Torrance, Ltd., with offices in the Lindsay building. In addition to its previous business in real estate and insurance, a bond department dealing in all bonds, but specializing in good industrials, will be established. Mr. Carruthers and Mr. Torrance, who have recently returned from overseas, will have charge of the insurance and real estate business, while the bond department will be looked after by Mr. Wm. Martin, who was formerly with the legal firm of Coyne, MacVicar and Martin, but who has also been serving in the army.



Now *Staple* Articles of Trade

THE parts of a Ford car—*every* part—can be bought *anywhere* in Canada.

They need not be "ordered from the factory."

—nor from a Ford Branch.

—nor even from one of the 750 Ford dealers.

They can be delivered "on the spot" by over 2000 garage and repair men.

Although highly specialized pieces of engineering and machining, Ford parts have become *staple articles of merchandise*. They are as easy to obtain as a hatchet or a saw.

This is a most unusual service to the owner of a car.

Its value is incalculable.

The Ford car need never be "tied up" while repair parts are being "brought on from the factory."

There need be no annoying delays while touring because Ford Service Stations are located everywhere.

The owner of a Ford (barring serious breakdown through accident) may enjoy uninterrupted use of his car.

Caution to Ford Owners

Never allow "spurious" or imitation parts to be used in repairing your Ford. Your repair man—if he is earnest in his desire to serve you well—can get genuine Ford parts and sell them to you at a reasonable profit.

You need never accept "spurious" repair parts. In any locality, in any emergency, there is sure to be close at hand, a Ford Service Station.

Demand genuine Ford parts. Be firm.

Keep your Ford running at full Ford efficiency

SASKATCHEWAN CROP OUTLOOK

Seeding has Commenced Under Favorable Conditions—Collections Good—Continental Oil Co. to Establish Plant at Regina

(Staff Correspondence.)

Regina, April 22, 1919.

IDEAL weather prevails in this district and seeding operations are in full swing, under favorable conditions. The season is later than last year, but the seed will go in with a rush and there is ample moisture in the ground to give it a good start. Merchants and business men generally are in excellent spirits.

In discussing the situation with Mr. L. T. McDonald, secretary of the Regina Board of Trade, he said that the prospects in the West this spring were excellent. Regina, he pointed out, is an ideal distributing centre, is the capital and commercial centre of the province of Saskatchewan, the largest wheat-growing province in the Dominion. Already this spring, said Mr. McDonald, several large eastern wholesale and manufacturing firms have completed arrangements for the purchase of property in Regina, and will erect large warehouses to take care of their western business. Collections, he said, were very good, and the volume of business away ahead of last year.

While the writer was in Regina the manager of the Continental Oil Co., was in the city, and made the announcement definitely that this large oil company had completed arrangements to construct an oil refinery, the initial cost to be in the neighborhood of $500,000. The Imperial Oil Company's undertaking at Regina, which has been in operation there now for two or three years, and around which a thriving community has been built up, has been a pronounced success. The business also of the T. Eaton Co., and the Robt. Simpson Co. at Regina, and serving a large area from there, have been most successful, and are working at full capacity.

The life insurance managers at Regina report large increases in business and managers of loan departments report payments being well met and also quite an active demand for loans. One trust company manager said to *The Monetary Times*: "There is considerable activity in the way of settling up of estates and the selling of stock and implements by auction held on behalf of various estates, the owners of which having died during the epidemic and owing to the lateness of the season, the farms were kept intact and the disposal of the chattels are now going on. The price obtained for the implements is exceptionally good, although the demand for horses is not what one would like. There is very little demand for horses in the western part of the province, but implements can readily be sold. Soldiers, who disposed of their chattels and rented their farms unequipped before going to war, are now returning to their lands, and getting equipment at these sales. Owing to the return of the soldiers there is quite an activity in farm lands. The soldier is buying and arranging for payment through the Soldiers' Settlement Board."

Official Report on Agriculture

The first bulletin of the season relative to Saskatchewan's grain crop for the present year has just been issued. Prospects and estimates of the areas to be sown, condition of crops from time to time, meteorological data, etc., will be collected and compiled from all parts of the province every two weeks throughout the growing and later, the harvesting season. The information thus compiled will be gathered by telegrams from representatives in all districts fully acquainted with the conditions existing in that district.

The first bulletin to be issued shows that the snow has practically disappeared from the land with the exception of deep drifts and around the bluffs. The frost is out of the ground to a depth of from twelve to eighteen inches, making it possible on the higher and drier lands to already start work with the harrow. Snow has fallen, however, in several districts within the last week, but this has been beneficial on account of the added moisture, although delaying seeding perhaps for a week or ten days.

Sufficient seed grain appears to be on hand for all requirements. In those districts where a shortage appeared, the municipal authorities and grain growers' associations are endeavouring to meet the shortage. Many are importing seed oats owing to the scarcity of this grain last year.

Feed for stock during the seeding season appears to be sufficient and from present appearances there will be green grass within a short time to remedy any shortage that occurs. Some farmers are shipping hay from those districts where more than a sufficiency exists.

Regarding the area to be sown to wheat this year, some indefinite statements have been made. It would seem that owing to the unsettled conditions regarding the fixing of the price of wheat for the coming crop, many farmers are debating the advisability of increasing their areas. Possibly more land will be plowed this spring than last. More horse-power is available for one thing, the moist soil will help and the soldiers returning to the farming districts will assist in meeting the shortage of labor. At present a considerable shortage of help exists. Good wages are being offered, from $65 to $75 per month for experienced men being the rule.

ALBERTA AND GREAT WATERWAYS RAILWAY

Before the Public Accounts Committee of the Alberta Legislature on April 14th, Mr. Norman Harvey, Deputy Minister of Railways and Telephones, stated that the total cost to date of the Alberta and Great Waterways Railway had been $6,748,613. The bonds of this railway were guaranteed for a total distance of 350 miles, Edmonton to Fort McMurray, including a branch line to Egg Lake, forty-one miles long, with twenty miles of siding. The total interest so far has been $1,326,151. This represents the difference between the interest paid out on bonds of the railway under construction and the interest paid in on the trust funds from the proceeds of the bond sale on deposit in the bank.

According to Mr. Harvey, the system was that the interest on the guaranteed bonds was charged up as a part of the cost of construction on the lines under construction. Thus, the total interest on the bond issue was charged up against construction of the line until that portion between Edmonton and Lac La Biche was considered completed about two years ago and turned over to the operating department of the railway. Thereafter, the interest on the proportionate amount of bonds on the uncompleted portion was charged up as part of construction cost against that unfinished part, while the railway company was responsible for payment of interest on the bonds covering the completed portion.

The total railway mileage between Edmonton and Fort McMurray is 289 miles, and the steel is now laid to Last Cache, down to the river and within ten miles of the terminus, the grading being completed to the terminus. Mr. Harvey said that eleven miles of the Egg Lake branch had been completed with thirty miles of grading.

The deputy minister testified that the government had paid no interest direct to bondholders; that the cheques were paid out to the Alberta and Great Waterways Railway for the total amount of each progress estimate, including including interest on the bonds as part of the cost of line under construction; that the government never had endorsed any cheques and turned them over to bondholders; but that the interest was never paid to the company until the government was satisfied that the bondholders' interest had not been defaulted. He had not heard of any reports that such interest had been defaulted.

H. A. Warner, government engineer for the Lacombe and Blindman Valley Electric Railway, also was briefly examined and put in a statement of receipts and expenditures for the year 1918 of that railway, showing total revenue of $18,543, with a deficit of $136 for the completed portion of the line.

Subscription lists will close on or before April 30th, 1919

New Issue *MONTREAL, April 23rd, 1919*

$2,000,000

Fraser Companies Limited

6% Ten-Year First Mortgage Serial Gold Bonds

Dated April 1st, 1919. Maturing, $200,000 annually, April 1st, 1920-1929.

Interest payable 1st April and October. Principal and semi-annual interest payable in gold coin at Montreal, Toronto, New York or London, Eng. Coupon Bonds with privilege of registration as to principal. Montreal Trust Company, Montreal, Trustee.

DENOMINATIONS: $1,000 and $500

CAPITALIZATION

	Authorized	Outstanding
Common Shares	$10,000,000	$10,000,000
6 Per Cent. First Mortgage Serial Bonds	2,500,000	2,000,000

SECURITY FOR BONDS

Bonds will be secured by a specific First Mortgage and charge upon freehold and leasehold lands, water powers, timber leases, all plant and machinery now owned or hereafter acquired by the Company, and by a floating charge on all other assets

Complete prospectus, copies of which will be forwarded on request, contains a letter from Mr. Archibald Fraser, President of the Company, from which we summarize as follows:

1. **Fraser Companies, Limited**, is one of the largest manufacturers in Canada of spruce lumber and cedar shingles. It also operates at Edmundston, N.B., a Bleached Sulphite Pulp Mill with an annual capacity of 35,000 tons. The business has been in operation since 1877.

2. **Timber Areas**, freehold and leasehold, in Eastern Quebec and New Brunswick aggregate 1,661 square miles and contain 1,760,000,000 ft. b.m. spruce and cedar, and 4,650,000 cords pulpwood. In addition, 900 square miles of privately owned lands are operated under favourable lease.

3. **Annual Output** is as follows:—

Bleached Sulphite Pulp	35,000 tons per annum
Lumber Production	100,000,000 ft. b.m. per annum
Shingle Production	135,000,000 pieces per annum

4. **Property Values** securing Bonds $10,000,000—*five times $2,000,000 Bonds outstanding.*

5. **Net Current Assets**, after deducting all Current Liabilities, as at December 31st, 1918 (including this issue) totalled $1,594,836.77—over 79 per cent. of Bonds issued.

6. **Net Earnings**, as certified by Geo. A. Touche & Company, for five years, 1914-1918, inclusive, after Depreciation and Bank Interest, were:—

1918	1917	1916	1915	1914
$740,374.37	$706,355.11	$432,003.14	$393,321.04	$410,267.71

Bond Interest $120,000 (reduced annually by serial maturities)

Net Earnings given above make no allowance for profit on the Company's investment of approximately $2,500,000 in its Edmundston pulp mill recently put in operation. Earnings from this source alone during the current year are expected to be several times Bond Interest requirements.

Amount	Maturity	Price and Interest	Amount	Maturity	Price and Interest
$200,000	1920	100.00	$200,000	1925	98.03
200,000	1921	100.00	200,000	1926	97.77
200,000	1922	98.92	200,000	1927	97.53
200,000	1923	98.61	200,000	1928	97.30
200,000	1924	98.31	200,000	1929	97.08

Over $1,750,000 of this issue having been sold, we offer for sale the balance at the above prices—

To Yield 6.40%.

(Except 1920-1921 Maturities to yield 6 per cent.)

Payable as follows: 20% of the par value on application.
40% of the par value on May 1, 1919.
Balance, June 1, 1919.

The right is reserved to allot a portion only of the amount applied for. If only a portion of the amount applied for be allotted, the balance of the deposit will be applied towards payment of subsequent instalments. Payments may be anticipated in whole or in part at any time. Interest will be allowed on payments at the rate of 6 per cent. per annum. Accrued interest will be adjusted upon final payment.

Application may be made on the accompanying form.

BRITISH COLUMBIA ELECTRIC RAILWAY

ENCOURAGING YEAR'S WORKING — COMPANY'S STRONG POSITION

The twenty-second ordinary general meeting of the British Columbia Electric Railway Company, Limited, was held on Friday, April 4th, at the Liverpool Street Hotel, London, England. Mr. G. P. Norton presided.

The notice convening the meeting and the auditors' report having been read,

The Chairman said: Gentlemen, may we take the report and accounts as read, in order to save time? (Agreed.) I have to apologize for the absence of our chairman, and also of Mr. Davidson, who is, unfortunately, called away on account of a death in his family, but the Chairman has prepared a speech, and Mr. Blundell Brown will kindly read it.

Mr. T. Blundell Brown then read the Chairman's statement, which was as follows:—

Ladies and Gentlemen,—We much regret the long delay which has taken place in calling together this meeting, but I think you will agree that we merit your sympathy, and not your censure, when I tell you that every single male member of our staff in London has until quite recently been away on national service, and that there has also been much illness among our officers and employees, both in London and in British Columbia. In fact, I can assure you that it has been a matter of physical impossibility to prepare the accounts sooner. The report for the year under consideration is the most encouraging the directors have been able to place before you since the outbreak of the war. The total income brought into revenue account for the year, namely, to June 30th, 1918, amounted to £383,093, as compared with £288,338 during the preceding twelve months, an increase of £94,755.

THE RESERVES

There are two items in the balance sheet of which, I think, you will require some explanation, namely, the decrease of £136,000 in reserve fund and the increase of £303,000 in the reserve for depreciation sinking fund and renewals. This sum of £136,000 should have been set aside in the years 1916 and 1917 under the carefully considered scale to provide for depreciation and renewals adopted by your directors; but it was not set aside in those years owing to the low state of the company's revenue. It has now, however, been decided to correct this by adding this amount to the reserve for depreciation sinking fund and renewals by transfer from the reserve fund. The increase of £303,000 in depreciation sinking fund and renewals is accounted for by the above £136,000 transferred from reserve fund and by the addition of £167,000 from the revenue of the year under review.

You will note that the company's reserves are large, and place it in a strong position. It must, however, be remembered that for the most part these funds have been accumulated as a provision for depreciation sinking fund and renewals incidental to plant and property such as ours. A very large portion of this company's plant was erected during the four or five years immediately preceding the war, with the result that few actual replacements have been absolutely unavoidable during the past four years, and the provision for depreciation set aside each year has, therefore, accumulated. Replacements will be necessary now and as time goes on, and the reserves accumulated cannot be considered as more than sufficient to provide for the regular wastage.

WAGES AND FARES

The increase in our gross earnings was attributable to the more prosperous conditions which existed in the cities served by the company, resulting largely from the extensive programme of shipbuilding which was in progress during the year, and which brought with it a large body of labour attracted by the high wages paid. Unfortunately, however, these abnormal rates of pay have had the effect of raising the general standard to an unreasonable extent, with the result that our employees, not unnaturally, made large demands for increases to an extent which the earnings of the company were insufficient to provide. These demands were only conceded during a serious strike which took place in the first fortnight of July upon the intervention of the public authorities, and as part of a general settlement of the impossible situation which had arisen. The company was utterly unable to pay the wages asked for by the men unless revenue could be increased. At meetings of representative citizens and labour men, convened under the auspices of the Mayor of Vancouver in his office, it was decided that the employees' demands should be granted, and we stated that, although we considered the demands excessive, if the public were willing to pay higher fares we would raise no further objection. We consequently applied to the Councils of the cities of Vancouver, Victoria and New Westminster and the surrounding municipalities, and, after much discussion, were granted a 6-cent fare in the City of Vancouver and certain additions to our fares in other cities and districts for a period of nine months—that is, until April, 1919.

It was entirely on the good faith of the agreement made by the Council of the City of Vancouver with the company granting this 6-cent fare that we agreed to pay the wages demanded, thus ending the strike and securing to the citizens the resumption of the services. After the company had reinstated its service and was paying the wages demanded, the Mayor of Vancouver, much to our astonishment, refused to sign the by-law giving effect to his Council's agreement. A very regrettable controversy took place as a result of this action, which terminated in the courts of law, where the company's right to charge the 6-cent fare authorized by the Council was upheld.

AN IMPORTANT DEVELOPMENT

It is unfortunate for the welfare and prosperity of the province that it should be possible for such an occurrence as this to be associated with the name of a city of the standing and importance of Vancouver. Such an episode as this can only result in destroying all confidence on the part of investors, and, by making it exceedingly difficult to raise capital in this country for British Columbian enterprises in the future, retard the development of the whole province.

A development of vital importance to our company is being effected by the Provincial Government by the establishment of a Public Service Commission by Act of the Legislature. Until the final terms of this Act are available it is useless to comment upon it in detail, but it is certain that the Commissioners appointed will be empowered to revise and fix the rates and charges made for their various services by this and the other public utility companies operating in the province, and that they will be given very wide powers. These Commissioners will in all probability also exercise some control over the expenditure of the municipalities, and perhaps other bodies throughout the province, and the effect of their actions in these matters on taxation and on the general credit of the province cannot well be exaggerated. All who have interests in the province must sincerely hope that the Provincial Government will fully realize the importance of the Commissioners' duties, and will appoint strong, independent men of good standing in the commercial community, free from the influences of local politics, and with sufficient knowledge of these subjects to carry out their work intelligently. Should such men be appointed and the Act be framed to afford capital invested just protection, your company has nothing to fear. While commissions of this nature have not proved entirely satisfactory either from the point of view of the public or the companies, they are a recognized institution on the American Continent, and, as the right of capital legitimately invested to a reasonable return is acknowledged —a return sufficient to attract the investment of the additional capital required by the utility in question—they have in practice proved useful. We think it must prove an advantage to deal with one body of serious, reputable men rather than with several separate councils of cities and municipalities, unable, either from experience or from opportunity to investigate, to form any reliable judgment on such complicated and technical questions as the various means by which your company's revenue is created. It has been difficult for street railway companies to convince the general public that the old fares, fixed many years ago, when the service given was much less costly than it is to-day, are altogether inadequate. When this company commenced business in British Columbia some twenty years ago the cost of our material was at least 50 per cent. less than it is to-day, the wages paid were approximately 20 cents an hour, as compared with 51 cents an hour to-day, and the frequency of the service and the length of haul have all proportionately increased. The charges enforced by other public carriers have been increased, but the street railway company is probably more unfortunate in this respect than any other form of enterprise.

CONDITION OF THE PROPERTY

An exhaustive inspection has recently been made of our company's property in connection with the readjustment of our fire insurance schedules, and this confirms the statements from our own engineers and managers as to the high standard of our construction and equipment and the excellent condition in which it is continually maintained. Should a valuation of our company's property by competent valuers be decided upon by the Public Service Commission, either for the purpose of arriving at a basis for the fixing of fares and charges or for the transfer of our property to the local authorities, we are certain that such valuation will amount to a sum equal to that which would be required to make a return to the stockholders of the full capital invested by them in the undertaking. A strong point also in this company's favor is that the issue of practically half its capital is in the shape of perpetual debenture stock on a 4¼ per cent. basis. This low rate of interest should assist in enabling the company to secure from the Commission conditions which will provide for a reasonable return to its preferred and deferred stockholders before long. I have already referred to the shipbuilding industry, which is responsible for much of the present improvement in conditions in British Columbia, but which is largely a product of the war, and may be considerably diminished now that the war is over and present contracts are approaching completion. British Columbia has, however, an almost unlimited supply of many of the raw materials of which all Europe is in need, and if the labor problem can be solved justly and satisfactorily and capital and enterprise be encouraged by just treatment, there is every reason why, with patience and sympathy between all classes, the period of readjustment should be successfully passed and the prosperity created by the shipbuilding industry be permanently retained and immensely supplemented by the prosperity of other industrial activities. In conclusion, I will venture to remind British Columbians that if they wish to see the natural resources of their country developed, if they wish to see new industries established and general commercial activity, they must have capital, and they must compete, to secure capital, with other parts of the world, offering guarantees of safety and liberal inducements to investors. Prosperity can only come to British Columbia by the free flow of capital into the province. The prosperity of the years before 1913 arose from the introduction of capital from Great Britain and other countries, and to-day capital for the creation of new enterprises is more necessary than ever before.

The Chairman: Ladies and gentlemen, I have now formally to move: "That the balance sheet as at June 30th, 1918, and the revenue account for the year ended on that date, together with the reports of the directors and auditors thereon, be, and are hereby, received and adopted."

Mr. E. L. Evan-Thomas seconded the resolution, and it was carried unanimously.

The Chairman next moved: "That the payment on November 30th, 1918, of the dividend at the rate of 5 per cent. per annum on the cumulative perpetual preference stock be, and is hereby, approved."

Mr. T. Blundell Brown seconded the resolution, which was unanimously agreed to.

The retiring directors (Messrs. E. L. Evan-Thomas and T. Blundell Brown) were re-elected.

Mr. Harold G. Brown, in proposing a vote of thanks to the general manager and staff in British Columbia, said that Mr. Kidd and all the other members of the staff in British Columbia well deserved the thanks of the stockholders.

Mr. Evan-Thomas seconded the motion, remarking that it was absolutely true that there probably never was a general manager who had had to bear so much responsibility as Mr. Kidd had during the last two years, and who had been most ably seconded by his assistants and the staff generally.

The chairman said he would like to endorse what had been said by the two previous speakers. Those who had been watching the correspondence from the other side had wondered how the staff could have kept going under the exceedingly difficult circumstances which had prevailed and do so well as they had done. Every possible credit was due to the general manager, who, under most difficult circumstances, had always acted with the greatest possible wisdom, and who had pulled the company through great difficulties during the past year.

The vote was unanimously accorded.

The London auditors (Messrs. Norton, Slade and Company) and the Canadian auditors (Messrs. Helliwell, Maclachlan and Company) were re-elected and the proceedings terminated.

MORTGAGE AND TRUST COMPANIES' ASSOCIATION

British Columbia Legislation Discussed—Election of Officers—Representation at Dominion Association Meetings

THE annual meeting of the Mortgage and Trust Companies' Association of British Columbia was held in Vancouver on April 16th. About twenty-five delegates were present, representing institutions which are members of the association. The president, Mr. G. L. Smellie, was in the chair. The principal discussion was on the proposed new Municipal and Registry Acts, the former of which has already received its first reading in the provincial legislature. The various sections of the act will be taken up by special committees of the association, and a general meeting will be held later, at which the various recommendations will be considered, and it will be decided which changes, if any, should be asked for. The association is also interested in a new Registry Act. The effects of legislation upon investments of foreign money in Canada was also discussed at the meeting.

Mr. John Appleton, secretary of the Dominion Mortgage and Investment Association, was present and addressed the meeting. He intimated that when he left Toronto he was asked to convey the wishes of the Dominion Association that at their next annual meeting they would have one or more representatives of the British Columbia body. He said that eastern Canada was interested in British Columbia's institutions, and that the presence of British Columbia's representatives would have a salutary effect. In speaking of what had been done by the Dominion association, Mr. Appleton pointed out that it had now established a rule that no further charges would be created to rank ahead of first mortgages as exemplified by the recent seed grain legislation in the provinces of Alberta and Saskatchewan, and also by the regulations of the Department of the Interior with respect to seed grain distribution to holders of unpatented lands.

Other matters dealt with by Mr. Appleton included the suggested change to the Interest Act, which would provide for statutory recognition of a standard form of calculating interest on blended payments of interest and principal so as to remove all ambiguity as to the exact rate of interest paid by the borrower under long-term mortgages. He said that the general desire had sprung up for long-term mortgages, and a necessary corollary was a standard form of calculating interest, one which the courts would recognize. He also referred to the various proposed changes in the Ontario Loan and Trust Corporations Act, made at the recent session of the legislature of Ontario.

The officers elected to serve for the ensuing year resulted as follows: President, Mr. G. L. Smellie; vice-president, Mr. J. R. Waghorn; secretary-treasurer, Mr. George L. Schetky; executive committee, Messrs. A. C. Stirrett, R. Kerr Houlgate, A. E. Plummer, H. M. Forbes, G. H. Dorrell and H. R. Glass.

GRAIN INSURANCE AND GUARANTEE CO.

On April 16th the Banking and Commerce Committee of the House of Commons incorporated the Grain Insurance & Guarantee Company, of Winnipeg. Mr. F. H. Chrysler, K.C., Ottawa, explained that the purpose of the bill is to save dealers from loss if grain is destroyed after purchase from the farmers. The capital stock of the company will be half a million dollars, and the head office at Winnipeg. The provisional directors of the company are western grain dealers, including R. T. Evans, Frank O. Fowler, W. A. Anderson, H. Kaimer, and D. N. Potter, of Winnipeg.

The new company has been organized by the Northwest Grain Dealers' Association. The association had taken out a charter and formed a mutual insurance company among the members of the association. The Northwest Grain Dealers' Association has a large membership among the members of the Winnipeg Grain exchange and elevator owners and grain dealers throughout the three prairie provinces.

SENDING CHEQUE FOR COLLECTION DIRECT

Supreme Court Releases Drawer in Important Case Recently Decided

By M. L. Hayward, B.C.L.

IF A gives B a cheque drawn on C, B sends the cheque direct to C, and C fails to pay, under what circumstances will A be released from liability to B?

The above query was answered by the Supreme Court of Canada in the case of Rogers vs. Calgary Brewing Company, decided by the Supreme Court of Canada, in which Rogers gave the Brewing Company a cheque on the Estevan Security Company, and at the time Rogers had funds on deposit sufficient to meet the cheque. The brewing company deposited the cheque with the Bank of Montreal at Calgary on November 14, and the bank sent it direct to the Estevan Security Company. The security company did not remit, and the bank made no effort to enforce collection or to get back the cheque. Finally on December 10, the security company sent the Bank of Montreal a draft for the amount of the cheque drawn on the Union Bank, which the latter bank refused to honor.

Four days later the Estevan Security Company suspended payment; the brewing company sued Rogers on the cheque and the latter set up the defense that the Bank of Montreal as the agent of the brewing company was responsible for the non-payment, and that he (Rogers) was released from liability on the cheque.

The Supreme Court so held and decided in favor of Rogers. The following paragraphs from the judgment of the Chief Justice will show the view taken by the court:—

"The Bank of Montreal, acting as agent for the brewing company to collect the amount of Roger's cheque or draft on the Estevan Security Company, sent that cheque direct to the drawee by post, and, instead of insisting upon prompt payment out of the funds which Rogers then had available with that company for the payment of his cheque, chose to give the company almost one month's delay, and at the end accepted a worthless draft of the company which immediately after went into insolvency. On these facts, I do not entertain any doubt that Rogers was discharged of his liability to the brewing company for the amount of the cheque or draft, and that the appeal ought to be allowed. I am inclined also to doubt that there was a good presentment, and in any event notice of non-payment was not given in a reasonable time.

"Suppose the Estevan Company had had sufficient funds with the Union Bank on which the draft was made, but the Bank of Montreal, in place of taking cash, had again accepted the draft of the Union Bank on some other bank. The process might have gone on indefinitely. Could it be suggested that the liability of Rogers would always have continued, and that he could have been held responsible for the failure of the Union Bank or any subsequent bank whose draft the Bank of Montreal might have taken? It would just as true as in the present case that the brewing company had never received cash.

"It is no use for the manager of the Bank of Montreal to say that it did not appoint the Estevan Security Company their agent, because that bank does not appoint private bankers its agents, if that is what it in fact did. Suppose, as counsel for Rogers suggested, it had sent the cheque to the Express Company for collection, and it had taken the worthless draft instead of cash, what answer could the Bank of Montreal have had in face of this action of its agent? Why should it be allowed to repudiate the agency, because it sent it direct to the company on whom it was drawn? Further, the Bank of Montreal did not repudiate the discharge by the draft, did not send back the draft, but accepted and presented it in due course."

The Montreal Mining Exchange, which has been closed for some time, has now reopened.

NO METROPOLITAN SALE THIS YEAR

The bill to enable the city of Toronto to purchase part of the Metropolitan Railway from the Toronto and York Radial Co. came before the Ontario legislature just before it closed for the session. The government stated that it was unwilling to enact any legislation on such short notice, and the bill is, therefore, postponed for the time being.

PACIFIC MARINE INSURANCE COMPANY

The underwriting account of the Pacific Marine Insurance Co. for the year ended December 31st, 1918, shows premiums, less reinsurance agency charges and commissions, of $761,144. There was also a balance at the end of 1917 of $453,952, and premiums received on 1917 account to the amount of $198,603, making a total of $1,413,701. Claims paid totalled $882,389, of which, however, only $366,649 was on 1918 account. After meeting general expenses of $24,423 and a transfer of $3,959 to profit and loss account, the balance carried to balance sheet is $502,928. Interest earnings were $22,459, making a total available in the profit and loss account of $26,418. Dividends at 10 per cent. required $10,110, and a similar amount was transferred to reserve.

The balance sheet now shows total assets of $689,857, including municipal and government bonds to the amount of $174,549; amounts due from insurance companies and agents, $359,004, and cash in bank, $133,140. The liability on underwriting account is $502,928; paid-up capital is $101,100, and reserve is now $40,440.

The managing director of the company is Mr. Leslie H. Wright, and the secretary-treasurer, Mr. W. Hobbs-Fernie. The head office is located in Vancouver. The company's business is extensive, underwriting agencies being located throughout Canada, United States, Great Britain and in Australia and Holland. There are also settling agencies in India, South America, China, Japan and other countries.

FOREIGN BOND AND SHARE CORPORATION

The purpose of the Foreign Bond and Share Corporation, which has just been formed under the laws of Delaware, is to finance public and private enterprises in Central and South America, the Far East, Europe, and other parts of the world. It will also sell to American investors either the debentures of the corporation, which will be covered by the deposit of the securities of these foreign companies, or the foreign securities themselves. It is the intention of this corporation to reach all classes of investors in the United States. The Foreign Bond and Share Corporation has an authorized capital stock consisting of 100,000 shares of common stock, of the par value of $100 each, and 3,000 shares, with no par value, known as "participating certificates," and a subscribed capital and surplus of $3,000,000.

The organizers of this corporation include private banking firms and some of the strongest financial institutions throughout the United States. Among them are Brown Brothers and Co., J. and W. Seligman and Co., Guaranty Trust Company, Chase Securities Corporation, Central Union Trust Company, Columbia Trust Company, Hayden, Stone and Co.—all of New York; First National Corporation of Boston; Hibernia Bank and Trust Company, New Orleans; First Trust and Savings Company, Cleveland; Anglo and London Paris National Bank, San Francisco; Mercantile Trust Company, Mississippi Valley Trust Company, and interests associated with National Bank of Commerce—all of St. Louis; and the Central Trust Company of Chicago. Other institutions have expressed their desire to take part in the enterprise.

The Manitoba Farm Lands Association is planning to launch a campaign for new members. A membership committee has been formed with the executive as a nucleus, and the work of organization will be pushed rapidly.

COMMISSION ON WAR LOANS REDUCED

At a meeting of the Montreal Stock Exchange, held on April 17th, it was decided, by a vote of 25 to 23, to reduce the commission rate on transactions in war loan bonds from one-quarter to one-eighth of one per cent. This change has been under consideration for some time past. It was pointed out that much of the large business was being diverted from the Montreal to the Toronto Stock Exchange.

CANADIAN GUARANTY TRUST COMPANY

The Canadian Guaranty Trust Co., of Brandon, Man., has just opened a branch office at Swift Current, Sask., under the management of Mr. J. W. Hemenway, who, for a number of years, has been a leading business man of that city. The company's business in this territory has been developing so rapidly of late that it was thought wise to open this office and so be able to handle it at closer range.

INLAND TRADE COMMISSION PROPOSED

Western Wholesalers Urge Such an Organization—Powers Similar to Those of Railway Board in Railway Matters

FOR the purpose of regulating the production, manufacture and distribution of foodstuffs and other commodities, it has been suggested that a federal body be formed along the lines of the Dominion Board of Railway Commissioners. This scheme is being urged by the Wholesale Grocers' Association of Saskatchewan. Such a commission, it is urged, could have many branches, including a food branch. Provincial committees representing each class of trade under regulation would represent the executive body of the different provinces. The powers of the commission should be extensive, being a practical counterpart of those enjoyed by the Railway Commission Board. Following the formation of the commission all matters affecting production, manufacture and distribution would be considered and passed by it before presentation to parliament for action. In this way it is hoped that injudicious and harmful legislation may be avoided and the interests of the food producing and distributing agencies protected.

The duties of the commission should be the regulation and control of all food products grown, manufactured, prepared or offered for food in Canada. Where any complaints bearing on matters of food are heard they will be promptly investigated by this commission in the same way that the railway commission considers matters that come under its jurisdiction. The commission would have power also to take action without outside suggestion in matters where they believe the best industries of the food production and distribution trades were at stake.

In general the policy of such a commission as it affected the food trade would take in the following important questions:—

1. The standardization of quality and weights of canned goods, fish, fruits, vegetables, jams, cereals, flour, spices and all package goods.
2. The standardization of the pure food laws.
3. The question of establishing adequate help for infant industries, by the establishment of foreign markets, that would assure them of an opportunity of disposing of their goods at reasonable prices.
4. The advertising of home grown and home packed goods, both at home and abroad, with the idea of developing old avenues of distribution, and of creating a new demand.
5. The development of methods of protection against inferior goods coming into the country, to be achieved in part by examination at port of entry.

There is a movement under way for the organization of a Dominion-wide Wholesale Grocers' Association, and it is generally understood among western grocers that were this organization to be formed, the proposed commission would, in all probability, find ready sanction as one of the first actions of the new association.

CONTROL OF WATER CARRIERS' RATES

The Montreal Board of Trade is strongly opposing the effort which is being made to extend the jurisdiction of the Dominion Board of Railway Commissioners to tolls and tariffs of water carriers by bill number 6, now before the House. A protest along this line was forwarded a few days ago by the board of trade to the railway committee of the House of Commons. The railway committee will proceed with the consideration of the proposal at its meeting on Wednesday, the 30th instant. The Montreal board of trade has repeatedly, and heretofore with success, opposed the placing of the water carriers under the jurisdiction of the Board of Railway Commissioners with respect to tolls and tariffs, not because of any doubt as to the ability or impartiality of the Board of Railway Commissioners, but because of the conviction that it is in the best interests of shippers generally that water carriers should retain their right of contract in the matter of tolls and tariffs.

PRINCE EDWARD ISLAND FINANCE

A statement of receipts and expenditures for the fiscal year ended December 31st, 1918, was submitted a few days ago in the Prince Edward Island legislature. The results were as follows:—

Receipts.

Dominion subsidy	$372,181
Public lands	785
Provincial secretary, fees	1,535
Prothonotary's fees	1,587
Registrar of deeds, Charlottetown	3,506
Registrar of deeds, Summerside	1,830
County court fees	399
Fines and penalties	302
Falconwood Hospital fees	8,007
Private bills	290
Vendor's license	88
Peddlers' licenses	420
Casual revenue	468
Fire insurance companies	7,500
Life insurance companies	2,400
Accident and guarantee companies	606
Loan and trust companies	825
Banks	8,219
Telegraph company	500
Express companies	400
Electric light company	133
Miscellaneous companies	1,466
Income tax	18,757
Land tax	54,061
Fox tax	10,069
Succession duties	4,477
Motor vehicles, etc.	13,618
Oyster culture	17
Refund	41
	$514,498
Less motor vehicle tax (net) transferred to public works department	12,650
Ordinary receipts	$501,847
Interest, etc., on sinking fund investments	6,519
	$508,367

ONTARIO FARM CONDITIONS

The following is a summary of recent reports made by Agricultural Representatives to the Ontario Department of Agriculture:—

Seeding has been largely prevented by the frequent rains of the past week or two, and the cool weather has been delaying growth. However, early sown spring wheat and oats are reported to be above ground in some of the Lake Erie counties. Fall wheat so far is practically uninjured, except on badly drained land, and it promises to be a record crop. Clover has not done so well, having suffered more or less from heaving in some localities, although many fine fields are also reported. Alfalfa looks to be in fair condition. All these crops have been much helped by the rains which have recently prevailed.

Orchards have suffered very little from winter injury. Some fruit growers have already started their first spraying for the season, and several representatives predict that orchards will receive more care than usual this year. Prince Edward speaks of an increased acreage of nearly all canning crops, especially of peas, which will also be grown for seed.

Well finished cattle are scarce, and bad roads have also hindered marketing. Prices for good beef animals have ranged from 14 cents to 15 cents a pound. Dairy cattle continue at a premium. Welland states that "Any sort of a cow will bring $100 while good ones are ranging from $200 to $250." Northumberland reports that several choice young cows have gone into the hands of new breeders at $500 each. In Halton a herd of pure-bred but untested Holstein cows sold at a recent sale, brought an average of $320, while calves and yearlings averaged $111.

Milk is in fair quantity for the time of year, and is in good demand. Oxford has been paying $2.90 a hundredweight for milk during April. Butter fat has commanded from 60 cents to 65 cents a pound in some creameries. Two new milk condenseries are being started in Prince Edward county. Horse raisers are now getting better prices for their animals. Dufferin and Victoria reporting some sales as high as $300. Prices for hogs, according to representatives, range from $20.25 to $21 a hundredweight.. Two more live stock shipping clubs have been organized in Wellington, and all are declared to be operating satisfactorily.

Farm labor is reported to be scarce in almost every section of the province. Welland reports prices as running from $30 to $50 with board, for single men, and from $50 to $60 a month for suitable married men. The further return from overseas of farmers' sons is expected to help out the situation.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt for the week ended April 18th, 1919:—

Buffalo Mine, 93,365; Cobalt Reduction, 88,000; McKinley-Darragh, 83,950. Total, 265,315.

The total since January 1st is 5,968,607 pounds, or 2,984.3 tons.

BRITISH COLUMBIA ELECTRIC RAILWAY COMPANY

As was indicated by the chairman at the annual meeting of the British Columbia Electric Railway Co., which was held on April 4th, in London, England, the company had a difficult period during the year ended June 30th, 1918. A full report of the meeting is given elsewhere in this issue. The chairman dealt at some length with the labor difficulties of the year, and also the action of the provincial government in the establishing of a public utilities commission. The company is an English limited company, which was incorporated in 1897, and represents large British investments here. It is, in fact, the largest electric railway system in Canada.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended April 17th compared with the corresponding period last year:—

	Week ended April 17, '19.	Week ended April 18, '18.		Changes.
Montreal	$125,279,524	$ 89,295,123	+	$35,984,401

MANITOBA FARM LANDS SETTLEMENT ASSOCIATION

Organization of the Manitoba Farm Lands Settlement Association has been completed. William Pearson, president of the Wm. Pearson Co., was elected chairman and A. Lobb vice-chairman. The following were elected to the executive committee: D. A. Downey, Michael Scott, C. W. Simpson, Walter Johnson, N. T. MacMillan, L. M. Wililamson, Robert Tate, Mathew Rogers, C. H. Webb, A. H. Oakes, H. L. Emert and John Flanders. Chas. H. Webster agreed to act temporarily as secretary-treasurer until the executive committee is in a position to make a permanent appointment. About twenty-five membership applications were filled, and it is hoped to increase the membership rapidly, as all land owners and land dealers are eligible.

MASSEY-HARRIS INDUSTRIAL PLAN

On April 18th the Massey-Harris Co., Ltd., announced three important changes in the relationship between the company and its employees. The first is the establishment of a pension fund, which will be entirely maintained by the company and not by payments on the part of employees. The second is the arrangement whereby employees may purchase shares in the company on favorable terms. This subject was discussed at the annual meeting, held on April 15th, when the directors were authorized to make arrangements whereby employees who have been with them for two years or more and who earn not more than $2,000 per annum may purchase shares.

The third change is the most interesting in view of present economic conditions. A works council is to be established, one-half of the members of which are to be elected by secret ballot by the employees; the others are to be appointed by the company. Foremen are not to be eligible for election. Details will be worked out immediately.

WHOLESALE PRICE MOVEMENT IN CANADA

(Continued from page 19)

Japanese government controlled much of the transportation on the Pacific ocean. In some instances railroad transportation and through shipments were similarly affected. The absence of many commodities from the markets and the governmental control of prices and supplies in many others caused many of the index numbers to reflect prices movements in all their operations less accurately than usual, and some were discontinued owing to the paucity of data.

The movement of prices in Canada since 1890 is indicated by Chart No. 1. The prices from 1890 to 1900 were averaged, and the result was called one hundred for the purpose of making comparisons with prices in subsequent years. For instance, prices at the beginning of 1916 were 180 per cent. of the average for the decade from 1890 to 1899. Two lines are drawn, the one representing an unweighted index number, that is, the commodities are not taken in proportion to their importance in ordinary use. The other represents a weighted index number. It will be seen that the results are similar.

The second chart indicates in greater detail the movement since 1910.

Another chart prepared by the department compares the movement in Canada with that in the United Kingdom and the United States. It has been most pronounced in the United Kingdom, but prices moved very similarly in Canada and the United States, although from 1914 until early in 1917 those in Canada advanced somewhat more than in the United States on account of Canada's participation in the war.

NEW INCORPORATIONS

The following is a list of companies incorporated during the past two weeks, with capital and names of provisional directors:—

Guelph, Ont.—Crowe's Iron Works, Ltd., $200,000; C. L. Dunbar, L. W. Goetz, H. McTague.

Ottawa, Ont.—By-Products, Ltd., $100,000; J. E. Charrier, A. W. Guertin, J. P. Labelle.

St. Catharines, Ont.—J. H. Wethey, Ltd., $300,000; W. S. Morlock, S. E. Wedd, R. B. Whitehead.

Galt, Ont.—Thomas Brothers, of Galt, Ltd., $40,000; L. Thomas, G. O. Thomas, J. H. Thomas.

Winnipeg, Man.—Stewart & Cameron, Ltd., $100,000; J. D. Cameron, L. Cameron, C. Cameron.

Peterborough, Ont.—Stickney Motors, Ltd., $1,500,000; C. W. Hall, L. C. Burpee, T. H. Bowyer.

Halifax, N.S.—Enstern Title & Guarantee Co., Ltd., $100,000; W. H. Covert, M. S. Clarke, H. B. Pickings.

Vancouver, B.C.—West Coast Towing & Salvage Co., Ltd., $250,000; W. H. Green, C. H. Chambers, J. W. North.

Hamilton, Ont.—Electric Bond & Share Co., of Canada, Ltd., $1,000,000; G. H. Levy, C. H. Higgins, A. M. Herriman.

Toronto, Ont.—Hesson Tobacco Pipe Manufacturing Co., Ltd., $100,000; W. C. Cope, J. Harton, A. J. Robertson. Thompson & Heyland Lumber Co., Ltd., $40,000; E. M. Dillon, R. T. Birks, M. B. Banks. Loew's Uptown Theatre, Ltd., $750,000; G. Thompson, R. Murphy, T. Mcavoy. Premier Retread Co., Ltd., $25,000; F. Brenman, H. E. McKitrick, R. C. O'Donoghue. Utility Bond Corporation, Ltd., $100,000; H. B. Housser, J. W. Wood, D. H. Charles. Ina Food Products Co., Ltd., $40,000; W. Silk, F. Walker, S. Kraisman. National Farm and Amusement Co., Ltd., $1,000,000; H. J. Dupuis, J. A. Duguay, R. A. Aubry. Foreign Development Co., Ltd., $780,000; E. M. McDougall, L. G. Bell, S. C. Demers. Crescent Supply Co., Ltd., $50,000; J. W. Blair, F. J. Laverty, C. A. Hale. Canada Mexico Oil Co., Ltd., $600,000; E. M. McDougall, L. G. Bell, S. C. Demers. British Manufacturing Co., Ltd., $100,000; H. Shriaberg, M. Shriaberg, H. K. Symonds. Mount Royal Steamship Co., Ltd., $100,000; W. F. Ritchie, L. Beauregard, J. B. Johnson. Casavant Brothers, Ltd., $1,000,000; J. C. Casavant, S. Casavant, C. J. Laframboise. Compagnie Canadienne Transatlantique, Ltee., $1,000,000; W. K. McKeown, T. H. Onslow, G. E. Chart. Palmer & Son, Ltd., $100,000; W. J. Shaughnessy, C. G. Heward, P. A. Badeaux. H. R. Flick Co., Ltd., $100,000; W. S. Johnson, A. R. Hall, R. M. Husband. Sanatogen Company of Canada, Ltd., $100,000; W. W. Barry, J. H. Dubois, A. Perkins. Canadian Sanitas Co., Ltd., $100,000; M. Beauzemont, Y. Dufour, E. Bussieres.

SWITZERLAND BANK INCREASES CAPITAL

La Societe de Banque Suisse, Bale, is increasing its capital from 82.000,000 francs to 100,000,000 francs by the issue of 36,000 shares of 500 francs each. Subscriptions to the new shares can be made only by present shareholders.

BANK BRANCH NOTES

The following is a list of branches of Canadian banks opened recently:—

Harbor Breton, Nfld.	Canadian Bank of Commerce
Winnipeg, Man. (Kildonan and Kelvin)	Royal Bank of Canada

The Royal Bank of Canada will open a branch in Winnipeg, at the corner of Logan and Main Streets, on May 1st, according to an announcement made by Robert Campbell, supervisor, at that city.

The Canadian Bank of Commerce has purchased a site at the corner of Stafford and Grosvenor Streets, Winnipeg, at about $14,000. The house is to be removed and work commenced immediately on a new branch building.

Among the projected buildings of Drumheller, Alta., is that of the Merchants Bank of Canada, which will cost about $10,000.

The Merchants Bank has also purchased a site immediately east of the Hudson's Bay property on Portage Ave., Winnipeg, at a price between $70,000 and $100,000.

The Dominion Bank has enlarged its branch at Portage and Sherbrooke, Winnipeg, the extra space having been found necessary for the purpose of its expanding business in that part of the city.

Since the declaration of the armistice, the Home Bank of Canada has opened new offices at the following points: Arnprior, Belton, Coboconk, Iona, Middlemiss, Rosemont, and Walkers in Ontario, and at Franklin, Man.

Mr. Edward Pope, eldest son of Sir Joseph Pope, undersecretary for external affairs, has been ordered to Paris to organize a branch of the Bank of Montreal there. Mr. Pope is at present accountant in the Ottawa office of the bank.

Mr. Gordon Laird, formerly assistant manager of the Toronto branch of the Canadian Bank of Commerce, has now taken over his duties as manager of the Halifax branch of the bank. Mr. MacGillivray, former manager of that branch, is now superintendent of branches, and looks after the bank's affairs in the whole Maritime field.

Mr. John Bell Waddell, Montreal manager of the Union Bank of Canada, will retire from banking in order to become associated with Sir Mortimer Davis, president of the Imperial Tobacco Co. of Canada, in the management of Sir Mortimer's numerous undertakings.

The Molsons Bank announces the appointment of Mr. D. M. Cleland and Mr. W. James, as assistant inspectors. Mr. H. E. Bieber, manager at Richmond, Ont., has been appointed manager of a new branch to be opened at Windsor, Ont. Mr. W. D. Clarke, manager at Exeter, has been appointed manager at Richmond.

Mr. Frank Trott, accountant of the Imperial Bank, East End, St. Thomas, Ont., has been promoted to the managership of the agency at Grand Valley.

Mr. A. T. Lowe, for several years manager of the Royal Bank of Canada at Ingersoll, Ont., has been appointed assistant manager of the main Toronto branch.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first two weeks in April, 1919:—

LEGAL NOTICE

CANADIAN BISCUIT & CONFECTIONERY EXPORT COMPANY, LIMITED

PUBLIC Notice is hereby given that under the first Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," and Amending Acts, letters patent have been [illegible] under the Seal of the Secretary of State of Canada, bearing date the [illegible] day of March, 1919, incorporating William [illegible], Herbert [illegible], Herbert Arthur Telfer, John Wetherill [illegible] and Charles Joseph [illegible], manufacturers, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:— (a) To import, export, manufacture, buy, sell and deal in goods, wares and merchandise, and without limiting the generality of the foregoing the same shall be deemed to include confectionery, biscuits, candy, and all goods of which sugar or flour forms a part; and to act as agents for the purchase or sale of any such goods, wares and merchandise; (b) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights. (c) To purchase or otherwise acquire or undertake all or any part of the business, property, assets or liabilities of any person, partnership or company carrying on business with objects similar in whole or in part to those of the company, or possessed of property suitable for the purposes of the company. (d) To procure the company to be registered and recognized in any foreign country and to designate persons therein according to the laws of any such foreign country to represent this company and to accept service for and on behalf of the company of any process or suit; (e) To make application and negotiate for, lease, purchase or otherwise acquire or exercise, develop, hold, grant, and dispose of or turn to account any patent, trade mark, secret information, copyright, grant, license, lease, process, design, concession and the like which may seem capable of being used for any of the purposes of the company, and the acquisition of which may seem calculated to benefit the company. (f) To acquire by purchase, lease or otherwise and to hold and dispose of such movable and immovable property, rights, easements and privileges as may be deemed necessary or convenient for the purposes of the company. (g) To issue fully paid-up shares, bonds or debentures for the payment either in whole or in part of any property, real or personal, patents, rights, claims, privileges, concessions, contracts or other advantages which the company may lawfully acquire; (h) To purchase, acquire, hold and dispose of shares of the capital stock, bonds or other securities of any other company, corporation or individual carrying on or engaged in, in whole or in part, any business which the company is empowered to engage in or carry on, and to acquire, hold, sell or otherwise dispose of such shares, bonds or securities, notwithstanding the provisions of section 44 of The Companies Act; (i) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (j) To sell and dispose of the assets of the undertaking of the company or any part thereof, for such consideration as the company may think fit and in particular either for cash or for shares, bonds, debentures or securities of any other companies, or partly for cash and partly for such shares, bonds, debentures or securities, notwithstanding the provisions of section 44 of the said Act: (k) to distribute in specie or otherwise, as may be resolved by the company, any assets of the company among its members and particularly the bonds, shares or debentures of any other company formed to take over the whole or any part of the assets of this company; (l) To enter into any agreement with any government or authority, supreme, municipal, local or otherwise, that may be conducive to the company's objects, or any of them, and to obtain from any such government or authority any rights, privileges or concessions which it may be deemed desirable to obtain, and to carry out, exercise and comply with or sell and dispose of any such arrangements, rights, privileges and concessions; (m) To invest and deal with the moneys of the company not immediately required on such securities and in such manner as may from time to time be determined; (n) To promote any company or companies for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (o) To construct, improve, maintain, work, manage, carry out or control any roads, ways, branches or sidings, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (p) To lend money to customers and others having dealings with the company and guarantee the performance of contracts by any such persons; (q) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (r) To do all or any of the things hereby authorized either alone or in conjunction with or as factors or agents of any other company or persons, or by or through factors, trustees or agents; (s) To do all such things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Canadian Biscuit & Confectionery Export Company, Limited," with a capital stock of forty thousand dollars, divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 24th day of March, 1919.

THOMAS MULVEY,
Under-Secretary of State.

39-1c

The business of the Monarch Life Assurance Co. for the first three months of the year was $1,898,047, compared with $1,423,952 last year, an increase of $474,095, or 33.3 per cent.

NEWS OF MUNICIPAL FINANCE

Burnaby, B.C.—The tax rate has been reduced this year from 27 to 24 mills on improved lands, and from 50 to 48 mills on wild lands.

Guelph, Ont.—The tax rate of the city as struck by the finance committee will be 29¾ mills for the current year. This is a mill less than the combined general, school and patriotic tax of last year, but it is four mills more for civic purposes, now that the tax rate is cut off.

Middlesex County, Oat.—A levy of one and three-quarter mills for county roads construction and maintenance in Middlesex has been recommended by a special committee appointed to revise the county road system. Under this by-law it is specified that the money raised in each municipality shall be expended in that particular municipality under the direction of officers appointed.

Vancouver, B.C.—A tax rate of 27 mills net is the lowest the ratepayers may expect this year, according to the opinion of Mayor Gale. The rate last year was 24 mills net. Alderman Kirk, chairman of the city finance committee, is proposing a drastic cutting of the civic estimates in an effort to bring the rate down to 25 mills net. To do this a reduction of the estimates to the extent of some $600,000 is proposed by Alderman Kirk. The mayor, however, takes the view that the best that can be looked for is a reduction of approximately $300,000.

Ontario.—According to an announcement made by the Hon. Finlay Macdiarmid in the Provincial legislature, the Ontario government has decided to contribute towards the maintenance of county highways upon the same basis as toward construction, which is forty per cent of the total outlay. The government has had the matter under consideration for some time, and had finally reached the conclusion that it was in the interest of better highways generally that the counties should be further assisted in keeping their roads in first-class shape once good roads had been constructed.

North Vancouver, B.C.—The council has decided to increase the tax of freight on the ferries. A petition signed by over fifty auto owners has been received protesting against the new schedule of rates that was put in force last week. The members of the council stated that additional revenue was absolutely necessary and the only way that it could be increased was by either charging the pleasure cars a higher toll or taxing freight on the ferries. The council had gone fully into the matter before raising the fares on the autos, and in their opinion they had placed the increased rate on the traffic that was able to bear it best. It was pointed out that it costs nearly as much to run a car on the road per mile as the ferries charged for transporting it. For the last four years the ferries had been costing North Vancouver about $40,000 a year, counting the deficit and the depreciation.

Calgary, Alta.—It has been recommended that the city give the treasurer instructions to protect any of its mortgages in arrears, which are liable to come under the hammer. By this order the city will pay up arrears of taxes on property covered by sinking fund loans and redeem the property from the sale. The city has the right to take such action, as its position in the matter is that of a mortgagee.

The separate school estimates for 1919 have been prepared and the city is asked to contribute $73,475 to the board's funds. The increase over last year is $6,000, and is made up chiefly of increases in teachers' salaries, school doctor's salary, apparatus and repair work.

The annual financial statement of the electric light and waterworks departments, has been completed. The electric light wound up 1918 with a deficit of $29,170, while the increase made in water rates last year was responsible for that utility having a surplus of $24,406 on revenue earnings. In discounts the two departments lost $30,944. The latter surplus will be applied on deficits that have accumulated from previous years in the waterworks.

With a balance of $6,791 in the bank, the city ends the first three months of the year. Included in the receipts is the amount of $256,725 from taxes, of which 1916 and arrears taxes were $65,795; 1917 arrears, $36,139; 1918 arrears, $84,906; tax suspense account, $58,072, and interest on taxes amounting to $17,169.

South Vancouver, B.C.—There will be no increase in the tax rate in South Vancouver this year, Commissioner Gillespie has announced. Last year's rate of 41.40 will be the rate that will be charged again this year. The commissioner decided on this course of action after another session with the advisory committee, when the estimates were pruned in order to allow the rate to remain the same. Reductions in the estimates amounting to $94,558 were made, bringing the estimates down to $771,849. A 50-mill rate will be charged on wild land which will produce a revenue of $78,230, and improvements will be assessed at the 41.40 rate on the basis of one-third of their value.

A visit will be made to Victoria by a committee to urge upon the government the necessity of making a loan of $100,000 to be used in permanent road work for the main thoroughfares.

At a meeting of the delinquent taxpayers held in the municipal hall recently, it was decided to try and make arrangements with the creditors of the municipality to allow the corporation to take advantage of the recent amendment to the Municipal Act giving municipalities power to consolidate the arrears of taxes. If this is done it will enable a great many ratepayers to save their property from the tax sale which it is proposed to hold this year. The arrears will be payable in 10 instalments, the first one to be made this year. As the arrears of taxes have been given as security for loans made to the municipality by the Provincial government and Spitzer, Rorick & Company, it will be necessary to secure the consent of these creditors to the consolidation.

Regina, Sask.—The city council has struck a tax rate of 35.5 mills on the dollar for the 1919 municipal levy for public school supporters, or an increase of 5½ mills over last year. Separate school supporters will be required to contribute 41.3 mills as compared with 36.8 mills last year. The full general rate this year is 22.35 mills as compared with 18.95 mills last year. The annex rate is 14.8 mills. The computation of the requirements and the striking of the rate was complicated this year by the new legislation, limiting the income tax rate to 30 mills on the dollar. While the city solicitor ruled that this limitation applied only to the general rate, which is 22.35, and that therefore the income taxpayer would be required to pay the full 35.5 mills, the city commissioners, on the other hand, interpretated the legislation to include the rate for all purposes. The city commissioners' interpretation was accepted by the council and incorporated in the by-law.

The total amount to be provided for this year for all purposes is $895,550, including last year's deficit, as compared with a total estimated expenditure last year of $1,257,349. The total amount required for general municipal purposes this year is estimated at $895,000, including the 1918 deficit, as compared with an actual expenditure last year of $872,641, an increase of $23,000 for 1919. Without the deficit the general municipal estimated expenditure for this year is $63,000 less than last year, which is principally due to an anticipated surplus on utilities of $13,300, as compared with a deficit of $76,000 last year. The estimated expenditure for 1919 totals $1,114,484, compared with the actual expenditure of $1,093,172 last year. The estimated receipts total $329,355, compared with $311,515, for actual receipts last year.

The Dominion government has decided to grant the claim of the city for $60,000, representing the loss incurred by the destruction of the winter fair building, when occupied by the military authorities.

The current estimates for the city, while making provision for a loss on the street railway of between $20,000 and $25,000 will, it is understood, anticipate a joint surplus on the operation of the three utilities of approximately $15,000 for the year 1919. It is expected that the waterworks and electric light departments will be able to make more than enough to offset the anticipated street railway loss.

PERSONAL NOTES

Capt. H. L. Plummer has been elected a member of the Toronto Stock Exchange.

Col. J. F. Michie has been appointed vice-president of the General Accident Assurance Company of Canada.

Mr. A. Jarvis of Æmilius Jarvis and Co., Toronto, has just returned from Europe, where he has spent two months.

Mr. M. B. Karr has been appointed inspector for Eastern Ontario, for the General Accident Assurance Company of Canada.

Mr. S. E. Heward has been appointed representative of the National City Company of New York, at Halifax, and will have his office at 161 Hollis St.

Mr. James Elmsly, manager of the newly organized Bankers Trust Company, Montreal. Mr. Elmsly, who is already well-known in financial circles in Montreal and throughout the Dominion, was formerly with the Bank of British North America, and lately with the Prudential Trust Co. The Bankers trust Company is capitalized at $1,000,000; it was organized by directors of the Merchants Bank, and its offices will be in the Merchants Bank Building, Montreal.

Mr. Edward Hay, formerly general manager of the Imperial Bank of Canada, has been appointed president of the General Accident Assurance Company of Canada.

Lieut. O. L. Harwood, of Brandon, has just returned from overseas after two years service. For some years Mr. Harwood was prominently connected with the Brandon Board of Trade. He is now in the financial and insurance business.

Major John Ley Retallack, has been appointed Public Utilities Commissioner by the British Columbia Government. This post was recently created by the legislature and this is the first appointment. Mayor Gale of Vancouver was first proposed, but he refused the appointment.

OBITUARIES

Mr. Daniel B. Detweiler, one of Kitchener's most prominent business men, died at his home on April 18th.

Mr. Thomas Trow, ex-alderman for Stratford, and for many years a broker and conveyancer, died at that city on April 21st, in his 72nd year.

UNIQUE
INDUSTRIAL
SITES

*Offered on
Long Lease and
Favorable Terms*

- —only 9 blocks from the retail district.
- —industrial trackage, connecting with Canadian and States transcontinentals, to every site.
- —wharfage for deep sea traffic—harbor open the year round.
- —ample supply of raw material close at hand from forest—mine—land—sea.
- —never failing fuel supply—electric light and power—water and gas supply.

These and other advantages are offered manufacturers at

VANCOUVER

the industrial and distributing centre for British Columbia and the North-West—Canada's sole gateway on the Pacific—a strategic industrial point for export trade.

Bona fide inquiries from intending manufacturers will receive careful attention and confidential report. State definite points on which information is desired. Address

GOVERNMENT AND MUNICIPAL BONDS

The Monetary Times' Weekly Register of Municipal Activities and Financing

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
North Bay, Ont.. ..	$22,000.00	6	20 instal.	May 3
North Bay, Ont......	4,400.00	6	10 instal.	May 3
Sarnia, Ont.	111,992.80	6 & 6½	Various	Apr. 26
Capreol, Ont.	18,775.00	6	10 instal.	Apr. 26
Rosthern S.D., Sask..	35,000.00	6½	25 instal.	Apr. 30
Kenora, Ont.	17,000.00	6	20 instal.	Apr. 28
Alberta School Districts	18,500.00	..	Various	Apr. 30

St. John, N.B.—The municipal council will be asked in May for the issue of $200,000 debentures for a proposed nurses' home, and improvements to the White St. hospital.

Bartonville, Ont.—School Section No. 2, Bartonville, has applied for $30,000 for building an addition to the present school. The request was granted and debentures are to be issued.

Windsor, N.S.—Citizens have voted $40,000 to secure permanent streets and sidewalks, and $15,000 to procure additional fire-fighting apparatus, a bill now being before the provincial legislature to secure borrowing powers.

Alberta.—The provincial legislature has passed a bill authorizing the lieutenant-governor-in-council to obtain a loan of $4,000,000, of which $2,000,000 is for telephones, and the remainder for general purposes named by the legislature.

London, Ont.—The city council has sent for a vote in January the requisition of the Board of Education for an issue of $195,000 debentures with which to build a branch collegiate institute and effect other improvements.

The Monetary Times of Canada
TORONTO WINNIPEG

Kerrisdale, B.C.—The council has been asked to submit a by-law to the people authorizing the issue of debentures to the amount of $165,000 for the erection of two new fireproof schools at Kerrisdale and Shaughnessy Heights.

Westmount, P.Q.—The sinking fund commissioners desire to purchase approximately $45,000 city of Westmount municipal debentures, and will receive tenders until April 28th, 1919, at the office of the Montreal Trust Co. Arthur F. Bell, secretary-treasurer.

New Glasgow, N.S.—The Bank of Nova Scotia has been awarded $8,000 5 per cent. 42-year sewer extension bonds. The following is a list of tenders:—

Bank of Nova Scotia	92.15
J. C. Mackintosh and Co.	91.50
W. F. Mahon and Co.	90.59
F. B. McCurdy and Co.	90.05
Eastern Securities Co., Ltd.	89.57

Calgary, Alta.—W. Ross Alger, of Edmonton, has been awarded an issue of $180,000 school bonds of the city. The bonds are 6 per cent. serials, and are for twenty years. The following is a list of tenders:—

W. Ross Alger	101.12
W. A. Mackenzie and Co.	100.43
Dominion Securities Corporation	100.18
Nay and James	100.16
Security Trust Co.	100.03
G. A. Stimson and Co.	100.02
Lougheed and Taylor	99.58
Hornibrook, Whittemore and Allan (for A. E. Ames and Co.)	99.33
Canada Bond Corporation	97.50
A. Jarvis and Co.	97.02

Quebec, Que.—At a recent meeting of the civic finance committee, Mayor Lavigueur stated that the manager of the St. Roch's branch of the Bank of Montreal, advisor to the city on financial affairs, had advised that the city should not float its loan, $279,000, authorized by the provincial legislature at present, on account of the condition of the money market. Money was now commencing to become easier, and he thought it would be of better advantage to the city to wait until 1920. In the meantime the Bank of Montreal would be pleased to lend the money to the city at the rate of 5 per cent. The city was reminded that a loan of $2,125,000 would come due on April 1st, 1920, and the Bank of Montreal advised that the city should negotiate for its renewal as early as possible and to renew it in New York in order to save the rate of exchange. The city was further counselled to take advantage of the renewal of the old loan and to combine the new issue with it in order to save expenses in advertising, etc.

Saskatchewan.—The following is a list of authorizations granted by the local government board from April 5 to April 12th, 1919:—

School Districts.—*Barrier Lake, $1,200 10-year not ex. 8 per cent. annuity. Welcome Valley, $2,800 10-year not ex. 8 per cent. annuity. *David, $1,600 8-year not ex. 8 per cent. instalment. *Sunny Brae, $1,800 10-year not ex. 8 per cent. annuity. Prospect Valley, $2,800 10-year not ex. 8 per cent. instalment.

---

*Being included in the next sale held by the local government board.

The following is a list of debentures reported sold from April 5 to April 12th, 1919:—

School District.—LeRoss, $2,000; Wood, Gundy and Co., Saskatoon.

Rural Telephone Co.—Richlea, $31,600; John J. Stevenson.

Alberta.—Sealed tenders will be received by the debenture branch of the department of education up till April 30th, 1919, for the purchase of seven blocks of school district debentures, amounting to $18,450, as follows: Block No. 1,

NOVA SCOTIA UNDERWEAR BONDS

Messrs. J. C. Mackintosh and Co., Halifax, have purchased and are now offering $200,000 6½ per cent., first mortgage sinking fund gold bonds of the Nova Scotia Underwear Co., Ltd., at 100 per cent., and accrued interest, to yield 6½ per cent. The bonds are long term, dated April 15th, 1919, due April 15th, 1949.

The Nova Scotia Underwear Co., Ltd., has total assets nearly three times bonds outstanding, and profits show progressive increase, last year being over four times bond interest. The company is to greatly extend lines manufactured, and to enlarge scope of activities.

FRASER COMPANIES, LIMITED, BONDS

A public offering of 6 per cent. ten-year first mortgage serial gold bonds is now being made by the Royal Securities Corporation, Ltd., at a price to yield 6.40 per cent., except in the case of the 1920 and 1921 maturities, which are offered to yield 6 per cent. The total amount of the issue is $2,000,000, but, as was stated in *The Monetary Times* last week, most of the bonds have already been disposed of by private offering. Details appear elsewhere in this issue. The company's capitalization includes this issue, of which $2,500,000 is authorized but only $2,000,000 outstanding, and $10,000,000 of common stock.

Due to the fact that Fraser Companies, Limited, has always been a close corporation, its operations are perhaps not as familar to the general public as those of some of the better known western lumber and pulp manufacturers. It ranks, however, among the largest lumber operators in Canada and is the biggest enterprise of its kind in the Maritime Provinces. Founded more than forty years ago, its history has been one of substantial growth and success.

The purpose of the new financing is to reimburse the company for expenditures totalling $2,500,000 on its new 35,000-ton pulp mill at Edmundston, N.B., the initial operation of which last December marked the entrance of the company into the pulp and paper business. The new mill is among the largest and best equipped of its kind in the Dominion.

MEMBERS OF BROKERAGE FIRM RETURNED

It has been announced by McCuaig Brothers and Co., Montreal stock brokers, that Lieut.-Colonel D. Rykert McCuaig, D.S.O., and Major Clarence N. McCuaig, members of that firm, have returned to their duties after an absence of more than four years overseas, and that Brig.-Gen. G. Eric McCuaig, C.M.G., D.S.O., another member of the firm, is expected to return shortly.

Arrangements have been made to remove to the offices formerly occupied by Sir Rodolphe Forget, M.P., at the corner of Notre Dame and St. Francois-Xavier Streets, on or before May 1st next.

EUROPE DISORGANIZED

"Never have I returned to Canada feeling more satisfied with our own country and own conditions," said Mr. Æmilius Jarvis, of Toronto, who has just returned from Europe, in an interview with *The Monetary Times*. "The condition in Europe is simply appalling. In Great Britain everyone seems, so to speak, on their back and don't know how to get up. The government's continual yielding to individual branches of unionism has completely upset other unions, resulting that no one is satisfied, and whilst matters are patched up for the present, it only means deferring until trouble breaks out in another quarter. The government being so busy with foreign affairs has had no time to give attention to domestic matters and I fear there is no one in the government big enough, strong enough and with sufficient business experience to cope with the situation. I never was so pleased with the efforts of our own authorities in keeping Canada to the fore and securing business. So far, Canada and the United States, and Japan probably to a less degree, have been to the fore in the markets, and I cannot conceive of a more far-reaching benefit to Canada as a whole than the continuance of our government granting credits to foreign countries for our products. Even in this respect Canada is already ahead of the United States and it is commented upon by Americans as an example of our keenness."

Referring to foreign trade, he said: "To my mind, the football is at Canada's feet. It only requires concerted action to put us in a position of an exporting nation in comparatively few years, that we could not have obtained in two or three decades. We are popular, not only in Great Britain, but in France and in Belgium, and in this respect I think we have got an advantage over our American cousins."

Messrs. A. Jarvis, and Co. inform *The Monetary Times* that the Manitoba issue of $1,580,000 5½ per cent. 15-year bonds, purchased by their company and Turner, Spragge and Co. last month, has been entirely disposed of.

All commodities	262†	279 8	286.5	263.5

*Preliminary figures. †Nine commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915.

DIVIDENDS AND NOTICES

THE MERCHANTS BANK OF CANADA

QUARTERLY DIVIDEND

Notice is hereby given that a dividend of Two and three-quarters per cent. for the current quarter, being at the rate of Eleven per cent. per annum, upon the Paid-up Capital Stock of this Institution has been declared, and will be payable at its Banking House in this city and at its Branches, on and after the 1st day of May next, to Shareholders of record at the close of business on the 15th day of April.

ANNUAL MEETING

The Annual General Meeting of Shareholders, for the election of Directors and other general business of the Bank, will be held at the Banking House, in the City of Montreal, on Wednesday, the fourth day of June next. Chair will be taken at 12 o'clock, noon.

By order of the Board.
D. C. MACAROW,
General Manager.

Montreal, 31st March, 1919.

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 129

Notice is hereby given that a dividend of Three per cent. upon the capital stock of this Bank, being at the rate of twelve per cent. per annum, has been declared for the quarter ending 31st May next, and that the same will be payable at the Bank and its Branches on and after Monday, 2nd June, 1919. The Transfer Books of the Bank will be closed from the 16th to the 31st of May next, both days inclusive.

By Order of the Board.
JOHN AIRD,
General Manager.

Toronto, 17th April, 1919.

CANADA CEMENT COMPANY, LIMITED

PREFERENCE SHAREHOLDERS

DIVIDEND No. 37

Notice is hereby given that a dividend of 1¾% for the three months ending March 31st, 1919, being at the rate of 7% per annum, on the paid-up Preference Stock of this Company has been declared, and that the same will be paid on the 16th day of May next to Preference Shareholders of record at the close of business, April 30th, 1919.

(Signed) H. L. DOBLE,
Secretary.

Montreal, April 15th, 1919.

THE RIORDON PULP AND PAPER COMPANY, LIMITED

COMMON STOCK DIVIDEND No. 13

Notice is hereby given that a quarterly dividend of 2½% has been declared on the Common Stock of the Company for the quarter ending March thirty-first, 1919, payable May fifteenth, 1919, to shareholders of record at the close of business on May ninth, 1919.

By order of the Board.
F. B. WHITTET,
Secretary-Treasurer.

Montreal, April twenty-first, 1919.

DETROIT RIVER TUNNEL COMPANY

Detroit, Mich., April 8, 1919.

NOTICE IS HEREBY GIVEN that the Annual Meeting of the stockholders of the Detroit River Tunnel Company, for the election of Directors and the transaction of such other business as may be brought before the meeting, will be held at the Head Office of the company, in the City of Detroit, Mich., on the First Thursday after the First Wednesday (being the 8th day) of May, 1919, at 10 o'clock a.m., Standard Eastern Time.

DWIGHT W. PARDEE,
Secretary.

CANADIAN PACIFIC RAILWAY COMPANY

NOTICE TO SHAREHOLDERS

The Thirty-eighth Annual General Meeting of the Shareholders of this Company, for the election of Directors to take the places of the retiring Directors and for the transaction of business generally, will be held on Wednesday, the seventh day of May next, at the principal office of the Company, at Montreal, at Twelve o'clock noon.

The Common Stock Transfer Books will be closed in Montreal, New York and London at 3 p.m. on Tuesday, the fifteenth day of April. The Preference Stock Books will be closed in London at the same time.

All books will be re-opened on Thursday, the eighth day of May.

By order of the Board.
ERNEST ALEXANDER,
Secretary.

Montreal, March 19th, 1919.

DEBENTURES FOR SALE

TOWN OF CAPREOL

SALE OF DEBENTURES

Tenders will be received by the undersigned up to Saturday, the 26th of April, A.D. 1919, for the purchase of public school debentures of the Town of Capreol for $18,775.00, bearing interest at six per cent., principal and interest being repayable in annual instalments during a period of ten years.

The highest or any tender not necessarily accepted.

W. H. MATTHEWS,
Clerk.

Capreol, Ont., April 11th, 1919.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement 50c per insertion. All condensed advertisements must conform to usual style. Condensed advertisements on account of the very low rates charged for them, are payable in advance: 50 per cent extra if charged

POSITION WANTED.—Young man, at present in Straits Settlements, desires connection with firm engaged in or wishing to establish Export and Import business. Leaving Straits October. Box 181, *The Monetary Times*, Toronto.

The Appellate Division of the Supreme Court of Canada has decided that the Massey-Harris Co. must pay an income tax to the city of Toronto on the interest received from bonds of the Victory Loan purchased by the company, carried with the assistance of the bank, and subsequently resold.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Ross Can Co.—The Ross Can Co. has moved into new premises at Bowmanville with fully equipped machinery, and the plant is in full operation.

Cape Breton Electric Co., Ltd.—On account of the annual meeting of the shareholders of the company, to be held on Tuesday, May 6, 1919, the transfer books will be closed from April 25, 1919, to May 6, 1919, both inclusive.

Zimmerman-Reliance, Ltd.—Announcement has been made by Industrial Commissioner Kirkpatrick, that Hamilton is to be the home of Zimmerman-Reliance, Ltd., the $2,000,000 company, which is an amalgamation of the Zimmerman Manufacturing Co., of Hamilton, and the Reliance Knitting Co., of Toronto. Negotiations to this end have been going on between the civic industrial department and the management of the new company for the past two months.

Barrett Co.—The annual report of the company for the year ended December 31 last, shows a gross increase from all sources of $11,150,301, an increase of $1,914,430 over the previous year. The total expenses and losses amounted to $7,360,740, an increase of $1,798,113. The net income from all sources was $3,789,561, an increase of $116,317. After deducting interest charges of $175,307, the net normal profits amounted to $3,614,253, an increase of $152,864. The sum of $335,726 was appropriated to the adjustment of security valuations, giving a net final profit of $3,949,979, an increase of $220,536. Mr. W. H. Childs, the president, in his report to the stockholders, points out that, owing to the increase in the costs of labor and material, the sales and earnings of the company suffered a diminution during the last two months of the year.

Sun Brick Co.—The company has been reorganized and has come into the hands of G. T. Clarkson, as receiver, by reason of default of payment of interest on bonds. The liabilities on bonds amounted to $125,000, on mortgages to $20,000, and due to creditors $300,000. Among the largest claims is that of Sir Henry Pellatt for $221,982, and that of the Toronto Electric Light Co. for $13,703. There was a nominal deficiency of $135,401. Under the agreement, the bondholders in the original Sun Brick Co. are to receive bonds of the Sun Brick and Tile Co. to the amount of their bonds and interest, with a similar amount of common stock, or, in the alternative, bonds of the Sun Brick and Tile Co. to the amount of their bonds, these to be guaranteed by the Sun Land Co. The creditors are to receive stock in the Sun Land Co. in satisfaction of their claims.

Mining Corporation of Canada.—The report of the company for the year ended December 31 last, shows that the output of silver amounted to 1,708,252 ounces, as compared with 4,485,541 in 1917. The net profits for the year, after depreciation and special expenditure, were $925,760, compared with $2,557,091 the previous year, and $1,895,583 in 1916. After payment of the four quarterly dividends there remains at the credit of profit and loss $3,025,347, compared with $3,448,377 a year ago. During its long record of production the mine has produced a total of 29,322,834 fine ounces of silver. Efforts are still being made to secure suitable new properties for exploitation, but of all those investigated last year, which included 160 in Canada and the United States alone, only one has been acquired. The investigations embraced properties in Russia, China and Mexico.

LIFE INSURANCE AGENCY
Old established Trust Company in Vancouver, B.C., is willing to take B.C. or City Agency for sound Life Insurance Company. Address
W. STARK,
839 Hastings Street, West, Vancouver, B.C.

Sawyer-Massey Co., Ltd.—In the annual statement of the company for the 12 months ended November 30th last, a loss of $77,236 from operations is shown. This, after adding $64,500 for depreciation and $38,666 for bond interest, was increased to a net adverse result for the year of $180,402, which, with a previous debit balance of $129,711 at profit and loss account, brought the total up to $310,114. The year's showing compares with net profits of $117,423 in 1917 and $72,208 in 1916.

In their report to the shareholders the directors state that on February 7 of last year the Dominion government passed an order-in-council admitting tractors into Canada free of duty. This, it is stated, caused an exploitation of the Canadian market by other American companies, and, in addition, the removal of the duty enabled those already engaged in the sale of American tractors in Canada to sell at exceedingly attractive prices. In order to meet this competition the company was compelled to reduce its selling price to a level at which there was left little or no margin over the cost of production.

Price Brothers and Co., Ltd.—Profits of the company for the 12 months ended February 28 last are shown at $1,493,961, compared with $1,374,782 the previous year, an increase of $119,179. The figures compare with $1,240,485 in the 1916-17 statement, or in excess of a quarter of a million dollars over the showing in that report. After deductions are made for bond and note interest amounting to $439,976, there remained for dividend purposes a balance of $1,053,984, equal to 21.8 per cent. on the outstanding capital stock issue of the company. The excellent showing made in the profit and loss account is carried into the balance sheet for the year, current assets being shown at $3,962,997 and current liabilities $1,198,875, leaving a favorable working capital of $2,764,122, compared with $2,436,521 at the end of the 1917-18 period, an increase of over $300,000. Cash on hand is carried at $179,945, against $21,314 the previous year, although an increase in bank loans of $210,000, to a total of $450,000, rather offsets this. Investments, however, including $750,000 Victory bonds, were increased from $153,012 at the end of the previous year to $885,985, or by some $730,000.

Canadian Consolidated Rubber Co.—The annual statement submitted at the meeting on April 22, showed that total sales in 1918 amounted to $18,785,640, the largest in the history of the company, being over 15 per cent. in excess of 1917, when they amounted to $16,323,431. This volume of business was made up of domestic and export sales, only $793,403 being attributable to war orders. Net profits for the year were $1,604,851, as compared with $1,208,018 in 1917. The assets of the company total $25,305,342, including liquid assets of $11,297,468. Liabilities are shown at $12,244,721, of which $9,500,000 represents bonded indebtedness and $2,744,721 current liabilities.

The board of directors is now composed as follows: Charles B. Seger, president; Sir Mortimer B. Davis, Colonel Samuel P. Colt, Victor E. Mitchell, K.C., E. W. Nesbitt, M.P., W. A. Eden, R. E. Jamieson, J. B. Waddell, R. C. Colt, A. D. Thornton, H. Wellein and Homer E. Sawyer, J. N. Gunn, E. S. Williams and Ernest Hopkinson, vice-presidents of the United States Rubber Co. Walter Binmore was appointed secretary, H. P. Nellis assistant secretary, Hugo Wellein treasurer and J. P. B. Daigneau assistant treasurer.

SECURITY ABOVE ALL

Whether with the intention of taking out insurance or associating yourself as representative with some company, you first look for security.

The figures for 1918 emphasize the unexcelled financial position of the North American Life. After a year of War and Pestilence, the Company emerges stronger than ever, meriting its motto "Solid as the Continent."

Business in Force	over	*$70,900,000*

WHY MUTUAL POLICIES ARE EASY TO SELL

First—Because of the co-operative and democratic principle on which the company is founded. The Mutual Life Assurance Company of Canada is a company consisting of policyholders, maintained by policyholders, exclusively for policyholders.

Second—Because the purpose for which the company was established is now generally understood: the company since its establishment in 1869 has consistently followed one aim—that of furnishing the largest amount of protection for the least possible outlay.

Third—Because the company's day-by-day activities advertise it: The Mutual of Canada since its organization has paid to policyholders or their beneficiaries or holds as a trust to guarantee future payments, over sixty millions of dollars.

"BE A MUTUALIST!"

The Mutual Life Assurance Co. of Canada
Waterloo Ontario

THIS SPRING

arrange your Life Insurance. Every year you delay means added cost. Every year means the added possibility of being unable to get Insurance. It is well to remember that 8 per cent. of all applicants are refused for ill-health and other considerations.

Obtain particulars of the Great-West Life Policies. They are well worth investigating. And so many people have thought them well worth applying for that the Company has now over $180,000,000 of Insurance in force.

Your request for rates will imply no obligation to insure. The Company is pleased to give the fullest information and advice by mail—and will, if desired, send specimen Policies.

Ask for a pocket Memo-Book—useful and convenient.

Much desirable territory is ready for Agents who can deliver policies in satisfactory volume. Inquiries about localities will have careful attention.

Union Mutual Life Insurance Co.
Portland, Maine

Address: ALBERT E. AWDE, Supt. of Agencies.

Abitibi Power and Paper Co., Ltd.—Announcement has been made of the listing of $1,000,000 15-year 7 per cent. convertible debenture stock of the company on the Montreal Stock Exchange, interest to be payable on June 1 and December 1.

St. Maurice Paper Co., Ltd.—Operating profit of the company, after all expenses, amounted to $1,468,488 last year, as compared with $1,060,853 the year before. The surplus is given as $562,300, as compared with $596,148 the previous year. Current assets are $2,757,680, against $1,990,694. Current liabilities are $1,040,079, against $1,039,880 the previous year. The working capital is thus increased to $1,717,601, compared with $950,814. The company's total assets are now $9,727,425, as against $8,872,558. The following comparisons are interesting:—

	1918.	1917.
Profit	$1,468,488	$1,060,853
Surplus	562,300	595,148
Current assets	2,757,680	1,990,694
Current liabilities	1,040,079	1,030,880
Net working capital	1,717,601	950,814
Cash	30,334	13,615
Total assets	9,727,425	8,872,558

BANK OF HAMILTON MEETING

The annual meeting of the Bank of Hamilton was held in Hamilton, Ont., on April 21st. The report of the directors dealt with the extensions during the year. A branch was opened a few months ago in Montreal, and branches were also opened during the year at Ethel, Ont.; Armada, Carmangay, Enchant and Milo, Alta.; Gretna and Plum Coulee, Man.; Tisdale and Weldon, Sask., and Penticton, B.C.

The president, Sir John Hendrie, referred to the financial results of the year, which have already been outlined in *The Monetary Times*. There has been a large increase in small depositors, he said, which is a good sign. The business of the Bank of Hamilton is growing rapidly, particularly in the west, and for the total assets now handled it has the smallest board of directors in comparison with other banks. The issue of $1,000,000 of new stock to shareholders at $150 per share is, he said, equivalent to a bonus of $10 to $12 a share. With regard to farm business, the president considers that it is safe and desirable. Last year 27,997 loans were made to farmers aggregating $8,836,820. Regarding the general conditions of trade and commerce, he did not care to venture any opinion or to voice any conclusions, as some of the most prominent bankers have already given their views on the future.

Mr. J. P. Bell, general manager, dealt in detail with the changes in business for the year. As to general conditions, he said:—

"It is now five months since the armistice was signed, but very few of the troubles that were predicted for the period after the war have yet come about. It is true that enterprise is halted, and that in many lines buyers have been holding back their orders in expectation of lower prices, but many now believe that there is not going to be any rapid decline in prices and are again entering the markets. But there are those who take the ground that the abnormal prices were due only to the war and must come down rapidly. Whether they are justified in this expectation is difficult to tell. So many new and unnatural influences are at work that experience alone will show what level of prices is in keeping with current conditions. No one can presume to say what is normal. Old standards are gone. Sources of supply have been changed. Markets have disappeared. The world's money, in which terms of prices must be quoted, has been too inflated. Who can foretell what changes will occur in the months ahead? Perhaps the most that can be said is that, though prices may fall further, they will not for a long time, if ever, return to the pre-war basis."

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Brantford, Ont.—April 22—Millinery shop of Mrs. Todd, Colborne Street, was damaged. Cause, toy pistol. Estimated loss, over $1,000.

Chatham, Ont.—April 17—Family Theatre was destroyed. Estimated loss, $8,000.

Chicoutimi, Que.—April 12—Building owned by the Chicoutimi Pulp Co. was damaged. Estimated loss, $25,000, covered by insurance.

Hargrave, Man.—April 14—Canadian Pacific Railway station was destroyed. Estimated loss, $7,000.

Havelock, Ont.—April 19—Bank of Toronto building, the Fennell shoe store and the Bell Telephone exchange building were damaged. Estimated loss, $30,000.

Lacombe, Alta.—April 18—Cold storage plant of Andrew Gilmour, M.L.A., was destroyed. Estimated loss, $30,000, partially covered by insurance.

Langley, B.C.—April 15—Sawmill of the Beaver River Lumber Co. was destroyed. Estimated loss, $75,000, partially covered by insurance.

London, Ont.—April 18—Home of Mr. F. C. Evans, 544 Dundas Street, London, Ont., was damaged. Cause, overheated gas heater. Estimated loss, $1,000.

Moncton, N.B.—April 14—Home of Mr. W. F. Ferguson was destroyed. Cause, overeheated gas stove. Loss covered by insurance.

Monkton, Ont.—April 17—White Block was destroyed. Cause, overheated stove. Estimated loss, $10,000.

Montreal, Que.—April 19—Montreal Ice Cream Cone Co., 347 Craig Street West, and the Canadian Pneumatic Tool Co., 345 Craig Street West, were damaged. Estimated loss, $40,000.

Moose Jaw, Sask.—April 15—Home of Mr. A. J. Lewis was damaged. Cause, overturned oil lamp. Estimated loss, $150.

Prince Albert, Sask.—April 23—Serious fires have been raging in northern Saskatchewan during the past week as a result of gales. No particulars have as yet been received.

St. Boniface, Man.—April 21—Between thirty and forty cars of grain and coal were destroyed. Estimated loss, $105,000.

St. Lawrence River, Que.—April 20—Cottage of Mr. W. E. Brough was destroyed. Estimated loss, $5,000.

Taymouth, N.B.—April 20—House owned by Mrs. John Edney was destroyed. Amount of insurance, $1,000, which will not cover the loss.

Toronto, Ont.—April 24th—Garage and dwelling owned by Mrs. Cawthra, 271 College Street, was damaged. Estimated loss, $500. Insurance, $75.

Truro, N.S.—April 10—Home of Mr. James Talbot was destroyed.

Winnipeg, Man.—April 22—Plant of the Brett Carriage Manufacturing Co. was destroyed. Estimated loss, $25,000, covered by insurance.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Vancouver, B.C.—Fire Chief Carlisle submits the following report for the month of March to *The Monetary Times*:—

The total loss sustained by fire for the month amounted to $61,718, of which amount $43,790 was covered by insurance, leaving the property loss above insurance at $17,928. The total value of the property involved was $2,718,201.

Current Loans of Banks at Record Level

March Bank Statements Reflect Continuation of Business Activity—Demand Deposits Unchanged—Further Increase in Savings Deposits—Loans to Municipalities and Call Loans in Canada Are Substantially Increased

	March, 1918.	February, 1919.	March, 1919.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$561,042,236	$ 566,775,434	$ 566,797,268	+ .89	+ .004
Deposits after notice	921,080,803	1,018,184,512	1,037,851,766	+ 12.59	+ 1.9
Current loans in Canada	886,995,222	1,095,301,791	1,117,197,446	+ 26.1	+ 2.0
Current loans elsewhere	102,217,679	130,590,063	123,984,608	+ 20.6	— 5.4
Loans to municipalities	50,652,061	36,830,183	41,993,305	—18.0	+ 13.9
Call loans in Canada	74,257,877	79,154,121	87,601,337	+ 17.6	+ 10.2
Call loans elsewhere	167,296,701	155,983,681	160,116,443	— 4.2	+ 3.2
Circulation	191,328,665	210,894,809	216,529,576	+ 13.1	+ 2.9

STATEMENTS of the chartered banks of Canada as at March 31st, 1919, collected by the Dominion government, are given on the following pages. Some of the figures were mentioned in these columns last week, and the more important changes are shown above. Savings deposits have now reached a figure exceeded only by the total for October, 1918, just before the flotation of the second Victory Loan. It will be observed, however, that the increase of $32,000,000 shown by the January statement declined to an increase of $28,000,000 in February and $20,000,000 in March. This is one of the results of a certain amount of unemployment and a decrease in the wage scale in some industries. Current loans are at a record figure as shown in the comparison below, but deposits on demand are practically unchanged as compared with February, indicating that increased funds are being used in the transaction of business. Circulation shows a substantial increase and the additional loans to municipalities reflect the seasonal tendency.

The following table gives record of deposits for the past thirteen months:—

	Deposits payable on demand.	Deposits payable after notice.
1918—March	$561,042,236	$ 921,080,803
April	558,509,221	933,644,668
May	535,655,731	947,757,337
June	549,327,078	965,934,556
July	549,068,651	992,015,137
August	554,906,517	1,014,711,865
September	588,940,119	1,037,498,920
October	644,220,998	1,076,514,627
November	666,366,359	939,329,271
December	711,034,060	958,473,557
1919—January	623,919,410	990,000,085
February	566,775,434	1,018,184,512
March	566,797,268	1,037,851,766

The course of deposits for the past six years is shown in the following table:—

March.	On demand.	After notice.	Total.
1914	$345,590,642	$ 646,143,604	$ 991,734,246
1915	339,514,286	676,875,790	1,016,390,076
1916	389,165,388	738,169,212	1,127,334,600
1917	448,151,528	888,765,698	1,336,917,226
1918	561,042,236	921,080,803	1,482,123,039
1919	566,797,268	1,037,851,766	1,604,649,034

The trend of the Canadian loans account for the past thirteen months is shown in the following table:—

Loans.	Current in Canada.	Call in Canada.
1918—March	$ 886,995,222	$74,257,877
April	884,089,402	77,497,360
May	894,817,113	78,466,582
June	897,226,012	76,970,920
July	905,677,233	74,382,762
August	920,775,269	73,509,571
September	942,802,018	74,137,860
October	1,003,593,603	73,685,136
November	1,082,709,655	85,675,063
December	1,075,640,003	89,120,423
1919—January	1,080,340,861	87,598,427
February	1,095,301,791	79,154,121
March	1,117,197,446	87,601,337

The following table shows the call loans abroad in March, as compared with previous returns:—

	1916. $	1917. $	1918. $	1919. $
January	134,248,552	155,747,476	132,687,066	140,819,656
February	139,138,651	162,344,556	160,239,494	155,983,681
March	141,889,989	161,616,735	167,296,701	160,116,443
April	147,146,443	159,156,054	179,818,531	....
May	163,400,659	168,692,675	172,259,879	....
June	182,757,015	159,309,133	170,034,476	.
July	177,121,733	151,875,676	167,112,836	.
August	171,380,353	176,610,625	160,544,990	....
September	173,877,586	166,480,004	159,680,810	.
October	189,346,216	151,018,747	157,040,858	.
November	183,250,389	139,832,552	171,035,732	.
December	173,878,134	134,483,482	150,248,322	.

The statement is given in full on the following pages.

The following table shows the course of principal loan accounts during recent years:—

March.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1914	$ 823,490,422	$ 53,279,411	$69,088,240	$145,218,223
1915	769,138,883	41,745,737	68,245,261	101,938,685
1916	770,139,526	52,705,827	81,747,512	141,889,989
1917	843,054,466	83,551,225	76,478,708	161,616,735
1918	886,995,222	102,317,679	74,257,877	167,296,701
1919	1,117,197,446	123,984,608	87,601,337	160,116,443

NEW MATTAGAMI FINANCING

It is understood that negotiations are practically completed with a group of Canadian and American bankers, headed by a Montreal financial house, for the underwriting of approximately $1,500,000 of bonds of the Mattagami Pulp and Paper Co., one of the largest producers of easy bleaching sulphite pulp in eastern Canada. The company's plant at Smooth Rock Falls, Ontario, has been in active operation for a little over a year and has established an excellent record of earning power. The purpose of the new financing is the completion of extensions now under way to increase the company's annual pulp output from 30,000 tons to 45,000 tons.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers	Counter.
N.Y. funds	2 47-64 pm	2 25-32 pm	....
Mont. funds	par	5c. pm	⅛ to ¼
Sterling:			
Demand	$4.7875	$4.7915	Nominal
Cable transfers	4.7975	4.80	Nominal

Rate in New York for sterling demand, $4.66¼, nominal.

Bank of England rate, 5 per cent.

Of the deposit in Central Gold Reserves $10,500,000 is in gold coin; the balance is in Dominion Notes.

T. C. BOVILLE, *Deputy Minister of Finance.*

NEW TRUST COMPANY DEPARTMENT

The Toronto General Trusts Corporation has added to its existing organization a publicity and service department under the management of Mr. John Cowan. Mr. Cowan was originally eight years in the service of a leading firm of estate solicitors in Glasgow, Scotland. After coming to Canada he spent twelve years as deputy registrar of the Surrogate Court of York County. For some time recently he has been in the estates department of the National Trust Co., Toronto.

The Canada Bonded Attorney and Legal Directory, Ltd., has declared a dividend of 7 per cent. per annum, payable to shareholders of record as at May 31st, 1919.

PERSONAL NOTES

Mr. C. A. Bogart, general manager of the Dominion Bank, has sailed for England on business, and will be away for six weeks.

Mr. A. L. Fullerton, manager in London, England, for the Dominion Securities Corporation, is spending a few weeks in Canada.

Mr. W. A. Adam, of Duncan, B.C., has been chosen publicity commissioner for the Victoria and Island Development Association.

Mr. J. R. Macdonald has been elected first president of the Chamber of Commerce for Stratford. The first vice-president is Mr. C. A. Mayberry.

Mr. E. Roy Fenwick, manager of the New Brunswick branch of the Dunlop Tire and Rubber Co., has been appointed to the managership of the Montreal branch.

Mr. A. H. Johnstone who for several years has been with The Norwich Union office in Winnipeg, has joined the staff of the Great North Insurance Company of Calgary.

Mr. W. W. King, formerly manager for the Mutual Life of New York, in Montreal, has assumed his duties as manager for the company for the three prairie provinces, with offices in Winnipeg.

Sir Mortimer B. Davis, president of the Imperial Tobacco Company of Canada, and a director of the Royal Bank of Canada, has been elected a member of the board of the United States Rubber Company.

Major Charles Greenshields, of Greenshields, Greenshields and Languedoc, Montreal, has left for England. Major Greenshields' trip, which will be of a business nature, will keep him away for some weeks.

Mr. Haley Fiske, for twenty-seven years vice-president of the Metropolitan Life Insurance Co., and connected with it for more than forty-five years, has been elected president of the company to succeed the late John R. Hegeman.

Mr. Charles H. Hosmer, president of the Ogilvie Flour Mills, and a director of the Bank of Montreal, the Royal Trust Co., and the Canadian Pacific Railway, recently went under an operation, and is now reported to be doing favorably.

Mr. M. Scarth Stevenson, of the Molsons Bank, Montreal, has been elected to the directorate of the National Shipbuilding Corporation. Chandler M. Wood, president of the Metropolitan Trust Company, of Boston, has also been elected to the directorate of the corporation.

Mr. W. Harland Knowles has been appointed manager in Montreal for the Eastern Trust Company, whose head office is at Halifax. Mr. Knowles, who was formerly with the Crown Trust Company, joined the Eastern Trust about a year ago as manager of the real estate department and now succeeds H. C. Flood, who has gone into the bond business.

Mr. T. F. Aspden, vice-president of the American Foreign Banking Corporation, was in Toronto, on Tuesday. Mr. Aspden is a former Canadian, having been some time in the service of the Canadian Bank of Commerce. The institution with which he is now connected, was organized to carry on foreign exchange operations, and its shareholders are all banks, one being the Standard Bank of Canada.

The Anderson Agency, Ltd., of Medicine Hat, has taken over the insurance and general business of the Krauss-Dawson Agency of that city. Capt. Chas. A. Anderson (formerly Chas. A. Krauss) has just returned recently from the front where he lost a leg in the war.

On May 1st the amalgamation of the Bank of Ottawa with the Bank of Nova Scotia was completed, the assent of the governor-general having been given on the previous day. All branches of the former Bank of Ottawa are now doing business as branches of the Bank of Nova Scotia.

OBITUARIES

Mr. F. L. Cox, for some years assistant manager of the Canada Life Assurance Co., at Halifax, died on April 28th, after a week's illness of pneumonia.

Mr. William Hyslop, Jr., president and manager of the Hyslop Bros., Ltd., Toronto, dealers in automobiles and bicycles, died at Wellesley Hospital, on April 26th, with acute influenza.

Mr. Jas. McGregor, for many years manager for Canada, of the Commercial Union and Palatine Insurance Companies, died on April 24th, after an illness extending over two years.

Mr. James W. Leonard, head of the Toronto Terminal Company, and well-known throughout Canada as an able and experienced railway man, died on April 28th, at Brampton, where he was residing. He was formerly general superintendent of the Canadian Pacific Railway, in Toronto, and was for a number of years vice-president of the company.

Mr. Henry Seton Strathy, one of Toronto's leading bankers, and a figure in banking circles for over fifty years, died suddenly at his home in the St. George Apartments, St. George Street, Toronto, on April 26th, in his 86th, year. He was closely indentified with Canadian Financiers from 1850 until his retirement in 1907. Born in Edinburgh, Scotland, in 1832, he came to Canada in his youth and commenced his business career in the firm of Hope, Birrel and Company of London, Ont. Entering the Gore Bank, he served with it from 1850 until he became London manager of the Canadian Bank of Commerce in 1867. He became general manager of the Canadian Bank of Commerce, resigning in 1885 to form a partnership with his nephew, Gordon Strathy, out of which developed the Traders' Bank of Canada. He was its first general manager, and remained with it until his retirement. He was a councillor of the Canadian Bankers' Association.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first three weeks in April, 1919:—

Canadian Pacific Railway.

	1919.	1918.	Inc. or dec.
April 7	$2,921,000	$2,984,000	— $ 63,000
April 14	2,868,000	2,935,000	— 67,000
April 21	3,037,000	3,016,000	+ 21,000

Grand Trunk Railway.

	1919.	1918.	Inc. or dec.
April 7	$1,274,553	$1,012,494	+ $262,059
April 14	1,263,483	1,058,517	+ 204,966
April 21	1,248,310	1,012,494	+ 235,816

Canadian National Railway.

	1919.	1918.	Inc. or dec.
April 7	$1,450,444	$1,569,763	— $119,319
April 14	1,583,458	1,671,776	— 88,318
April 21	1,551,366	1,686,046	— 124,680

SASKATOON MUTUAL FIRE INSURANCE

The 1918 business of the Saskatoon Mutual Fire Insurance Co. showed an increase of about 85 per cent., as compared with 1917. The total insurance in force at the end of the year was almost $24,000,000. Assessments totalled $49,131 and cash premiums, $48,584; these, with the other receipts, made a total of $113,757. Losses to the amount of $42,114 were paid and expenses amounted to $38,772. Total assets are $286,136, including premium notes with a net value of $178,066. Investments in securities of a public character totalled, with accrued interest, $62,527; these include war loans, Saskatchewan bonds and rural telephone bonds. The Saskatoon building is valued at $20,000 and the unpaid assessments constitute an asset of $14,775. The liability statement shows an unearned premium reserve of $55,816. There is a balance of assets over liabilities of $227,773.

AN OUTSTANDING FINANCIAL EVENT

THE coming budget speech of the Minister of Finance is looked forward to as one of the most momentous in the history of Canada because it comes at a critical moment in our economic history. The new political and economic developments of the past year have been of more importance in this respect than is a change of government because the events of the year will introduce, and are introducing factors which will more deeply effect the political system.

One member intimated in the House of Commons a few days ago that the unrest in the country was due to the delay in the budget speech; however, this may be it is desirable that it be given at an early date. The postponement has been due to the prolonging of the peace conference which delayed the return of the Canadian Premier and it is possible that he may not be back by the middle of May, about which time the Finance Minister expects to give the speech. The actual changes introduced will not necessarily be great. It is not expected that any permanent alteration in the tariff will be made and if taxation measures are an important feature they will undoubtedly take the form of increases.

As the figures given in the article in this issue on the finances of the Canadian railways would indicate the railroad question is one of the largest issues in national politics, and their success or failure will have a substantial bearing upon Dominion taxation.

The debate which took place in the House of Commons on April 28th, on the bill to incorporate the Canadian National Railway Company was one of the most comprehensive in recent years. In fact the bill was finally put through only by the process of closure. The effect is to unify all the lines owned by the Dominion Government. The Grand Trunk Pacific is, of course, still operated by the Minister of Railways.

The National Railway system is thus made directly responsible to the Dominion Government as proprietor, and on the subject of rates, traffic, etc., its standing is just the same as that of the other Canadian roads; it will be subject to the rulings of the Dominion Board of Railway Commissioners. There is this important distinction, however, which cannot be done away with no matter how independent a government road is made, that any deficits come from the public purse, whereas in the case of a private road the management must go to the shareholders. The control of the government railway is somewhat removed from parliament and becomes almost entirely a matter for the executive branch, whereas if the lines were operated through the Department of Railways as was the case with the Intercolonial, the gross expenditures and revenues would come up annually in the estimates.

General sentiment in Canada is not in favor of public expenditures merely for the purpose of relieving unemployment. A policy of this kind would have the effect of sinking the public railroads more deeply in debt. If they are to compete with the Canadian Pacific Railway and other private systems a policy of rigid economy must be pursued.

The reports from Great Britain to the effect that a policy of partial protection may be introduced there, have an important bearing on the tariff question here, and if the outlook for the success of the league of nations does not seem good, a distinct effort to solidify the empire by means of tariff changes will probably be made. At the same time the feeling between Canada and the United States at the present time is of the very best, and no government will do anything which would antagonize the latter.

A FINANCIAL FACTOR IN RECONSTRUCTION

NOW that the demand for farms and for loans for increasing farm production is gradually coming back to normal the valuable functions performed by loan companies in financing work of this kind will be increasingly apparent. In fact, it is doubtful if the service which has been rendered in the past by our land mortgage corporations has been fully appreciated by the people of Canada. This important group of companies numbers about forty, some of them being older than confederation and most of them dating back some distance before 1900. The provincial governments have in many cases authorized them to act as legal depositaries for trust funds.

Among the useful functions performed by these institutions are the following:—

1. A direct means of bringing hundreds of millions of money into this country to assist in developing its resources, along safe lines.

2. A permanent place where bona-fide borrowers, with adequate real estate security, can always secure reasonable accommodation.

3. A regular source whence, week in and week out, debentures or bonds can be purchased in any denomination, for terms varying from one to five years, secured by carefully selected improved real estate.

4. A constant friend of the farming community, ready to assist in breaking new ground, building new barns, and lending money to buy additional stock or farm implements, thus contributing to increased production.

5. A safe depository for savings, large or small, whether subject to withdrawal on call or definitely left for fixed periods, at good rates of interest, and secured by all the assets of the companies.

6. A special place where people, wishing to own their own homes, can either borrow the money to buy them, or else procure assistance to build them, under the expert supervision of the companies' own trained inspectors.

7. One of the strongest bonds of union between eastern, central, and western Canada, acting as middleman between the European and eastern lender and the western borrower and therefore interested in the advancement and prosperity of all who have occasion to employ borrowed capital.

It is anticipated in New Westminster, B.C., that the shipbuilding plant at Poplar Island will be closed down shortly; this will mean the discharging of 400 employees and the loss of a payroll of $60,000. The revival of wooden shipbuilding, however, was purely a war time phenomenon and the mushroom growth of such industries could not be expected to be permanent.

PRICE FIXING AND THE MIDDLEMAN

THAT the railroads, street railway, telephone and other companies operating services, which are to some extent at least monopolistic in character, are not the only organizations whose rates should be controlled by the public, is the contention of Mr. J. L. Payne, writing in the Toronto Globe. He maintains that the "spread" between the price which the farmer receives for such commodities as grain, meat and dairy products is too great and that organizations handling the distribution of these products may just as appropriately be subject for public control at least to the extent of the regulation of price. There is now no question, he says, as to the rights of the public in relation to street railway fares, freight charges, passenger rates, telegraph and telephone tolls, postage, water service, etc., and we never hear the law of supply and demand mentioned in connection with these services.

Assuming that the distribution of the farm products referred to has been organized to such extent as to partake of the nature of a monopoly, it is quite just that the prices should be fixed. Certainly as far as the primary farm production is concerned, the law of supply and demand still operates, the price of the principal commodities being fixed in a world market. The farmers themselves are not organized in such a manner as would permit of their securing more than the law of supply and demand, if we may continue to use this expression, warrants. This limits the investigation to such "middlemen" as packers, jobbers, and wholesale dealers in these commodities. Such investigations as have been carried on in Canada and the United States into their operations have not found prices to be higher than is necessary to maintain that production which is adequate for present requirements. What such investigations have revealed is that there are some producers who, through specially favorable conditions of production, are able to make large profits; this was emphasized in the report on milling in Canada. Such a state of affairs is not peculiar to these industries but is commonly found in all branches of competitive industry. The practicable and equitable means of making such companies return a portion of their gains to the public is by taxation of profits. The middlemen (and it is only those who buy and sell without changing the form of the commodity, that can be properly called middlemen) have been subject to much abuse during these years of rising prices. The services which they perform, however, are essential, and it is because they are essential and useful to the consuming public that such business organizations have found a place in the competitive economic system. The middleman acts in the first instance as a distributor and in the second instance as the equalizer of business conditions over a wide geographical area. His services of the first kind are as useful as those of the stock or bond underwriter, and by investing and holding in store he acts like the speculator who purchases a security in the expectation of a market rise and whose dealings equalize prices over a period of time covering varying business conditions.

BANKERS' TRUST CO. OPENS OFFICES IN MONTREAL

The formal opening of the offices of the Bankers' Trust Co., was held in the Merchants Bank Building, St. Peter Street, Montreal, on May 1st. The new organization is capitalized at $1,000,000, and is closely affiliated with the Merchants Bank. Fifteen members comprise the board of directors as follows:—

K. W. Blackwell, president; D. C. Macarow, vice-president; A. J. Dawes, F. Robertson, A. B. Evans, F. H. Wilson, G. L. Cains, T. Long, T. Ahearn, F. Orr Lewis, T. E. Merrett, J. D. G. Kippen, J. M. Kilbourn, W. A. Meldrum, W. B. Leitch and Lt.-Col. J. R. Moodie. James Elmsly is manager of the company, and J. M. Kilbourn is secretary.

The company announces that it will carry on a regular trust company business, acting as executor, administrator and trustee under wills, as trustee under bond issues; as guardian of estates of minors and of property of incompetents; as assignees and liquidator for insolvent estates; as general agent; as transfer agent for corporations; as registrar for corporations; and other branches of trust company business.

The Montreal Stock Exchange seat held by R. O. Johnson, of the firm of Greenshields and Co., has been sold for a price stated to be $26,500. It is understood that the purchaser of the seat is John Pitblado, of J. Pitblado and Co., who last week made application to the exchange for membership.

GRAIN BOARD OF APPEAL

The Winnipeg Board of Trade and the Winnipeg Grain Exchange are endeavoring to have the new board of appeal on grain matters established in Winnipeg. It is urged that ninety per cent. of the controversies of this kind originate either in Winnipeg or west of Winnipeg, and the hearing of these in the east, would entail great trouble and expense to the firms concerned.

ENEMY SHARES VESTED IN GOVERNMENT

On April 23rd, the secretary of state for Canada was empowered to have 143,676 shares of C.P.R. stock held by or on behalf of enemy citizens and registered on the company's New York register, vested in the minister of finance as custodian. The value represented is $22,000,000. All interest accrued upon the shares since August 4th, 1914, was likewise transferred.

On April 26th further enemy-owned stock to the value of approximately $500,000 was taken over in a similar manner. This lot included shares in several banks and industrial corporations.

FIRE PREVENTION BILL

The Dominion bill to amend the criminal code respecting fire prevention has passed both houses of parliament and will become law shortly. Much criticism was directed at it during the second reading, and when it came up for third reading in the House of Commons, the opposition leader moved a six months' hoist. The motion, however, was defeated.

It was maintained by some of the members that the comparisons frequently used misrepresented the fire losses in Canada as compared with European countries, because in the case of the latter the wealth was not as great and the method of building construction was entirely different. Hon. Mr. Meighen pointed out, on the other hand, that the population in Europe was denser and that fire losses usually increased in accordance with the density of population.

HOME INDUSTRY CAMPAIGN IN BRITISH COLUMBIA

The Manufacturers' Association of British Columbia has inaugurated a home industry campaign. At a meeting held on April 22nd, Mayor Gale of Vancouver stated that there were from 750 to 1,000 general factories in the province. These factories, however, employ only about 18,000 hands and the value of the annual output is $30,000,000, while the province imported $20,000,000 last year. He maintains that the retail merchants are not supporting the local manufacturers properly.

At a meeting of the retail section of the Vancouver Board of Trade, Mr. James Ramsay, president of the Provincial Manufacturers' Association, gave some figures regarding local industry. He said that in spite of the adverse conditions resulting from high freight rates and labor difficulties there were resources of raw material and power in the province which would attract industry. "In the population of British Columbia, numbering about 400,000, there is a little more than 250,000 Anglo-Saxons; 20,000 Indians; 30,500 Asiatics and about 89,000 Europeans. In the various manufacturing plants throughout the province there are 66,000 persons employed. Lumber industries employed 18,000; fishing and kindred industries, 13,000; agriculture, 8,000; shipbuilding and allied industries, 10,000; general manufacturing, 14,000, and transportation and power, 4,000. There is a need of the manufacturers in this province specializing in their manufacturing. In the past there had been too much jumping from one business to another." In regard to the retailers Mr. Ramsay said that from eighty to ninety per cent. of the goods shown in Vancouver stores are of eastern manufacture.

CANADIAN PACIFIC TO CONSTRUCT LINES IN WEST

The bill to authorize the Canadian Pacific Railway to construct several branch lines in Western Canada was considered by the Railway Committee of the Commons, on April 29th, with Mr. D. C. Coleman, manager of western lines, in attendance to make any explanations asked for by the members of the committee. All the clauses in the bill were passed with but little discussion. Mr. Coleman explained it was proposed to commence construction this year.

TRADE STATEMENT FOR YEAR SHOWS DECREASE

A decrease of $372,322,922 in the total of Canadian trade is shown for the fiscal year ended March 31, as compared with the previous year, is shown by the statement issued through the customs department. The statement shows that the value of Canada's trade during the year ending with the 31st of last month was $2,176,378,717, while in the previous year it amounted to $2,548,691,639. The decrease in exports, amounting to $332,413,982, is largely responsible for the falling off in the total amount of Canadian trade value. For the last fiscal year domestic merchandise was exported from Canada to the value of $1,207,613,806, while in the previous year the total value of exports was $1,540,027,788. Imports declined $46,078,415 during the past year the totals being: 1918-19, $916,443,432; 1917-18, $962,521,847. The total of duty collected during the last year was $158,044,456, as against $161,588,465, or a decrease of $3,544,009.

The exports of domestic agricultural products during the past fiscal year reached a total value of $269,819,833, as compared with $567,713,584 in the previous year. This is a decrease of $297,893,751. There was a decline of $87,318,248 in the value of domestic manufactured articles exported, the total for last year being $549,284,268, while in the previous year it was $636,602,516. Slight increases are shown in the total value of minerals and fish exported, and the exports of animals and their products was greater last year than the previous year by $25,000,000. The export of forest products last year was about $20,000,000 greater in value than it was in 1917-18.

YIELDS ON INVESTMENTS IN STOCKS AND BONDS

The following table of investment yields of stocks and bonds has been compiled for *The Monetary Times* by Messrs. Morrow & Jellett, Members Toronto Stock Exchange, 103 Bay Street Toronto:—

April 30th, 1919.

	Div. Rate	Price about	Yield about

Alberta Workmen's Compensation Board

First Year's Report Shows Large Surplus of Assessments Over Payments and Expenses—Amount of Pay Rolls Subject to Assessment Is $5,540,512

THE first annual report of the Alberta Workmen's Compensation Board for the year ended December 31st, 1918, has just been made public. The report reviews the organization and operation of the board as follows:—

The Workmen's Compensation Act, 1918, was passed at the 1918 session of the legislature, and became effective on August 1, 1918, in so far as it applies to industries coming within the scope of schedule 1, and on January 1, 1919, in so far as it applies to industries coming within the scope of schedule 2. Practically all industries where manual labour is employed are now within the scope of this act, with the exception of railways, the farming industry and labor casually employed. When any industry comes within the scope of this act, the Workmen's Compensation Act, which became effective in 1908, is automatically repealed, in so far as it applies to that industry.

On August 22, 1917, a commission, composed of John T. Stirling, chairman, Walter F. McNeil and James A. Kinney, was appointed by order-in-council to investigate conditions as they existed in the province at that time, with reference to compensation for injuries to workmen. This commission submitted a report in the form of a suggested act with the evidence collected, attached. This report, among other things, recommended that all industries should be brought within the scope of the act, and all suggestions contained therein were practically adopted, with the exception that employment in connection with railways was exempted.

On April 29, 1918, the Workmen's Compensation Board, which was composed of the same personnel as the commission above referred to, was appointed, and on May 13, 1918, Mr. F. A. Noble was appointed secretary by the board, and proceeded to arrange for necessary data being collected to enable the board to arrive at a decision as to what premiums should be charged in connection with the industries coming within schedule 1.

For the purpose of creating a fund, the sum of $5,000 was obtained as a loan from the provincial government, this sum being repaid to the government on July 25, 1918, with six per cent. interest.

An assessment was made on July 17, 1918, of three per cent. on the average monthly pay-rolls of the industries coming within the scope of schedule 1, using as a basis the twelve months ending May 31, 1918, and since that time assessments have been made every two months at the rate of three per cent. on the average monthly pay-rolls. The total amount collected by the assessments, with interest on same, from the commencement of the act up to and including December 31, 1918, was $94,995.04. Of this amount $13,441.64 was expended in payment of claims, $269.80 on medical aid and $10,378.82 in payment of expenses and equipment, leaving a balance of $70,904.78. Of this balance $30,000 was invested in Dominion of Canada 1918 Victory bonds, leaving a balance in the bank on December 31, 1918, of $40,904.78.

The board is indebted to the provincial government for the use of office accommodation which it occupies in the Qu'Appelle Building, Edmonton. The furnishings of this office, however, including furniture and other equipment, have been paid for by the board.

During the period the act has been in operation up to and including December 31, 1918, there were 943 accidents reported to the board, and of these 362 were finally disposed of by payment of compensation, 284 on which no compensation was payable, leaving 297 to be finally disposed of.

The total amount of assessments made against employers under schedule 1 was $96,322.61, of which $94,638.34 was collected, leaving a balance on December 31, 1918, of $1,684.27 to be collected.

The following regulations have been made from time to time by the board and are now in effect:—

1. In addition to the report required to be forwarded to the board in accordance with the provisions of section 62, subsection 2 of the act, the physician or surgeon attending any workman shall forward to the board progress reports on the first and fifteenth days of each month during the time such injured workman is unable to resume work as a result of injuries sustained by him as stated in the report first mentioned herein, and shall also forward to the board a final report within three days after said workman is, in his opinion, able to resume work. All reports required to be provided in accordance with this regulation shall be on a form which may be prescribed from time to time by the board.

2. Every employer, in addition to the report required to be forwarded to the board in accordance with the provisions of section 62 of the act, shall also forward, on a form prescribed by the board, within 24 hours after the same comes to his knowledge, notification that the injured workman has returned to work, or is, in his opinion, able to return to work.

3. All claims for compensation, in accordance with section 42, subsection 3, shall be made on forms which may be prescribed from time to time by the board.

4. Every employer included in the Workmen's Compensation Act shall keep posted in a conspicuous place on the premises where the work is carried on, where it may be seen, such notices as the board may, from time to time, require to be posted.

5. No payment under section 45 of the Workmen's Compensation Act, 1918, will be considered by the board unless sanction has been given by an officer of the board for an operation to be performed or other treatment to be given, or unless it can be proved, to the satisfaction of the board, that, in an extreme emergency case, it is necessary to perform such operation or give such treatment before such sanction could be obtained.

Statistics of Operations

A summary of the board's work as at December 31st, 1918, is given below. In the report a number of tables are included giving details of the operations:—

Number of employers within the scope of the act	264
Number of employees within the scope of the act	10,259
Number of accidents reported	943
Number of accidents reported and for which no claims were made	281
Number of accidents for which claims were made	662
Number of claims which have been finally disposed of by payment of compensation	362
Number of claims which have been finally disposed of without payment of compensation	284
Number of claims on which further payments have to be made	75
Number of accidents reported which are still under consideration and on which no payment has been made	222
Total amount of pay-rolls on which assessments were made	$5,540,512.23
Total amount of assessments made	96,322.61
Total amount of assessments collected	94,638.34
Total amount of assessments still to be collected	1,684.27
Amount of expenditure in connection with fatal accidents	379.35
Amount of expenditure in connection with non-fatal accidents	13,062.29

APRIL FIRE LOSSES

Large Decrease for the Month and Year—Total Fatalities Increase

The Monetary Times' estimate of Canada's fire losses during April, 1919, is $1,089,070, compared with $2,154,095 in March, and $3,240,187 in April, 1918. The following is the estimate of the April fire losses:—

Fires exceeding $10,000	$ 783,500
Small fires reported	78,300
Estimate of unreported fires	227,270
Total	$1,089,070

The Monetary Times' record of the past three years and this year to date shows the following monthly losses:—

Month.	1916.	1917.	1918.	1919.
January	$ 1,649,217	$ 1,918,660	$ 2,688,556	$ 3,915,290
February	3,275,600	2,009,953	2,243,762	1,091,834
March	1,406,501	2,050,650	1,682,286	2,154,095
April	1,460,437	1,317,714	3,240,187	1,080,070
May	1,850,205	1,163,110	3,570,014	....
June	494,557	1,184,627	3,080,982	....
July	3,039,634	1,101,734	3,369,684	....
August	1,057,109	1,230,183	3,110,445	....
September	981,703	1,301,700	917,286	....
October	1,077,815	704,605	5,119,145	....
November	923,235	959,049	1,059,580	....
December	3,271,496	5,144,100	1,733,917	....
Totals	$20,487,509	$20,086,085	$31,815,844	$ 8,241,289

The following is a list of fires in April at which the loss amounted to $10,000 and over:—

Wellesley Township, Ont., April 2, barn of C. V. Gies, $10,000.

Toronto, Ont., April 2, storage warehouse of the Imperial Extract Co., $15,000.

Pierson, Man., April 23—Falling into fire	1
Lindsay, Ont., April 24—Fell into burning bonfire	1
Montreal, Que., April 24—Trapped in burning house	1
Haileybury, Ont., April 26—Trapped in burning house	1
Toronto, Ont., April 28—Clothing caught fire from heater	1
Total	27

COMMERCIAL FINANCE CORPORATION, LTD.

A company has been formed under Dominion charter with the above name, and head office in Toronto. Its official prospectus states that it is an all Canadian corporation, organized for the purpose of purchasing conditional sales agreements, notes and other securities created by the sales of automobiles, trucks, tractors and aeroplanes. This is not an untried plan as there are similar institutions in large cities of the United States. The plan is that the corporation will purchase from a dealer, on a basis shown in a schedule supplied, conditional sales agreements. Such an investment is secured in four ways:—

(1) By a conditional sale agreement placing the ownership of the vehicle in the corporation until the last note shall have been paid.

(2) In each case a reputable person signs notes for the amount owing on the vehicle.

(3) A substantial dealer endorses the notes and is responsible for their punctual payment.

(4) Every vehicle so handled is insured and the policy is made payable to this corporation.

The authorized capital of the company is $2,000,000, but it is probable that only $500,000 will be raised for the present. Seven per cent. cumulative preference shares are being offered direct to the public at par with a bonus of 50 per cent. common stock.

The directorate consists of Sir Henry M. Pellatt, Chas. Bauckham, A. E. Dyment, Lieut.-Col. Geo. A. Stimson, Harold R. Frost, E. M. Dillon and Alfred E. Irwin, managing director. Mr. Irwin comes from Detroit and has been connected with similar companies in the United States.

Canadian Railways and the National Debt

Acquisition of The Grand Trunk and of the Grand Trunk Pacific Would Increase Dominion Debt By One Third—Annual Deficit Probably $20,000,000—Summary of Financial Obligations of Roads

By W. T. JACKMAN, M.A.

THE railway situation in Canada, since the beginning of the war, has been changing rapidly; and, instead of an era of private initiative and private profit in railway enterprise such as we witnessed before 1914, we have entered upon a period in which government activity in this direction is regarded by some as the panacea for all our ills in transportation. As an outcome of this changed point of view—brought about, perhaps, as much by the war-time results of governmental participation in transportation and industry in allied countries, as by the depleted finances of some of our own railways on account of the war—the government at Ottawa, on October 1st, 1917, took over the Canadian Northern Railway, through the purchase of the 600,000 shares of its stock which were then outstanding, at the price of $10,000,000. When this transaction took place, the amount of the company's liabilities were such as to increase the country's funded debt by over three hundred and twenty-seven million dollars.[1]

In the summer of 1918, negotiations were carried on by some members of the Cabinet with the Grand Trunk directorate in London, looking toward the acquisition of this line and its subsidiary, the Grand Trunk Pacific; but such conferences were fruitless of results and left the whole matter in a very unsatisfactory condition. On March 4th, 1919, the Grand Trunk Pacific Railway Company notified the government that, on account of insufficient funds, it could not continue to operate beyond March 10th; and upon receipt of this letter, on March 7th, an Order-in-Council appointed the Minister of Railways and Canals as receiver for the Grand Trunk Pacific in order to keep the line in operation.[2] This action, on account of its vital relation to the Grand Trunk, has brought the latter again into direct relations with the government; and measures are now being taken by which the Grand Trunk system, as well as the Grand Trunk Pacific, may soon become an integral portion of the Canadian National Railways. The purpose of the present article is to consider the effect of this probable transference of ownership upon the country's financial position.

Looking, first of all, at the condition of the Grand Trunk finances; what are its bonded debt obligations? Some of these have matured during the past year, but those which are still outstanding constitute a heavy burden,[3] Changing from pounds to dollars, at the rate of £1 = $5, they may be listed as follows:—

1.	Grand Trunk Railway perpetual debenture 5s, £4,270,375	$ 21,351,875
2.	Grand Trunk Railway perpetual consolidated debenture 4s, £24,624,455[4]	123,122,275
3.	Grand Trunk Railway second equipment 6s, £373,000	1,865,000
4.	Great Western perpetual debentures 5s, £2,723,080	13,615,400
5.	Northern Railway of Canada third preferred debenture 6s, £14,500	72,500
6.	Northern Railway of Canada perpetual debenture 4s, £308,215	1,541,075
7.	Canada Atlantic first mortgage 4s, £3,287,690	16,438,450
8.	Grand Trunk Railway equipment 4½s, Series A, $2,167,000 Series B, 2,016,000 Series C, 1,572,000	5,755,000
9.	Grand Trunk Railway 5½ per cent. secured notes, unmatured, £2,500,000	$ 12,500,000
10.	Wellington, Grey and Bruce bonds, £62,400	312,000
	There are also the following issues:—	
11.	Matured bonds not presented for payment, £700	3,500
12.	Collateral car trust 5s, due Whipple Car Co., guaranteed by Grand Trunk Railway	225,000
13.	New England Elevator Co. first mortgage 3¾s, guaranteed by Grand Trunk Railway	250,000
14.	Montreal Warehouse first mortgage 4s, guaranteed by Grand Trunk Railway	1,000,000
		$208,312,875

From the foregoing it will be seen that the total bonded debt of the Grand Trunk, exclusive of the Grand Trunk Pacific, is approximately $208,312,875. When we add to this the amount of the Grand Trunk guarantees of the Grand Trunk Pacific securities, as given below, namely, $97,301,252.86, we get a total of $305,614,127.86 as the amount of the Grand Trunk Railway Company's bonded obligations for its own system and the Grand Trunk Pacific.

Maintenance Has Been Neglected

Should the government decide to take over the Grand Trunk, its capital obligations would include not only this amount of bonded debt but also the large sums that are essential to put the property into good operating condition and bring its facilities up to standard requirements. When we contrast, for instance, the relative amounts spent upon maintenance of way and structures in recent years by the Grand Trunk and the Canadian Pacific, it is evident that vast retrenchment has been put into effect by the former in order to survive the emergency of war time. For this division of its expenses, to mention only one example, in 1915-16 the Grand Trunk spent only $1,335 per mile of line, while the Canadian Pacific expended $5.061 per mile;[1] in other words, the expenditure of the former was only about one-fourth that of the latter. In the same year, for maintenance of equipment, the Grand Trunk spent but $1,850 per mile of line while the Canadian Pacific expended $5,759 per mile; that is, the former disbursed for this purpose less than one-third as much as the latter.[1] It is clear from a study of the accounts and statistics for a series of years, as indeed has been acknowledged by both the present president of the company and his predecessor, that there has been great deficiency in providing adequate upkeep of roadway and equipment. President Kelly, in 1917, submitted to the Railway Inquiry Commission a statement of the company's needs in regard to rolling stock and roadway, in which he declared that for these purposes alone they should have $21,181,345.07 to bring the railway up to par.[2] I have spoken of this under the heading of "capital obligations." Had the amount been provided by the company in the ordinary course of operation it would have been a charge against revenue; but if it should have to be done by the government it would be really a part of its capital expenditure. Moreover, the commission reported in 1917, that the existing plant was wholly inadequate for the traffic re-

---

[1] Railway Statistics of the Dominion of Canada, 1915-16, p. 29.

[2] Hansard, March [illegible], 1919, p. [illegible].

[3] [illegible] information here has been taken from Moody's "Analyses of [illegible] Railroads," 1917, pp. [illegible], and the Annual Report of the Grand Trunk Railway Co. for 1917.

[4] [illegible] of these have been pledged for security of Nos. [illegible]

[1] "Railway Statistics," 1915-16, p. 92. But lest it be thought that the Grand Trunk has been allowing its property to go to ruin, perhaps the contemplation of the following figures may serve as a corrective. These have been worked out from the statistics returned to the government for the year 1915-16, the year when the effects of the war were probably most evident.

Expenses for Repairs and Renewals.

Road.	Average amt. spent per steam locomotive.	Average amt. spent per passenger car.	Average amt. spent per freight car.
C. P. R.	$2,320	$2,235	$39
G. T. R.	2,605	2,293	13

[2] Report of the Railway Inquiry Commission, p. xxxiii.

quirements and that $30,150,500 more capital was necessary to make the requisite additions.[1] If we add these two latter amounts, together equal to $51,331,845.07, to the above amount of the Grand Trunk bonded obligations for itself and its subsidiary, $305,614,127.86, we shall get $356,945,972.93 as the amount for which the government would have become responsible had it taken over the Grand Trunk at the end of 1916. But if this course should be taken by the end of the present year, the above-mentioned amount of the government responsibility will be greatly increased by several factors. In the first place, there will have to be an additional sum required for betterments, rolling stock and extensions during the three years 1917-1919. Then, the expense of these things, if carried out now, would be fully one-half more than the same program would have cost before the war. And, lastly, the amount would have to be increased by the sum which the government would have to pay the shareholders for their equity in the property, should the method of arbitration be adopted as in the case of the Canadian Northern. These three additions to the above figure would indicate that, as a result of taking over the Grand Trunk, the Dominion government would have to assume capital obligations to an extent approximating $400,000,000.

Annual Capital Charges

Let us look next at the annual charge which must be borne by the government as a consequence of its acquisition of this road. The interest upon the above bonded obligations may be given in the same order as follows, allowing £1=$5:—

		Amount of annual interest.
1.	Grand Trunk Railway perpetual debenture 5s, £4,270,375	$ 1,067.594
2.	Grand Trunk Railway perpetual consolidated debenture 4s, £24,624,455	4,924,891
3.	Grand Trunk Railway second equipment 6s, £373,000	111,870
4.	Great Western perpetual debenture 5s, £2,723,080	680,770
5.	Northern Railway of Canada third preferred debenture 6s, £14,500	4,350
6.	Northern Railway of Canada perpetual debenture 4s, £308,215	61,643
7.	Canada Atlantic first mortgage 4s, £3,287,690	657,538
8.	Grand Trunk Railway equipment 4½s, $5,755,000	258,975
9.	Grand Trunk Railway 5½ per cent. secured notes, unmatured, £2,500,000	687,500
10.	Wellington, Grey and Bruce bonds, £62,400[2]	12,855
11.	On the matured bonds there would be no interest payment.	
12.	Collateral car trust 5s, $225,000	11,250
13.	New England Elevator Co. first mortgage 3¾s, $250,000	9,375
14.	Montreal Warehouse first mortgage 4s, $1,000,000	40,000
	There is also "Annual interest sanctioned but unexercised"	500,513
	Making in all	$ 9.029.124
	To this we must add:—	
(a)	Rentals due for leased lines, £155,206[4]	776,030
(b)	Interest on $15,000,000 Grand Trunk Western 1st mortgage 4s[5]	600,000
(c)	Interest on Grand Trunk Pacific bonds guaranteed by Grand Trunk Railway, viz.,	

---

[1] Report of the Railway Inquiry Commission, p. xxxiv.

[2] These bonds have a variable interest return: but I have taken the amount of interest which was paid in 1917, namely, £2,570 17s. 7d. (Annual Report of Grand Trunk Railway Company, 1917, p. 10).

[3] Part of this is by Acts of 1911 and 1912 set aside for specific purposes and part is interest on pledged securities. (Annual Report of the Grand Trunk Railway Company, 1917, p. 11).

[4] Annual Report of the Grand Trunk Railway Company, 1917, p. 32.

[5] The interest on these bonds is guaranteed by tht Grand Trunk Railway Company. (Moody: "Analyses of Investments. Steam Railroads." 1917, p. 1243).

But even this amount of annual interest and rental charges is not all. The Grand Trunk has guaranteed the interest upon the Central Vermont Railway first mortgage four per cent. bonds ($10,732,000 outstanding) to an amount not to exceed 30 per cent. of the gross earnings from the interchange of traffic between the two railways.[1] This would probably give a variable amount from year to year; but no mention is made of it in the financial statements of the parent company and I have been unable to find it in any other source. Then there are the dividends upon £12,500,000 guaranteed stock, which at the rate of four per cent will net $2,500,000.[2] Adding this to the foregoing $14,394,404 we get $16,894,404 as the annual fixed charges to be met by the Grand Trunk, exclusive of the guarantee to the Central Vermont and of the dividends to be paid upon the three classes of preferred stock.[3] Should the government acquire the Grand Trunk, the annual charges of the latter would have to be assumed by the former; and in case the government decided to take the road on the basis of a yearly rental payment the amount of this would increase the above figure by a sum which would make the obligations on account of this railway at least $20,000,000 a year.[4]

Just Meets Expenses and Charges

The next question one naturally asks is: What is the earning power of the company? The income account for the years 1911-1917 shows that after the payment of operating expenses, interest on bonds and debentures, rentals of leased lines, and a dividend of four per cent. on the guaranteed stock, together with a five per cent. return on the first and second preferred stock and a nominal rate of return on the third preferred stock (except in the years 1914 and 1915, when no dividend was declared on any of the preferred stock), the surplus in any case was very small, and during this period there have been at least two years of deficits. The largest surplus was £26,279 14s. 5d. in the year 1917.[5] This means that the revenues of the company are but little more than enough to pay the expenses of operation and the fixed charges on capital. It will be remembered, as we have already said, that maintenance expenses for line and equipment are greatly in arrears, that no depreciation fund has been set aside to take care of equipment, and that practically nothing has been done to establish a fund as a reserve for contingencies. According to the statement of former President Chamberlin, five per cent. of the cost of the equipment should be set apart annually for replacement of this capital; and for the Grand Trunk this would necessitate an annual contribution out of operating revenue equal to about $2,750,000. Were even this outlay provided for, it is evident that the surplus of £26,279 mentioned above would be converted into a heavy deficit. Besides, if the operating ratio of the Grand Trunk under government management should increase, as has been the case with the Canadian Northern Railway since it came under the government, it is not difficult to foresee that in the near future the disbursements from the Dominion Treasury would have to make good the inevitable deficits in operation.

Grand Trunk Pacific

Turning now to the case of the Grand Trunk Pacific, we give only the great outstanding facts concerning the finances of this company. Its contract with the Dominion government required the latter to guarantee its bonds for the prairie section to an amount not exceeding $13,000 per mile, and for the mountain section to an amount equal to three-fourths of the entire cost of that section. The bonds guaranteed by the government were secured by a first mortgage covering the undertaking from Winnipeg to Prince Rupert; and the company's bonds guaranteed by the Grand Trunk Railway Co. were secured by a second mortgage. It was thought that the proceeds of these two bond issues would be ample to complete the Grand Trunk Pacific, and, under the agreement, the latter was then to lease and operate the National Transcontinental, which had been built by the government, on the payment of a rental (after the first seven years) equal to 3 per cent. of the cost of construction. Because of the company's lack of funds, in 1909, the Dominion government, on the guarantee of the Grand Trunk, advanced the Grand Trunk Pacific $10,000,000 at 4 per cent. But even the proceeds of this loan, which the government bought at par, proved insufficient;[1] and in 1913 the government made a further loan, on the guarantee of the Grand Trunk, to the extent of $15,000,000 at 4 per cent. As in 1909, the government bought the bonds at par.[2] Then came a change of the Grand Trunk policy, when it declared that its financial condition would not permit it to guarantee any further loans of the government to the Grand Trunk Pacific; but as the latter was still unfinished, the government came to its rescue and guaranteed a further issue of not exceeding $16,000,000 of the company's 4 per cent. bonds without the Grand Trunk security. Part of these were sold, and another part ($7,500,000) was issued and pledged to the government as security for a cash loan of $6,000,000.[3] The company also issued $9,720,000 of 5 per cent. notes, guaranteed by the Grand Trunk Railway Co., and further secured by a deposit of $14,580,000 debenture stock. In 1916, the government voted an $8,000,000 loan to the Grand Trunk Pacific on a mortgage; this was to pay the interest on the company's securities which had been guaranteed by the government and the Grand Trunk, and also the deficit in operating expenses—for the Grand Trunk insisted that it should not be called on to make up anything for the operating expenses of its subsidiary.[4] In the years 1917 and 1918 parliament voted $7,500,000 each year to make up the operating deficit and to pay the interest on bonds which had been guaranteed by both the government and the Grand Trunk. These loans of 1916, 1917 and 1918 were secured by a blanket mortgage on the Grand Trunk Pacific, but were not guaranteed by the parent company. It would seem from what we have just said and from the fact that the Grand Trunk has requested the government to continue this yearly aid, that the Grand Trunk directors virtually desire to wash their hands of the Grand Trunk Pacific and leave the government to care for it.[5]

In order to present a complete conspectus of the finances and liabilities of the Grand Trunk Pacific, perhaps it will be desirable to indicate in the following tabular arrangement the measure of these liabilities and the nature of the guarantees under which they were issued:—

1. Dominion government guarantees, etc., for Grand Trunk Pacific securities:—

---

[1] Moody: "Analyses of Investments. Steam Railroads," 1917, p. 1248.

[2] "Annual Report" of the Grand Trunk Railway Company, 1917, p. 27.

[3] For some years up to the end of 1913 a five per cent. dividend was declared upon both first and second preferred stock, but the dividend upon the third preferred ranged from one-quarter to one and a half per cent. No preferred stock dividends were paid in 1914 and 1915. (Moody: "Analyses of Investments. Steam Railroads," 1917, p. 1237).

[4] The government's proposal was to pay $2,500,000 a year for the first three years, $[illegible] for the next five years, and $3,600,000 annually thereafter. (Hansard, March 20th, 1919, p. 692). But the Grand Trunk [illegible] a net annual rental of £977,000 and would leave to arbitration what further sum, if any, the shareholders are entitled to on account of the [illegible] of the undertaking due to the development of the [illegible]. As an alternative they suggested an annual sum of £1,163,000 [illegible]. (Hansard, March 20th, 1919, p. 693).

1917	7,500,000	
1918	7,500,000	
		$ 39,000,000.00

Total guarantees of Dominion government and loans by the government to the Grand Trunk Pacific (i.e., total interests of the government in the Grand Trunk Pacific	$147,980,848.00

II. Saskatchewan government guarantees:—

4 per cent. bonds, due 1939	$11,347,848.00	
4½ per cent. terminal bonds, due 1943	1,882,240.00	
		13,230,088.00

III. Alberta government guarantees:—

4 per cent. bonds, due 1939	$ 2,430,000.00	
4 per cent. coal branch bonds, due 1942	1,159,596.00	
		3,589,596.00

IV. Grand Trunk Railway guarantees for Grand Trunk Pacific:—

4 per cent. Series A second mortgage bonds, due 1955	$10,206,000.00	
4 per cent. Series B second mortgage bonds, due 1955	9,963,000.00	

Dominion government loans to Grand Trunk Pacific on Grand Trunk Railway guarantee:—

1909..$10,000,000 at 4 per cent., due 1919		
1913..$15,000,000 at 4 per cent., due 1923		
	$25,000,000.00	
5 per cent. secured notes (secured by pledge of 4 per cent. debentures), due 1925	9,720,000.00	
4 per cent. perpetual debenture stock	34,879,252.86	
4 per cent. Lake Superior branch bonds	7,533,000.00	
		$ 97,301,252.86

Summarizing these, we find:—

Dominion government guarantees of Grand Trunk Pacific securities	$147,980,848.00	
Less amount of these guaranteed by Grand Trunk Railway	25,000,000.00	
Net amount of Dominion government guarantees		$122,980,848.00
Saskatchewan guarantees of Grand Trunk Pacific securities		13,230,088.00
Alberta guarantees of Grand Trunk Pacific securities		3,589,596.00
Grand Trunk Railway guarantees of Grand Trunk Pacific securities		97,301,252.86
∴ Total guarantees of Grand Trunk Pacific securities		$237,101,784.86[1]

Should the government take over both the Grand Trunk and the Grand Trunk Pacific it would be liable, therefore, for the obligations of the latter to the amount of $237,101,784; but in case the Saskatchewan and Alberta governments should be held responsible for their guarantees, namely, $16,819,684, the net amount of the Dominion government's obligations on behalf of the Grand Trunk Pacific securities would be $220,282,100. But in order to raise this road up to standard in the matter of ballasting, ties, terminals, rolling stock, etc., it was estimated by the Railway Inquiry Commission at the end of 1916 that $46,358,500 would be necessary.[2] In terms of present-day prices and wages, this would be the equivalent of over $70,000,000, and when this is added to the above obligations, it becomes evident that the total amount of capital liabilities for which the Dominion government will be responsible upon the Grand Trunk Pacific system cannot be less than $290,000,000, or, roughly, $300,000,000. This assumes that all cash advances made to the road for construction purposes will be cancelled and not repaid.

Income and Expenses

Now, how does this western line stand in regard to its income account? Here there seems to be considerable diversity of statement. In the report of the Railway Inquiry Commission we are informed that the Grand Trunk Pacific in the year 1916 had a net operating income of $826,653,[3] and this is largely confirmed in the government statistics of that year.[4] From these sources it would seem that the revenue of this company was sufficient to pay all operating expenses, but not ample enough to pay the interest charge on the funded obligations and government loans, which was approximately $7,200,000.[5] But in 1917 the minister of finance said there was a "deficit upon operating account," and that in order to meet this deficit, together with the fixed charges and the essentials for betterments and rolling stock, a sum of $7,500,000 would be required for the year.[6] To the same intent, he says that the company this year is not earning its fixed charges, and is even subject to a deficit of $4,000,000 in operating revenue.[7] For the year 1919-20 he considers that there will be a shortage of about $12,000,000, composed of an estimated $8,000,000 of interest on the company's securities and $4,000,000 deficit in operating expenses.[8] In all these instances there is left out of account the fact that under the original agreement the Grand Trunk Pacific is also liable every year for $5,000,000 more, this amount being the minimum annual rental which it should pay to the government for the National Transcontinental. In any case, there is at least $8,000,000 of fixed charges which the company does not earn, and which the government would have to carry if it appropriated the whole undertaking, since the Grand Trunk is unable to shoulder any part of its financial burden for its subsidiary.

From the foregoing reasoning we may group our results in the following way: By taking over the Grand Trunk the government would have to assume capital obligations of about $400,000,000 and annual charges of $20,000,000; and by acquiring the Grand Trunk Pacific its capital obligations will be increased by about $300,000,000 and its annual expenses by at least $8,000,000. This means that by such a proposed course of government ownership the enormous debt

---

[1] This does not include the cash advances made to the Grand Trunk Pacific, which are as follows: By the Dominion government, $6,263,716; by the provincial governments, $376,320; by municipalities, $350,000; by Grand Trunk Railway Co., $26,179,728—a total of $33,169,764. It is assumed that these will not be repaid should the government take over the Grand Trunk Pacific and Grand Trunk Railway.

of Canada would be augmented by one-third of its present amount. When we take these facts into consideration in connection with the annual deficit of at least $20,000,000 in the case of the Canadian Northern (which has been acquired by the assumption of $434,312,747 of liabilities, including a funded debt of $327,928,765 and the deficit in operating expenses of the Canadian government railways, amounting in 1917 to $6,179,503,[2] without the payment of any interest on capital, it will be seen that the drain upon the Dominion treasury will soon make heavy calls upon the taxpayers of this country.

It will be noted throughout this article that I have said little as to the value of the physical assets of either the Grand Trunk or its subsidiary. The minister of finance stated to parliament on April 3rd that if the government should exercise its right of foreclosure upon the Grand Trunk Pacific on the basis of its first mortgage and offer the road for sale it could buy it in "at a much lower price than is now represented by all the securities which have been issued in respect of it."[3] He acknowledged that, if the liabilities of the Grand Trunk on behalf of the Grand Trunk Pacific were fully taken into account the value of the Grand Trunk shares, that is, the shareholders' equity in the property, would be practically nil.[4] The government, therefore, concedes that the value of the assets in these cases is not a determining factor in the proposed transaction for the change from private to public ownership. The government approves the Drayton-Acworth allegation that this is a case for generosity and not for exacting the full pound of flesh.

Speaking for the Administration, the Minister of Finance has said that if the government takes over the Grand Trunk—and presumably the same thing applies to the Grand Trunk Pacific—it will take it on the same basis as the Canadian Northern was acquired; that is, it will still be a corporation with power to issue securities when necessary. As a corporation, its object would be to finance itself as much as possible. "This is the policy we have adopted with regard to the Canadian Northern Railway Company. Instead of advancing that company money from time to time, we encourage it to make issue of its own securities as a corporation in New York and in London. Some of these securities are guaranteed by the Dominion government and some are not." In this way it would seem as if the government were endeavoring to make the people think that they would not be responsible for the extent of the obligations I have shown, in case the government acquired these lines, but that all the financial strain would still rest upon the existing corporations which are in control of the properties. This confusing of the issue is wholly derogatory to democratic government, which rests upon full and accurate publicity. Does the Canadian Northern still do all its own financing by the issuance of its securities and the sale of these in New York or London? Far from it, as the government well knows. Then why should this blind be held out, as a consequence of which many of the electorate are deceived? I am not here arguing either for or against government ownership, but am seeking to present the financial status of the railways and the government in a wholly unprejudiced light, and to leave to the people the drawing of conclusions.

BANK CLAIMS MONEY CONFISCATED IN BELGIUM

The Secretary of State has secured permission to take possession of Royal Bank stock valued at $17,000, owned by enemy aliens in Montreal. The bank did not oppose the transfer but filed a bill for $55,000, which the Germans owed it through its confiscation of money in Belgium, and a deal put through for the commanders of the Dresden and Karlsruhe at Jamaica on a coal purchase two days before war broke out.

GRAIN SUPPLY IN CANADA

More Wheat on Hand than Last Year—Merchantable Quality High

THE Dominion Bureau of Statistics issued on April 25th a press bulletin giving in summary form the results of its annual inquiry as to the total quantities of wheat, oats, barley and flaxseed in Canada at the end of March, the stocks of all kinds of agricultural products remaining in farmers' hands at the same date, and the proportion of the crops of 1918 that proved to be of merchantable quality.

Returns collected from elevators, flour mills, railway companies and crop correspondents show that on March 31, 1919, the quantity in Canada of wheat, and wheat flour expressed as wheat, was upwards of 117,739,000 bushels, as compared with 77 million bushels last year, 126 million bushels in 1917, 197 million bushels in 1916 and 79 million bushels on February 8, 1915. The total for 1919 comprises 75,373,000 bushels in elevators, flour mills and afloat in winter storage, 32,315,000 bushels in farmers' hands and 10,051,000 bushels in transit by rail. Of oats, including oat products expressed as grain, the total quantity returned as in Canada on March 31, 1919, is 164,120,000 bushels, as compared with 155½ million bushels last year and 184 million bushels in 1917. The total for 1919 comprises 17,809,000 bushels in elevators and flour mills, 141,694,000 bushels in farmers' hands and 4,617,000 bushels in transit by rail. The total quantity of barley in Canada on March 31, 1919, is returned as 30,542,000 bushels, as compared with 16 million bushels last year and 14,871,000 bushels in 1917. The figures for 1919 comprise 8,135,000 bushels in elevators and flour mills, 20,026,000 bushels in farmers' hands and 2,381,000 bushels in transit by rail. Of flaxseed the total quantity in Canada on March 31, 1919, is returned as 2,259,000 bushels, as compared with 2,420,000 bushels last year, and 5,662,000 bushels in 1917. The total for 1919 comprises 881,000 bushels in elevators and mills, 1,039,000 bushels in farmers' hands and 339,000 bushels in transit by rail. For wheat and barley, therefore, the quantities in stock at the end of March this year are considerably in excess of those in stock a year ago, whilst for oats and flaxseed the quantites are more but not to so great an extent.

Stocks in Farmer's Hands

The reports of crop correspondents show that of the total wheat production of 1918, 17 per cent., or 32,315,000 bushels remained in farmers' hands on March 31, 1919. Last year the proportion was 14 per cent., representing nearly 32 million bushels, and in 1917 it was 21 per cent., representing nearly 55 million bushels. Of the other field crops the proportions and quantites estimated to be in farmers' hands on March 31, 1919, are as follows: Oats, 33 per cent., or 141,694,000 bushels; barley, 26 per cent., or 20 million bushels; rye, 21 per cent., or 1,784,000 bushels; buckwheat, 23 per cent., or 2½ million bushels; corn for husking, 12 per cent., or 3 million bushels; flaxseed, 17 per cent., or 1 million bushels; potatoes, 31 per cent., or 32,836,000 bushels; turnips, etc., 18 per cent., or 22,295,000 bushels; hay and clover, 18 per cent., or 2,701,000 tons. The stock of potatoes—viz., 32,836,000 bushels, compares with 24,130,500 bushels last year, 16,770,000 bushels in 1917, 16,825,000 bushels in 1916, and 32,310,000 bushels in 1915.

The returns from crop correspondents show that of the total wheat crop of 1918—viz., 189,075,350 bushels, 93 per cent., or 175,370,000 bushels, were of merchantable quality. Last year the proportion was estimated at 95 per cent., and in 1917 it was 85 per cent. The proportions per cent. of other crops of 1918 estimated to be of merchantable quality were as follows, the corresponding percentages for 1918 being given in brackets: Oats, 90 (91); barley, 92 (90); rye, 92 (89); buckwheat, 75 (76); corn for husking, 67 (50); flaxseed, 90 (89); potatoes, 81 (77); turnips, etc., 86 (83); hay and clover, 89 (87).

The Western Canada Mutual Fire Insurance Association

THIS Association has been formed by the principal Mutual Fire Insurance Companies in Western Canada. The members of this Association are Farmers Mutual Fire Insurance Companies, confining their business to the insurance of farm property, non-hazardous dwelling property, schools, halls and churches at actual cost.

The formation of this Association does not in any way affect the individuality of its members.

OBJECTS of the ASSOCIATION

1. To obtain better conditions and greater benefits for the Policyholders.
2. To safeguard the interests of Policyholders.
3. To watch and suggest Government legislation affecting Mutual Fire Insurance Companies.
4. To standardize where practicable.
5. To promote fire prevention schemes and assist in the reduction of fire waste.

The following Companies are members of the Association:—

LICENSED IN MANITOBA

	Incorporated
Miniota Farmers Mutual Fire Insurance Company, Beulah ..	1886
Portage la Prairie Farmers Mutual Fire Insurance Company, Portage la Prairie	1884
Urban Mutual Fire Insurance Company, Portage la Prairie...	1888
Royal Victoria Mutual Fire Insurance Company, Beulah....	1900

LICENSED IN SASKATCHEWAN

Help the Y.M.C.A. Fir

Help the "Y" Construct the M

CANADIAN Y.M.C.A.

ALL the world now knows that the R Triangle of the Y.M.C.A. was "Sign of friendship" to thousa of your brothers, sons, nephe cousins and neighbours' boys in the l four and a half years. Wherever t Canadian Soldiers went, the "Go Old 'Y'" went too. And now it is co ing back home with them!

For Our Men Returning

For the soldiers and their dependents, returning from Overseas, we have provided follows :—

1. A Red Triangle man on board every ship when it leaves Great Britain, with a full equipment of games, gramophones and records, magic lantern, literature and writing materials. Where possible, also a piano or an organ. Lectures, concerts, sing songs, instruction re Government repatriation plans, and Sunday Services.

2. Red Triangle comforts and facilities for the men on arrival at Halifax, St. John, Quebec and Montreal, including coffee stalls, with free drinks, free eatables, cigarettes, candies, etc.

3. Red Triangle men on every troop train to provide regularly free drinks, eatables and cigarettes, organize games and sing songs, and fu information.

4. Red Triangle free canteen service, information bureau, e each of the 22 Dispersal centres in Canada.

5. Red Triangle Clubs in the principal cities of Canada shape of large Y.M.C.A. hostels to furnish bed and board a rates and to be a rendezvous for soldiers.

6. Seventy-five Secretaries to superintend Red Triangle serv Military Hospitals, Camps and Barracks, throughout Canada.

7. Tickets entitling soldiers to full Y.M.C.A. privileges for six months at any local Y.M.C.A. furnished.

In addition to our work for the returning soldiers, we have to maintain the Red Triangle service to the full for the soldiers in Siberia, as well as the work of special secretaries in Northern Russia, Palestine and Poland.

Red Tria

$1,10

Y.W.C.A. For the wives and children Overseas, dependent upon Canadian soldiers, and for Y.W.C.A. work in Canada generally, a sum of $175,000 from the Red Triangle Fund will be set aside for the Dominion Council of the Y.W.C.A., which is caring for the soldiers' women folk, and their little ones on the long journey from Liverpool to Canada, and is also extending its work for Canadian girls.

For their sake also be generous when you make your contribution.

its Work For Soldiers

that will Reconstruct Canada

For the support which has made possible the
ar work of the Y.M.C.A. we thank you. Your
oney has been well expended. We have rendered
ll account.

We ask now your continued sympathy and
ipport for Red Triangle Service for our Soldiers
uring demobilization, and for Y.M.C.A. work
r Canada generally during the Reconstruction
eriod. The Annual Red Triangle campaign will
held throughout Canada May 5th to 9th, 1919.
he objective is $1,100,000.

CANADIAN
Y.M.C.A.

or Canada's Manhood

The Reconstruction programme of the Y.M.C.A. includes the following vitally important
elopments :—

1. An increased service to 300,000 teen-age boys in the
ominion—the development of Canadian Standard Efficiency
aining; Bible study groups; summer camps; conferences,
rvice for High School boys, for working boys, in the towns and
ies; for boys on the farm and for boys everywhere, who have
ked opportunity for mental, moral, physical or social
velopment.

2. Inauguration of Y.M.C.A. work in the country, and the smaller towns and villages lacking Association buildings and equipment, on a plan of county organizations. This will include the establishment of Red Triangle centres for social, recreational and educational work among boys and men, in co-operation with the churches.

A.
ampaign
5th to 9th

HYDRO EXTENSION URGED

Guelph Convention Passes Resolutions in View of Increased Expenditure on Provincial System

A CONVENTION of delegates from various parts of western Ontario was held in Guelph, Ontario, on April 24th. In addition to dealing with the work of the Hydro itself, the Grand Trunk Railway situation was also discussed.

One of the principal resolutions passed was the following:—

"Whereas: Sixty-two municipalities in the province of Ontario have carried by-laws to the extent of over thirty millions of dollars for the construction of Hydro-Electric Railways and,

"Whereas: During the period of construction, through which we are now passing, a public work of this kind, which will be revenue producing, will provide a great deal of employment, will not be a burden to the people of the country, and will be of very great value to the territory to be served,

"Therefore, be it resolved: That this meeting urges the Provincial government to grant the necessary order-in-council, so that construction may be commenced on these railways as speedily as possible."

A second important resolution was as follows:—

"That whereas the province of Ontario, having enunciated a municipal radial railway policy, and having passed the necessary legislation to enable the municipalities, through the Hydro-Electric Power Commission of Ontario, to proceed with the construction of a radial railway system, and whereas the people of sixty-two municipalities have by overwhelming majorities carried by-laws to the extent of over $30,000,000 for the construction and operation of these railways, in conjunction with the Hydro-Electric Power System in the province of Ontario;

"And whereas the municipalities are urging the Hydro-Electric Power Commission to proceed with this work at once, and the Commission is ready to proceed with such work; and whereas, it is highly desirable that no unnecessary duplication of existing lines should take place if such can be prevented, and in view of the fact that these railways will parallel to a considerable extent the Grand Trunk Railway, for which the Federal government has been negotiating;

"Therefore, be it resolved, that this meeting strongly petition the government to co-operate with the Hydro-Electric Power Commission of Ontario, so that the municipalities through the commission may acquire by lease, purchase or otherwise, such branch lines of the Grand Trunk Railway system and the Canadian Northern Railway system as will enable the municipalities to carry out the Hydro radial scheme to the best advantage throughout the province of Ontario."

FRENCH-AMERICAN BANKING CORPORATION

A banking organization with the above title has been created under New York State laws for the purpose of promoting trade between France and the United States.

Half the stock of the corporation will be held by American interests and half by French. The plan of operation, it is declared by the organizers of the new corporation, means that hereafter American business men will be able to avail themselves of banking facilities in France as advantageous as Frenchmen themselves enjoy.

The French participant in the alliance is the Comptoir National d'Escompte de Paris, which takes half the capital stock. The American interests are the First National Bank of Boston and the National Bank of Commerce in New York, each holding one-fourth the capital stock of the new corporation. The French-American Banking Corporation is capitalized at $2,000,000, with a surplus of $500,000, all paid in. There will be twelve directors, six to represent the American group and six the French group.

A "CLEAN UP" WEEK IN SASKATCHEWAN

Insurance Commissioner Reports Heavy Losses for 1918 and Takes Steps to Have Better Showing This Year

MAYORS of cities and towns, and reeves of rural municipalities throughout Saskatchewan, have received a request from the provincial fire commissioner, Mr. Arthur E. Fisher, asking for their active co-operation in cutting down the fire loss in the province. This year there will be two "clean up" weeks from May 5th to May 17th, instead of one week as in previous years.

Fire losses in the province of Saskatchewan in 1918 were estimated by the commissioner at $2,250,000 as compared with $2,750,000 for 1917; only $800,000 was received in insurance, he says. Fatalities due to fires numbered 45 last year, against 27 in 1917, while injuries received in fires in 1918 affected 30 persons as compared with 17 in 1917. Thus out of the 45 tragedies in the year 19 were in connection with fires caused by carelessness, such as lighting stoves with coal oil, negligence to use proper precautions with gasoline, and playing with matches. Among those injured but who recovered, numbering 30, everyone of these accidents were in connection with preventable fires, the cause being overheated stoves, coal oil and gasoline explosions and carelessness with matches.

The total number of fires in 1918, exclusive of those in elevators, was 1,333, of which 505 were in dwellings, 17 hotels, between 80 and 90 in stores, 21 in schools and 31 affecting automobiles. The causes given for the fires bear out the contention of Mr. Fisher that the majority of fires are preventable in a most striking way because the burning of rubbish was responsible for 75 fires. Stoves of one kind or another and through various kinds of carelessness in connection with their location, condition, use of fuel, installation and state of repair caused 333 fires. Hot ashes caused 19 fires; spontaneous combustion, 13; sparks from various classes of engines, 51; carelessness with matches, 51 fires; careless smokers, 34 fires; unknown, 565. In connection with the latter Mr. Fisher is confident that carelessness can be reckoned as the cause of the great majority of the unknown fires also. Carelessness affects the just as well as the unjust, and the cautious person as well as the negligent one, because 101 fires were caused by blazes starting in adjoining buildings.

Losses to elevators and their contents amounted to $101,837 on buildings and $153,062 on grain stored therein during 1918, and the number of fires were twenty-three, the largest loss being at the Quaker Oats Company elevator at Bruno where $39,500 of damage was done.

$500,000 GAS DEAL AT TILBURY

A half million dollar deal has been closed in the purchasing of the interests of the Canadian Gas Co. in the Tilbury East field, Ontario, by the Union Natural Gas Co. This gives the Union company the direct control of certain leases and producing wells from which they have been buying the gas under contract with the Canadian company.

PAY BALANCE ON SAGUENAY RAILWAY

The balance of the money owed the Quebec Railway, Light, Heat and Power Co. by the Federal government in connection with the sale of the Saguenay Railway has been paid, making, with the amount paid at the time of the sale, a total of some $3,400,000. The money will be used by the Quebec Railway Co. to reimburse the bondholders of the Saguenay Railway, and will benefit the company to the extent of relieving it of its obligations in the form of interest on the Saguenay bonds, which the Quebec Railway has been sponsor for.

BRITISH TRADE ASSOCIATION HERE

The Canadian Association of British Manufacturers and their representatives has been established with branches at Toronto and Montreal. Similar associations have existed in Australia and New Zealand for several years. The objects of the association as set forth in the constitution are as follow: "To further the interests of British trade throughout the Dominion of Canada and to affiliate with and work in concert with kindred associations in other centres of the Dominion having similar objects." Provisional committees have been appointed to draft the constitution of the association.

The government of the association consists ot a supreme council and each branch of the association will have its own local executive council. The supreme council will consist of the chairman and one councillor from each local executive. The association will include British subjects only: (a) British manufacturers and wholesale exporters from the United Kingdom; (b) representatives and agents of British manufacturers and wholesale exporters from the United Kingdom.

No representative or agent of British manufacturers who enters into any agency agreement with, or in any way represents any manufacturers or wholesale exporters whose principal works or place of business are situated in any country deemed by the supreme council to be or to have been hostile or unfriendly, will be entitled to membership of the association. Assistance in the formation of the new association has been rendered by Mr. G. T. Milne and Mr. F. W. Field, the British government trade commissioners in Canada.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Cape Breton Electric Co., Ltd.—A semi-annual dividend of $3 per share on the preferred capital stock and a dividend of $1.50 per share on the common capital stock of the company has been declared, payable May 1st, 1919, to stockholders of record at the close of business, April 23rd, 1919.

Dalyte Electric Co.—The shareholders of the Dalyte Electric Co., the merger of the Flexible Conduit Co., Dalyte Lamp Co. and Munder Tungsten Co. held their annual meeting at the offices of the company, Guelph, on April 25th, and the following directors were elected for the year: President, John Kennedy; vice-president, J. E. Carter; managing director, J. S. Wheeler; Col. J. Davidson, George W. Walker, C. L. Dunbar and Dr. A. T. Hobbs.

Nipissing Mining Co.—At the annual meeting of shareholders of the company, held on April 28th, the report, as recently outlined in *The Monetary Times*, was adopted. R. B. Watson, who presided, gave it as his opinion that the price of silver would stay up after price regulation was removed, and pointed out that recently the United States had sold about 250,000,000 ounces of silver to Great Britain, evidencing the great demand for the white metal. The retiring board of directors was re-elected without change.

Shawinigan Water and Power Co.—At the time of the annual meeting of the company last February, J. E. Aldred, the president, announced that a total of $917,000 notes had been converted into stock up to that time, and that the prospects were for a steady increase in the figures until the majority of the notes had been converted. Since the time of the annual meeting, note conversions have run well past the $870,000 mark, and that the total amount of notes now converted stands at approximately $1,750,000 out of the total total of $4,500,000. This indicates that the progress forecasted is being made.

Twin City Rapid Transit Co.—The gross of the company for March was $914,420 against $835,294 in 1918. Net revenue was $241,487 against $220,902. Net after fixed charges was $79,332 against $60,207. The dividend on stock has been passed for the first quarter of 1919. On December 5th, 1918, the directors declared a dividend of 1 per cent. on the common stock, which was paid on January 2nd, 1919. The last previous payment was in April, 1918. From 1909, and including 1917, the common received 6 per cent. per annum, which rate was cut to 4 per cent. in March, 1918, when a quarterly dividend of 1 per cent. was paid.

Robert Simpson Co.—The company had total net earnings last year of $1,466,416, an increase of over $400,000 on the previous year. To this is added $425,180, brought forward from the previous year, making a total in profit and loss account of $1,891,597. Bond interest and preference dividends required $505,964; dividends on common stock, together with directors' fees, amounted to $336,550, and $276,513 was written off buildings, plant, equipment and leases, leaving a balance of $822,620 in profit and loss account, being $397,439 in excess of last year. The total assets are now $11,529,958. Current assets are $4,975,947, and current liabilities $1,271,440. The capital stock issued stands at $3,350,000 6 per cent. preference and the same amount in common.

Dominion Canners, Ltd.—The company was the leading concern in an amalgamation of a number of canning interests in British Columbia recently. The Vantoria Canning Co., the Kelowna Packers, Ltd., and the Food Products, Ltd., were taken over. This brings the holdings of the Dominion Canners in British Columbia well over the 50 per cent. mark in all fruit and vegetable canning enterprises, and places them in control of this class of product in the province.

The new organization has its own charter and will be operated independently of the eastern plants of the company, but the assistance which has been assured by the mother company will give an immensely widened market for the products from the canning plants of British Columbia.

Canadian Cottons, Ltd.—A special meeting of the company's bondholders has been called for May 12th for the purpose of securing their consent to the sale of the Mount Royal Spinning Mill at Cote St. Paul. No mention of the name of the purchaser is made in the notice calling the meeting, but it is well known now that it is the Dominion Textile Co., as it has operated the plant under lease for about ten years. As the lease expires soon and the company desires to continue the operation of the mill, it has decided to purchase instead of lease.

Conditions have changed very materially for the better in the textile industry since the expiring lease was made nearly ten years ago at $198,000 per annum, and it is considered unlikely that the Textile Co. would have been able to renew at anything like those figures.

Furber Lumber Co.—A large lumber enterprise in the British Columbia field, is on its way to completion. The scheme was launched by a syndicate headed by Percy M. Furber, president of the Mexican Oil Fields Co., New York, and John Arbuthnot, financier, well known in Victoria. This syndicate will be known as the Furber Lumber Co., and its operations will be on a colossal and world-wide scale.

Orders have already been placed with the syndicate by British interests to deliver thirty million feet of lumber, which, in the event of a satisfactory agreement being reached on purchase price with the saw mills and lumber manufacturers, will be supplied by British Columbia mills. In addition to this huge contract, Mr. Arbuthnot states further contracts are pending from European interests for an unlimited quantity of lumber that will run into billions of feet, and will keep the British Columbia mills operating day and night at full capacity to supply the demand.

General Motors Corporation.—The statement of the company for the year ended December 31 last, shows net profits after deducting all expenses of manufacture, selling, administration, etc., of $35,504,576, and after a deduction for federal taxes and extraordinary expenditures of $20,113,548, a balance of $15,391,028. Net profits after 6 per cent. dividends on both the preferred stock and the debenture stock amounted to $12,905,063. This is equal to 8.75 per cent. on the $147,379,900 outstanding common stock. In the previous year net profits amounted to $34,634,854, and the balance after deduction of war taxes, etc., was $27,732,965. The surplus available for common dividends for the 12 months ended December 31, 1917, was $26,285,954, or equal to 34.2 per cent. on the $76,873,300 outstanding common stock. The profit and loss statement shows that there was added to the company's surplus during the year through acquisition of properties, $23,232,792, and after the deduction of common dividends the final profit and loss balance was $36,408,937.

Net sales of the General Motors Corporation and subsidiaries for the 12 months ended December 31 last, amounted to $269,796,830, not including sales of companies purchased during the year prior to their acquisition.

Canadian Car and Foundry Co.—Judgment was received last week by Senator Curry, chairman of the board of the Canadian Car and Foundry Co., in the case of the Car company against the American Can Co., which was rendered by

the Appellate Court of the State of New York, in favor of the local company. The amount involved, including interest, was about $750,000, and arose out of the famous Russian shell contract. The American Can Co. entered into an agreement with the Car company to make use of the fuse plant at Dayton, Ohio, for the filling of some of its own war contracts with the Russian government, but when the Russian Imperial government was overthrown the American Can Co. desired to get a judicial opinion on the matter of payments to safeguard its own position. This was obtained in one of the lower courts in favor of the Car company, but the American Can Co. decided to carry the matter still higher, and it is this judgment which has just been received. Senator Curry stated that it was really stronger in favor of their company than the judgment of the lower court.

This disposes of the largest item still outstanding in connection with the Russian shell contract still to be settled. There is still a claim for approximately $200,000 arising out of tariff drawback on unexported shells, which has to be settled in the United States by a special Congressional bill, as there is no clause in the Tariff Act to deal with such a circumstance. The last Congress expired before this bill was completed, so that it will have to come up again at the next session. These two amounts, with a few smaller ones, brought the total outstanding unsettled claims to slightly over a million dollars.

Canadian Consolidated Felt Co.—Sales of the company in 1918 rose to $1,155,192 from $763,481 the previous year, but expenses, interest, taxes, etc., rose also, so that the net result was a profit of $69,804, compared with $43,339 in 1917. Surplus rose to $250,039 by the addition of the year's profit. The following are the results for 1918 and 1917 compared:—

	1918.	1917.
Net sales	$1,155,192	$763,481
Expenses, interest and taxes ...	1,085,387	720,141
Net profit	$ 69,804	$ 43,339
Previous surplus	180,234	136,891
Total surplus	250,039	180,234

The statement of assets and liabilities shows some good improvement and indicates that every effort has been made in the year to strengthen the general finances. Total assets now amount to $3,507,998, against $3,475,229. Current assets are $714,304, against $617,344, and current liabilities $515,880, against $547,869, leaving net working capital $198,424, against $69,475. Taking into consideration investments of $2,160,451, against $2,187,793, total working assets at the end of the year were $2,358,875, against $2,257,268. Inventories were taken at $614,498, against $565,729. Cash was lower at $7,979, against $10,395.

The following officers were elected at the meeting: W. A. Eden, president; R. E. Jamieson, vice-president; C. B. Seger, G. W. Charles, V. E. Mitchell, K.C., W. Binmore, P. Y. Smiley, E. Wellein and A. D. Thornton, directors.

Dome Mines Co.—The excess of net current assets over current liabilities amounts to $488,895, according to the statement of the company for the year ended March 31st, 1919. Capital assets total $4,430,995, the mining claims and properties being valued at $2,575,000, and the plant and equipment at $1,855,995. Current assets total $495,453, including $125,488 cash on hand and in banks. The reserves at March 31st, 1918, totalled $695,929, and, after adding to this the sum of $234,373 for depreciation and making other adjustments, the total reserves at March 31st last totalled $931,573. The surplus at March 31st, 1918, was $524,797, from which is deducted the net loss for the past year of $455,456, and the inventory adjustment of $12,540, leaving the total surplus at March 31st last of $56,801.

The profit and loss statement shows a total expenditure during the year of $237,279, of which $133,003 was on development. There was a non-operating revenue of $16,196, reducing the total to $221,082. To this, however, is added $234,373 for plant depreciation, bringing the amount to $455,456.

"Under an agreement entered into between the Dome Extension Mines Co., Ltd., and this company," says Mr. Bache, "we have the option to purchase the property and assets of that company for 76,666 fully-paid shares of the capital stock of this company. Under this agreement your company has no obligation, but if it desires to keep the option in force an average sum of $3,000 per month in exploration and development must be expended. The option expires the 15th day of March, 1920. Your directors will, so long as conditions justify, continue exploration and development work on the Dome Extension property, and if, in their opinion, results justify the completion of the purchase, a special general meeting of the shareholders will be called, and thereat all the available information will be laid before them. The programme of exploration now being pursued consist of crosscutting on the sixth level in the Dome Extension property to the ore zone previously located by diamond drilling. This work has now progressed to the extent that the zone has been penetrated by a crosscut which discloses ore of about $4 grade."

The Canada Co.—The annual meeting was held on March 31 at the company's offices in London, England. Mr. H. C. Weld, governor of the company, presided. One of the outstanding features of the accounts was the greater sales of the lower-priced land, of which they had sold 2,670 acres, as against 750 acres in the previous year. These 2,670 acres were sold at a price 57½ per cent. above the company's valuation. Last year the prices were about 15 per cent. above valuation. The disposal of the higher-priced land was somewhat less, but they had parted with 1,500 acres at satisfactory prices, averaging 31 per cent. above valuation. The company had also disposed of 3,000 acres of reverted land (namely, land that had been leased but for various reasons had reverted again to the company). These resales showed a slight improvement—5 per cent.—over the book values. The result of the land sales, as a whole, amounted to 7,483¾ acres, at prices averaging 16½ per cent. above valuation, which compared with only 11½ per cent. in the previous year.

In regard to the financial results, as shown in the accounts, he would like to refer first to the capital recoupment fund instituted under the act of 1916; £3,655 were placed to the recoupment fund to be utilized, if arrangements can be made, for the purchase of land or for other purposes. That fund now stood at £6,801. The object of the fund was calculated to give firmness to the company, consistent with the policy of the board in getting a new act, so that the company should not be a dying, but a progressive company. He hoped the present state of the fund went to show that the board's policy was doing good, although, of course, the late war had prevented the company somewhat.

Another point in the accounts was the inland revenue assessment of profits for 1918, namely £5,057. It seemed rather hard, perhaps, that they should have to pay the sum on a diminished capital, but the matter had been carefully considered by the company's solicitors, who advised that the inland revenue was justified. The other items remained much the same, except the item for taxation in Ontario, where the provisional tax on mining rights cost £740. That sum was payable owing to a new act passed in 1917 imposing a tax on the acreage of all lands in which the minerals were retained by owners who were not also owners of the land. That sum cleared the company's tax for two years up to next September, and arrangements were in progress that would, he hoped, satisfactorily adjust the claims in the future.

COBALT ORE SHIPMENTS

The following is a statements of the shipments of ore, in pounds, from Cobalt, for the week ended April 25th, 1919:—

Hudson Bay, 63,686; Coniagas Mines, 94,371; Dominion Reduction, 62,000; Buffalo Mines, 93,725; McKinley-Darragh, 156,238; La Rose Mine, 120,000; total, 590,020.

The total since January 1st is 6,558,627 pounds, or 3,279.3 tons.

LEGAL NOTICE

CANADIAN BISCUIT & CONFECTIONERY EXPORT COMPANY, LIMITED

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada 1906, known as "The Companies Act," and Amending Acts, letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the [illegible] day of March, 1919, incorporating [illegible], Herbert Arthur Telfer, John [illegible] and Charles Joseph [illegible], manufacturers, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:— (a) To import, export, manufacture, buy, sell and deal in goods, wares and merchandise, and without limiting the generality of the foregoing, the same shall be deemed to include confectionery, biscuits, cakes and all goods of which sugar or flour forms a part; and to act as agents for the purchase or sale of any such goods, wares and merchandise; (b) To carry on any other business whether manufacturing or otherwise which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To purchase or otherwise acquire or undertake all or any part of the business, property, assets and liabilities of any person, partnership or company carrying on business with objects similar in whole or in part to those of the company, or possessed of property suitable for the purposes of the company; (d) To procure the company to be registered and recognized in any foreign country and to designate persons therein according to the laws of any such foreign country to represent this company and to accept service for and on behalf of the company of any process or suit; (e) To make application and negotiate for, lease, purchase or otherwise acquire or [illegible], develop, hold, grant, and dispose of or turn to account any patent, trade mark, secret information, copyright, grant, license, letter, process, design, concession and the like which may seem capable of being used for any of the purposes of the company, and the acquisition of which may seem calculated to benefit the company; (f) To acquire by purchase, lease or otherwise and to hold and dispose of such movable and immovable property, rights, easements and privileges as may be deemed necessary or convenient for the purposes of the company; (g) To issue fully paid up shares, bonds or debentures for the payment either in whole or in part of any property, real or personal, patents, rights, claims, privileges, concessions, contracts or other advantages which the company may lawfully acquire; (h) To purchase, acquire, hold and dispose of shares of the capital stock, bonds or other securities of any other company, corporation or individual carrying on or engaged in, in whole or in part, any business which the company is empowered to engage in or carry on, and to acquire, hold, sell or otherwise dispose of such shares, bonds or securities, notwithstanding the provisions of section 44 of The Companies Act; (i) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (j) To sell and dispose of the assets of the undertaking of the company or any part thereof, for such consideration as the company may think fit and in particular either for cash or for shares, bonds, debentures or securities of any other companies, or partly for cash and partly for such shares, bonds, debentures or securities, notwithstanding the provisions of section 44 of the said Act; (k) to distribute in specie or otherwise, as may be resolved by the company, any assets of the company among its members and particularly the bonds, shares or debentures of any other company formed to take over the whole or any part of the assets of this company; (l) To enter into any agreement with any government or authority, supreme, municipal, local or otherwise, that may be conducive to the company's objects, or any of them, and to obtain from any such government or authority any rights, privileges or concessions which it may be deemed desirable to obtain, and to carry out, exercise and comply with or sell and dispose of any such arrangements, rights, privileges and concessions; (m) To invest and deal with the moneys of the company not immediately required on such securities and in such manner as may from time to time be determined; (n) To promote any company or companies for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (o) To construct, improve, maintain, work, manage, carry out or control any roads, ways, branches or sidings, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (p) To lend money to customers and others having dealings with the company and guarantee the performance of contracts by any such persons; (q) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (r) To do all or any of the things hereby authorized either alone or in conjunction with or as factors or agents of any other company or persons, or by or through factors, trustees or agents; (s) To do all such things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Canadian Biscuit & Confectionery Export Company, Limited," with a capital stock of forty thousand dollars, divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 24th day of March, 1919.

THOMAS MULVEY,
Under-Secretary of State.

39-1c

Messrs. Craig, Lowther and Irvine, members of the Montreal Stock Exchange, have opened an Ottawa branch under the management of Bradbury Brothers.

NEWS OF MUNICIPAL FINANCE

Medicine Hat, Alta.—The general tax rate of the city has been fixed at 16 mills.

Sarnia, Ont.—A by-law has been passed allowing the city to spend $81,000 on necessary pavement work.

Assiniboia, Man.—Approximately $1,040,000 is the assessment for 1919, as fixed and approved by the town council at a special meeting on April 15th, for the purpose of revising the assessment roll.

New Westminster, B.C.—November 15th was decided upon by the city council for the last payment of current year's taxes, after which date, in accordance with the recent act passed by the legislature, 15 per cent. will be added. It was also decided to hold a tax sale on September 30th this year.

Saskatoon, Sask.—The balances in the sinking fund and debenture accounts and the current bank loan of the city are as follows:—

Cash in sinking fund account	$ 17,293.00
Cash in debenture account	100,822.62
Bank loan	427,000.00

Bridgeburg, Ont.—The efforts of the Bridgeburg Civic Improvement Association to have the assessment of the International Railway Bridge between Bridgeburg and Buffalo increased have met with success. The assessment of the bridge has been raised from $300,000 to $1,250,000. This will increase the Bridge Company's taxes from about $9,000 annually to $36,000.

Winnipeg, Man.—Accumulation of surplus earnings in addition to the sums set aside for depreciation, the latter amounting to about $200,000, will result in the city's light and power department having at its disposal, providing the surplus earnings are maintained during the coming years, a total of over $1,200,000, at the time the department's debentures mature.

Esquimalt, B.C.—The council has decided that $81,525 should be expended by the municipality during the present year and to levy a general rate of 13 mills to raise the $60,638 required above the anticipated revenue of $20,887. In addition to the general rate a levy of five mills will be made to raise $22,542 for school purposes, making a total levy of 18 mills on the assessment of $4,619,855.

Alberta.—The main highways of the province are to have $400,000 expended on them this year, and the legislature voted an additional $300,000 for other road work. For bridge building there is an appropriation of $500,000, which will be used in the reconstruction of a number of existing bridges and the erection of several new structures. The bridge programme, however, includes nothing this year of large proportions.

Victoria, B.C.—Mayor Porter has appointed a committee of aldermen to examine the whole question of trade licenses and tax collection, and the council will then frame a by-law based on the committee's report, fixing definitely the amounts that shall be charged by the city against various classes of business. A by-law will also probably be adopted compelling merchants and others brought within the scope of the trade license to pay the tax as the general taxes are paid, eliminating as far as possible the present system of collection by canvass.

Calgary, Alta.—The municipal law committee of the Alberta legislature has voted to allow the city charter amendment extending the five-year-repayment of arrears privilege to taxpayers who have paid their taxes before the new sale date, April 22, providing they pay the current year's taxes with interest and one-fifth of the arrears. Another amendment approved was that authorizing the city to collect interest on arrears of taxes between the old tax sale date of September 30, 1918, and the new date, April 22, 1919. This will mean about $90,000 in interest to the city.

Saskatoon, Sask.—The local government board sat recently in the city hall to consider the sewer and water extension estimates and other capital outlays. The city asked the board to approve of an expenditure of $472,500 in addition to the city's capital expenditure. It was explained by Commissioner Yorath that in the case of the electric power and light machinery it would not be necessary to issue debentures this year, but that it was necessary to issue the contract immediately in order to get delivery of the turbines and generators for installation by the winter of next year.

Fredericton, N.B.—The city's tax rate this year will probably be $2. Last year the rate was $2.20, and it was feared that the amount would be even higher this year. Recently, however, when the assessment was fixed at $150,000, the same amount as last year, it was said that the tax rate would be no higher than last year, and might be somewhat lower as a result of the increases in valuation. The chief assessor is not yet in a position to make even a close estimate as to what the valuation for assessment this year would be, but has stated that to reduce the tax rate from $2.20 to $2 with the same assessment would mean that the valuation would have to be increased by approximately $400,000.

Vancouver, B.C.—Tentative reductions in the civic board of works department estimates of $54,929 have been agreed to by the aldermen. The proposed reduction in the budget prepared by Alderman Kirk, chairman of the finance committee, was $175,871. The principal controversy was over the item of general ward improvements for this year, efforts to cut this proving futile. The estimate of $200,000 for this work still stands. The total was made up of three items; work already authorized by the council amounting to $35,430; rocking and planking of streets and lanes, $104,570; hard surfacing streets $60,000, making a total of $200,000.

The estimates of the fire department, totalling $337,337, inclusive of the $24,000 for new apparatus, were tentatively carried by the committee of the whole This total is exclusive of the fire alarm system estimates. An item of $1,600 for an additional district chief was not included. Alderman Kirk, in his budget, proposed that the estimates of this department be cut to $275,000.

Calgary, Alta.—According to a statement by Mayor Marshall, the utilities will be assessed to meet increases, which means increased revenue and increased rates. The mayor stated: "The electric light department will need another $100,000, and the street railway much more. While labor will be largely the need for the increased revenue, it will not be the whole cause. The utilities have been running behind for the last four years in their maintenance, and this is particularly true in regard to the electric light. Repair work will have to be done and the programme of improvements is somewhat extensive. Materials are tremendously high, compared to 1914, and there is little likelihood of their coming down in price for some time. They will have to be purchased at prevailing prices. The utilities will simply have to have more money."

Up till April 23rd, the city's tax sale netted $123,000, plus the taxes that came through the mails, and the money taken at the wicket. One point that has arisen in connection with the sale is that unless the owner gives a "quit claim" deed no title can be taken by any person until at least 18 months after the sale and another month for the time of the transfer. Another legal point to be remembered is that, while the period in which the owner may redeem is 18 months, unless the 1917 taxes are paid, the land will go into the 1920 tax sale, and any claim that the person buying now may have will be automatically wiped out.

A NEW FINANCIAL FIRM

F. S. Ratliff and Co. is the name of a new financial firm at Medicine Hat, Alta. Mr. T. F. Dawson, who has been in business in Medicine Hat for a good many years and late of the Krauss-Dawson Agency, has joined Mr. Ratliff. The new firm will carry on a general financial business in farm loans, farm lands, etc., and will also handle stocks and bonds.

DEBENTURES FOR SALE

CITY OF MOOSE JAW

SALE OF DEBENTURES

Sealed tenders endorsed "Tender for Debentures," will be received by the City Commissioners up to noon of the 19th day of May, 1919, for the purpose of the following issue of debentures of the City of Moose Jaw:

$210,000.00 debentures for extension to the Electric Light and Power Systems of the city. Tenders will be received alternatively for:—

(a) Debentures bearing interest at the rate of 5½% per annum, repayable in twenty equal annual instalments of principal and interest.

(b) Sinking Fund Debentures bearing interest at 5½% per annum repayable at the end of twenty years.

The highest or any tender not necessarily accepted.

S. A. HAMILTON,
Mayor.
GEO. D. MACKIE,
City Commissioner.

Moose Jaw, 29th April, 1919.

DEBENTURES FOR SALE

$1,000,000 PROVINCE OF NEW BRUNSWICK 3-YEAR 5½ PER CENT. GOLD BONDS

Sealed Tenders endorsed "Tenders for Province of New Brunswick Bonds" addressed to the undersigned, will be received for the purchase of $1,000,000 (One Million Dollars) three year Gold Bonds of the above Province, to be dated May 15th, 1919, bearing interest at the rate of five and one-half per centum per annum, payable half yearly on the 15th May and 15th November. Principal and interest payable in Gold at the office of the Provincial Secretary-Treasurer, Fredericton, N.B., or at Bank of Montreal in St. John, Montreal or Toronto, or at the Agency of the Bank of Montreal in the City of New York, at the option of the holder.

Bonds to be in the denominations of $1,000 and $500 in amounts to suit the purchaser, with coupons attached, and may be registered as to Principal and Interest. Full payment for Bonds with accrued interest to date of payment to be made at the Bank of Montreal, Fredericton, on delivery of Interim Certificates at said Bank. Interim Certificates will be supplied, to be exchanged for definitive Bonds on completion by the engravers.

Tenders to be delivered to the undersigned not later than noon on Wednesday the 14th day of May 1919. Tenders must be for the whole amount offered and must be accompanied by marked cheque for $20,000, to be applied in the case of the successful tenderer in payment for Bonds.

The highest or any bid not necessarily accepted.

THE COMPTROLLER GENERAL,
Province of New Brunswick.

Fredericton, N.B., April 28th, 1919.

APRIL BOND SALES

THE municipal bond sales in April, 1919, totalled $1,349,202, compared with $1,899,514 for the previous month, and $3,968,995 for April last year, showing a small decrease for the month, and a large decrease for the year. The following is the summary by provinces for April:—

Ontario	$ 369,902
Manitoba	460,000
Alberta	218,650
Saskatchewan	62,650
British Columbia	400,000
Quebec	30,000
Nova Scotia	8,000
Total municipal	$1,549,202

There were two provincial issues during the month—viz., Saskatchewan $3,000,000 and Ontario $3,000,000. No offering has yet been made of the Ontario bonds, but it is supposed that the purchasers are waiting till after the United States Victory loan, when the market will be more settled, and then offer the bonds across the line. R. C. Matthews and Co., who are offering with A. Jarvis and Co., the Saskatchewan issue in Canada, report that the bonds are selling fast.

The only corporation issues during the month were the Fraser Companies $2,000,000 issue, and the $200,000 Nova Scotia Underwear Co.'s issue. The following is the summary of all bond sales during April:—

Provincial	$6,000,000
Municipal	1,549,202
Corporation	2,200,000
Total bond sales	$9,749,202

The March figure was $7,984,514.

NEW STOCK AND BOND BUSINESS FOR WINNIPEG

Clark and Martin who, for fifteen years, have conducted a grain and stock business at Winnipeg, with offices in the Grain Exchange Building, have opened a separate office in the Lindsay Building, to deal exclusively in listed stocks and bonds.

The company has a direct private wire to the offices of Logan and Bryan, New York, who are the New York correspondents of the house.

NEW YORK BROKERS OPENING IN MONTREAL

The New York Stock Exchange firm of Sutro Brothers and Co., is about to open a branch office in Montreal. The office will be in charge of Lt.-Col. Stanley Watson, who went overseas as a subaltern in the 24th Battalion, later becoming machine gun officer of that unit in France.

Sutro Brothers and Co., it is understood, have leased the premises at 57 St. Francois-Xavier Street, now occupied by the Montreal stock brokerage firm of Redpath and Co. The latter will move to new offices at 56 St. Francois-Xavier Street on the completion of alterations now being proceeded with.

Messrs. H. J. Birket and Co. have purchased a small block of $2,500 7 per cent. 10-instalment school debentures of West Gap S.D., Sask.

The Winnipeg Board of Trade has issued a pamphlet describing the industrial advantages of the city, including the ample supply of water now available from Shoal Lake.

INVESTMENT SERVICE

Industrial Progress and Peace

As we see it. Canada's industrial response to war's demands was but a preparation for greater progress in times of peace.

During the war we financed such companies as Nova Scotia Steel & Coal Company, Canadian Car and Foundry Company, Riordon Pulp and Paper Company, Mattagami Pulp and Paper Company, Canadian Salt Company, and others.

Now, with peace, our facilities are more than ever at the disposal of Canadian corporations who desire financing.

We stand ready also to serve discriminating Investors who wish to purchase Mortgage Bonds of representative Canadian industries.

Write for our Investment recommendations.

GOVERNMENT AND MUNICIPAL BONDS

One of the interesting features of the investment market in Canada at present is the substantial demand for external securities which may be favorably purchased owing to the exchange situation. There is a considerable volume of transactions in Anglo-French bonds due to the fact that they are convertible at a fair rate of interest; one Toronto firm handled $700,000 of this in a single week. As regards the relations between Canada and the United States, however, this situation is reversed, Canadian funds are at a discount in New York and the Canadian securities can be purchased there profitably.

Judging from the prices at which issues have been sold during the past week the demand for good bonds at present exceeds the supply.

We own and offer

$10,000
SAO PAULO 1st Mtge. 5% Bonds
DUE JUNE 1, 1929
Interest Payable June and December—Denomination: $500
Price: at Market to yield
6¾%

These bonds are an underlying security of the Brazilian Traction, Light and Power Co., Ltd.

They are secured by a specific charge on the Tramway, Light and Power Properties at Sao Paulo.

Junior Securities of a total par value of $153,627,000 having a market value of approximately $90,000,000 follow these 6,000,000 1st 5's.

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
North Bay, Ont.	$ 22,000	6	20 instal.	May 3
North Bay, Ont.	4,400	6	10 instal.	May 3
Thorold, Ont.	40,000	6	10 instal.	May 6
Moose Jaw, Sask. ..	210,000	5½	20 instal.	May 19
New Brunswick	1,000,000	5½	3 years	May 14
Beamsville, Ont. ...	6,000	6	10 instal.	May 15
Walkerville, Ont.	$30,000	6	15 instal.	May 7
Walkerville, Ont.	15,000	6	10 instal.	May 7

Beamsville, Ont.—Tenders will be received up till May 15th for the purchase of $6,000 6 per cent. 10-instalment debentures.

Kingston, Ont.—The finance committee has passed two by-laws for issuing debentures, viz., $35,000 for patriotic purposes and $30,000 for the waterworks electric pump.

Nova Scotia.—The following towns are now entitled to borrow money, bills to that effect having been passed in the provincial legislature: Pictou, Truro, Stellarton, Windsor and Kentville.

Thorold, Ont.—Tenders will be received up till May 6, 1919, for the purchase of $40,000 6 per cent. 10-instalment debentures by D. J. C. Munro, treasurer. The town has a total assessment of $1,764,949, a municipal debenture debt of $328,709, and a school debenture debt of $38,205.

Moose Jaw, Sask.—Sealed tenders will be received up till May 19th for the purchase of $210,000 debentures for extension to the electric light and power systems. Tenders received alternatively for 5½ per cent. 20-instalment debentures and 5½ per cent. 20-year straight-term bonds. (See advertisement elsewhere in this issue.)

New Brunswick.—Sealed tenders will be received by the comptroller-general of the province up till March 14th, 1919, for the purchase of $1,000,000 3-year gold bonds, to be dated May 15th, 1919, bearing interest at the rate of 5½ per cent. per annum, payable half-yearly. (For further particulars see advertisement elsewhere in this issue.)

Charlottetown, P.E.I.—The city has been authorized to expend $100,000 in laying down permanent streets and sidewalks, and to issue debentures for that amount, payable at a date not exceeding 20 years from date of issue, and bearing interest at a rate not above 5 per cent. per annum, payable half-yearly, provided that an adequate sum be annually provided and set apart as a sinking fund to redeem the debentures at maturity.

Saskatoon, Sask.—The city is seeking to issue debentures to the amount of $500,000. Word of the decision of the local government board has not been received yet. The two largest items in the programme are $175,000 for extensions to the municipal electric light and power plant, and $50,000 for the construction of a convention hall. It is proposed to expend a considerable amount in sewer and water extensions. The city wishes to spend about $10,000 on park improvements, and a further $8,000 for the erection of a children's home.

Winnipeg, Man.—Messrs. Wood, Gundy and Co., Toronto, have purchased $400,000 bonds of the city at 100.87. The bonds bear interest at the rate of 5½ per cent. and are for twenty years. Among the other tenders were:—

A. E. Ames and Co.	100.37
Dominion Securities Corporation	100.21
Harris, Forbes and Co.	100.201
National City Co.	99.299

The city is purchasing £110,000 of consolidated debenture stock held by the British Treasury Board in London, England. It will thus make a profit on the exchange rate by paying in sterling, which is at a discount now. The stock was issued from 1907 to 1909, is due in 1940, and is being repurchased at 82. A special meeting of the city council, held on April 22nd, authorized the deal. The new bonds, sold to Wood, Gundy and Co., are dollar bonds payable in New York.

IRON AND STEEL CONTROL RELEASED

The following cablegram, dated April 24th, has been received by the British government trade commissioners in Canada from the Department of Overseas Trade:—

"All subsidies and control over prices and material with regard to orders for pig iron, manufactured iron and steel and tin plates will be withdrawn April 30th subject to provisions of existing contracts and any export regulations. This means that manufacturers and merchants in the United Kingdom are free to make their own terms with regard to price and delivery from May 1st."

The Imperial Securities Co., Montreal, has changed its name to Truax, Higgins Co., with offices in the Lewis Building, 17 St. John Street, Montreal.

The Transfer Books of the Bank will be closed from the 16th to the 31st of May next, both days inclusive.

By Order of the Board.
JOHN AIRD,
General Manager.

Toronto, 17th April, 1919.

THE ROYAL BANK OF CANADA

DIVIDEND No. 127.

Notice is hereby given that a Dividend of Three per Cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after Monday, the second day of June next, to shareholders of record of 15th May.

By order of the Board.
C. E. NEILL,
General Manager.

Montreal, Que., April 15th, 1919.

DIVIDEND NOTICE

Notice is hereby given that the regular quarterly divident of 1¾ per cent. on the Preferred Stock of Lake of the Woods Milling Company, Limited, has been declared payable on Monday, June 2nd, 1919, to Shareholders of record at the close of business on Thursday, May 15th, 1919.

By order of the Board.
R. NEILSON,
Assistant-Secretary.

Notice is hereby given that a dividend of 3 per cent. on the Common Stock of Lake of the Woods Milling Company, Limited, for the three months ending May 31st, 1919, being 2½ per cent. from the earnings of Lake of the Woods Milling Company, Limited, and one-half of 1 per cent. from the earnings of the Sunset Manufacturing Company, has been declared payable on Monday, June 2nd, 1919, to Shareholders of record at the close of business on Thursday, May 15th, 1919.

By order of the Board.
R. NEILSON,
Assistant-Secretary.

UNION BANK OF CANADA

DIVIDEND No. 129

Notice is hereby given that a dividend at the rate of [illegible] per cent per annum upon the Paid-up Capital Stock of the Union Bank of Canada has been declared for the current quarter, and that the same will be payable at its Banking House in the City of Winnipeg, and also at its branches, on and after Monday, the 2nd day of June, 1919, to shareholders of record at the close of business on the [illegible] day of May next.

The Transfer Books will be closed from the 17th to the 31st day of May, both days inclusive.

By order of the Board.
H. B. SHAW,
General Manager.

Winnipeg, April 17th, 1919.

DETROIT RIVER TUNNEL COMPANY

Detroit, Mich., April [illegible], 1919.

NOTICE IS HEREBY GIVEN that the Annual Meeting of the stockholders of the Detroit River Tunnel Company, for the election of Directors and the transaction of such other business as may be brought before the meeting, will be held at the Head Office of the company, in the City of Detroit, Mich., on the First Thursday after the First Wednesday (being the 8th day) of May, 1919, at 10 o'clock a.m., Standard Eastern Time.

DWIGHT W. PARDEE,
Secretary.

BARCELONA TRACTION, LIGHT AND POWER COMPANY, LIMITED

(Incorporated under the Laws of the Dominion of Canada.)

To the Holders of First Mortgage 50-Year Bonds:

Notice is hereby given that, in accordance with the terms of Supplemental Trust Deed, dated 31st day of December, 1918, as approved by the Resolutions passed at the Meeting of the First Mortgage 50-Year Bondholders of the above Company, held on Thursday, the 19th day of December, 1918, Bondholders are requested to produce their Bonds at the offices of the Company, 603 Dominion Bank Building, Toronto, Canada, or 3 London Wall Buildings, London, England, for the purpose of having endorsed thereon a memorandum modifying the rights of Bondholders and of the Supplemental Trust Deed executed in pursuance of such Resolutions.

For and on behalf of
BARCELONA TRACTION, LIGHT AND POWER
COMPANY, LIMITED
R. H. MERRY,
Secretary.

Toronto, Canada, 30th April, 1919.

CANADA BONDED ATTORNEY AND LEGAL DIRECTORY, LIMITED

DIVIDEND NOTICE

Notice is hereby given that a dividend of 7% per annum to date has been declared and will be paid on the Preferred Stock of this Company to Shareholders on record as at May 31, 1919, on or after that date.

R. A. WHARTON,
Managing Director.

Toronto, April 30, 1919.

THE WESTERN OUTLOOK

Seeding Now Well Advanced—Moose Jaw and Medicine Hat are Prosperous—Calgary a Busy City

(Staff Correspondence)

April 26th.

SEEDING is in full swing in all parts of the west, and spring has opened up favorably. In the last ten years that the writer has covered this western territory the present season, looked at from every angle, is the most favorable from the crop point of view, and, of course, that is what counts in the west. A genuine spirit of optimism prevails. The west experienced a most unusually mild winter, there is plenty of moisture in the ground to carry the seed well along, and from every source of information it is learned that the seed has gone in under most favorable circumstances. In the Moose Jaw section, one of the districts where the crop was fairly good last year, conditions are very satisfactory. The merchants report good business, and even with all the victory loans and war work and expenditure, there seems to be more money in the savings banks than ever. Wholesale houses, of which there are a large number in Moose Jaw, report increased business with collections quite satisfactory. The trust companies and legal offices are busy winding up estates of victims of the "flu" epidemic.

In the Medicine Hat district where a good crop is much needed this year, from 20 to 40 per cent. of the seeding has been done already, and by the time this appears it will be nearly completed. Seeding conditions this year are ideal, and the seed is going in with a rush; there is plenty of moisture here, and the farmers, said a prominent manager of one of the large flour mills, are the most optimistic in years, many of them have to be provided with seed by the government on account of scarcely any crop last year. The acreage will be about the same as last year, there being very little fall ploughing done. Medicine Hat is an important milling centre. The flour mills report a fair domestic trade, but we are doing very little export at the present time. Mr. Preston, manager of the Lake of the Woods Milling Company, spoke of one order of about three cars of flour from the Hudson Bay Company to go to their post on Herschel Island in the Arctic Ocean, the vessel leaving from Vancouver about the middle of June. Medicine Hat is a great industrial centre, having still undiminished supplies of natural gas which can be supplied to manufacturers at such low cost. Three new industries have started this spring. The Alberta Foundry & Machine Company who are transferring from the making of munitions to that of farm tractors on a large scale, also Martin and Phillips, who are going in for the manufacture of light farm tractors, which are in such great demand at the present time, also the Saskatchewan Bridge & Iron Works who are moving their whole plant from Moose Jaw where they have been making munitions principally, in the last few years.

Prospects for an exceedingly good year in the Calgary district are very bright, and crop conditions are more favorable at the present writing than for several years past. In discussing the outlook with *The Monetary Times*, Mr. D. G. Campbell, secretary of the board of trade, said:—

"Business conditions in Calgary are good. Last year's crop failure had caused considerably worry as to the future, but as is generally the case the evil that was feared was considerably greater than the evil that visited us. The failure of the crop concerned wheat principally, though coarse grains, hay and pasturage generally suffered to some extent. But in spite of the failure, the value of agricultural products produced and marketable in the province for the year amounted to over $214,000,000—quite a respectable sum when the population of the province (approximately 560,000 people), is taken into account.

"The coming of peace brought its problems, involving chiefly readjustment of stocks. This process of readjustment has been going on gradually, confidence that was disturbed in November and December, has been restored, and the outlook for this year is favorable.

"Crop conditions are good. We have had considerable moisture; the land is in good condition and seeding is general. Being a province where agriculture is the principal, as well as the basic industry, the tone of business is usually a reflection of crop prospects.

"Industrial activity has been very steady. Labor disturbances culminating in cessation of work have been comparatively few; building activity is reviving somewhat, and there is not much unemployment. With prospects for considerable extension of municipal and government development work there is every reason to expect that the year 1919 will be at least as good a year for business in Calgary as 1918 was."

Farm Land Situation

"Generally speaking," said Mr. H. H. Farman, manager of the Western Agencies and Development Co., to *The Monetary Times*, "the sale of farm lands in Alberta has not been active so far this season. There are some inquiries for ranch properties, but those who are looking for wheat or mixed farming lands, are disposed to wait until such time as the crops are assured. Then, too, the local buyers are short of ready money for further investment, due to the unfavorable crop returns for 1918. Perhaps, however, this situation is just as well, as there was a danger of land prices advancing beyond the real value that is warranted by our present population and the returns from farming operations under normal prices.

"There is a real shortage of desirable houses in this city, and rents have advanced to nearly the level of the years 1912 and 1913. Considerable house building is in progress, and it is to be hoped that conditions in this respect will have improved by fall. Present costs for material and labor, however, are so high, that the rental returns from new dwellings is not sufficient to make them an atractive investment."

Mayor Marshall, interviewed by *The Monetary Times'* representative as to his opinion on the conditions of unrest in the country at present, said:—

"While there is a great deal of unrest in the country, in fact in the world, at the present moment, I believe the adjustments during the reconstruction period are gradually getting down to a basis of understanding, and that by cooperation of classes and interests, when they get together man to man in the matter, we have nothing to fear for the future. The governments and municipalities are having their own troubles, and sometimes, through misunderstanding, their interests seem to clash, yet I find, that by coming into direct contact with one another, either by sending representatives to the seats of government, provincial and Dominion, or having special representatives from them visit our communities, we are able to understand one another and get together very quickly.

"The one thing we need to fear more than another is change of too radical a nature. A condition of this kind would undoubtedly create chaos throughout the country, and that is the one thing we must guard against. By this I do not mean that we are to in any way impede progress, but there is a great difference between progress and radicalism. People of all classes must come to understand that we must reap the fruits of this war and to do so, we must get the idea out of our heads entirely of wanting to go back to old conditions, as it is to be hoped that we will never return to former conditions in their entirety, but we must hold to all that is good and beneficial of the past, of which there is a great deal.

"As to the financial condition, I believe Western cities are slowly but surely getting on a better and sounder basis. I am very optimistic of the future of our own city, as while we have a great deal of back taxes on our books, we are clearing the situation in that direction by the tax sale that is being held at the present time.

"Our development for the future must be sound and conservative. We must be careful of going into debt except where it is absolutely necessary and in keeping with proper, practical development."

WHY MUTUAL POLICIES ARE EASY TO SELL

First—Because of the co-operative and [illegible] principle on which the company is founded. The Mutual Life Assurance Company of Canada is a company consisting of policyholders, maintained by policyholders, exclusively for policyholders.

Second—Because the purpose for which the company was established is now generally understood—the company since its establishment in 1869 has consistently followed one aim—that of furnishing the largest amount of protection for the least possible outlay.

Third—Because the company's day-by-day activities advertise it. The Mutual of Canada since its organization has paid to policyholders or their beneficiaries or holds as a trust to guarantee future payments, over sixty millions of dollars.

"BE A MUTUALIST!"

The Mutual Life Assurance Co. of Canada
Waterloo Ontario

"IN unsettled times the thoughts of men turn instinctively to the sound security of Life Insurance."

The first step to securing suitable and adequate Life Insurance is to obtain dependable information.

Permit The Great-West Life to give you that information—by mail, if you wish, for leisurely consideration.

You will readily see the merits of the Great West Plans. Inexpensive, profitable, liberal—these Policies have appealed to over sixty-five thousand persons as the best anywhere available.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Blyth, Ont.—April 26—Tannery belonging to Bainton Brothers was damaged. Estimated loss, $2,500 to building and $20,000 to contents, partly covered by insurance.

Calgary, Alta.—April 19—Abattoir owned by Mr. Andrew Gilmour, of Lacombe, was destroyed. Estimated loss, $30,000, partially covered by insurance.

Ennismore, Ont.—April 25—Home of Mr. D. Kennedy was destroyed. Cause, spark from chimney.

Fort Coulonge, Que.—April 16—Sawmill and dwelling of Louis Normand was damaged. Estimated loss, $10,000.

Fredericton, N.B.—April 25—Fred D. McMann's hotel, stables and general store at Minto, Queen's county, were destroyed. Estimated loss, $50,000; insurance, $9,000.

Haileybury, Ont.—King Edward boarding-house was destroyed. Estimated loss, $5,000, partially covered by insurance. House owned by G. Neely was damaged to the extent of $800 and the home of C. Hogan was damaged by $500.

Kingston, Ont.—April 27—Queen Street Methodist Church was destroyed. Cause, overheated furnace. Estimated loss, $40,000; insurance, $31,700.

Montreal, Que.—April 24—Jubilee Rink, corner of St. Catherine Street East and Marlborough, was destroyed. Cause, defective electric wire. Estimated loss, $25,000, partially covered by insurance.

Newmarket, Ont.—April 30—The Newmarket High School was damaged. Estimated loss, $200.

Ottawa, Ont.—April 27—Shop at 273 Dalhousie Street, owned by Mr. G. Drazin, 216 Besser Street, was damaged. Estimated loss, $500.

April 28—Building owned by Mr. B. A. Grison, 21 Fentiman Avenue, Ottawa South, was damaged. Estimated loss, $2,000, covered by insurance.

Parry Sound, Ont.—April 30—Three boathouses and a number of gasoline launches, one steam launch and a number of rowboats and canoes were destroyed.

Sydney, N.S.—April 28—The Sydney Hotel was destroyed. Estimated loss, $80,000.

Saskatoon, Sask.—April 21—Home owned by Andrew Cockburn, of 326 Avenue X South, was destroyed. Estimated loss, $2,000.

Toronto, Ont.—April 25—House of Mr. Q. Cahan, 885 Dundas Street West, was damaged. Estimated loss, $400. Building owned by Page Cut Stone Co. was damaged. Estimated loss, $200. Brick building owned by Toronto Pharmacal Co., 20 Brockton Avenue, was damaged. Estimated loss, $2,500.

April 26—Building owned by Canada Wire and Cable Co. was damaged. Estimated loss, $50,000. Two houses at 311 and 313 Silverthorn Avenue, owned by Robert and William Petherick, were damaged. Estimated loss, $2,000.

April 27—Residence owned by John B. Baker, 108 Howard Park Avenue, was damaged. Estimated loss, $250. Home of Mr. Wm. Petherick, 213 Silverthorn Avenue, was damaged. Estimated loss, $1,500.

A VOLUNTARY PUBLIC SERVICE

The Y.M.C.A. is to be commended for the publicity which it has given to its work and to its finances. Such an institution of a quasi-public character derives its revenue from thousands of contributors, who have not the time nor the opportunity to examine how the money is spent unless the finances be placed before them in a convenient and easily intelligible form. The funds now being solicited, it may be noted, are to be spent in Canada, and will, therefore, react beneficially to this country.

GOVERNMENT AND MUNICIPAL BONDS

(Continued from page 40)

Kenora, Ont.—Messrs. A. Jarvis and Co., Toronto, have purchased a block of $17,000 6 per cent. 20-instalment bonds at 100.52.

Sarnia, Ont.—Messrs. W. L. McKinnon and Co., Toronto, have purchased an issue of $111,992 of the city's bonds at 104.262. The bonds bear interest at the rate of 6 and 6½ per cent., and are of varying maturities up to 1938. The money is to be spent for an incinerator plant, water mains, street paving and waterworks. The following are some of the tenders:—

W. L. McKinnon and Co.	104.262
A. E. Ames and Co.	103.69
Canada Bond Corporation	103.55
Brent, Noxon and Co.	103.45
W. A. Mackenzie and Co.	103.33
C. R. Clapp and Co.	102.86
Wood, Gundy and Co.	102.66

Lincoln County, Ont.—The Dominion Securities Corporation was the successful tenderer for the county's $200,000 5½ per cent. 20-year bonds paying 102.774, at which price it will cost the county about 5.27 for the money. The following is the list of tenders:—

Dominion Securities Corporation	102.774
A. E. Ames and Co.	101.873
Wood, Gundy and Co.	101.81
R. C. Matthews and Co.	101.70
Canada Bond Corporation	101.65
A. Jarvis and Co.	101.538
G. A. Stimson and Co.	101.55
Sterling Bank	101.50
Ralph M. Bird and Co.	101.22
Housser, Wood and Co.	101.19
McNeill, Graham and Co.	101.03
National City Co.	100.76
Brent, Noxon and Co.	100.6558
W. A. Mackenzie and Co.	100.525
W. L. McKinnon and Co.	100.51
C. H. Burgess and Co.	100.43
Bankers Bond Co.	100.3179
Morrow and Jellett	100.30
J. F. Stewart and Co.	100.217
United Financial Corporation	100.25

Walkerville, Ont.—Tenders are again being called for $30,000 15-instalment paving debentures and $15,000 10-instalment patriotic fund debentures. The rate of interest is 6 per cent. on both blocks. When tenders were first called in March the rate of interest was 6½ per cent. on the first block and 6 per cent. on the second block.

TO PASS BANKRUPTCY BILL

It is authoritatively stated that the bill to amend the Bankruptcy Act, recently introduced by Hon. Hugh Guthrie, solicitor-general, will be passed by parliament at the present session. The bill, which provides a general bankruptcy law for the Dominion, has the support of boards of trade and business men generally.

WESTERN CANADA MUTUAL FIRE ASSOCIATION

Attention is called to the official announcement of the Western Canada Mutual Fire Insurance Association which appears on page 25 of this issue. The object of the Association is to watch the interests of the mutual companies in the provinces of Manitoba, Saskatchewan and Alberta, and by co-operation and standardization to assist in the development of business.

National Fire Protection Convention

Annual Meeting at Ottawa Attended by Close to 200 Delegates — Fire Prevention by Mechanical Means and by Education—Canadians Present—New Officers—Legislation by Federal and State or Provincial Governments

STANDARDIZATION and publicity, are the principal means adopted by the National Fire Protection Association, which has just held its 1919 convention in Ottawa, in its efforts to prevent loss by fire. The association is really international in its extent, and includes members in Canada, Great Britain, Australia, South Africa, China, Japan and other countries, as well as in the United States. The 1919 meeting was well attended and successful in every way, a substantial increase in membership being recorded for the year—May, 1918, to May, 1919.

Because of the action which is being taken by the Dominion and provincial governments of Canada to prevent fires, it was decided to hold the 1919 meeting in Ottawa, at the invitation of the Canadian members. The practice has been to have the meetings alternately in New York and Chicago, the only exception previous to this year being 1917, when it was held in Washington. The decision to accept the invitation of the Canadians was reached by unanimous vote of the executive committee. The experience indicates that it is beneficial to have the conventions in various places, as this stimulates membership and prevention activities in different sections, and the attendance at the sessions is more regular than in New York and Chicago, where so many of the members' business places are located, and their attention is frequently distracted. It is probable that, in future, Chicago will be the meeting place every second year, but the other conventions will be held in various cities.

The association consists of about 150 members and over 3,000 associate members. Among the members represented at Ottawa were: Board of Fire Underwriters of the Pacific, San Francisco; Canadian Fire Underwriters' Association, Montreal; Canadian Manufacturers' Association, Toronto; Chicago Board of Underwriters of Chicago, Insurance Exchange, Chicago; Clay Products Association, Chicago; International Acetylene Association, New York; International Association of Municipal Electricians, Camden, N.J.; Louisiana Fire Prevention Bureau, New Orleans, La.; Mutual Fire Prevention Bureau, Oxford, Mich.; National Association of Manufacturers of Approved Hollow Metal Window Frames and Sash, Chicago, Ill.; National Board of Fire Underwriters, New York, N.Y.; National Lumber Manufacturers' Association, Chicago, Ill.; National Wholesale Grocers' Association of the United States, New York; New Brunswick Board of Fire Underwriters, St. John, N.B.; New England Bureau of United Inspection, Boston, Mass.; New Jersey Schedule Rating Office, Newark, N.J.; New York Board of Fire Underwriters, New York, N.Y.; New York Fire Insurance Exchange, New York; Ohio Inspection Bureau, Columbus, Ohio; Philadelphia Fire Underwriters' Association, Philadelphia, Pa.; Philadelphia Suburban Underwriters' Association, Philadelphia, Pa.; Southeastern Underwriters' Association, Atlanta, Ga.; St. Louis Fire Prevention Bureau, St. Louis, Mo.; Suburban Fire Insurance Exchange, New York, N.Y.; Tennessee Inspection Bureau, Nashville, Tenn.; Underwriters' Association of the District of Columbia, Washington, D.C.; Underwriters' Association of the Middle Dept., Philadelphia, Pa.; Underwriters' Association of New York State, Syracuse, N.Y.; Underwriters' Bureau of Middle and Southern States, New York; Underwriters' Laboratories, Chicago, Ill.; Vancouver Island Fire Underwriters' Association, Victoria, B.C.; Western Canada Fire Underwriters' Association, Winnipeg, Man.

The following Canadian associate members were among those present:—

H. S. Angus, Dale and Co., Montreal; M. H. Baker, Canadian Fire Underwriters' Association; Arnold Barr, Lake Superior Corporation; G. C. Francis, Canadian Fire Underwriters' Association; R. D. Fudger, New Brunswick Board of Fire Underwriters; J. W. Graham, fire chief of Ottawa; G. H. Greenfield, Canadian Car and Foundry Co.; W. H. Hall, Canadian Surety Co.; W. A. Hamilton, Dominion Messenger and Signal Co.; C. Heath, fire commissioner for Manitoba; J. E. Hodgins, St. Lawrence Underwriters, Toronto; V. D. Hurst, Western Canada Fire Underwriters' Association; T. J. Irvine, St. Lawrence Underwriters; N. S. Jones, Seneca Jones and Son, Hamilton, Ont.; C. O. Jost, Canadian Fire Underwriters' Association, Montreal; W. R. Lee, Rockwood Sprinkler Co., of Canada, Ltd.; J. B. Laidlaw, Norwich Union Fire Insurance Co., Toronto; Geo. F. Lewis, deputy fire marshal for Ontario; J. A. Miller, Pyrene Mfg. Co. of Canada, Ltd.; R. F. Mosley, Ontario Safety League; A. G. Lemoine, H. G. Vogel Co., Toronto; W. A. McKague, *The Monetary Times* of Canada; W. H. Mulligan, Hydro-Electric Power Commission of Ontario; J. L. Noble, Vancouver Island Fire Underwriters' Association; G. F. W. Price, building inspector, Toronto; J. A. Robertson, Canadian Fire Underwriters' Association; C. L. Schofield, Canadian Fire Underwriters' Association; E. J. Stafford, National Trust Co., Toronto; H. Stainton, Western Canada Fire Underwriters' Association; A. R. Ten Eyck, fire chief, Hamilton, Ont.; A. Tessier, fire chief, Hull, Que.; C. C. Wansbrough, Western Assurance Co., Toronto; James White, Commission of Conservation; Alfred Wright, London and Lancashire Fire Insurance Co., Toronto, J. Wright, Bennett and Wright, Toronto; S. B. McMichael, Dominion Messenger and Signal Co.; L. V. M. Willmott, Dominion Messenger and Signal Co.; D. A. Cumming, D. A. Cumming and Co., Brockville, Ont.; G. D. Finlayson, superintendent of insurance for Canada; J. Grove Smith, Dominion fire commissioner; W. B. S. Shapley, Canadian Manufacturers' Association, Toronto.

After a roll call of members, the delegates were welcomed by Hon. N. W. Rowell, president of the Privy Council of Canada, on behalf of the Dominion, and by Mr. Harold Fisher, mayor of Ottawa, on behalf of the city. The Hon. Mr. Rowell referred especially to the close relations which exist between the United States and Canada; over half our external trade last year was with the United States, and we are their second best customer. Fire prevention, he said, is one of the ways in which we can make lighter the heavy burden left by the war losses and war debts. These losses and debt obligations can be made good only by the savings of the people, and further destruction of capital should be reduced to a minimum. He referred to our unenviable position at the top of the list of nations as regards fire losses, and commended the work done by the association.

President's Address

The president, Mr. F. J. T. Stewart, of New York, then gave his address, which was, in part, as follows:—

"After four successive annual meetings within a period during which most of the world has been at war, it is a great satisfaction to feel that, in coming together on this occasion, we can plan for the future full of hope that peace will reign indefinitely. It may be, however, too much to expect, that we will be without enemies. In the terms of the international diplomat, it may not be a war of nations, but we may depend upon an indefinite conflict with our neighborly enemy 'fire.' This characterization of fire is found in the address of former president W. H. Merrill, who, after summarizing the life and property loss incident to a series of conflagrations in the preceding fifteen years, added: 'Had these twenty thousand persons been killed in fighting for their country rather than simply for their lives, their fame would be everlasting. Had these two billions of property value been wiped out by the invasion of a foreign foe, the call for defence would meet with a universal response.'

"All this may rightfully be said of the past four years, and, in addition, it may now be recorded that the response to the call for defence was so universal that the importance of fire prevention as a war measure gained a general recognition far beyond any we have been able to claim for it as a conservation measure in time of peace. We are encouraged, however, to believe that one of the beneficial results of the war will be a lasting realization of the national importance of conserving life and property against loss by fire.

"Many of our members, notably the National Board of Fire Underwriters, aided the various departments of the government in an organized effort to prevent fires due to carelessness or design which might destroy munitions of war. In this connection, the fire prevention section of the War Industries Board, whose working force was almost exclusively composed of National Fire Protection Association members, rendered a notable service. The war work of many of our members, especially among the architectural and engineering professions, was a prominent feature, and the importance of fire prevention was kept in the foreground in matters pertaining to construction and planning.

"The various standards and regulations of the association for safeguarding against fire, which are already widely used on this continent, found even a broader scope of application during the war. I have always felt that members of this association could rightly take pride in the many excellent standards which have been prepared over a period of nearly twenty-five years. This feeling has been fully justified recently in connection with the discussions of plans for an American engineering standards organization. On several of these occasions, the fact was favorably commented upon, that the National Fire Protection Association is unique in the field of standard making, being as it is an association of associations organized to bring together all interested talent in the preparation of fire prevention standards or codes.

"You will no doubt be interested in further information regarding the plans for an American standards organization, to which reference has just been made. Most of you, perhaps, know of the American engineering standards committee, which was formed by joint action of five national engineering societies (American Society of Civil Engineers, American Institute of Mining Engineers, American Society of Mechanical Engineers, American Institute of Electrical Engineers and the American Society for Testing Materials, called the 'Founders Societies.') Its purpose is to provide machinery for the development of engineering and industrial standards, by the operation of which duplication is avoided, and co-operation between all interested organizations and government departments secured. It was expected that a standard or group of standards thus developed would be acceptable to all concerned, and therefore become a truly 'American Standard.' Moreover, it was felt that as international standardization develops, there will be need for an authoritative national body to deal with the corresponding foreign bodies. National engineering standards committees are said to be already in operation in England, Canada, France and Holland; others will probably be organized in the near future.

"It is now proposed to broaden the scope of the work and membership of the American engineering standards committee, as the outcome of a conference held at the United States Bureau of Standards, at Washington, on January 15th of this year, to consider methods of procedure to be followed in the preparation of safety codes. The present intention is to reorganize it into an association of associations in some respects similar to our own organization. Briefly stated, the aim of the new organization will be to co-ordinate the work of standard-making, particularly with reference to new standards, and in cases where no one organization is obviously best qualified or sufficiently interested to act as sponsor body and provide for a committee to prosecute the work. The standards association will be interested chiefly in knowing that such working committees are sufficiently representative of the interests most concerned with the subject under consideration. It is not proposed to review in detail a finished standard worked out by such a committee and approved by a sponsor body.

"It will, therefore, be seen that it is not the intention of the standards association to do any actual work of standard making, nor to interfere with the scope and influence of existing bodies such as our own which already are engaged in such work. In the beginning it is expected that any existing standard if presented by the organization which prepared it, will be adopted as an American standard. We are given to understand that the preparation and promulgation of fire prevention standards will be expected to continue as before, except that an opportunity will be afforded, if desired, to secure additional backing by having them designated as American standards by the new organization.

"It is significant that we should be holding our annual meeting in Canada just at this time, while we are talking and thinking so much about national and international standards. In the matter of fire prevention standards, it is perhaps safe to say that Canada and the United States are already practically in harmony and our co-operation is becoming closer and more comprehensive each year. As far as these two countries are concerned, we, therefore, seem to have anticipated in fire prevention matters, the present movement looking eventually to the establishment of international standards of all kinds.

"The war has resulted in stimulating standardization work in general, and we may expect an unusual activity of this nature in the future. As the importance of standardization work becomes increasingly prominent, our responsibility for the numerous fire prevention standards already promulgated will be proportionately greater. It will be necessary for the chairman of our special committees to keep even more closely in touch with each development affecting their subject, and promptly change our standards when found necessary to keep them in step with the state of the art.

"So much for fire prevention standards and standardization in general. Our next great concern, which logically follows the possession of standards, is how to utilize them to best advantage. While we, no doubt, all agree that a certain amount of fire prevention legislation is important, I am sure we cannot hope for pronounced success in reducing the fire waste in the North American continent, unless we can personally reach and interest the individual in some manner. Apparently, good headway has been made lately by appeals to the patriotic duty of the individual, to minimize waste by fire during the war. I think the response to that appeal was greater than we realize and is accountable for the fact that the fire loss was not radically greater than it was during the period of the war. The persistence of the newspapers in prominently featuring their suspicion and even opinion that each important fire was due to the design of an enemy, undoubtedly had a deterring effect on fires due to both carelessness and design.

We cannot, however, expect the effect of all this to be permanent, unless we make a special effort to keep up the interest which is apparently aroused. A few items may be cited which indicate that this is already being done. The fire prevention inspections and educational work done by the fire insurance companies and their field men under the direction of the National Board of Fire Underwriters, will be continued, although it was originally undertaken as a war emergency work.

"The local fire insurance agents throughout the country are fully alive to the unusual opportunity which they have in dealing directly with the owners of practically every property, whether it be in the home or in the factory. Through their organization, the National Association of Insurance Agents (member of the National Fire Protection Association), they have pledged themseves to a fire prevention campaign, both by inspections and circulation of literature.

"We have recently been encouraged to believe that the influence of women in an organized way may be made available both locally and nationally to assist in interesting the individual in fire prevention. We will hear more on this point later in our program from one of the women. In addition to these items there are other encouraging signs which one might dwell upon—and then there are the Canadians. The impending results of their enthusiasm and energy we contemplate with confidence.

"I have not referred to any of the so-called discouraging conditions. The fact is, there can be no conditions answering that description, as long as we are unwilling to be discouraged. Let us therefore keep shouting with the optimist that 'Business is fine,' and it just cannot help but be so. Convince the laggard in fire prevention that he is out of step with the others, and a lonely feeling will soon drive him to get the careful habit. We will never get anywhere by making people believe that nobody cares how many preventable fires occur.

"It is the painful duty of the president to point out to you each year that we need more funds. Some day, perhaps, we will have a president who will regret to report a large accumulated surplus in the treasury; he, at least, should be ashamed of it. We do need more money, as much as ever, but when we think how little the great game of waging war has interfered with our financial status, I again line up with the optimist and say: 'We have much to be thankful for, and more to hope for.' When I recall how we marvel each year at the results accomplished by our efficient and enthusiastic secretary-treasurer, Mr. Wentworth, I wonder if some might not feel that nothing is impossible for him, so why worry over a difference of a few dollars. My thanks and appreciation are extended to the members and committees for their excellent co-operation during the year."

Executive Committee's Report

The report of the executive committee was then received, in part, as follows:—

"Two regular meetings of the committee were held during the year, in June and January, for consideration of matters referred by the association and other business affecting the welfare of our organization. The resignation of Chairman H. L. Phillips, in the middle of the year, received with sincere regret by his associates, resulted in the appointment, under the articles of association, of the present chairman, by the executives, for the balance of the term.

"The invitation from officials of the Canadian government to meet this year in Canada, presented with such persuasive eloquence by the chairman of our Canadian committee, Mr. Laidlaw, was accepted by the executives without a dissenting vote. This Ottawa meeting represents the second departure from the long-established custom of meeting on alternate years in Chicago and New York, the first occasion being the meeting of 1917 in Washington on invitation of the Bureau of Standards, U.S.A. The executives express the hope that the policy adopted in the case of these two meetings meets with the general approval of the members, so that should other desirable opportunities offer for meetings outside of New York and Chicago, there may be no hesitancy in their favorable consideration.

"The executive committee gave consideration to the matter of the joint observance of fire and accident prevention day, in co-operation with the National Safety Council, which plan has now been carried out for several years by a special committee of the association. Certain members, whose opinions we respect, have been inclined to fear that the effectiveness of our propaganda in the observance of this day may be impaired by including consideration of accidents. The committee has, however, [illegible] felt that both subjects may be helped by intelligent and friendly co-operation. The principal industries of the United States and Canada are rapidly establishing safety and welfare departments, and under these department managements the safety field falls as naturally as the safeguarding of other hazards. It has been felt that the future will justify the present broad policy of the association in this important matter."

Resolutions Submitted

Resolutions as follows had been prepared by the executive committee and were referred to the committee on resolutions:—

"The National Fire Protection Association, assembled in Ottawa for its twenty-third annual meeting, bespeaks the continued observance by the people of the United States and Canada, both privately and in their occupations, of the measures for conservation of our resources adopted for the war emergency. The supreme need of the war impoverished European world for foodstuffs and the products of North America, imposes an obligation upon us to safeguard to the extent of our intelligence and ability every form of natural and created resource. The elimination of waste, at all times the duty of good citizenship, is at this moment our profoundest public and private responsibility.

"In its warfare against the needless sacrifice of human lives and property by fire the association advocates the following measures:—

"1. The adoption by municipalities of the standard building code of the National Board of Fire Underwriters to the end that fire-resistive building construction may be encouraged, the use of inflammable roof coverings prohibited, adequate exit facilities from buildings assured, and interiors so designed and fire-stopped as to make easy the extinguishment of fires therein.

"2. The adoption by all states and provinces of minimum building requirements for the protection of state, provincial and county hospitals, schools, asylums and similar institutions outside city limits and of small communities in in which the establishment and enforcement of a building code is impracticable.

"3. The enactment by each state and province of the fire marshal law advocated by the Fire Marshals' Association of North America to the end that official investigation may be made of the causes of all fires, preventable fires may be eliminated by public education, and the crime of arson stamped out.

"4. The adoption of the association's ordinances providing for the systematic inspection of all buildings by city fire marshals or local firemen to insure the vigorous enforcement of rules for cleanliness, good housekeeping and the maintenance of safe and unobstructed exits, fire-fighting apparatus and other protective devices.

"5. The enactment of ordinances fixing the cost of extinguishing preventable fires upon citizens disregarding fire prevention orders, and a more general legal recognition of the common law principle of personal liability for damage resulting from fires due to carelessness or neglect.

"6. The wider general use of the automatic sprinkler as a fire extinguishing agent and life saver and the more general adoption of the fire division wall as an important life-saving exit facility.

"7. A careful study of the technical surveys of cities made by the engineers of the committee on fire prevention of the National Board of Fire Underwriters covering the items of water supplies, their adequacy and reliability, fire department efficiency, fire alarm systems and conflagration hazards, and of the possiblity of co-operation among neighboring cities through mutual aid and the standardization of hose couplings.

"8. The universal adoption and use of the safety match and legislation prohibiting smoking in all parts of factories, industrial and mercantile buildings except in such fireproof rooms as may be especially approved for the purpose by fire departments.

"9. The education of children and the public generally in careful habits regarding the use of fire, and the general adoption by the schools of the United States of the fire prevention manual "Safeguarding the Home Against Fire," prepared by the National Board of Fire Underwriters for the United States Bureau of Education.

"10. The universal adoption and exclusive use of slow-burning motion picture film with national, provincial, state and local legislation to prevent the continued manufacture and distribution of material having the hazardous properties of the gun cotton stock now commonly employed.
